Advice on using editable PDF sample ESOL papers

This sample paper has been edited so that candidates can complete their answers onscreen, without needing a printer.

This has been done to help candidates who need to complete their work from home or remotely.

It is important to remember that some of the questions cannot be completed in this way.

If a question cannot be answered onscreen, centres should allow candidates to answer these questions in another way.

This could be done by using a photograph of something the candidate has written or drawn on paper, or a screenshot which has been edited in some way.
