Nail enhancements and advanced hand and nail art techniques

Nail enhancements can be applied by using the gel, liquid and powder or wrap system. Technology used to manufacture nail enhancement products has moved forward greatly, and there are many top class products which are easy to work with, give excellent clarity and offer a wide range of colours. In particular, there are now wonderful gel and liquid and powder systems that are fantastic for creating nail art designs too. Artwork can continue from the nail plate onto the skin using appropriate products to create a more avant-garde look which is often used in photographic and competition work. Health, safety and hygienic procedures must always be followed. This unit is designed to bring out the creative side in you!

Assignment mark sheet

Unit 334 Nail enhancements and advanced hand and nail art techniques

Your assessor will mark you on each of the practical tasks in this unit. This page is used to work out your overall grade for the unit. You must pass **all** parts of the tasks to be able to claim a grade. For the practical task a pass equals 1 mark, a merit equals 2 marks and a distinction equals 3 marks.

What you must know	Tick when complete
Task 1a: produce an information sheet	
Task 1b: produce an information sheet	
Task 1c: produce a fact sheet	
Or tick if covered by an online test	

What you must do	Grade	Points
Task 2a: Nail enhancements		
Task 2b: Advanced hand and nail art techniques		

Total points for graded tasks	
Divided by	÷ 2
= Average grade for tasks	
Overall grade (see conversion chart)

What does it mean?

Some useful words are explained below

Acetone

A solvent used to dissolve nail enhancements. It can also be found in nail varnish remover.

Activator

A liquid component from the wrap system that speeds up the polymerisation process of the cyanoacrylate resin.

Allergen

A substance that can cause an allergic reaction.

Contact area/well

This is the part of the nail tip that is bonded to the natural nail plate using an adhesive.

Cuticle oil

This product is applied at the end of the nail enhancements service to condition the cuticles and may be sold as a retail product.

Fan shape nail

The plate of the nail is wider at the free edge than the cuticle area.

Mood board

A visual representation of ideas and themes that can be used to develop designs.

Nail tips

These are made from virgin ABS plastic and can be applied to the free edge to extend the nail plate. They can be clear, natural or white.

Polish secures

Rhinestones, flatstones, pearls, etc.

Resin

A type of cyanoacrylate used within the wrap system.

Semi permanent polish

Coloured gels can be used to create a polished finish that will last a few weeks until they are removed.

Sidewall

This refers to the soft tissue that runs along the sides of the nail plate.

Silk

A fabric used within the wrap system to create strength.

Techniques

Embedding, airbrushing, 3D, cut-outs and free-hand application.

Tip and overlay

This enhancement technique uses a tip to extend the nail plate with an overlay applied over the tip and the natural nail plate.

Volatile

This describes substances that easily evaporate in the air.

What you must know

You must be able to:

- 1 Describe salon requirements for client preparation, preparing yourself and the work area
- 2 Describe different consultation techniques used to identify treatment objectives
- 3 Describe the factors that need to be considered when selecting techniques, products and equipment
- 4 Explain the environmental conditions suitable for nail enhancement treatments
- 5 Explain the safety considerations that must be taken into account when providing nail enhancement treatments
- 6 Describe the range of tools and equipment used for nail enhancement treatments
- 7 Describe products used and their key ingredients
- 8 Describe how to prepare and use nail art products, tools, equipment and techniques
- 9 Describe how to plan and develop free-hand designs for hand and arm decoration
- 10 Explain the importance of preparation procedures for natural nails and nail enhancement systems
- 11 Explain the principles of general nail care

Revision tip

A mood board is a great way of bringing ideas together to help create and design a nail art look. Research areas such as colour, texture, cultural and historic factors for inspiration but remember to be careful not to breach copyright in your design.

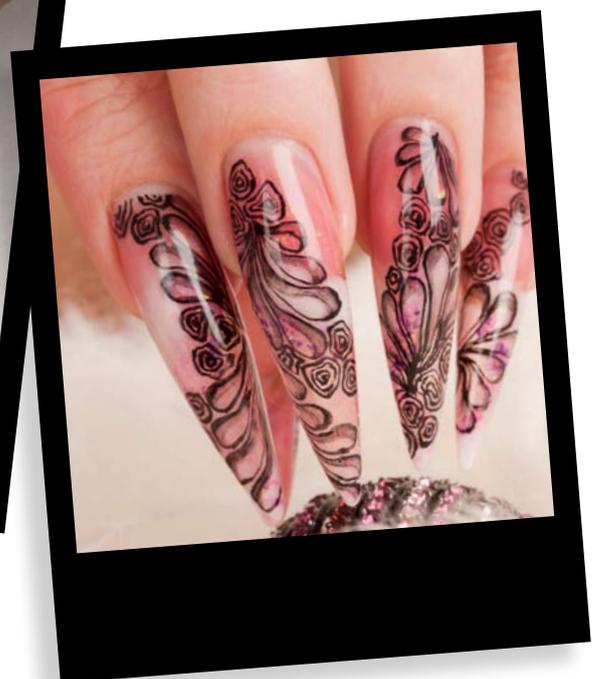

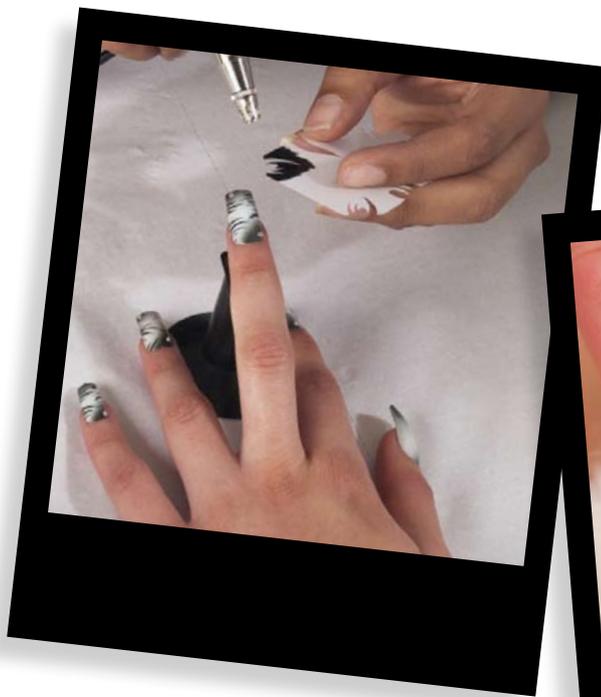

Follow in the footsteps of... “ *Jackie O'Sullivan*”

Nails have been Jackie's passion since watching her mum get her nails done nearly 20 years ago. She started with a Star Nails course and gained her first NVQ. Her first big break was as an educator for Grafton International. Jackie was then offered the chance to work with the nail artist, Christian Cesar. Jackie now runs her own business, 'Naughty Nails', and also lectures at South Trafford College. **Look for the blue quote marks to see what she has to say to you!**

- 12 Describe methods of selecting and using natural nail overlays, nail repairs and nail enhancement systems
- 13 Explain known contra-indications that prevent or restrict nail enhancement
- 14 Describe how to communicate and behave in a professional manner
- 15 Describe the importance of positioning yourself and the client correctly throughout the treatment
- 16 Explain safe and hygienic working practices
- 17 Explain contra-actions which might occur during and following the treatment and how to respond
- 18 Explain the aftercare advice that should be provided
- 19 Describe the importance of completing the treatment to the satisfaction of the client
- 20 Describe the methods of evaluating the effectiveness of the treatment
- 21 Describe the importance of the correct maintenance, removal and aftercare advice

“

Try not to make enhancements too long; this will minimise breakages.

Create designs on tips to make a display board for your clients to see.

Advanced

Always make sure that the natural nail plate is free from bacteria, moisture and contaminants before the application of nail enhancements or artwork.

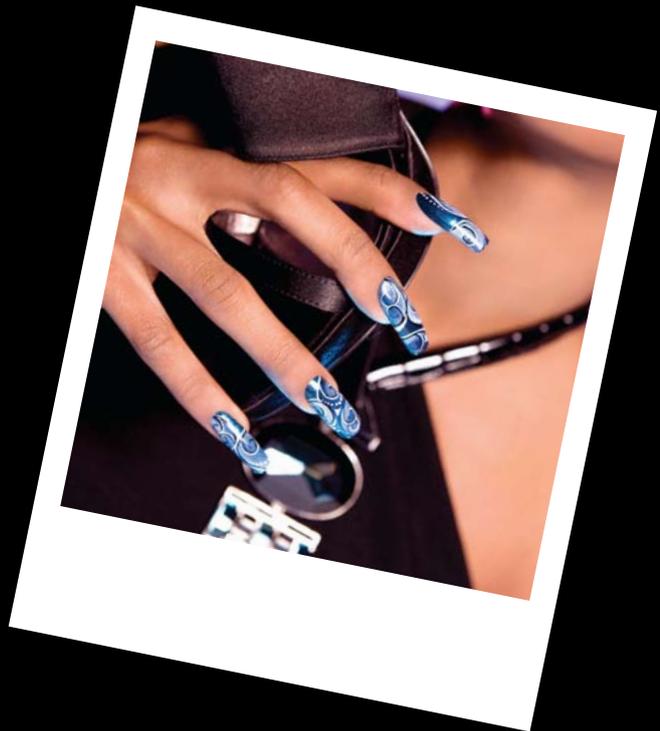

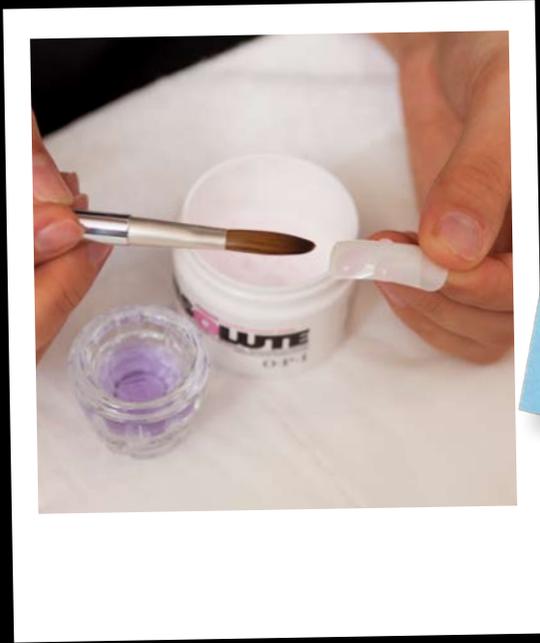

Image courtesy of Professionalnails

Make sure that you always follow manufacturer's instructions when working with products because timings, mix ratios and application techniques may vary.

techniques

When completing hand art, ensure that the products are suitable to be used on the skin.

What you must do

Practical observations

This page shows what you need to do during your practical task. You can look at it beforehand, but you're **not** allowed to have it with you while carrying out your practical task. You must achieve **all** the criteria; you can achieve 1 mark, 2 marks or 3 marks for the criteria indicated with *.

- 1 Develop a mood board that demonstrates the ideas and concepts that can be used to reflect themes *
- 2 Prepare yourself, the client and work area for the treatment
- 3 Use suitable consultation techniques to identify treatment objectives *
- 4 Identify influencing factors
- 5 Provide clear recommendations to the client based on factors *
- 6 Position yourself and the client correctly throughout the service
- 7 Communicate and behave in a professional manner
- 8 Follow safe and hygienic working practices
- 9 Select and use products, tools and equipment, correctly taking into account identified factors *
