4th August 2015

Dear Salim

Ref: Level 3 Advanced Technical Diploma in Electrical Installations

The JIB has been at the forefront of setting and maintaining standards within the Electrotechnical industry for over 40 years. We aim to improve the industry, its status and productivity.

Our membership is representative of the industry and includes some of the UK's largest electrical contractors but small and medium enterprises make up the bulk of our members. In setting the standards for employment, welfare, grading and apprentice training in the electrical industry, the JIB has helped its members to maintain stability in the workplace and offer employment conditions that attract, train and motivate the best operatives.

We are happy to support the City and Guilds Level 3 Advanced Technical Diploma in Electrical Installations. We believe that this qualification has been designed with the needs of the industry/sector in mind and so is suitable for a young person between the ages of 16-19 studying full time with the aim of becoming an electrician. It will give that young person an advantage when progressing to an apprenticeship, traineeship or other industry recognised entry route, and ultimately when seeking employment as an installation or maintenance electrician

City & Guilds Level 3 Advanced Technical Diploma in Electrical Installations (450)

We would regard this qualification as preparing learners to succeed in other qualifications, specific to the electrical sector, such as an Electrotechnical apprenticeship recognised by the industry.

It will give the learner essential industry knowledge and skills in the following areas:

- planning and overseeing electrical work activities
- principles of electrical science
- design and installation practices and procedures
- principles of inspection, testing and commissioning electrical systems
- inspecting, testing and commissioning electrical systems
- electrical system fault diagnosis and rectification
- requirements for electrical installations

We confirm that we consent to our logo being associated with this qualification on the City and Guilds website.

Yours sincerely

D Thomas
