Introduction

The sample assessment materials within this document refers to the bricklaying sample occupational specialism assignment. The aim of these materials is to provide centres with examples of knowledge, skills and understanding that attest to distinction grade. The examples provided do not reflect all evidence from the sample assignment as the focus of this material is the quality and standards that need to be achieved rather than the volume of exemplar evidence provided. However, the examples provided are representative of all tasks in the sample assignment. It is important to note that in live assessments a candidate's performance is very likely to exhibit a spikey profile and standard of performance will vary across tasks. Threshold competence will be based on a synoptic mark across all tasks.

The materials in this GEM are separated into the sections as described below. Materials are presented against a number of tasks from the assignment.

Task – This section details the tasks that the candidate has been asked to carry out. What needs to be submitted for marking and any additional evidence required including any photograph/video evidence. Also referenced in this section are the assessment themes the candidates will be marked against when completing the tasks within it. In addition, candidate evidence that has been included or not been included in this GEM has been identified within this section.

In this GEM there is candidate evidence from:

Task 1

Task 2

Task 3

Candidate evidence - This section includes a description of the task and how the task links to the relevant assessment themes. It may also include the candidates work, photographs/videos of the work in production (or completed) and practical observation records of the assessment completed by centre assessors. This will be actual evidence that was captured as part of the assessment and then internally marked by the centre assessor.

Commentary section - This section includes detailed comments to demonstrate how the candidate evidence attests to the standard of distinction competence by directly correlating to the grade descriptors for this occupational area. Centres can compare the evidence against the performance indicators in the marking grid descriptors within the assessor packs, to provide guidance on the knowledge, skills and understanding that needs to be achieved for distinction competence.

It is important to note that the commentary section is not part of the evidence or assessment but are evaluative statements on how and why that piece of evidence meets a particular standard.

Grade descriptors

To achieve a distinction a candidate will be able to:

Demonstrate an exemplary performance that fully meets the requirement of the brief, demonstrating excellent technical skills and techniques for planning, preparing, setting out and constructing complex masonry to industry standards including level plumb and gauge, quality of finish and can enter the industry to begin to work in the occupational area.

Demonstrate relevant and comprehensive knowledge and understanding of complex masonry principles and processes through the tasks completed. They will work safely and make informed and appropriate use of tools, materials, and equipment within the construction environment that they are operating.

Competently and independently, they will interpret information, demonstrate excellent planning, assess risk, and follow safe working methods when applying the technical skills to practical tasks and procedures.

Carry out tasks to an exemplary standard as recognised by industry, producing an excellent quality of work that meets acceptable tolerances, regulations and standards.

Solution focussed, confidently diagnosing complex tasks and faults in masonry. They will be able to accurately research, identify and rectify issues independently. Communicate with stakeholders building excellent working relationships to support the planning and execution of a brief.

Consistently use industry terminology appropriately in both written and verbal contexts.

Task 1 – Prepare and plan for the construction and repair of complex masonry structures

(Assessment themes: Health and Safety, Design and planning, Presentation)

For task 1 candidates need to produce the following pieces of evidence:

- Measurements of location/area
- Method statement
- Bill of quantities
- A materials/tools list
- A risk assessment
- A scaled drawing/design of a decorative panel to a suitable scale (using a maximum of 250 bricks)
- Present the design and scaled drawing of the proposed decorative panel to the client

For illustration, the guided exemplification materials (GEM) for Task 1 contain examples of candidate evidence for the following assessment requirements only:

- Method statement
- A risk assessment
- Materials list
- Assessor observation on candidate presentation design and scaled drawing of the proposed decorative panel to the client

The following task 1 candidate assessment requirements have **not** been included as example candidate evidence for this version of the guided exemplification materials.

- Assessor observation of measurements of the site location/work
- Bills of quantities
- Scaled drawing/design of a decorative panel to a suitable scale (using a maximum of 250 bricks)

Candidate Evidence

Task 1 - Method statement

Method statement for construction of the panel (Task 2)

1. Review Health and safety – follow risk assessments
2. Select the correct PPE that is required and that it is in date as indicated in risk assessment
3. Complete the materials list for the panel to establish the quantities of materials required to complete the work
4. Select all required tools and equipment that you will require to complete the task
5. Set out area – protection of areas and equipment/materials – including tarp and dust covers - Tools, equipment, materials and machines required, protect all areas - be close to clean water and electric points
6. Set out/mark out the wall to the size indicated on the drawing accurately by marking on the floor with a pencil and using a square
7. Load out the work area with the required number of bricks and position the spot boards to allow efficient work method
8. Set out the decorative panel on the floor in pencil and draw in the brick shapes and joints to prepare for cutting of the panel
9. Lay the first course of bricks and carefully check dimensions for accuracy
10. Construct the wall to panel height and set out the size of the panel checking gauge level and plumb as the work proceeds
11. Cut the bricks and lay them in the panel to the correct pattern as the work proceeds. Checking the angle with a square as they are laid
12. Check level plumb and gauge as the work proceeds
13. Complete the joint finish and clean the surrounding area
14. Carry out final checks and adjustments as required.
15. Clean area and dispose of final waste correctly

Commentary

The method statement provides a detailed and accurate description of each task and is thorough in its consideration of all the processes required. Demonstrating the candidate has comprehensive knowledge and understanding of the principles and processes of the Bricklaying craft and all the processes including, positioning materials and equipment, setting out, and drawing the feature panel to allow cuts to be measured accurately. The candidate demonstrates thorough knowledge of how to sequence a job and the candidate has shown excellent attention to detail. Comprehensive justifications have been provided linking the method to the task and the candidate has used terminology correctly throughout

Candidate Evidence

Task 1 - Risk assessment

Construction of Panel			
Hazard	Risk	Control	Probability
Setting up mixing equipment	Trailing leads- trip hazards	Protect, signpost and tape leads	Low
Manual Handling	Muscular skeletal injury	Observe MHOR. Avoid lifting weights of more than 20KG Use lifting equipment where practical and consider help from others to reduce lift weight (team lifting)	Low
Congested work area	Trip hazards	Maintain clean and tidy work area	Low
Wet floor surfaces	Slips and trips	Use of barriers and signage> Protect surfaces/clean wet surfaces regularly.	Low
Hazardous materials Liquids/ Additives Dust Cement Lime	Skin irritation/ eye damage, dermatitis/ dust	Use suitable barrier cream and gloves / PPE at all times Control dust with water where possible or local ventilation Carry out cutting outside and not in a confined area Ensure that hand washing facilities are present. Follow instructions provided by manufacturers	Low
Repair of chimney			
Hazard	Risk	Control	
Working at height	Falls from height	Use appropriate access equipment – following correct set up and use	Low
Hazardous waste	Injury	Identify types of waste and correct method of disposal. Follow guidance as to disposal method Correct selection and use of PPE	Low

Commentary

The candidate demonstrates thorough knowledge and understanding of the types of risks and hazards that accompany the given tasks. The candidate has completed a very comprehensive and complete risk assessment specifically aligning all the risk/hazards identified to relevant controls and their probability of taking place. It is clear, easy to follow and fully articulates the identification of all risks/hazards, the controls and probability for the tasks

Candidate evidence

Task 1 - Materials list: Decorative panel

Equipment/Materials	Quantity
Pencil	1
1200mm Spirit level	1
Tape measure	1
Brick trowel	1
Pointing trowel	1
Steel square	1
Line and pins	1
Lump Hammer	1
Bolster	1
Comb/ Scutch Hammer	1
Masonry saw	1
Gauge rod	1
Brick Hammer	1
Bucket	1
Shovel	1
Facing Bricks	220
Contrasting bricks	30
Sand	1
Cement	1
Lime	1
Weather Protective coverings	2
PPE	
Protective clothing	
Steel toe capped boots	
Safety Goggles	
Gloves/ Barrier cream	
Dust mask	

Commentary

The candidate shows excellent knowledge and understanding identifying all of the resources, components and PPE and quantities required to carry out the tasks including finer details as in the size of the level required. The candidate has identified the quantities required accurately and relevant to the tasks. The candidate has given consideration to protection of materials to the elements with the addition of weather protective coverings. The candidate demonstrates an excellent understanding of health and safety and has listed the PPE required to carry out the tasks safely.

Candidate evidence

Task 1 - Presentation of the design and scaled drawing of the proposed decorative panel to the client

Practical Observation Form

Assessment ID	Qualification number
8711-305	8711-35
Candidate name	Candidate number
Candidate A	CG12345
Centre name	Assessment theme
City & Guilds	Presentation

Complete the table below referring to the relevant marking grid, found in the assessment pack. Do not allocate marks at this stage.

Task	Notes – detailed, accurate and differentiating notes which identify areas of strength and weakness are necessary to distinguish between different qualities of performance and to facilitate accurate allocation of marks once all evidence has been submitted.
Presentation	The candidate was fluid from the start and spoke clearly whilst introducing their presentation, maintaining excellent eye contact and interaction throughout with the audience. The candidate was able to provide appropriate technical terminology throughout the presentation. The candidate gave detailed descriptive information detailing the specific types of bricks, joint finishes and colour, detailing the design and the decorative features clearly demonstrating reference to the history of the building and associated gardens. They made clear reference to the brief and provided clear rationale to justify their recommendations for their design and the materials chosen. Overall an engaging presentation that was well thought out and fully met the brief.

Assessor signature	Date
Assessor A	15/12/20202

Commentary

The candidate demonstrates thorough knowledge on how to deliver a presentation. The presentation was clear and fluid with the correct use of terminology and language throughout. Positive body language and excellent interaction from the outset, providing clear and detailed justification on the recommended materials. The candidate demonstrated exemplary understanding of bricklaying materials and their use for the panel project and rationale for the design used with reference to the history of the building and its surroundings. Presentation fully meets the brief and provided an accurate and detailed representation of the specification requirements.

Task 2 – Construct complex masonry structures

(Assessment theme: Health and Safety, Construct complex masonry structures)

For task 2 candidates need to produce the following pieces of evidence:

- Construct a sample decorative panel according to the client's specifications

For illustration, the guided exemplification materials (GEM) for Task 2 contain examples of candidate evidence for the following assessment requirements

- Assessor observation of completed decorative sample panel

Photographic/video evidence required:

- Video evidence of first course laid. Video sequences to show beginning, middle and end of work on first course - *Illustrated in Task 2 video evidence section below (video 1 D)*
- Video evidence of setting out/measuring/marketing out - *Illustrated in Task 2 photographic/video evidence section below (video 2 D)*
- Photographic evidence of the plumb, level, line, and gauge work - *Illustrated in Task 2 photographic/video evidence section below (photos 1 -18)*
- Video evidence of work in completion at start, at stages and close to completion of decorative panel - *Illustrated in Task 2 photographic/video evidence section below (video 3 D)*
- Photographic evidence of the completed panel from the side/front elevation - *Illustrated in Task 2 photographic/video evidence section below (photos 19 -21)*
- Photographic evidence of work area/housekeeping/waste disposal managements at middle and completion of task - *Illustrated in Task 2 photographic/video evidence section below (photos 22 -26)*

Candidate evidence

Task 2 – Construct complex masonry structures

Practical Observation form

Assessment ID	Qualification number
8711-305	8711-35
Candidate name	Candidate number
Candidate A	CG12345
Centre name	Assessment theme
City & Guilds	Construct complex masonry structures

Complete the table below referring to the relevant marking grid, found in the assessment pack. Do not allocate marks at this stage.

Task	Notes – detailed, accurate and differentiating notes which identify areas of strength and weakness are necessary to distinguish between different qualities of performance and to facilitate accurate allocation of marks once all evidence has been submitted.
Construct complex masonry structures – Decorative Panel	<p>The candidate followed a logical process positioning all the resources required correctly allowing for efficient and safe working practice.</p> <p>Excellent selection of tools and material, including the selection of protective material coverings when working.</p> <p>The candidate set out the wall accurately on the floor to the correct size as per the drawing correctly marking on the floor with a pencil and using a square.</p> <p>Decorative features were properly marked out (shapes and joints) on the floor to ensure that the cuts were accurately marked and these were cut within tolerance and without any error or damage.</p> <p>Plumb points checked at regular intervals. The plumb points are maintained within +/- 2mm, the work levelled within +/- 3mm and gauge, line and range consistently good with a regular consistency of joint thickness over the panel. The candidate checked the angle with a square as bricks were laid continually checking their work during the construction process to ensure that the work was produced to a high standard and met industry standards.</p> <p>The finished work was completed to a high standard, with a high-quality finish that was clean with no mortar smudging.</p> <p>The candidate used excellent techniques and tool use throughout the task. Area was kept tidy and clean, and waste was disposed correctly and regularly.</p> <p>Overall an excellent representation of the specification.</p>

Photographic/video evidence Task 2

Video 1 D: Video evidence of first course laid. Video sequences to show beginning, middle and end of work on first course

<https://1drv.ms/v/s!Alx3sne-m16pggB7RBQKmGpejIMDsQ?e=7rF5xU>

- 0:00 – 2:00 Beginning of first course
Bedding bricks, levelling bricks, transferring level, gauging
- 2:00 – 3:14 Middle of first course
Laying front elevation of first course to line
- 3:15 – 4:01 End of first course
Completing rear elevation of first course bedding bricks to line

Note: Video details first course laid, the accuracy of initial construction and the tolerance of levelling and gauging in first course (level and gauging further illustrated in photographs across completed construction).

Video 2 D: Video evidence of setting out/measuring/marketing out

https://1drv.ms/u/s!Alx3sne-m16pggBzON5_07J0npRjYw?e=8J6AWL

- 0:00 – 3:15 Diagonal basketweave panel surround
Setting out/measuring/marketing out panel surround on floor
- 3:16 – 3:31 Diagonal basketweave panel
Series of stills showing measuring/marketing out of diagonal bond in panel
- 3:32 – 3:52 Wall length
Setting out/measuring/marketing out wall length for construction of first course

Note: Video details accuracy in the setting out/measuring and marketing of panel (as described in Task 2 practical observation form).

Photographic evidence of the plumb, line, level and gauge work

Photograph 16

Photographs 17 and 18 showing final gauge

Photograph 17

Photograph 18

Photographs 17 and 18 showing final gauge with final gauge height of wall was 1,236mm against a given measurement of 1,237mm within 3mm throughout with even joint thickness throughout construction

Video 3 D: Video evidence of work in completion at start, at stages and close to completion of decorative panel

<https://1drv.ms/v/s!Alx3sne-m16pgqEAj67DH-90-ff4bg?e=PDlp5k>

- | | |
|--------------|--|
| 0:00 – 2:00 | Laying bricks, jointing brickwork
Half round joint finish as work proceeds |
| 2:01 – 6:53 | Bedding bricks in the diagonal basketweave panel
maintaining 45-degree angle and bond |
| 6:54 – 8:59 | Laying intermediate bricks in dentil course to line |
| 9:00 – 11:56 | Completing brick on edge, laid to line
measuring to maintain joint size |

Note: Video details tolerances met to support photographic evidence without error.

Photographic evidence of the completed panel from the side/front elevation

Photograph 19 – 21 showing completed decorative panel

Photograph 19
Side elevation

Photograph 20
Front elevation

Photographs 19-21 showing side and front elevations of panel completed to an excellent standard without error (detailed in Video 3 D)

Photograph 21

Photographic evidence of work area/housekeeping/waste disposal managements at middle and completion of task

Photographs 22 – 26 showing work area/housekeeping/waste disposal on completion of panel

Photograph 22 – work area at start of task

Photograph 23 – work area at middle of task

Photograph 24 - Waste bricks placed in rubble bags

Photograph 25 - work area at middle of task

**Photograph 26 - work area at completion of task
(Waste mortar collected in bucket)**

Photographs 22 – 26 showing area was kept tidy and clean throughout the task and waste was disposed correctly and regularly without build-up of debris.

Commentary

The candidate demonstrates an excellent understanding of the preparation required to complete the task, correctly selecting and setting up the tools, equipment and resources required to carry out and complete the construction of the decorative panel, including the addition of protective covers for materials. The candidate demonstrated excellent knowledge of setting and marking out accurately and to the drawing requirements. The candidate demonstrated excellent knowledge and skills using the correct techniques required to construct complex masonry structures including marking out the brick shapes and joints in advance, use of a square and correct cutting technique showing accuracy and care to reduce damage to materials. Plumb, level, line and gauge were regularly checked, all within tolerance and with an overall consistency in joint thickness. The candidate worked cleanly and safely throughout the task and the completed appearance and the finish was of an excellent quality without error or defect fully meeting the specification.

Task 3 – Renovate and repair masonry structures

(Assessment themes: Health and Safety, Repair of masonry structures)

For task 3 candidates need to produce the following pieces of evidence:

- Carry out repairs to an existing chimney including replacing the pot, flaunching, remove and replace a damaged brick and re pointing an area of the chimney to match the original style to the agreed specification.

For illustration, the guided exemplification materials (GEM) for Task 3 contain examples of candidate evidence for the following assessment requirements

Assessor observations of completed renovation/repair to include:

- Inspection and removal as part of preparation
- Chimney pot fitted and flaunching
- Repaired brickwork

Photographic/Video evidence required:

- Photographic evidence of inspect and removal of materials for preparation or repair – *Illustrated in Task 3 photographic/video evidence section below (photos 27 - 32)*
- Photographic evidence of removal and replacement of corbelling and new clay fitted to the existing chimney - *Illustrated in Task 3 photographic/video evidence section below (photos 33 - 35)*
- Photographic evidence of the top of stack flaunching in cement mortar - *Illustrated in Task 3 photographic/video evidence section below (photos 36 - 37)*
- Video evidence of gauging coloured mortar - *Illustrated in Task 3 photographic/video evidence section below (video 4 D)*
- Photographic evidence of the face of the stack once jointed - *Illustrated in Task 3 photographic/video evidence section below (photos 38 – 40)*
- Photographic evidence of the finished repair from top and side elevation - *Illustrated in Task 3 photographic/video evidence section below (photos 41 - 42)*

Photographic evidence of the finished repair from top and side elevation

Photographs 41 – 42 showing completed repair of chimney

Photographs 41 and 42 showing completed repair work – finished to an excellent standard without error

Commentary

The candidate demonstrated excellent knowledge and understanding in preparation of the repair work, correctly pre inspecting the damage and selecting the correct tools and materials required to complete the task. The candidate used correct techniques to prepare the chimney for repair with excellent skills shown in brushing and cleaning the structure prior to repair, with clear care and consideration given to the existing structure. Mortar was gauged correctly with care given to ensure the texture and colour matched. Repairs were carried out to an excellent standard without error or defect. Working area regularly cleaned and waste disposed of correctly with safe working maintained throughout the task.
