

## Questions and Answers

# Transitioning to the new Rail Engineering Operative apprenticeship standards 19.06.2018

### How do we access the qualifications and support materials for the on programme phase of the apprenticeship?

For the mandatory qualifications, please find below information on how to be approved to deliver these qualifications:

<https://www.cityandguilds.com/delivering-our-qualifications/offer-our-qualifications>

The qualification handbooks can be found in our website:

Level 2 Diploma in Rail Engineering Knowledge (6497-02)

<https://www.cityandguilds.com/qualifications-and-apprenticeships/transport-maintenance/railway/6497-diplomas-in-rail-engineering-knowledge#tab=documents>

Level 2 Diploma in Rail Engineering Competence (6499-02)

<https://www.cityandguilds.com/qualifications-and-apprenticeships/transport-maintenance/railway/6499-diplomas-in-rail-engineering-competence#tab=documents>

For more information on our Learning Assistant e-portfolio, learning resources (including demos), and how we can support your business: [directsales@cityandguilds.com](mailto:directsales@cityandguilds.com)

### Where can I find more information about the math and English events?

Please visit our website for this summer's events here:

<https://www.cityandguilds.com/what-we-offer/centres/cpd-training>

### Are there any discounts for re-sits?

We offer competitive prices. Please speak to your business manager or sales representative for further information.

### How many resits are allowed?

The employer group has not set up a maximum limit of resits for this occupational standard. The

employer and the training organization must agree with the apprentices their readiness for the end point assessment.

Obviously if many resits are attempted, there is going to be a moment when there isn't enough funding to cover them and someone would have to pay for it (the employer, training organization or apprentice).

Apprentices should attempt the end point assessment only if they are ready.

**Are there enough end point assessors to cover all apprentices?**

As the largest end point assessment organization, we build our assessor base following demand within the sector and escalate according to increasing take up.

Thank you for your continued support.
