

2020 - 2021 Adaptations Engineering

For the period of:
September 2020 – Summer 2021

Introduction

The Covid-19 pandemic caused significant disruption to the summer 2020 assessment series.

City & Guilds, working in consultation with regulators and other awarding bodies, adopted several mitigation options to ensure that affected learners received a valid and reliable result for assessments they were unable to sit. These were either estimated grades, adapted assessment or delayed assessment until they could be sat safely.

As we move into the 2020/21 academic year, we recognise that the ongoing nature of this pandemic will likely cause further disruptions for learners and centres. The observation of government guidance will bring additional challenges for the administration of assessments

For the academic year 2020/21, centres should plan to, and wherever possible, deliver all assessments in line with the requirements set out in City & Guilds handbooks and assessment materials.

Where this is not possible City & Guilds has devised adaptation guidance. This will provide details of what adaptations can be used to provide centres and learners with flexibility to support the delivery of assessment during these challenging times.

This document sets out the qualification specific adaptations available and the conditions for their adoption. This document has been designed to complement the **City & Guilds Qualification assessment adaptation guidance** document which can be found on City & Guilds COVID-19 webpages.

What is adaptation?

Adaptations should only apply if a learner(s) is not able to be assessed in the way the assessment design intended. The adaptations are in relation to the conditions and controls for assessments, the delivery of the assessments, or in some instances the assessment methodology. This document specifies the adaptations that are permitted and the qualifications and assessments to which they apply. Where an adaptation is permitted it is indicated by ✓ and where there is no adaptation permitted or needed it is indicated by ×.

Centres are not permitted to make any further adaptation to the assessments beyond what is set out in this document.

Scope of learners

The adaptations within this document are **ONLY** available to learners who meet the following criteria:

- Are undertaking their assessment in the United Kingdom or Republic of Ireland
- Are scheduled to complete their qualification or assessments during the 2020/21 academic year

Please note these adaptations do not apply to international or End-point Assessment products.

**Adaptations for:**

QAN	City & Guilds qualification number	City & Guilds qualification title
603/1705/X	1272-02	Level 2 Diploma in Machining (Foundation Knowledge)
603/1706/1	1272-03	Level 3 Diploma in Machining (Development Knowledge)

What adaptations are permitted for assessment methods?

Assessment methods	Assessment component numbers	Adaptation permitted
Assessments for knowledge and/or understanding alone. Centre marked assignment/test with little or no practical.	201 / 202 / 204-213 301-311 / 313-315 / 317 / 318	✓ Remote assessment
Assessments for knowledge and understanding alone. Externally marked e-volve test.	203	✓ Remote invigilation only
Research tasks. Centre marked assignment.	312 / 316	✓ Remote assessment

Please see information below and on the next page about the specific permitted adaptation for each assessment method

For centre marked assignments or tasks assessing only knowledge and understanding:

These can be taken remotely by learners provided they are supervised and the centre has software or processes that maintain the security of the assessment materials, generate evidence that can be retained by the centre and authenticate that the responses are the learner's own.

Mark schemes/marking guidance and grade boundaries from tests should be used to mark the assessment and determine the final grade.

Please refer to section 3 'Remote assessment and remote invigilation' of our 'Qualification assessment adaptation guidance' document available from www.cityandguilds.com/covid-19

Where remote assessment is not an option, centres can assess learners 1:1 via oral questioning. The test content should be used as a basis for the questioning, where questions have images or tables, these can either be shared discretely from the test, an alternative equivalent image sourced or the questions can be rephrased around the image.

Oral questioning/Q&A session must be carried out by an assessor who is occupationally competent and in a way that authenticates the responses are the learner's own. These will need to be recorded in written or verbal format and linked to the assessment criteria.

For e-volve tests:

Remote invigilation is available, please see the latest guidance on the Covid-19 section of the City & Guilds website for more information www.cityandguilds.com/covid-19/

For research tasks:

Knowledge based assignments can be completed remotely, provided the centre has software or a process that maintains the security of the assessment materials, generates evidence that can be retained by the centre and authenticates that the responses are the learner's own.

Please see information on the next two pages for further details

The most effective way of assessing competence within an NVQ, is through direct observation of the learner. During social distancing, this method of assessment would not meet with the current government guidance for COVID -19. Therefore, assessors should be conscious of other appropriate methods of assessment and/or evidence types that would cover the requirements of the unit/qualification, these could include:

- Witness testimonies
- Professional discussions
- Authenticated learner produced reports
- Outputs of learner's work or work products (with supporting documentation from work activity)
- Records, photographs or video evidence of work activity taking place (these must be enough to show the relevant level of input from the learner).

Use of technology should also be considered:

- Video link/recording – this option may be considered for various elements of the assessment process including communication with learners, witnesses, and employers. Where this option is used the following must apply:
 - The assessor must introduce all members of the call and their role and purpose for the call
 - The assessor must agree with all parties that they agree to being recorded, in line with individual privacy policies
 - The date, time, location and purpose of the recording must be stated
 - The date and time must also be stated at the end of the recording
 - The assessor should have agreed a plan in advance of the call to ensure the outcomes are met
 - When being used as a tool for observation, the assessor must be able to confidently validate and authenticate the evidence being provided to enable an assessment decision
 - The video needs to be clear and at a distance that the task is clearly visible, and an assessment decision can be made with confidence
 - The video evidence must be accompanied by an assessment decision that demonstrates that the video evidence has been assessed and feedback given to the learner
 - The video is of the actual work being carried out in real time and not a synopsis of the work done when completed (if being used as an observation).
- Audio link/recording - this option may be considered for various elements of the assessment process including, communication with learners, witnesses, and employers. Where this option is used the following must apply:
 - The assessor must introduce all members of the call and their role and purpose for the call
 - The assessor must agree with all parties that they agree to being recorded, in line with individual privacy policies
 - The date, time, location and purpose of the recording must be stated
 - The date and time must also be stated at the end of the recording
 - The assessor should have agreed a plan in advance of the call to ensure the outcomes are met.

- When being used to capture a professional discussion, the assessor must be able to confidently validate and authenticate the evidence being provided to enable an assessment decision
- **This method is not suitable for observations.**

Minimum Performance Evidence Requirements

Performance evidence should continue to be the main form of assessment in order to demonstrate consistent, competent performance for a unit. Where strategies define a set or minimum number of examples of evidence required, assessors may accept fewer examples provided they are satisfied that the full range of performance and scope have been met to confirm competency.

For learners who are nearing the completion of their qualification, the evidence already gathered should be reviewed to identify where it may provide additional evidence to meet the requirements of the remaining units. Evidence of the following may also be considered:

- a) Performance observed based on training activities leading up to summative assessment.
- b) Reference and evidence to training tasks, GLH, SOW and assessor statements.

Important note:

It is expected that whichever assessment method is used to produce evidence, awarding bodies and centres/providers must be confident that the evidence produced is *Valid, Authentic, Reliable, Current and Sufficient* to cover the performance criteria and knowledge requirements fully.

The process of assessment must not differ from that outlined within the relevant assessment strategy as a result of the COVID-19 situation in that the assessor and the learner must first agree a plan prior to assessment and gathering of evidence. Assessment must be carried out in a way that ensures the assessor has the confidence to make an informed decision about the learner's competence. Following this, the assessor must provide feedback on their decision to the learner and finally review the learner's progress towards competence.

Both the internal and external quality assurance arrangements remain as stated in the assessment strategy documentation.

For e-volve tests:

Remote invigilation is available, please see the latest guidance on the Covid-19 section of the City & Guilds website for more information www.cityandguilds.com/covid-19/

For centre devised assessments:

These can be reviewed/amended as per the standard centre devised assessment process. Centres can offer a consolidated practical assessment that focuses on the breadth of practical skills in a reduced time that gives confidence to the assessor on making a grade judgement that is comparable to previous cohorts.
