

Remote Invigilation

Cisco Webex Invigilation Instructions

Webex working instructions

This document explains the use of Webex for the invigilation of remote on-screen assessments using City & Guilds on-screen e-assessment platform, e-volve.

Introduction.

Webex is an online meeting solution from Cisco. You are required to set up an account with [Webex](#) and depending on the browser you use, install a desktop app or web browser extension.

The minimum requirements can be found [here](#)
The installation guide can be found [here](#)

For launching the meeting software, we recommend using Google Chrome web browser for the best user experience. The candidate will be using Surpass Viewer for their exam session. Surpass Viewer is a Flash enabled browser which has been developed by BTL, the suppliers of our e-volve platform in association with Harman who are supporting Flash until 2023.

Once you have installed the software either through the desktop app or web extension, you are ready to invigilate candidate exams remotely.

Below we will explain the process, expectations and limitations of remote invigilation using Webex.

Process

Using Webex, you will be required to invigilate to the same standards as you would if you were in a room with the candidate. The candidate will be required to dial into the meeting on two devices, one to capture their face for identification and screen sharing purposes and another device to show the room that the candidate is in. This will allow you to ensure the candidate is safe, not receiving outside assistance during the exam or reading from pre-prepared documentation.

Scheduling an invigilation session

Log onto Webex and click on the Create Meeting button

 More ways to join

Start a Meeting 

Schedule 

Fill in the details and select the relevant date and time for the online invigilation session, add in the candidate on the Attendees (remember to press enter once you've entered their email, this will ensure they get an invite to the meeting via their email) and click **Schedule**.

Schedule a Meeting

[Meeting templates](#)

* Meeting topic	<input type="text" value="This is a test"/>
* Meeting password	<input type="text" value="epJiAWM44F5"/> 
Date and time	Monday, Apr 27, 2020 8:50 am Duration: 1 hour  (UTC+01:00) Dublin, Edinburgh, Lisbon, London 
	<input type="checkbox"/> Recurrence
Attendees	<input type="text" value="Separate email addresses with a comma or semicolon"/> <input type="text" value="candidate@example.com"/> 

You will now be directed back on your Webex home screen where you can see your meeting details. The meeting is now arranged.

This is a test

Meeting number:	145 014 865
Password:	epJIAWM44F5 (37542964 from phones and video systems)
Host key:	506290

More ways to join

Join by video system	Dial 145014865@meetingsemea10.webex.com You can also dial 62.109.219.4 and enter your meeting number.
Join by phone	+44-20-7660-8149 United Kingdom Toll Access code: 145 014 865 Global call-in numbers

Please ensure you follow up with the candidate to ensure the agreed date and time is correct, that they have access to equipment that meets the minimum technical requirements and that they valid ID for the invigilated session.

Starting the remote invigilation session – Overall process

To successfully invigilate the exam session, the following steps need to take place

- 1. The invigilator logs onto Webex and starts the relevant Webex session (this is covered in detail, below)**
- 2. The candidate joins the Webex session**
- 3. The candidate shares their screen**
- 4. The candidate turns on their webcam**
- 5. The candidate should identify themselves using valid photo identification. The candidate can use their passport, driving licence or centre/employee ID badge**
- 6. The candidate logs on to the Webex session on their mobile phone/tablet and starts their phone/tablet camera if it doesn't start automatically**
- 7. The invigilator needs to check the candidate does not have access to any unauthorised materials. The invigilator must tell the candidate to scan room with their smart phone/tablet, until they are satisfied they have covered the whole**

room (fig 1). This should include checking the area behind the monitor, checking for any sort of audio device that the candidate is wearing (hearing aids are permitted), that the area around the computer is clear and that any scrap paper is blank (fig 2)

8. The candidate should place their phone/tablet in a location that gives as wide an angle of the room as possible (fig 3)
9. If the candidate is wearing a watch, they should be asked to remove it and place it on their desk
10. The invigilator should ask the candidate to confirm they understand the requirements of the test and that they are now under exam conditions
11. The invigilator takes a screen shot showing their Webex screen, two views of the candidate and screen share
12. The invigilator shares the URL of the on-screen exam session which the candidate enters into their Surpass Viewer
13. The invigilator reads out the keycode of the exam and the candidate enters their exam keycode and the invigilator either unlocks the exam or reads out the exam pin code
14. The candidate confirms their details and starts the exam
15. Once the candidate has finished, the invigilator will inform the candidate when they can expect their result. This may depend on the type of exam and/or the process at your centre. If unsure, ask the candidate to contact their centre contact for confirmation. Once done, the invigilator ends the meeting and exits Webex

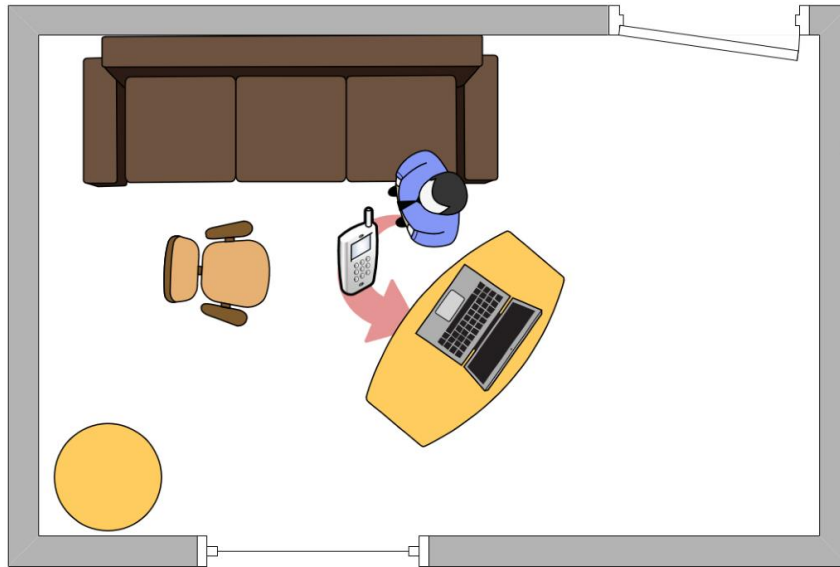

Fig 2

Fig 3

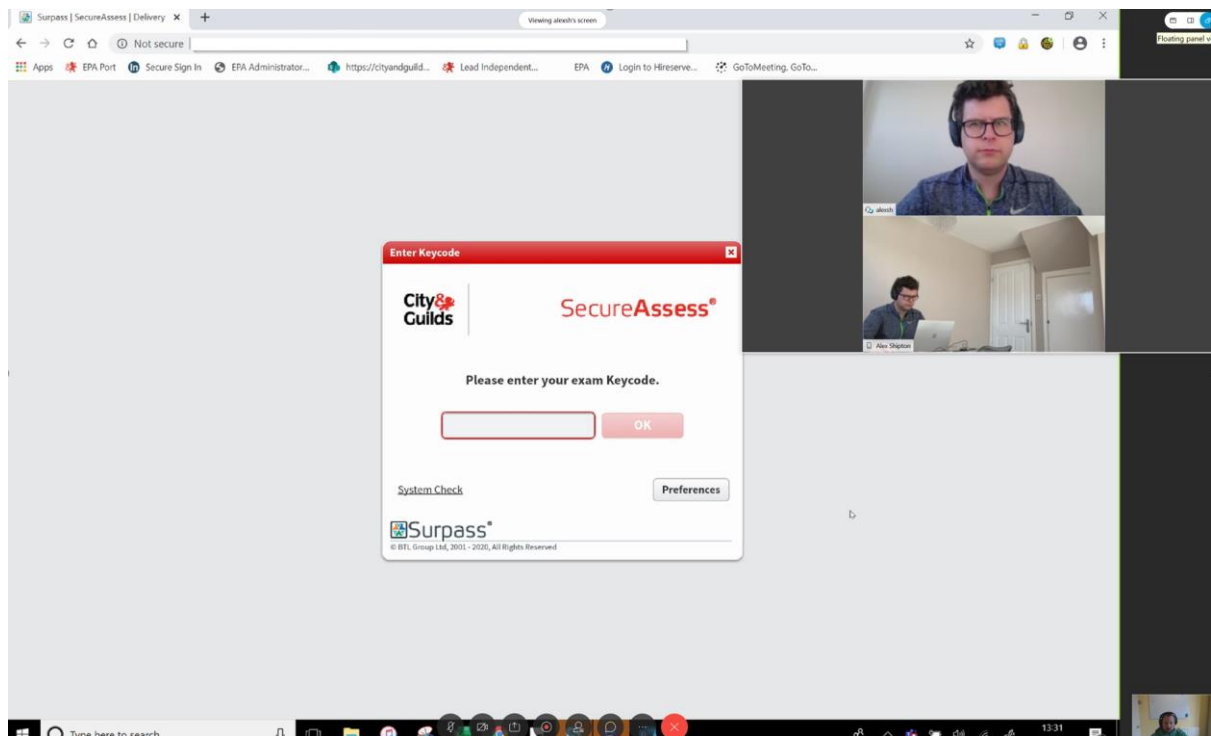

Under no condition should the exam session be recorded.

Starting the Webex session

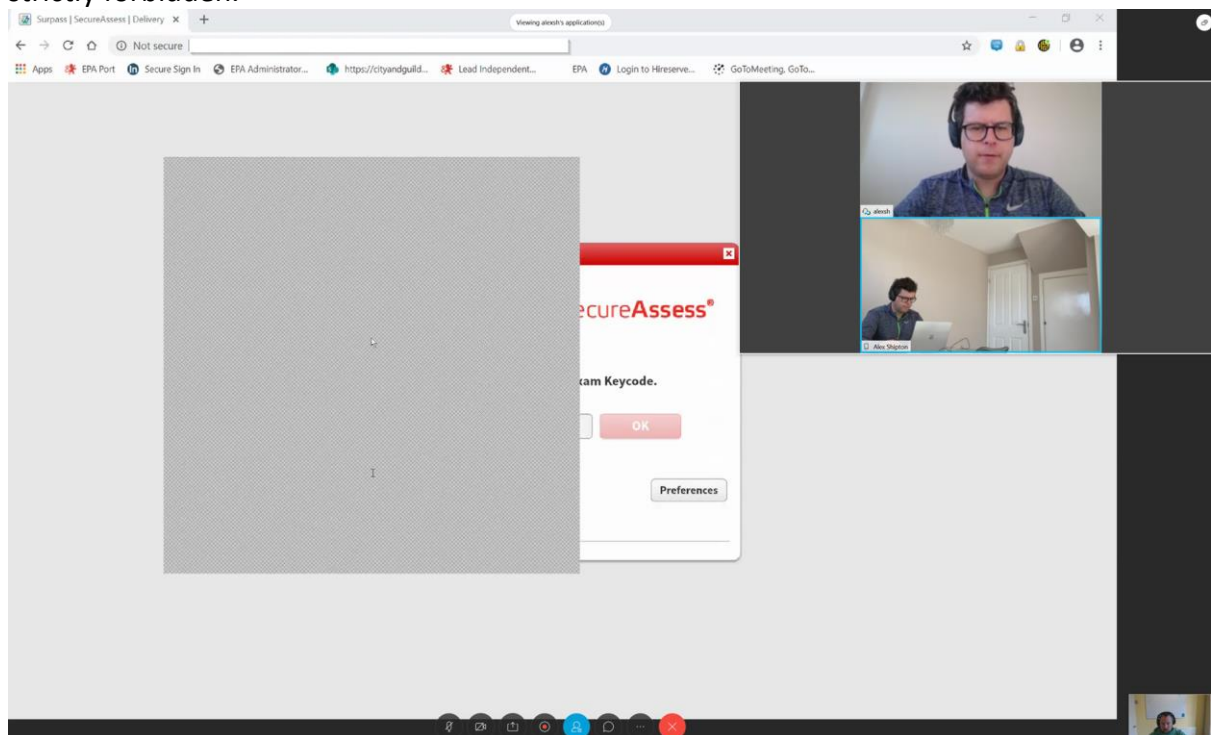

Log into Webex and start the relevant meeting. You will be prompted to choose an audio option, for best user experience, computer audio is preferred. Now wait for the candidate to join. Once the candidate has joined ask them to show their ID, setup their second device and display their room setup.

Once in the meeting, you should see a similar screen to below, showing two views of the candidate and what is on their screen. You will need to use the floating panel view and adjust the size of the window to allow you to clearly see the candidate from both angles. Please take a screen shot and save with your records.

For more information on how to use **floating panel view** to achieve the desired candidate view, please read the guidance [here](#)

If at any time during the session you see a box appear like below, immediately ask the candidate what they are doing as this indicates that another program is being used which is strictly forbidden.

Once the exam session is over end the meeting session by clicking on the **Leave** meeting button.

The WebEx online meeting solution is owned and/or provided by Cisco Systems, and not by City & Guilds. We have no control over the content or functionality of, and have no responsibility for, WebEx or over any other third-party software, internet browser, product or service referred to in this document (together the “**technologies**”).
