

Apprenticeship Standards

Delivery approaches during Covid-19

City and Guilds and ILM have been working closely with Ifate to secure agreement for our centres on which Standards will have dispensations allowed, so that apprentices can safely take their end-point assessments where possible.

The table below shows the main delivery approach that Ifate has allowed and which Standards will use a blend of dispensations.

Current C19 dispensations for end-point assessments:

*	Remote invigilation at home, or testing in the employer's premises using e-volve knowledge tests
**	Dispensation to replace the observation
***	Dispensation in place to allow the live observation using remote technology in special circumstances
****	Pending the government's response to when salons can open again we are working with IfATE and other sector bodies on further dispensations to factor in the health and safety not only of apprentices, but the clients of salons.

Delivery approaches and dispensations:

Live EPA standards				Paused EPA Standards
	Remote delivery standards	Face to Face standards with C19 dispensation with Remote delivery available	Face to Face Delivery only No C19 dispensation available, subject to Covid safe delivery in a workplace or educational setting	Close-contact Face to Face Delivery
