T Levels – Construction and building services engineering

Chosen delivery partner for T levels

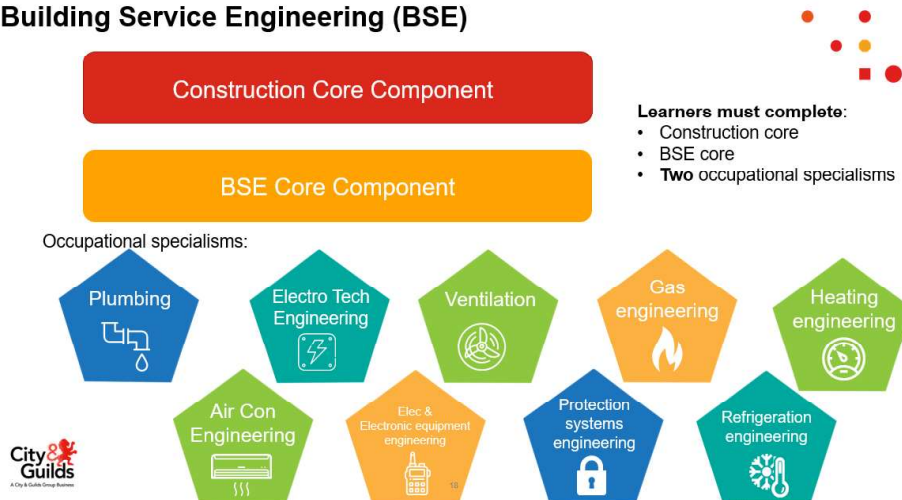

We are thrilled to announce that City & Guilds has been awarded the contract by the Institute for Apprenticeships and Technical Education (IfATE) and the Department for Education (DfE) to be the delivery partner for the Construction T Level. We are delighted to have won the bid and we will be working in collaboration with EAL

We will develop new Technical Qualifications (TQs) in both On-site Construction and Building Services Engineering (BSE) which will be delivered as part of the T Level in Sept 2021.

T Levels signify a big change in technical education as they will become one of the main funded choices for students post-16, alongside A levels and apprenticeships. Equivalent to 3 A levels, the 2-year courses have been developed in collaboration with employers and businesses to ensure the content prepares learners for the world of work and meets industry needs. They will offer learners a mixture of classroom learning and industry placement.

An outline of the scope of the product is below. Submission of our qualifications will be in June 2020 to allow centres to prepare for delivery in September 2021 <https://www.cityandguilds.com/tlevels>

Building Service Engineering (BSE)

Skills for Wales – Construction and building services engineering

City & Guilds/EAL will be the sole provider of a new suite of fundable Construction and Building Services Engineering qualifications in Wales. Ready for first teaching from September 2021, these qualifications and apprenticeships will start to help simplify the complex landscape of more than 400 qualifications available in the sector. <https://www.cityandguilds.com/about-us/uk-local-teams/wales/skills-for-wales>

End Point Assessment In BSE

With the landscape changing and apprenticeships now having End-point Assessment included we will look at how this will be delivered in the Building Services arena. We will be looking at the delivery model and how the process and assessment is delivered to our customer network. We will also be looking at some of the technical delivery details and resource requirements for the Gas Engineering and Property Maintenance Operative apprenticeships as well as an update on the progress of the plumbing and domestic heating EPA.
