Next level skills for next level jobs

T Levels are a brand new, two year programme following on from GCSEs or a level 2 study programme, aimed at 16 to 18-year-old learners. They will combine classroom learning and an extended industry placement (of at least 45 days) together on a qualification designed with businesses and employers.

T Levels will give young people a head start towards the future they need to enter skilled or further technical study.

In collaboration with EAL, we will be offering the technical qualifications (TQs) for T Level in Construction: Building Services Engineering and On-Site Construction starting from September 2021.
