Functional Skills Reform monthly updates

Webinar 06: Sneak Preview – 06 February 2019
Katherine Cooper, Amanda Kelly and Paul Sceeny
Welcome to webinar 6 – sneak preview

Questions
Please post your questions during the webinar. We might not be able to answer them live, but if not we’ll add to the FAQs.

Paul Sceeny
Technical Advisor

Amanda Kelly
Industry Manager

Katherine Cooper
Technical Advisor
The new subject and regulatory documents

Subject Content
- published by DfE
- sets out the purpose, learning aims and outcomes learners need to achieve
- essential reading for tutors.

Conditions and Requirements
- published by Ofqual
- sets out regulatory rules and requirements awarding organisations must meet if they intend to offer reformed Functional Skills

Statutory Guidance
- published by Ofqual
- helps awarding organisations understand how to comply with Conditions and Requirements.

All necessary info about qualification specs/assessments will be incorporated into our handbook docs.
Scope of study – **English** (Level 1)

**Speaking, Listening and Communicating**

**Scope of study**

- **Text:** this should include narratives, explanations, discussions, instructions, information, descriptions and presentations all of varying lengths.

1. Identify relevant information and lines of argument in explanations or presentations
2. Make requests and ask relevant questions to obtain specific information in different contexts
3. Respond effectively to detailed questions
4. Communicate information, ideas and opinions clearly and accurately on a range of topics
5. Express opinions and arguments and support them with evidence
6. Follow and understand discussions and make contributions relevant to the situation and the subject
7. Use appropriate phrases, registers and adapt contributions to take account of audience, purpose and medium
8. Respect the turn-taking rights of others during discussions, using appropriate language for interjection

**Reading**

**Scope of study**

- **Text:** this should include a range of straightforward texts on a range of topics and of varying lengths that instruct, describe, explain and persuade.

9. Identify and understand the main points, ideas and details in texts
10. Compare information, ideas and opinions in different texts
11. Identify meanings in texts and distinguish between fact and opinion
12. Recognise that language and other textual features can be varied to suit different audiences and purposes
13. Use reference materials and appropriate strategies (e.g. using knowledge of different word types) for a range of purposes, including to find the meaning of words
14. Understand organisational and structural features and use them to locate relevant information (e.g. index, menus, subheadings, paragraphs) in a range of straightforward texts
15. Infer from images meanings not explicit in the accompanying text
16. Recognise vocabulary typically associated with specific types and purposes of texts (e.g. formal, informal, instructional, descriptive, explanatory and persuasive)
17. Read and understand a range of specialist words in context
18. Use knowledge of punctuation to aid understanding of straightforward texts
Scope of study – **English** (continued)

**Writing**

**Scope of study**

*Text:* this should include straightforward texts such as narratives, instructions, explanations and reports of varying lengths.

**Spelling, punctuation and grammar**

<table>
<thead>
<tr>
<th>19. Use a range of punctuation correctly (e.g. full stops, question marks, exclamation marks, commas, possessive apostrophes)</th>
</tr>
</thead>
<tbody>
<tr>
<td>20. Use correct grammar (e.g. subject-verb agreement, consistent use of different tenses, definite and indefinite articles)</td>
</tr>
<tr>
<td>21. Spell words used most often in work, study and daily life, including specialist words</td>
</tr>
</tbody>
</table>

**Writing composition**

- 22. Communicate information, ideas and opinions clearly, coherently and accurately
- 23. Write text of an appropriate level of detail and of appropriate length (including where this is specified) to meet the needs of purpose and audience
- 24. Use format, structure and language appropriate for audience and purpose
- 25. Write consistently and accurately in complex sentences, using paragraphs where appropriate
Scope of study – **Mathematics** (Level 1)

<table>
<thead>
<tr>
<th>Level 1 - using numbers and the number system – whole numbers, fractions, decimals and percentages</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Read, write, order and compare large numbers (up to one million)</td>
</tr>
<tr>
<td>2. Recognise and use positive and negative numbers</td>
</tr>
<tr>
<td>3. Multiply and divide whole numbers and decimals by 10, 100, 1000</td>
</tr>
<tr>
<td>4. Use multiplication facts and make connections with division facts</td>
</tr>
<tr>
<td>5. Use simple formulae expressed in words for one or two-step operations</td>
</tr>
<tr>
<td>6. Calculate the squares of one-digit and two-digit numbers</td>
</tr>
<tr>
<td>7. Follow the order of precedence of operators</td>
</tr>
<tr>
<td>8. Read, write, order and compare common fractions and mixed numbers</td>
</tr>
<tr>
<td>9. Find fractions of whole number quantities or measurements</td>
</tr>
<tr>
<td>10. Read, write, order and compare decimals up to three decimal places</td>
</tr>
<tr>
<td>11. Add, subtract, multiply and divide decimals up to two decimal places</td>
</tr>
<tr>
<td>12. Approximate by rounding to a whole number or to one or two decimal places</td>
</tr>
<tr>
<td>13. Read, write, order and compare percentages in whole numbers</td>
</tr>
<tr>
<td>14. Calculate percentages of quantities, including simple percentage increases and decreases by 5% and multiples thereof</td>
</tr>
<tr>
<td>15. Estimate answers to calculations using fractions and decimals</td>
</tr>
<tr>
<td>16. Recognise and calculate equivalences between common fractions, percentages and decimals</td>
</tr>
<tr>
<td>17. Work with simple ratio and direct proportions</td>
</tr>
</tbody>
</table>
Scope of study – Mathematics (continued)

**Level 1 - using common measures, shape and space**
18. Calculate simple interest in multiples of 5% on amounts of money
19. Calculate discounts in multiples of 5% on amounts of money
20. Convert between units of length, weight, capacity, money and time, in the same system
21. Recognise and make use of simple scales on maps and drawings
22. Calculate the area and perimeter of simple shapes including those that are made up of a combination of rectangles
23. Calculate the volumes of cubes and cuboids
24. Draw 2-D shapes and demonstrate an understanding of line symmetry and knowledge of the relative size of angles
25. Interpret plans, elevations and nets of simple 3-D shapes
26. Use angles when describing position and direction, and measure angles in degrees

**Level 1 - handling information and data**
27. Represent discrete data in tables, diagrams and charts including pie charts, bar charts and line graphs
28. Group discrete data and represent grouped data graphically
29. Find the mean and range of a set of quantities
30. Understand probability on a scale from 0 (impossible) to 1 (certain) and use probabilities to compare the likelihood of events
31. Use equally likely outcomes to find the probabilities of simple events and express them as fractions
Scope of study – Mathematics (continued)

Level 1 - solving mathematical problems and decision making

Students at Level 1 are expected to be able to:

- Read, understand and use mathematical information and mathematical terms used at this level;
- Address individual problems as described above;
- Use knowledge and understanding to a required level of accuracy;
- Analyse and interpret answers in the context of the original problem;
- Check the sense, and reasonableness, of answers; and
- Present results with appropriate explanation and interpretation demonstrating simple reasoning to support the process and show consistency with the evidence presented.

The context of individual problems at this level will require some comprehension in order for the student to be able independently to identify and carry out an appropriate mathematical approach.

Qualification overview – **English Reading and Writing** (levels 1 and 2)

**Some reminders**

- Functional Skills qualifications should provide reliable evidence of a student’s achievements against demanding content that is relevant to the workplace. They need to provide assessment of students’ underpinning knowledge as well as their ability to apply this in different contexts. They also need to provide a foundation for progression into employment or further technical education and develop skills for everyday life.

- A key aim for Functional Skills English specifications is that they should enable the student to develop confidence and fluency in, and a positive attitude towards, English. Students should be able to demonstrate their competence in English by using it in real-world situations as well as demonstrating a sound grasp of basic English knowledge and skills.

**Purpose of Functional Skills**

- A qualification for work, study and life. Achievement of the qualification demonstrates the ability at an appropriate level to read, write, speak, listen and communicate in English, and to apply these skills effectively to a range of purposes in the workplace and in other real life situations.
Qualification overview – **English Reading and Writing** (levels 1 and 2)

**Definitions**

- **Reading**
  defined as the independent understanding of written language in specific contexts. This can be demonstrated through the use of texts on screen or on paper.
  - Dictionaries **will** be permitted for Reading assessments.

- **Writing**
  defined as the independent construction of written language to communicate in specific contexts. Text can be written on paper or electronically.
  - Dictionaries **will not** be permitted for Writing assessments.
English Writing – assessment overview (levels 1 and 2)

• Available on demand
• Delivery on paper and on-screen.
• Two extended response questions. One or both will use stimulus material.
• Question topics will not be linked.
• Duration: 1 hour 30 minutes – same for on-screen and paper
• Dictionaries not permitted.
• Range of texts similar to now – see current Guidance for Delivery.
  • We will not require candidates to write speeches.
• Mark schemes will contain updated marking grids similar to those currently in use to support accurate and consistent preparation.
English Reading – assessment overview (levels 1 and 2)

- Available on demand
- Delivery on paper and on-screen.
- Mix of multiple choice and short answer. Some will be open and some will be fixed response (as now)
- Both levels will have two source documents
- Both levels will have 30 marks (currently 40)
- Level 1 Reading subject content now requires compare across documents (currently only Level 2)
- Both levels require candidates to infer meaning from images (not assessed currently).
- Question topics not directly linked, but will have a common thread
- Duration: 1 hour – same for on-screen and paper delivery
- Dictionaries permitted.
- Similar range of text types to current Reading assessments (see Guidance for Delivery).
English Speaking, Listening and Communicating assessment overview (levels 1 and 2)

• Similar structure and format to current model – where we provide guidance and recording forms. We will also provide exemplar materials.

• Level 1 = formal discussion (unfamiliar); short talk (presentation or explanation) (familiar); informal discussion in response to a peer’s short talk.

• Level 2 = formal discussion (unfamiliar); talk (presentation or extended explanation) (familiar); informal discussion in response to a peer’s talk.

• Level 1 subject content now requires us to include a presentation/explanation, which was previously only at Level 2.

• Both levels have a 3rd activity – to help ensure all criteria are covered – Performance descriptors have been provided by Ofqual so centres must use these. They will be updated in the recording forms.

• Timings and guidance similar to now. 30 minutes overall (3 hrs for English overall).
Qualification overview – **Mathematics** (levels 1 and 2)

**Some reminders**

- Functional Skills qualifications should provide reliable evidence of a student’s achievements against demanding content that is relevant to the workplace. They need to provide assessment of students’ underpinning knowledge as well as their ability to apply this in different contexts. They also need to provide a foundation for progression into employment or further technical education and develop skills for everyday life.

- Functional Skills mathematics specifications should enable the student to gain confidence and fluency in, and a positive attitude towards, and to develop behaviours such as persistence and logical thinking as they apply mathematical tools and approaches.

**Purpose of Functional Skills**

- Mathematics for Level 1 and Level 2: a qualification for work, study and life. Achievement of the qualification demonstrates a sound grasp of mathematical skills at the appropriate level and the ability to apply mathematical thinking effectively to solve problems successfully in the workplace and in other real life situations.
Mathematics – assessment overview (levels 1 and 2)

• Available on demand
• Delivery on paper and on-screen
• Duration – 1 hour 45 minutes (both levels)
  • Same time allowance for paper and on-screen.
• Two sections within overall time limit – sections not timed. Candidates free to use the time as they need.

• Section A – without a calculator
  • Broadly underpinning skills, with some problem solving, through short questions progressing to slightly longer contextualised activities.
  • 15 questions – 1 mark per question.

• Section B – with a calculator
  • Test of underpinning skills through short questions progressing to longer contextualised activities/problems.

  • For on-screen tests - candidates will complete Section A without access to on-screen calculator. Once section A is complete, it will lock down and candidates will progress to Section B where on screen calculator will be available to them.
Functional Skills at levels 1 and 2
Support coming…

**Materials and tools**
- Qualification handbook
- Subject specifications
- Guidance for Delivery
- At least two samples at each level
  - with mark schemes
  - PDF and on-screen format
  - on-screen versions available through OpenAssess
- Worked examples
- SLC recording forms.

**Teaching & Learning resources**
- Updated SmartScreen
- Updated e-Functional Skills

**Face to face support**
- Advisor support and training
  - Calendar of events across England from Easter
  - Continuing beyond September.
- Digital credentials to recognise participation in these sessions.
- Follow up webinars and networks.
Supporting your transition to the 2019 reformed Functional Skills qualifications
Readiness checklist

Remember the readiness guide too!

Don’t forget to sign up for our email alerts and events!
Standardising Functional Skills – the other big change

Context:

- Both DfE and Ofqual want to see improved *standardisation* across awarding organisations.
- About ensuring the *standard required to pass* is the same as across all AOs.

At present:

- There’s no formal process in place by which AOs can standardise.
- Perception that some Functional Skills qualifications are ‘harder’ or ‘easier’ to pass with particular AOs.
Standardising Functional Skills – how will it work?

Process:

• All awarding organisations involved
  • co-ordinated through Federation of Awarding Bodies (FAB) and JCQ, overseen by Ofqual.

• **Pass descriptors** for each assessment at each level
  • describes level of performance required from a learner to achieve a ‘pass’ (similar to a grade descriptor for GCSE).

• Developed from standards required to current Functional Skills assessments (this is about making the qualifications fairer, not ‘harder’).

• Used by all AOs as part of their processes for setting pass marks.

• AOs will share a common archive of sample candidate scripts, as reference in setting pass marks.
Outcomes:

• There'll will still be variations in each AO’s assessment materials, the standard required to pass these will be the same.

• Increased assurance for centres that common standard is measured by all AOs.

• Descriptors will help centres gauge learner readiness to take the exams.

• Increased assurance that all learners with a Functional Skills qualification have reached at least an agreed minimum level of performance.

• Challenges 'race to the bottom' narrative, raising the status of the qualifications.
Don’t forget: these are all here to help your #FunSkills2019 journey

From 3748 to 4748...

**Key dates to keep in mind**

- Last certification for ‘old’ Functional Skills
  - 31 August 2020.

- External assessments for ‘old’ Functional Skills withdrawn
  - 30 April 2020.

**Last registration for ‘old’ Functional Skills (3748)**
- 31 August 2019.

**New number (4748) from**
- 1 September 2019.

**ICT not changing, but will be migrated to 4748 on our systems.**
Next month’s webinar is on 6 March

If you would like us to answer any particular questions, please submit them to: fsreform@cityandguilds.com

Usual start time 15.30
Thank you
