Resources

Schemes of work – an ideal guide for tutors to ensure that all of the learning requirements are covered.

Sample lesson plans – to give tutors inspiration and save valuable planning time.

Individual learning plan – to enable learners to record their progress through each unit, identifying areas for further development and recording a plan to achieve targets.

Consultation sheets – act as checklists for learners to work through when planning client services and treatments, to ensure the suitability of the style and health and safety considerations.

PowerPoint presentations – slide decks that allow tutors to save valuable preparation time, while still delivering a professional and engaging presentation in the classroom.

Handouts – provide a convenient way of presenting key information to learners in a classroom setting. They save tutors time and give learners the confidence that they are receiving the information they require.

Worksheets – these can be used by learners to review and implement what they have learned. Worksheets can be projected on to the whiteboard or downloaded for tutors to make changes and adapt to their own delivery style.

Video e-learning – the practical units in this package are supported by instructional videos with interactive questions to test learner knowledge. The videos demonstrate the skills learners need to master, with distinct chapters to allow easy navigation. Multiple choice questions appear after each video to ensure the learner has watched and understood the material. Learners who answer incorrectly are given a useful hint so that they can reattempt the question. Concise and informative feedback is also provided for each question to consolidate understanding. A summary of each quiz highlights areas where the learner would benefit from further revision.
