About this manual

This manual has been designed as a companion for learners taking this course. It gives them a record of their progress in a simple, accessible way leading to the creation of evidence that meets the performance criteria of the qualification.

For tutors, the manual is also a tool to support formative assessment. It can be used to make a judgement on progress and to identify any potential gaps in learning.

The logbook section records summative progress. It may be completed on more than one occasion and in an order that suits the candidate.

The manual includes:

- coverage of all the core units, containing a set of structured tasks, supported by clear, full-colour illustrations
- minimised reflective writing and tick boxes placing focus on capturing practical activities completed on site
- step-by-step progression through the basic skills required by electricians.

The manual and logbook are both presented as form-fillable PDFs which can be saved electronically.
