This SmartScreen package supports the 9302 Level 3 Heavy Vehicle Service and Maintenance Technician Apprenticeship (9302), providing a dedicated e-learning package to cover the technical knowledge apprentices need to cover. The content is the most sophisticated available on the market, offering a more interactive experience than other comparable products. Schemes of work are also included which are an ideal guide for tutors and centres to ensure that all the learning requirements are covered when delivering the apprenticeship.

Electude's learning modules use gamification principles and highly interactive resources, including animations and simulations, to keep students engaged throughout their training.

The programme:

- enables delivery of theory through interactive and engaging material, which is preferred by learners to traditional resources
- offers more flexible delivery of demonstrations and other practical tasks by utilising e-learning material and saves time and resource
- means learner progress can be tracked and monitored, and homework can be automatically marked
- enables learners to see their progress and scores in the e-learning, allowing them to see what they still have to complete, and where they need to improve
- helps tutors to see any specific areas of weakness that groups of learners may have which can then be addressed in the classroom/workshop.
