Question	Answer
1. General	
1.1 Is this a complete end-to-end solution?	<p>Portfolio Plus offers sufficient mapped digital learning content (specifically written for remote delivery) to cover a full qualification. It doesn't, however, include <u>every</u> possible unit. We've included what we know to be the most popular units.</p> <p>Portfolio Plus compliments existing delivery as remote learning solutions become the norm. Just like with any of our digital propositions, you still need to register learners for the qualification. The assessment (e-volve or assignment) takes place outside the platform.</p>
2. Assessment	
2.1 How will learners be assessed for the actual qualifications?	<p>We devised the content within Portfolio Plus to map to the selected learning outcomes and assessment criteria for each qualification.</p> <p>When learners complete their learning and tasks on the platform, an assessor/tutor completes a 'formative' assessment and checks if they are ready for 'summative' assessment.</p> <p>Assessments can either be done online (using e-volve) or (if the qualification allows it) through an assignment. If the assignment option was chosen, an EQA accesses the Portfolio Plus.</p>
2.2 Can IQAs/EQAs access the learners' work just like in Get-to-Gateway/Learning Assistant?	<p>If a Centre uses Portfolio Plus to deliver a qualification with the assessment tools, the EQAs need to access the learner portfolio through the system.</p> <p>EQAs can access uploaded evidence as part of their normal EQA visit/sample, but Centres will still need to make sure the learner has met all required learning criteria.</p>
3. Content	
3.1 Where can a customer see what units are included?	<p>We've developed online course grids and mapping guides with Centres in mind. They provide clarity on how our digital learning content maps to learning outcomes and assessment criteria.</p> <p>You can access these grids from our Portfolio Plus page under the 'Mapping grids' accordion.</p>
4. Requirements	
4.1 Is there a minimum order?	No, we've made Portfolio Plus available without any minimum purchase to allow our customers to try the solution and scale up as needed.

4.2 Does the price include the qualification?	No, Portfolio Plus is an extra cost on top of the registration.
5. Technology	
5.1 Can the learner access this via a mobile?	No, currently this is not available. Portfolio Plus was created to display best on larger screens and should work across a range of devices.
5.2 Is Walled Garden connection available?	Currently this is a service that is not available.
5.3 Which versions of Internet Explorer are supported?	We support IE11 and other versions of Internet Explorer.
6. Other information	
6.1 We already have an ePortfolio, will Portfolio Plus still work for us?	<p>We do have centres that run multiple ePortfolios with different suppliers.</p> <p>Portfolio Plus offers quality content which is found within the platform. This takes the time out of your delivery and allows you to track the progress of your learners. If you want to speak to someone to find out how this could work for you, do get in touch with our Digital Solutions Team.</p>
