

Retrofit Career Pathways

Step into the world of retrofit with City & Guilds!

As governments and organisations worldwide prioritise carbon reduction targets, retrofitting existing buildings has emerged as a key strategy to achieve these goals. This presents an opportunity to tap into the growing demand and develop the skills needed to excel in the evolving world of green construction.

City & Guilds has developed a range of Retrofit qualifications that equips learners to navigate the transformative landscape of sustainable construction. Our qualifications cover everything from learning about retrofit installation details to developing expertise in communication, health and safety, and the impact of climate change.

This document is your guide to potential career pathways within the retrofit industry, showcasing how learners can progress through City & Guilds qualifications, unlocking opportunities in the evolving world of sustainable construction.
