

Feedback statement for 2.1 from specialist observer

These are examples only. All witness statements should be completed by an expert in the subject area (not clients or peers). Statements should adhere to the assessment criteria but not merely repeat it and should show some examples of how the assessment criteria were covered.

[Your teacher will observe you give feedback on your performance of Task 2](#)

#### BAND 3

You performed an extensive risk assessment in the beauty salon today which clearly identified your knowledge of health and safety symbols such as the fire exit sign and the 'Corrosive' symbol on hydrogen peroxide. You used terms such as 'irritant' and 'combustible' when speaking about risks. Your performance in the salon was professional and done with complete autonomy.

#### BAND 2

You performed a good risk assessment in the nail bar today and identified some health and safety symbols. I gave you a small amount of guidance when you were trying to recognise the symbols on acetone varnish remover but in general you performed very well. You used some basic health and safety terminology such as 'hazards' and 'allergies'

#### BAND 1

You performed a limited risk assessment today in the hair salon and you needed continual guidance when recognising health and safety symbols and terms. You were able to show me where the fire exit was. To improve your grade, you must show more detailed knowledge of the symbols used on the chemicals in the stock room.
