To City & Guilds,

The British Association of Beauty Therapy and Cosmetology (BABTAC) was established in Gloucester in 1977, BABTAC is the premier UK association for beauty, hair, holistic and sports therapies. We are 'not for profit' and our main concerns are the well-being of our members, regulation of the industry and public welfare.

Governed by a Council of industry professionals, we also offer unrivalled beauty expertise, a rigorous ethical code and a professional practice standard. Our logo is a sign of confidence; display it with pride and give clients assurance of your qualifications and commitment to excellence.

We would like to provide our support to City & Guilds, as a Profession Association for the Beauty, nails, spa, hair and media and complementary therapies industry, we feel the following qualification is suitable for a young person between the ages of 16-19 studying full time and will give that young person an advantage when going onto applying for a job or progressing onto an apprenticeship or further learning. This qualification is suitable for someone wanting to work in the hair and media make up industry and as such this qualification is recognised by the industry. As a Hair and Media Make up Artist the industry will require that they cover both sets of skills both in hair and Make up. The following qualification allows the learner to gain these skills and knowledge.

BABTAC support the inclusion of:

- City & Guilds Level 3 Diploma in Hair and Media Make up 500/9001/X

For inclusion on the DfE 2017 performance tables in the technical level qualifications at level 3 category.

We feel that once the learner has gained this qualification which covers a sound understanding and key practical skills for the Hair and Make up industry they could take a position as progression opportunities into employment are:

- Hair and Media Make up Artist

We confirm that we consent to our company name (and logo) being made publicly available on the DfE and City & Guilds websites.

Yours sincerely

Colin Webster
