# Meet the contributors

Melissa Peacock
is an Advanced
Practitioner at Bedford
College, where she
is responsible for
teaching, learning
and mentoring new
lecturers. She has also
done consultancy
and examining work.
Melissa has worked
in beauty therapy for
18 years. She is the
author of your Level 3
Candidate Logbook.

Sarah Farrell studied beauty therapy at the London College of Fashion over 25 years ago, and has worked in several salons since then. She is now heavily involved in education. She is an External Quality Assurer consultant, Smartscreen author and technical advisor for your Level 3 Candidate Logbook.

Maria Retter has been a make-up artist for 15 years, and a teacher for 11 years. She's had a diverse career, involving film, theatre and fashion work, as well as work for magazines and tabloid newspapers. Maria is a qualified assessor, Internal Quality Assurer and author of the make-up units in your Level 3 Candidate Logbook.

City & Guilds would like to thank all the contributors. These are some of the top names in the industry, and they want you to benefit from their experience!

Meet the contributors

Eve Lom is one of the world's most respected beauty professionals. Eve studied anatomy, nutrition and massage techniques, and opened her first salon in 1984. Today, Eve's range of skincare products and the famous Eve Lom facial are available around the world.

Anita Crosland has been in the hair and beauty industry for 27 years, working in spas, salons and health farms. She taught for 17 years and was an External Quality Assurer, examiner and consultant before she came to City & Guilds as Beauty Therapy Product Manager in 2007.

Sally Biles has worked in the beauty industry for over 17 years as a therapist, spa manager, college lecturer and trainer, gaining experience and knowledge. Sally currently works at The Sanctuary in Covent Garden and is responsible for training and treatment development.

Janice Brown has 25 years' experience in the beauty industry, covering a wide range of roles, including sales representative, FE lecturer and company trainer. She is the co-author of the Encyclopedia of Hair Removal and currently director of the House of Famuir Ltd.

# Meet the contributors (continued)

### Level 3 NVQ/SVQ Beauty

Lisa Fulton has been International Training Manager for Fake Bake for the last six years, during which time she's seen the brand grow to become a world leader. As well as teaching in 38 colleges, her job allows her to travel the world working on TV ads, catwalk shows and pop videos. She's even tanned royalty!

Leslie Lyon began her career in the beauty industry over 25 years ago and today works as a consultant, educator, speaker, columnist and freelance writer. Leslie is also the President of Spas2b Inc, a full-service spa development, consulting and training company based in Ontario, Canada.

**Dean Nathanson** is the co-founder and Managing Director of CACI International, a leading supplier of electro-therapy equipment. They have received numerous awards and now supply systems to more than 30 countries and over 5000 clinics and spas in the UK.

Adele O'Keefe is Head of Hairdressing, Beauty and Holistic Therapy at Bolton Community College. She is the author of numerous resources. including textbooks and SmartScreen, and has been a City & **Guilds External Quality** Assurer and examiner for over 20 years.

**Kym Menzies-Foster** became a beauty therapist 15 years ago. Her first job was in a salon where she assisted make-up artists. Kym soon became a make-up artist too, working on fashion shows, magazines and music videos, with celebs like Naomi Campbell, Pixie Lott and Alesha Dixon.

Narendra Mehta developed his own unique therapy of Indian head massage (Champissage). He has been working for over 10 years as a physical therapist and has been running Indian head massage (now known as Indian Champissage) courses for several years.

**Lorraine Nordmann** has worked in the beauty therapy industry for 27 years. She currently teaches at Hugh Baird College, Liverpool. Lorraine is a published author, and has been a City & Guilds External Quality Assurer for 17 years. She is an active member of the Habia Beauty Therapy Standards Committee.

Sally Penford has worked in spas and ran her own skin therapy business before moving into teaching. She is the **Education Manager** for The International Dermal Institute and Dermalogica and manages a team of over 60 dedicated professionals.

Natalie Roche is managing director of Skin Solutions UK Ltd, the UK distributor for Xen-Tan, a self-tanning range sold in salons throughout the UK. Natalie educates self-tanners on how to get the best out of their products.

Bharti Vyas
revolutionised the
industry 25 years ago
by combining holistic
and beauty therapies.
In 1997, Bharti
developed her Ultimate
Therapy System, which
was soon adopted by
many companies. She
recently appeared
on The Salon and
The Clothes Show.

Bobbi Brown's career began with a B.F.A. in theatrical make-up. She later moved to New York to become a make-up artist, where she did work for Vogue and Cosmopolitan. Bobbi revolutionised the industry with her natural approach to make-up. Today she also creates runway looks for New York Fashion week.

Val Ross is a skin camouflage specialist. She works throughout the UK and in private consultation in Harley Street, taking referrals from dermatologists and consultants. She gives demonstrations, talks and workshops to a variety of audiences and is one of the foremost practitioners in this specialised field.

Elaine Stoddart has worked in the industry as a therapist, salon owner, college lecturer and author. She now leads a team of ten regional trainers in her role as director of training for Sterex, the leading epilation needle manufacturer.

Sally Watkins first became interested in the holistic side of the industy while travelling around Australia and Indonesia. After retraining and working for a large health club and from home, she set up the Eve & Adam Day Spa, in St Albans, in 2003 – an aesthetic and holistic haven from the stresses of daily life!

I began my career with an interest in beauty therapy. In time I went on to study anatomy, nutrition and massage techniques, such as lymphatic drainage, and also travelled to China to learn about acupuncture. My experience in all these areas helped me enormously as I moved on to establish my own salon and devise the facial treatments that have made me famous.

A few words from the beauty experts

A person's skin is a mirror of their body's physical and mental state and it can be affected by a range of dietary and environmental factors. It is important to encourage wellbeing in all areas of your clients' lives. I also believe that many women do too much to their skin. For me, less is definitely more and when a moisturiser is required it should not only hydrate but also protect against the rigours and damage of modern life. The minimalist regime I recommend works for all skin types and places a strong emphasis on cleansing and exfoliation.

I don't profess to have any miracle beauty cures. I believe beauty demands commitment.

**Eve Lom** Beauty therapist and businesswoman

As a working make-up artist in New York, I found that I could never find the right shades of foundation, or the perfect lip colour to use on models. So I started mixing my own lip colour. The models loved it, and before I knew it, I'd developed a range of 10 lipstick shades.

I believe true beauty is simple and achievable. Make-up is a way for a woman to look and feel like herself, only prettier and more confident. My beauty secret is to focus on what you like about yourself, instead of what you don't like. Self-confidence is the key – it makes a person glow from within.

The philosophy that permeates both my business and my personal life is that it's important to achieve and maintain balance, cultivate a positive outlook, and love yourself the way you are. You should never underestimate the value of always being on time, looking people in the eye, telling the truth, not smoking, drinking lots of water, exercising, eating healthily, reading, being nice and never giving up.

I also believe in keeping things simple, straightforward and organised – it's the only way I'm able to juggle work, family and home. As a result, the products I've created over the years have always been easy to use and always flattering. After all, who has the time to fuss in front of the mirror?

**Bobbi Brown** Make-up artist and businesswoman

When I first started working in beauty therapy, I wasn't aware of all the opportunities it would hold for me but I made sure I kept learning and furthering my knowledge from day one. Now, some 30 years later I own three successful salons, have my own product range, have written several books, have a website and am the skin care consultant to Tesco. I have earned a very decent living from beauty therapy but it also gives me enormous satisfaction to know that my therapies have really helped people.

When I first began, many people saw beauty therapy as a profession for those who were a bit dim or couldn't do anything else. However, today it is acknowledged that beauty therapists play a vital role in helping people take control of their health and wellbeing. By applying the knowledge you learn and truly understanding how and what changes you want to create for your client, you will bring them long-term and enriching benefits.

It's a wonderful and rewarding profession and one that you should be proud of entering. From a basic starting point, you can continue to add to your skills and develop your therapeutic repertoire. Knowledge is power and it can open up a personal and financial world of opportunities for you.

Bharti Vyas

Beauty therapist, author and businesswoman

My career in beauty therapy started with an evening make-up course, which I enjoyed so much that I gave up my job to do a full-time course. During my second year, I started working part-time in a local salon, which led to a permanent position. Working in a salon, I loved making the beauty area into a welcoming cocoon for clients and getting to choose the product houses I wanted to work with. As part of a well-respected chain of salons, it was also a great opportunity to meet some of the big names in the industry.

I carried on training and adding to my skills so when the opportunity came to teach an evening class at the local college I felt confident to go ahead. I discovered my passion was in teaching and moved into it full time.

If you are prepared to work hard and give a little extra there are so many opportunities out there. I've done consultancy work and been an examiner for awarding bodies as well as helping to develop new product lines. Three years ago I gained my present post as an Advanced Practitioner at Bedford College, where my role involves mentoring new lecturers.

The industry never stands still. I'm constantly learning new skills and techniques and no two days are ever the same. When I'm asked what I do, I'm really proud to say that I'm a beauty therapist!

**Melissa Peacock**Beauty therapist and tutor

# Image courtesy of Dermalogica

# Welcome to your City & Guilds Candidate Logbook. It is designed to help you work towards your beauty therapy qualification, by:

showing you what you need to achieve

helping you to record your achievements and evidence.

Introduction and useful words

In this logbook, you will find the forms that you and your assessor will use for your NVQ/SVQ. You'll also find helpful pictures, hints, tips and more from leading people in beauty therapy – all designed to make the qualification simple to understand and more fun to do!

We're sure that you will have lots of questions about your qualification, and this introduction should answer some of them. Of course, your assessor should also be on hand to explain things and be your guide, but here are the answers to the main questions you may have at this early stage.

# What qualification am I doing?

The Level 3 NVQ Diploma in Beauty Therapy. NVQ stands for National Vocational Qualification. 'Vocational' means that the work you do for this qualification is mainly about practical beauty therapy skills and real work activities. 'Diploma' refers to the size of the qualification that you are doing (see 'What do I need to achieve?', below). If you are in Scotland you may be doing the SVQ (Scottish Vocational Qualification).

# What do I need to achieve?

Your NVQ/SVQ is divided into 'units'. Each unit covers a different area of your work as a beauty therapist. There are **two** core units that you must complete (called 'core' mandatory units). If you follow the Beauty Therapy general route you must also complete **four** more mandatory units and at least **ten** credits from the optional group. If you follow the Beauty Therapy massage route you must complete **four** more mandatory units and **seven** credits. If you follow the Beauty Therapy make-up route you must complete **two** more mandatory units and at least **twenty** credits from the optional group. You can choose your optional units from a list of **fourteen**. This means you can follow your interests and the needs of the salon where you are working. You can find the complete list of units on pages 22–23.

# What's in a unit?

There are three main parts:

What you must do

What you must cover

What you must know

You need to achieve all three of these parts to complete the unit. The 'What you must do' part has a number of 'outcomes'. These cover different aspects of practical work you'll do for the unit. They are linked, so you can usually work towards all of the outcomes at once.

# Who decides what I need to achieve?

There are two organisations involved in creating your qualification.

1 Habia (Hairdressing and Beauty Therapy Industry Authority) Habia works with a group of experts in the beauty therapy industry to decide the skills and knowledge you need at Level 3. Habia then writes 'standards' to describe all the different things that you must be able to do, and these are what your NVQ/SVQ is based on.

# 2 City & Guilds

Habia passes the standards it has written to City & Guilds and City & Guilds decides how the standards will be assessed. City & Guilds is an 'awarding organisation', which means that it checks that you are assessed correctly and fairly and provides you with your certificate once you've achieved your NVQ/SVQ.

# Who will decide whether I have achieved the standards?

In an NVQ/SVQ you are either 'competent' or 'not yet competent'. This means that if you have not quite got everything right when you do something, you will have a chance to do it again after more practice – remember, practice makes perfect! There are a number of people who will help to decide when you are competent:

### 1 Your assessor

A person who is very experienced in the area of work that you are training in. This will probably be your tutor, or it may be a supervisor or manager in your salon. Your assessor will be overseeing your work towards the qualification on a day-to-day basis.

### 2 Internal Quality Assurer (IQA)

A person within your centre who checks that all the assessments made by the assessors are carried out to the correct standards.

## 3 External Quality Assurer (EQA)

An expert from City & Guilds who visits your centre to check that all the assessments are correct and to the same standard as those made in other centres. This ensures that you're not working to a higher or lower level than candidates in other centres. External Quality Assurers also check that your centre is operating the qualification properly and fairly and has all the systems and equipment in place for your NVQ/SVQ.

# mage courtesy of Guinot

# What steps will I need to take to complete my qualification?

Introduction and useful words

There are four main steps:

(continued)

# **Step 1 Planning**

Your assessor will tell you about the units that you're going to be doing and will talk about how to approach them. Your assessor will want to find out if you have any experience of working in beauty therapy, because it may count towards your award. At the end of this discussion, you should have an 'assessment plan', which sets out how you will go about achieving the award.

## **Step 2 Producing evidence**

You will produce your 'evidence'. You will find out much more about this later, but 'evidence' for an NVQ/SVQ consists of:

being observed by your assessor

being asked questions by your assessor

keeping documents, eg work logs or client records

for some units, doing a written or online test.

You will keep all this evidence in a portfolio.

## **Step 3 Feedback**

You will regularly be given feedback by your assessor and you will receive further training if you need it. If your assessor tells you that you are competent after an assessment, it will be recorded on the forms in your logbook. You will need to keep track of how much you have achieved and what you have still to achieve, but don't worry as you will discuss your progress with your assessor on a regular basis. You can also use the 'Tracking your progress' form on pages 18–21 to help you.

### **Step 4 Achievement**

When you have completed your units and your assessor is sure that you have all the evidence that you need, your centre will apply to an awarding organisation such as City & Guilds for your certificate. You will receive the full qualification certificate only if you have completed all the required units, with the required number of credits. Otherwise, you will receive a certificate listing the units you have achieved. Your centre will give you your certificate as soon as it is received from the awarding organisation.

# How long will it take?

There is no time limit set by City & Guilds for you to complete your NVQ/SVQ but your centre may have some requirements that they will explain to you. Many candidates complete the Level 3 NVQ/SVQ qualification within 12 months.

# Where do I go if I need more information about my assessments and qualification?

The most important sources of information you are likely to need are listed below.

Your tutor/assessor is the most important source of information about your qualification.

Your centre's student handbook or prospectus

On very rare occasions if you disagree with an assessor's decision, you should use your centre's appeals procedure. Ask an assessor or your Internal Quality Assurer (IQA) to help you if you are unsure of how to do this. Your centre will refer any unresolved problems to City & Guilds.

Your centre's website. Make a note of the address here:

The City & Guilds website (www.cityandguilds.com) or City & Guilds Customer Relations (01924 930800)

The Habia website (www.habia.org.uk)

# Introduction and useful words (continued)

# What do these words mean?

Here are some words that you may hear over the course of doing your NVQ/SVQ. You may want to refer back to this page if you hear a word and can't remember what it means.

Assessment plan An action plan set by you and your assessor at the beginning of your course and then updated as you progress through your assessments. It shows the order in which you are going to work towards all the units. It has key dates for collecting evidence for the units and for reviewing your progress and explains who will assess you, what type of assessment will be used and when and where the assessments will take place.

**Assessor** A person qualified and experienced in beauty therapy who will help you plan your work and assessments and organise your evidence. Your assessor will be responsible for judging if you are competent and will give you feedback.

**Awarding organisation** An approved organisation that issues certificates that are recognised by places of education and employers. For Beauty Therapy Level 3, your awarding organisation is City & Guilds.

**Candidate** A person working towards a qualification, ie yourself.

Candidate appeals procedure A system within a centre designed to help you have your evidence checked again if you disagree with the outcome of an assessment. Your centre will explain this procedure to you when you start. You may also find out at any time by asking your assessor or Internal Quality Assurer.

**Centre** A place where training and/or assessment towards qualifications is carried out, which may be a college, training centre or work place. Only 'approved centres' that meet strict standards can offer City & Guilds qualifications.

**City & Guilds** An awarding organisation for beauty therapy and many other qualifications. City & Guilds checks and approves centres, sets and monitors assessment and issues certificates to candidates who complete its qualifications. City & Guilds is the UK's leading vocational awarding organisation and has over 8500 centres in 100 countries offering awards in over 500 areas of work. In 2008 it awarded almost 4500 Level 3 Beauty Therapy certificates in the UK. See www.cityandguilds. com for more information.

**Competent** This means being able to do your work well. You are competent in an NVQ/SVQ when you show that you can work consistently to the required standards in a real work situation and that you know and understand the correct way to do your job.

**Evidence** Generally speaking, this is something that builds towards proof of your competence. In an NVQ/SVQ, such as beauty therapy, you need to collect evidence to show you are competent at your work. There are different kinds of evidence, ranging from your assessor observing your work to a written test. Each unit spells out the kinds of evidence you need to collect.

**External Quality Assurer (EQA)** An expert from City & Guilds who visits centres to check that all assessment is carried out correctly and to the same standard. They also check that your centre is operating the qualification properly and fairly and has all the systems and equipment in place for your NVQ/SVQ.

Habia (Hairdressing & Beauty Therapy Industry Authority) The government-approved standards setting body for hairdressing, beauty therapy and related areas. The standards for your Level 3 Beauty Therapy NVQ/SVQ (the lists of 'What you must do', 'What you must cover' and 'What you must know') were created by the experts at Habia.

**Internal Quality Assurer (IQA)** Someone in your centre who ensures that assessment is carried out correctly and that accurate records are kept.

**Maximum service time** The time specified by Habia in some units within which the practical work must be completed in order to be judged as competent. These times are included in each unit of your logbook, and a full list is on page 300.

**Modification** This is any way it is necessary to adapt a service according to the client's treatment requirements identified at consultation. Your assessor will need to witness this action taken.

**NVQ/SVQ** National Vocational Qualifications and Scottish Vocational Qualifications. These awards are based on real work activities. To gain an NVQ (or in Scotland an SVQ) you need to show that you have the skills and knowledge to do your job effectively by meeting the National Occupational Standards, such as those created by Habia for beauty therapy.

**Observation** Generally speaking, this means to watch or pay attention to something in great detail. For this award, it is one of the main types of evidence. Your assessor will watch you work, and judge whether you consistently meet the national standards. They will then give you feedback and an updated assessment plan.

**Outcome** A specific practical work activity that you need to achieve. Each unit is made up of between two and six outcomes.

**Portfolio** The place where you keep all the evidence you collect to show that you are competent. Usually this is a binder where you can put the hole-punched sheets of this logbook. Your portfolio needs to be clearly organised and all your evidence referenced to the units.

**Range** This term is sometimes used for the things listed in the 'What you must cover' part of the unit. You can tick these areas in your logbook following guidance from your assessor to record the work you cover when being assessed.

**Simulation** A copy of events, rather than the actual events. Evidence for most Level 3 units must come from real work, and not simulation.

**Standards (National Occupational Standards)** These describe the things that an employee, or a potential employee, must be able to do consistently in a work situation as well as the things that they must know and understand to do their job role competently. Habia sets the standards for beauty therapy.

Unit (mandatory and optional) The main building blocks of your award; each unit describes one aspect of your work. In the Beauty Therapy NVQ/SVQ Level 3 there are three 'core' mandatory units, which means you must achieve them. There are also a number of additional mandatory units, depending on which route you take (ie general, massage or make-up). You will also have to choose one or more optional units and achieve these.

**Vocational** An NVQ/SVQ is a vocational award because it's based on skills and knowledge that you need in order to work and build a career in beauty therapy.

**What you must do** Sometimes referred to as 'performance criteria'. Your assessor will complete the 'What you must do' areas of your logbook when your work is competent.

Witness statement A witness is someone who testifies that something happened and comments on it. For some units in this award, a witness statement can be used as evidence. A witness may be a client, a colleague, a manager other than your assessor, or someone else qualified to testify about your work. Your assessor will tell you when a witness statement may be used and will explain how it should be written.

# Summary of unit achievement

By signing this summary of unit achievement we are confirming that all the performance criteria, ranges and essential knowledge and understanding requirements for these units have been completed and that the evidence is authentic and has been obtained under specified conditions for which certification is now requested.

Candidate name:

# Tracking your progress

### Level 3 NVQ/SVQ Beauty

You may find it useful to keep track of how you're progressing through the units.

On the following four pages, you can tick off when you have achieved:

each observation

each outcome

all of 'What you must cover'

all the 'What you must know'

Once you have ticked this off, you will know you've achieved the unit and your assessor can check and sign. You can refer back to these pages at any time to see which units you have achieved and which still need to be achieved.

Core mandatory units

Complete list of units

(continued)

Each unit has a 'credit' value, where one credit is equal to 10 hours of notional learning time. So, every time you successfully complete a unit, you are awarded the credit (see list above). This means that if you ever wanted to build on your current qualification or change to a different qualification, your credits may count towards this. If you want to know more about what credits mean, ask your assessor.

# Beauty therapist Career planner

Qualified to Beauty Therapy NVQ/ SVQ Level 3 you will carry out the following treatments, depending on your chosen route:

# **General route**

### **Epilation**

Removing hair permanently using a fine probe

### Body massage

Incorporating massage of the body, face and scalp

# Body/facial electrical treatments

Improving the appearance or condition of the body and face

You can also study two optional units from a possible 14.

# **Employment** opportunities

- Self employed
- In a beauty salon
- In a department store
- In hotels, leisure centres and clubs
- In health spas
- On a cruise ship
- In training

# **Massage route**

# Body massage

Massage of the body, face and scalp

# Indian head massage

Massage of the upper body, face and scalp

# Pre-blended aromatherapy massage

Using the benefits of essential oils

## Stone therapy

Using the benefits of heated stones

You can also study two optional units from a possible 14.

# **Employment opportunities**

- Self employed
- In a complementary therapy clinic
- In hotels, leisure centres and clubs
- In a gym
- In health spas
- On a cruise ship
- In training

# Make-up route

# Cosmetic camouflage

Correcting, concealing and disguising imperfections

# Fashion and photographic make-up

Developing artistic make-up skills for photography, catwalk shows and personal appearances

You can also study four optional units from a possible 14.

# **Employment** opportunities

- Freelance work
- In a department store
- For a make-up house
- In the theatre
- On photoshoots
- On television and films
- As a personal make-up artist
- In training

# Meet a fellow student Afshan Islam

Afshan Islam is a 28-year-old Media Make-Up Level 3 student at Sheffield City College. She has also completed Levels 2 and 3 Hairdressing and Level 3 Cosmetic Make-up. Here's what she had to tell us.

'My two passions in life are sport and beauty. Before becoming a make-up artist and hairdresser I taught physical education - I really enjoyed the practical side of teaching, but after I had my children I decided to go back to college to study hairdressing. During the course I opened a womenonly hair salon and I've now also expanded into beauty treatments. The salon caters especially for women who wear headscarves, as it offers an environment in which they can take their scarves off in privacy. Women who wear the headscarf still want to go out and get pampered!

I decided to do the Media Make-Up course to expand on the day-to-day type of make-up usually requested in the salon. It's given me the chance to create high-fashion looks, which are more diverse and vibrant. The best part of the course has been working backstage on catwalk shows and photo shoots. I've really enjoyed recreating looks from different eras, such as the 1940s, which have been inspired by Hollywood stars like Judy Garland.

I was very proud and delighted to hear that I had won the City & Guilds make-up competition. I felt so excited to be working on a model who had won *Britain's Next Top Model!* (Mecia Simson – our Level 3 front cover model.) My colleagues were all really impressed. Eventually I hope to represent myself and my salon as a make-up artist, and to continue developing my unique flair for make-up.'

Make-up by Afshan Islam; Photography by Andrew Buckle

The salon should be a place where both staff and clients can be safe. Potential risks and hazards must be identified and dealt with promptly to avoid accidents. You should familiarise yourself with workplace policies and the health and safety information for all of

the treatments you carry out. As part of your training you will realise why hygiene is so highly regarded in the industry and that the best therapists pay as much attention to reducing risks to health and safety as they do to performing great treatments!

# Unit G22 (City & Guilds Unit 036) Monitor procedures to safely control work operations Core mandatory

Level 3 NVQ/SVQ Beauty

This unit has two outcomes.

Outcome 1 Check that health and safety instructions are followed

Outcome 2

Make sure that risks are controlled safely and effectively

# **Evidence requirements**

The Common Evidence Requirements below are in addition to the ENTO Assessment Strategies approved by UKCG in February 2008.

The standards require evidence of consistent occupational competence, as defined by the standards, to be demonstrated through relevant work activities. A variety of assessment methods should be used to confirm competence. Assessment of knowledge should be integrated with the assessment of performance wherever possible and appropriate.

Monitoring the operation of workplace health and safety procedures is the legal responsibility of all senior staff in a salon, not just that of the manager or proprietor. These responsibilities extend beyond salon staff to all people entering the business eg clients, suppliers, contract cleaners, etc. Therefore, in the context of this unit, 'other people' includes not only other employees, but all those who have a reason to be on salon premises at any time.

Evidence for outcomes relating to 'other people', therefore, may be drawn from a wide base of possibilities eg politely instructing clients to hang coats in the place provided and stow their bags at reception to comply with workplace procedures to avoid obstructions and accidents in salon work areas; briefing a new starter on some aspect of workplace health and safety procedures (Outcome 1e).

All evidence must be derived from performance in the workplace or approved Realistic Working Environment conforming to current Habia criteria.

# What you must do

Your assessor will observe you on at least **one** occasion. You must carry out correctly all the things listed under 'What you must do' on the sign-off sheets that follow. Simulation is **not** allowed for any performance evidence within this unit as the outcomes can be demonstrated by a combination of assessment methods drawn from:

- Direct observation of the candidate in the workplace
- Witness testimony by colleagues and line managers of the candidate's successful performance of activities in the workplace
- Documentary and other product-based evidence
- A personal report by the candidate endorsed by colleagues
- Questions
- Discussion
- Professional discussion

# What you must cover

There is no 'What you must cover' for this unit.

# What you must know

You will be assessed on your knowledge of the points on page 34. This will be completed through written and oral questioning by your assessor, or by an online test.

Safely control work operation

# Useful words

Some terms that you will come across in this unit are explained below.

**Contact dermatitis** A skin condition that can be sore, red and itchy.

**Disinfectant** A chemical solution used to kill the growth of bacteria when cleaning and sterilising tools and equipment in the salon.

**Hazard** Something with the potential to cause harm.

**Hazardous substances** A substance is hazardous if it could cause harm to the person who comes into contact with it. Some of the chemicals or cleaning products used in the salon could harm the skin if they come into contact with it.

**Health and safety legislation** Legally binding acts for reducing the risk of hazards and helping to provide a safe working environment. Refer to www.hse.gov.uk and the glossary on pages 310–311 of this logbook.

**Legal requirements** This affects the way the salon operates, how it is set up and maintained, the salon employees and working practices, eg COSHH.

# **Personal Protective Equipment**

**(PPE)** Equipment available for use in the workplace to protect you from harm and damage, eg gloves and an apron.

**Risk** The likelihood of a hazard occurring, eg if a spillage is left on the floor there is a greater risk of someone slipping.

**Safe working methods** Working in a way that will not increase the risk of someone in your workplace being injured.

**Workplace policy** Your salon will have rules about various procedures relating to health and safety, eg COSHH Regulations referring to the use of chemicals. These policies are often recorded in an employee handbook.

observe your

# Observation sign-off sheet Unit G22 Monitor procedures to safely control work operations What you must do

Within your work, you must show your assessor that you can do the following. Your assessor will

performance on at

least one occasion.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

# Outcome 1

# Check that health and safety instructions are followed

- a Keep up-to-date with health and safety regulations and workplace instructions, making sure that information is from reliable sources
- b Conduct your monitoring of workplaces at agreed intervals and in accordance with workplace instructions
- c Confirm that worker health and safety competence is up-to-date
- d Confirm that the health and safety training needs of other people have been identified and met \*
- e Effectively communicate workplace instructions to other people and obtain feedback from them
- f Respond promptly to any breaches of health and safety instructions in a way which meets workplace and legal requirements \*\*

Continues on next page

# Hints and tips

Make sure you know what the health and safety symbols mean and how they relate to your day-to-day work.

- g Make recommendations for changes to workplace instructions to the responsible people \*\*\*
- h Maintain records relating to health and safety matters that
  - comply with legal and workplace requirements, and
  - are accessible to those who are authorised to use them

Salon promotions are important to generate interest in the salon's products and services. The main objective is to increase salon business, but they are also good for introducing new staff, services and products. Promotional activities are exciting and should be fun for all involved. This unit is about developing the skills required to work with others and take

responsibility for the planning and implementation of promotional activities. You will carry out demonstrations to potential clients, participate in advertising campaigns and create promotional displays. You will also learn how to evaluate promotional activities and make recommendations for future promotions.

### Unit H32 (City & Guilds Unit 048) Contribute to the planning and implementation of promotional activities Core mandatory

Level 3 NVQ/SVQ Beauty

This unit has three outcomes.

**Outcome 1 Contribute to** the planning and preparation of promotional activities

Outcome 2 **Implement** promotional activities

Outcome 3

Participate in the evaluation of promotional activities

### **Evidence Requirements**

You must practically demonstrate in your everyday work that you have met the standards for contributing to the planning and implementation of promotional activities.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

Your assessor will make **one** observation of your performance when planning and implementing promotional activities. In addition, you will need to collect further documentary evidence to show you have met all the requirements of the standards. Although some evidence of your performance will be gathered from the observations made by your assessor, it is likely you will need to assemble relevant documentary evidence in your portfolio to meet the requirements of the standards and qualification.

### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

Undertaken the following types of promotional activities:

**Demonstrations** 

Displays

Advertising campaigns

#### Developed the following objectives:

To enhance salon image

To increase salon business

Image courtesy of Fake Bake

### What you must know

You will be assessed on your knowledge of the following:

Venue and legal requirements

Promotional event planning and preparation

Services and products

Selling skills

Communication techniques

Evaluation techniques

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 45–47.

Promotional activities

### Useful words

Some terms that you will come across in this unit are explained below.

**Demonstration** A physical display that may include explanation or description.

**Display** An arrangement of products and other media to attract attention.

**Evaluation** Measuring how successful or not the promotional activity has been.

**Flier** Advertising leaflet for a promotion.

**SMART objectives** A management acronym to describe how objectives should be written and planned: Specific, Measurable, Achievable, Realistic, Timebound.

**Target group** The clientele you are trying to attract into the salon. For example, a promotional activity to increase single eyelash extension treatments would probably be aimed at female clients.

**Timebound** An activity or objective that has set dates for tasks to be completed or started by.

**Venue** The place where a promotional event is held; it might be at the local theatre, for instance.

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will observe your performance on at least one occasion. In addition, you will need to collect further documentary evidence to show you have met all the requirements of the standard.

# Sign-off sheet Unit H32 Contribute to the planning and implementation of promotional activities What you must do

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

#### Outcome 1

### Contribute to the planning and preparation of promotional activities

- a Make recommendations to the relevant person for suitable **promotional activities** and identify the potential benefits for the business
- b Identify and agree specific, measurable, achievable, realistic and timebound **objectives** and target groups for the activity with the relevant person(s)
- c Agree requirements for the activity with all relevant persons in sufficient detail to allow the work to be planned
- d Produce an agreed plan showing the
  - type of promotional activity
  - objectives of the activity
  - roles and responsibilities of others involved
  - resource requirements
  - preparation and implementation activities
  - timescales
  - budget
  - methods of evaluation
- e Agree a plan that takes into account any legal requirements, when necessary
- f Ensure resources are available to meet the planned timescale

Date

Candidate signature

Assessor signature

IQA signature
(if sampled)

EQA signature
(if sampled)

#### Outcome 2

#### Implement promotional activities

- a Implement promotional activities to meet the agreed plan
- b Effectively adapt promotional activities, when necessary, in response to changed circumstances and/or problems \*
- c Use resources effectively throughout the promotional activities
- d Clearly and accurately communicate the essential features and benefits of products and services to the target group
- e Use methods of communication that are suitable for the type of **promotional activity** being undertaken
- Present information in logical steps
- g Encourage the target group to ask questions about the services and products being promoted
- h Respond to questions and queries in a way which promotes goodwill and enhances the salon image
- Actively encourage the target group to take advantage of the services and products being promoted
- Clear away products and equipment at the end of the promotional activity, when necessary, to meet the requirements of the venue

**Promotional activitie** 

Make-up promotions are always very popular with potential clients.

### Knowledge sign-off sheet

## Unit H32 Contribute to the planning and implementation of promotional activities

### What you must know

Yo	u need to understand:	Evidence type
14	the importance of working to a budget	E3
15	where and how to obtain resources	E3
16	the importance of clearly defining the roles and responsibilities of those involved in promotional activities	E3
17	the importance of allocating roles and responsibilities to match an individual's competence levels	E3
18	the importance of gaining an individual's commitment and agreement to undertake a role in the promotional activity	E3
19	the types of foreseeable problems that occur and ways of resolving them	E3
Se	rvices and products	
20	the features and benefits of the products and/or services being promoted	E3
Se	lling skills	
21	how to recognise buying signals and to close sales	E3
22	the difference between the features of a product or service and the benefits of a product or service	E3
23	how to tailor your presentation of the benefits of products and/or services to meet individual needs and interests	E3
Со	mmunication techniques	
24	how and when to participate in discussions	E3
25	how to give a short presentation (eg timing, pace, use of voice, use of graphics, etc)	E3
26	methods of presenting information (eg pictorially, graphically, verbally)	E3
27	methods of creating a visual impact	E3

#### Hints and tips

When helping to run a salon promotion, ensure that everyone understands what is expected of them during the event.

**Promotional activities** 

#### Hints and tips

Let the client hold the product and encourage them to smell it. Put a small amount on the back of their hand so they can feel the texture.

66

It's much more efficient to keep the clients you have than seek out new ones. Keep clients excited by always sampling new services and products. Sally Penford

"

## Supplementary notes *Unit H32*

Level 3 NVQ/SVQ Beauty			
Your assessor may use this space fo comments they may have about you			
Comment		Date	
Unit sign-off			
This section must be signed when the We confirm that this evidence is autoassessments were conducted under and that all the performance criteria knowledge requirements have been	hentic and the r specified conditions a, range and essential		
Candidate signature	Date

EQA signature (if sampled)	Date		

Body electrical treatments can be used to relax the client or improve the body's appearance, via toning, firming or slimming.
The equipment may be 'electrical', whereby a current has specific effects on the body, or it may be 'mechanical', whereby the

current is used purely to power the machine. In this unit you will learn how to diagnose body type and condition, and choose a treatment to achieve what the client wants. Soon you'll be making your clients look and feel fantastic!

# Unit B13 (City & Guilds Unit 016) Provide body electrical treatments Mandatory (General route)

Body electrical treatments

### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing body electrical treatments.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **five** separate occasions, involving at least **three** different clients.

### This unit has four outcomes.

Outcome 1
Maintain safe and
effective methods
of working when
providing body
electrical treatments

Outcome 2 Consult, plan and prepare for treatments with clients

Outcome 3
Carry out body
electrical treatments
Outcome 4
Provide aftercare
advice

66

I love any treatments which involve lymphatic drainage, as it's the best way to flush out the skin toxins, and really see a difference.

Eve Lom

# Unit B13 (City & Guilds Unit 016) Provide body electrical treatments Mandatory (General route) (continued)

Level 3 NVQ/SVQ Beauty

### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

### Used all of the following types of equipment:

Galvanic unit

Electro muscle stimulator (EMS)

Micro-current unit

Lymphatic drainage equipment

Micro-dermabrasion unit

#### Used all of the following consultation techniques:

Questioning

Visual

Manual

Reference to client records

### Treated all of the following body types:

Endomorph

Mesomorph

Ectomorph

### Treated all of the following body conditions:

Cellulite

Poor muscle tone

Sluggish circulation

Uneven skin texture

### Carried out at least one of the three necessary actions \*

Encouraging the client to seek medical advice

Explaining why the treatment cannot be carried out

Modification of treatment

\*However, you must prove to your assessor that you are able to deal with the other two.

### Met all of the following treatment objectives:

Improved skin and body condition

Improved contour and muscle condition

### Provided all of the following types of advice:

Avoidance of activities which may cause contra-actions

Future treatment needs

Modifications to lifestyle patterns

Healthy eating and exercise advice

Suitable homecare products and their use

To get the best results from a treatment system, think of it as part of yourself. Use your own expertise and training to personalise treatments according to your client's needs.

Dean Nathanson

### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing body electrical treatments

Client consultation

Anatomy and physiology

Contra-indications and contra-actions

Equipment and products

Treatment specific knowledge

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 64–70.

**Body electrical treatments** 

### Useful words

Some terms that you will come across in this unit are explained below.

**Adipose tissue** The layer of fat cells, otherwise known as the subcutaneous layer.

**Body galvanic** This uses the principle of iontophoresis to introduce beneficial substances into the skin. In the case of body treatments the substance will usually be diuretic, to help reduce the appearance of cellulite.

**Body micro-current** An electrical treatment used in various ways to lift and firm body contours.

**Cellulite** Congested tissue, cold to the touch, with a dimply orange peel appearance, often found on hips, thighs, insides of knees, and upper arms.

**Ectomorph** The body type where the limbs are long and slender, and weight gain is uncommon.

**Electrical muscle stimulator** A treatment used to tighten and tone muscles, giving a lifting and slimming effect. Electrical muscle stimulator is used to stimulate motor nerves and muscles. It is sometimes also called body faradic.

**Endomorph** The body type where the limbs tend to be short and the hips wider than the shoulders. Weight gain is common.

**Iontophoresis** A treatment using a direct galvanic current where the selected product is 'pushed' into the skin using a charged electrode.

**Lifestyle patterns** Habits including smoking, alcohol intake, sleeping, relaxation and exercise patterns, and diet and fluid intake.

**Mesomorph** The body type where the shoulders tend to be wider than the hips, and muscle tone is usually well developed.

**Micro-dermabrasion** Mechanical exfoliation using a high speed flow of crystals.

# Observation sign-off sheet Unit B13 Provide body electrical treatments What you must do

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will observe your performance on at least five separate occasions. You must involve at least three different clients.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

#### Outcome 1

### Maintain safe and effective methods of working when providing body electrical treatments

- a Set up and monitor the treatment area to meet organisation procedures and manufacturers' instructions
- b Wear suitable personal protective **equipment**, when necessary
- c Make sure that environmental conditions are suitable for the client and the treatment
- d Ensure your personal hygiene, protection and appearance meet accepted industry and organisational requirements
- e Effectively disinfect your hands prior to treatment
- f Ensure your own posture and position minimises fatigue and risk of injury whilst working
- g Ensure all tools and **equipment** are cleaned using the correct methods

Continues on next page

66

Further reading and research on electro-therapy will give you extra knowledge, so you can give your clients extra value for money.

Bharti Vyas

- h Position **equipment** and products for ease and safety of use
- i Ensure the client is in a comfortable and relaxed position suitable for the treatment
- j Maintain accepted industry hygiene and safety practices throughout the treatment
- k Adopt a positive, polite and reassuring manner towards the client throughout the treatment
- I Maintain the client's modesty, privacy and comfort at all times
- m Check the client's wellbeing at regular intervals according to organisational policy
- n Dispose of waste materials safely and correctly
- o Ensure the treatment is cost-effective and is carried out within a commercially viable time
- p Ensure client record cards are up-to-date, accurate, complete, legible and signed by the client and practitioner
- q Leave the treatment area and **equipment** in a condition suitable for future treatments

#### Hints and tips

Look at your client's underlying body type to gauge the realistic outcome of a course of treatments.

#### Outcome 2

### Consult, plan and prepare for treatments with clients

- a Use **consultation techniques** in a polite and friendly manner to determine the client's treatment needs
- b Ensure that informed and signed parental or guardian consent is obtained for minors prior to any treatment \*
- c Ensure that a parent or guardian is present throughout the body electrical treatment for minors under the age of 16 \*\*
- d Obtain signed, written informed consent from the client prior to carrying out the treatment
- e Clearly explain to the client what the treatment entails in a way they can understand
- f Encourage clients to ask questions to clarify any points
- g Ask your client appropriate questions to identify their medical history, **body type**, **body condition** and lifestyle pattern
- h Ask your client appropriate questions to identify if they have any contra-indications to body electrical treatments
- i Accurately record your client's responses to questioning
- Take the **necessary action** in response to any identified contra-indications \*\*\*
- k Ensure client **advice** is given without reference to a specific medical condition and without causing undue alarm and concern \*\*\*\*

- I Correctly carry out thermal and tactile tests to accurately determine the client's skin response to heat and pressure stimuli
- m Accurately carry out a test patch, if necessary, to determine skin sensitivity and to avoid adverse reactions
- n Recommend alternative treatments which are suitable for the client's **condition** and needs if contra-indicated for body electrical treatments \*\*\*\*\*
- o Clearly explain and agree the projected cost, likely duration, frequency and types of treatment needed
- p Agree in writing the client's needs, expectations and **treatment objectives**, ensuring they are realistic and achievable
- q Ensure that the client's skin is clean and prepared to suit the type of **equipment** to be used
- r Select suitable **equipment** and related products to suit the **treatment objectives**

### Outcome 3

#### **Carry out body electrical treatments**

- a Clearly explain the sensation created by the **equipment** being used
- b Explain the treatment procedure to the client in a clear and simple way at each stage in the process
- c Safely use the correct treatment settings, applicator and accessories on the body throughout the treatment in accordance with manufacturers' instructions
- d Adjust the intensity and duration of the treatment to suit the client's **body type** and **condition** and the areas of the body being treated
- e Take prompt remedial action if the client experiences discomfort or contra-actions
- f Apply a suitable post-treatment product to the treated area, if required
- g Ensure the finished result is to the client's satisfaction and meets the agreed treatment objectives

Level 3 NVQ/SVQ Beauty

# Knowledge sign-off sheet Unit B13 Provide body electrical treatments What you must know

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a cross-unit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

Yo	u need to understand:	Evidence type
Or	ganisational and legal requirements	
1	your responsibilities under current health & safety legislation, standards and guidance eg the Health & Safety at Work Act (and any other relevant legislation)	E3
2	the importance of not discriminating against clients with illnesses and disabilities and why (eg Disability Discrimination Act)	E3
3	the age at which an individual is classed as a minor and how this differs nationally	E3
4	why it is important, when treating minors under 16 years of age, to have a parent or guardian present	E3
5	why minors should not be given treatments without informed and signed parental or guardian consent	E3
6	the legal significance of gaining signed, informed client consent to treatment	E3
7	manufacturer's and organisational requirements for waste disposal	E3
8	the importance of the correct storage of client records in relation to the Data Protection Act	E3
9	how to complete the client records used in your organisation and the importance of, and reasons for, keeping records of treatments and gaining client signatures	E3
10	your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisation requirements	E3
11	the organisation's requirements for client preparation	E3

Body electrical treatments

Yo	u need to understand:	Evidence type
12	your organisation's service times for body electrical treatments	E3
13	your organisation's and manufacturers' requirements for treatment area, equipment maintenance and equipment cleaning regimes	E3
	w to work safely and effectively when providing dy electrical treatments	
14	how to set up the work area for bodyelectrical treatments	E3
15	the necessary environmental conditions for body electrical treatments (including lighting, heating, ventilation and general comfort) and why these are important	E3
16	the type of personal protective equipment that should be worn for micro-dermabrasion treatments and why (eg powder-free nitrile or powder-free vinyl gloves)	E3
17	the importance and reasons for disinfecting hands and how to do this effectively	E3
18	how to position yourself and the client for body electrical treatments	E3
19	reasons for maintaining client modesty, privacy and comfort during the treatment	E3
20	why it is important to maintain standards of hygiene and the principles of avoiding cross-infection	E3
21	why it is important to check the client's wellbeing at regular intervals	E3
Cli	ent consultation	
22	why it is important to encourage and allow time for clients to ask questions	E3
23	how to use effective consultation techniques when communicating with clients from different cultural and religious backgrounds, age, disabilities and gender for this treatment	E3
24	the importance of questioning clients to establish any contra-indications to body electrical treatments	E3
25	why it is important to record client responses to questioning	E3

## Knowledge sign-off sheet Unit B13 Provide body electrical treatments

### What you must know (continued)

Level 3 NVQ/SVQ Beauty

### Hints and tips

Make sure you use the correct amount of medium when applying the equipment. Too much will act as an insulator and the treatment will not be successful; too little and you risk damaging the client's skin.

Yo	u need to understand:	Evidence type
26	the legal significance of client questioning and recording the client's responses	E3
27	how to give effective advice and recommendations to clients	E3
28	how to work out body mass index (BMI)	E3
29	how to visually assess muscle tone	E3
30	how to assess body fat and fluid retention	E3
31	how to assess posture	E3
32	how to assess skin type	E3
33	the reasons why it is important to encourage clients with suspected contra-indications to seek medical advice	E3
34	the importance of, and reasons for, not naming specific contra-indications when encouraging clients to seek medical advice	E3
35	why it is important to maintain client's modesty and privacy	E3
36	the characteristics of different body types and body conditions (eg endomorph, ectomorph and mesomorph, cellulite, poor muscle tone, uneven skin tone and sluggish circulation)	E4
37	the importance of using electrical treatments in conjunction with other treatments, healthy eating and exercise to maximise results	E3
38	the types of treatments that could be given in conjunction with, or after, body electrical treatments	E3
39	the types of alternative treatments which could be recommended in the event of contra-indications to electrical treatments	E3

You need to understand:	Evidence type
40 structure and function of the skeleton	E4
41 the structure and function of muscles, including the types of muscles (ie voluntary and involuntary)	E4
42 the effect of exercise on muscle tone and how it can vary	E4
43 the positions and actions of the main muscle groups in the part of the body specified in the range (ie Deltoid, Biceps, Triceps, Brachialis, Radialis Trapezius, Latissimus Dorsi, Erector Spinae, Pectorals, Intercostals, Diaphragm, Rectus Abdominis, Obliques, Gluteals, Hamstrings, Quadriceps Extensor, Abductors, Adductors of upper leg, Gastrocemius, Soleus, Tibialis Anterior)	E4
44 the definition of 'origin' and 'insertion' of a muscle	E4
45 the causes of muscle fatigue and how to recognise it	E4
46 the basic structure and function of skin (ie the layers of the epidermis, subcutaneous layer, the dermis, including connective tissues, nerve endings, sweat glands, sebaceous glands, capillaries and hairs)	E4
47 the skin characteristics and skin types of different ethnic client groups	E4
48 the structure, location and the body's utilisation of adipose tissue	E4
49 the function of the endocrine system and its relationship to weight gain and loss	E4
50 the function of the digestive system	E4
51 the basic principles of healthy eating	E4
52 how ageing affects the body and skin	E4
53 how age limits the effectiveness of the treatment	E4
54 the function of blood and the principles of circulation, blood pressure and pulse	E4
55 the structure and function of the heart and arteries, veins and capillaries	E4
56 how to identify erythema and its causes	E4

Body electrical treatments

### Hints and tips

Always check the intensity dials are at zero before treatment, to ensure client comfort and avoid accidental current transference.

Everyone wants clear, fresh-looking skin, but only some people are lucky enough to have it naturally. This unit will teach you how to choose the best equipment to help rectify any skin problems your client may have, from true deep-cleansing comedone

removal on an oily skin, to reducing the appearance of lines and wrinkles for a mature client. You will also be able to recommend the best products and lifestyle advice to help the client to maintain your professional results!

# Unit B14 (City & Guilds Unit 017) Provide facial electrical treatments Mandatory (General route)

Facial electrical treatments

#### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing facial electrical treatments.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

#### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **five** separate occasions, involving at least **three** different clients.

#### This unit has four outcomes.

Outcome 1
Maintain safe and
effective methods
of working when
providing facial
electrical treatments

Outcome 2
Consult, plan
and prepare for
treatments with
clients

Outcome 3
Carry out facial
electrical treatments
Outcome 4
Provide aftercare
advice

66

Galvanic electro-therapy is ideal for clearing and deep cleansing the skin by desincrustation.
Janice Brown

"

# Unit B14 (City & Guilds Unit 017) Provide facial electrical treatments Mandatory (General route) (continued)

Level 3 NVQ/SVQ Beauty

#### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

## Used all of the following types of tools and equipment:

Direct high frequency unit

Galvanic unit

Electro muscle stimulator

Micro-current unit

Lymphatic drainage equipment

Micro-dermabrasion unit

Micro-lance

#### Used all of the following consultation techniques:

Questioning

Visual

Manual

Reference to client records

#### Treated all of the following skin types:

Oily

Dry

Combination

## Treated all of the following skin conditions:

Sensitive

Mature

Dehydrated

Congested

## Carried out at least one of the following necessary actions \*:

Encouraging the client to seek medical advice

Explaining why the treatment cannot be carried out

Modification of treatment

\*However, you must prove to your assessor that you are able to deal with the other two.

## Met all of the following treatment objectives:

Improved skin condition

Improved contour and muscle condition

Improved skin texture

## Provided all of the following types of advice:

Avoidance of activities which may cause contra-actions

Future treatment needs

Modifications to lifestyle patterns

Suitable homecare products and their use

Correctly maintain and store equipment to prevent crystals from contamination or absorbing water.

#### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing facial electrical treatments

Client consultation

Anatomy and physiology

Contra-indications and contra-actions

Tools, equipment and products

Treatment specific knowledge

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 88–93.

#### Hints and tips

Image courtesy of Crystal Clear

Always familiarise yourself with facial electrical equipment before you use it as all machines vary.

Facial electrical treatments

#### Useful words

Some terms that you will come across in this unit are explained below.

**Acid mantle** The layer of sebum and sweat on the skin's surface that provides lubrication and protection against bacteria.

**Comedone** A blackhead – a plug of oxidised sebum in the follicle or pore opening.

**Desincrustation** A treatment using a negatively charged galvanic current to break down the acid mantle, soften keratin, dilate pores, and saponify sebum to make deep extraction work possible.

**Direct high frequency** A treatment often used to control a seborrhoeic, acne, or oily skin.

**Electro muscle stimulator** A treatment used to tighten and tone muscles, giving a lifting, anti-ageing effect. A faradic current, described as a direct, interrupted, surging current, is used to stimulate nerves and muscles.

**Facial micro-current** A treatment with many benefits including toning, lifting, firming and re-educating muscles, and increasing collagen and elastin production, which slows down skin ageing.

**Iontophoresis** A treatment using a constant direct galvanic current where the selected product is 'pushed' into the skin using a charged electrode.

**Lifestyle patterns** Habits including smoking, alcohol intake, sleeping, relaxation and exercise patterns, and diet and fluid intake.

**Micro-dermabrasion** A mechanical exfoliating or skin peeling facial. A controlled, high-speed flow of crystals is applied over the skin's surface.

**Micro-lance** A tiny, sharp, sterile needle used to superficially pierce the epidermis, allowing trapped milia to be removed.

**Post-treatment** What should happen after treatment, eg advice, or necessary restrictions to activities.

#### Observation sign-off sheet Unit B14 Provide facial electrical treatments

#### What you must do

Level 3 NVO/SVO Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will observe your performance on at least five separate occasions, on at least three different clients.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

66

Try to describe the treatment without using jargon, which might confuse or worry the client. Janice Brown

"

#### Outcome 1

## Maintain safe and effective methods of working when providing facial electrical treatments

- a Set up and monitor the treatment area to meet organisation procedures and manufacturers' instructions
- b Wear suitable personal protective equipment, when necessary
- c Make sure that environmental conditions are suitable for the client and the treatment
- d Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- e Effectively disinfect your hands prior to treatment
- f Ensure your own posture and position minimises fatigue and risk of injury whilst working
- g Ensure all **tools and equipment** are cleaned using the correct methods
- h Position **tools and equipment** and products for ease and safety of use
- i Ensure the client is in a comfortable and relaxed position suitable for the treatment
- j Maintain accepted industry hygiene and safety practices throughout the treatment
- k Adopt a positive, polite and reassuring manner towards the client throughout the treatment
- Maintain the client's modesty, privacy and comfort at all times

- m Check the client's wellbeing at regular intervals according to organisational policy
- n Dispose of waste materials safely and correctly
- o Ensure the treatment is cost-effective and is carried out within a commercially viable time
- p Ensure client record cards are up-to-date, accurate, complete, legible and signed by the client and practitioner
- q Leave the treatment area, tools and equipment in a condition suitable for future treatments

Always challenge yourself to put your knowledge to practical application. Bharti Vyas

#### Observation sign-off sheet Unit B14 Provide facial electrical treatments

#### What you must do (continued)

Level 3 NVQ/SVQ Beauty

#### Hints and tips

Don't be frightened of a mild erythema! It is proof that circulation is being improved, thereby improving cell metabolism.

#### Outcome 2

#### Consult, plan and prepare for treatments with clients

- a Use **consultation techniques** in a polite and friendly manner to determine the client's treatment needs
- b Ensure that informed and signed parent or guardian consent is obtained for minors prior to any treatment \*
- c Ensure that a parent or guardian is present throughout the facial electrical treatment for minors under the age of 16 \*\*
- d Obtain signed, written informed consent from the client prior to carrying out the treatment
- e Clearly explain to the client what the treatment entails in a way they can understand
- f Encourage clients to ask questions to clarify any points
- g Ask your client appropriate questions to identify their medical history, **skin type**, **skin condition** and life style pattern
- h Ask your client appropriate questions to identify if they have any contra-indications to facial electrical treatments
- i Accurately record your client's responses to questioning
- j Take the **necessary action** in response to any identified contra-indications \*\*\*
- k Accurately carry out a test patch to accurately determine the client's skin response to heat and pressure stimuli
- Recommend alternative treatments which are suitable for the client's condition and needs if contra-indicated for facial electrical treatments \*\*\*\*

- m Ensure client **advice** is given without reference to a specific medical condition and without causing undue alarm and concern \*\*\*\*\*
- n Clearly explain and agree the projected cost, likely duration, frequency and types of treatment needed
- o Agree in writing the client's needs, expectations and **treatment objectives**, ensuring they are realistic and achievable
- p Ensure that the client's skin is clean and prepared to suit the type of equipment to be used
- q Select suitable **tools and equipment** and related products for the facial treatment and client's skin type and condition

66

For a gentler micro-dermabrasion treatment keep the crystal flow high and the vacuum flow low.

Sarah Farrell

"

#### Outcome 3

#### **Carry out facial electrical treatments**

- a Clearly explain the sensation created by the equipment being used
- b Explain the treatment procedure to the client in a clear and simple way at each stage in the process
- c Safely use the correct treatment settings, applicator and accessories on the face throughout the treatment in accordance with manufacturers' instructions
- d Adjust the intensity and duration of the treatment to suit the client's facial **skin type** and **condition**
- e Carry out necessary comedone and milia extraction, when required, minimising discomfort to the client and minimal damage to the skin
- f Take prompt remedial action if the client experiences discomfort or contra-actions
- g Apply a suitable post-treatment product to the treated area
- h Ensure the finished result is to the client's satisfaction and meets the agreed **treatment objectives**

If you have a spare outlet when using EMS, use it to apply a pair of pads to the trapezius muscle. It can then be worked on at the same time as the face. Sarah Farrell

"

Level 3 NVQ/SVQ Beauty

#### Knowledge sign-off sheet Unit B14 Provide facial electrical treatments

#### What you must know

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a cross-unit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

Yo	u need to understand:	Evidence type
Or	ganisational and legal requirements	
1	your responsibilities under current health & safety legislation, standards and guidance eg the Health & Safety at Work Act (and any other relevant legislation)	E3
2	the importance of not discriminating against clients with illnesses and disabilities and why (eg Disability Discrimination Act)	E3
3	the age at which an individual is classed as a minor and how this differs nationally	E3
4	why minors should not be given treatments without informed and signed parental or guardian consent	E3
5	why it is important, when treating minors under 16 years of age, to have a parent or guardian present	E3
6	the legal significance of gaining signed, informed client consent to treatment	E3
7	local authority and organisational requirements for sharps and hazardous waste disposal	E3
8	the importance of the correct storage of client records in relation to the Data Protection Act	E3
9	how to complete the client records used in your organisation and the importance of, and reasons for, keeping records of treatments and gaining client signatures	E3
10	your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisation requirements	E3
11	the organisation's requirements for client preparation	E3

You need to understand:  Evidence to understand:  12 your organisation's service times for facial electrical  E3	
12 your organisation's corvice times for facial electrical [2]	ype
12 your organisation's service times for facial electrical treatments E3	
13 your organisation's and manufacturers' requirements for treatment area, equipment maintenance and equipment cleaning regimes	
How to work safely and effectively when providing facial electrical treatments	
14 how to set up the work area for facial electrical treatments E3	
15 the necessary environmental conditions for facial electrical treatments (including lighting, heating, ventilation and general comfort) and why these are important	
16 the type of personal protective equipment that should be worn for micro-dermabrasion treatments and why (eg powder-free nitrile or powder-free vinyl gloves)	
17 the importance and reasons for disinfecting hands and how to do this effectively	
18 how to position yourself and the client for facial electrical treatments	
19 reasons for maintaining client modesty, privacy and comfort during the treatment	
20 why it is important to maintain standards of hygiene E3 and the principles of avoiding cross-infection	
21 why it is important to check the client's wellbeing at regular intervals	
Client consultation	
22 why it is important to encourage and allow time for clients to ask questions	
23 how to use effective consultation techniques when communicating with clients from different cultural and religious backgrounds, age, disabilities and gender for	
this treatment	

Facial electrical treatments

#### Hints and tips

It is advisable
to finish on a
positive polarity
when carrying out
a galvanic facial.
It will create a
fake acid mantle
until the skin
rebalances itself.

#### Knowledge sign-off sheet Unit B14 Provide facial electrical treatments

#### What you must know (continued)

Level 3 NVO/SVO Beauty

You	u need to understand:	Evidence type
26	the legal significance of client questioning and recording the client's responses	E3
27	how to give effective advice and recommendations to clients	E3
28	how to visually assess facial muscle tone	E3
29	how to assess facial skin type and condition	E3
30	the reasons why it is important to encourage clients with suspected contra-indications to seek medical advice	E3
31	the importance of, and reasons for, not naming specific contra-indications when encouraging clients to seek medical advice	E3
32	the characteristics of different skin types and conditions	E3
33	the importance of using electrical treatments in conjunction with other treatments to maximise results	E3
34	the types of treatments that could be given in conjunction with, or after, facial electrical treatments	E3
35	the types of alternative treatments which could be recommended in the event of contra-indications to electrical treatments	E3
An	atomy and physiology	
36	the position of the primary bones of the skull and shoulder girdle and the functions of the skull	E4
37	the positions and actions of the facial muscles (eg Frontalis, Sterno Mastoid, Platysma, Orbicularis Oris, Masseter, Orbicularis Occuli, Buccinator, Zygomatic, Digastric, Corrugator, Risorius)	E4

#### Hints and tips

Your client's lifestyle often impacts on the condition of their skin. The client will appreciate your professional advice on how to support the treatment results at home.

You	uneed to understand:	Evidence type
38	the definition of 'origin' and 'insertion' of a muscle	E4
39	the basic structure and function of skin (ie the layers of the epidermis, subcutaneous layer, the dermis, including connective tissues, nerve endings, sweat glands, sebaceous glands, capillaries and hairs)	E4
40	the skin characteristics and skin types of different ethnic client groups	E4
41	how ageing affects the skin and limits the effectiveness of treatment	E4
42	how the endocrine system affects the skin	E4
43	the function of blood and the principles of circulation, blood pressure and pulse	E4
44	the structure and function of the arteries, veins and capillaries in the face	E4
45	the structure and function of the lymphatic system, including lymphatic vessels, nodes and lymph in the face and neck	E4
46	how to identify erythema and its causes	E4
47	the principles of lymph circulation and the interaction of lymph and blood within the circulatory system	E4
48	the basic principles of the central nervous system, motor points and autonomic system	E4
49	the effect of electrical treatment on the facial muscles, skin, circulatory, lymphatic and nervous systems	E4
Со	ntra-indications and contra-actions	
50	those contra-indications which prevent facial electrical treatment and why (eg contagious skin diseases, dysfunction of the nervous system, heart disease/disorder, undergoing medical treatment, pacemaker, recent scar tissue, undiagnosed lumps and swellings, medication causing a thinning or inflammation of the skin (eg steroids, accutane,	E4

retinols), recent dermabrasion)

Facial electrical treatments

#### Hints and tips

While the effects of micro-dermabrasion are cumulative, it is also ideal as a 'one-off' to leave the skin brighter and rejuvenated.

#### Knowledge sign-off sheet Unit B14 Provide facial electrical treatments

# BZO BZO MICHAEL BARRES CONTROLL BARRES CONTROL

Body massage doesn't only relax and invigorate your client, it also improves the look and condition of their skin. In this unit you will learn various massage techniques, which medium is right to use on your client, and how to incorporate scalp and facial movements to add an extra dimension

to the treatment. You will also learn about additional treatments that can be incorporated, such as gyratory massage, audio sonic and infra-red, to tailor the massage treatment specifically to your client. Your client will leave feeling relaxed, refreshed and pampered!

# Unit B20 (City & Guilds Unit 026) Provide body massage treatments Mandatory (General and massage routes)

Body massage treatments

#### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing body massage treatments.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

#### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **four** separate occasions, each on **four** different clients, which must include **two** full body massage treatments, incorporating the face. **One** of the full body massages must incorporate the use of mechanical massage and infra-red treatment.

This unit has five outcomes.

Outcome 1
Maintain safe and
effective methods
of working when
providing body
massage treatments

Outcome 2 Consult, plan and prepare for treatments with clients

Outcome 3
Perform manual
massage treatments
Outcome 4

Perform mechanical massage treatments
Outcome 5
Provide aftercare advice

66

Body massage is one of the most enjoyable and relaxing treatments a person can experience. It benefits the client both physically and psychologically. Adele O'Keefe

# Unit B20 (City & Guilds Unit 026) Provide body massage treatments Mandatory (General and massage routes) (continued)

Level 3 NVQ/SVQ Beauty

#### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

## Used all of the following types of equipment on suitable treatment areas:

Gyratory massager

Audio sonic

Infra-red

## Used all of the following massage mediums:

Oil

Cream

Powder

#### Used all of the following consultation techniques:

Questioning

Visual

Manual

Reference to client records

## Dealt with all of the following types of a client's physical characteristics:

Weight

Height

Posture

Muscle tone

Age

Health

Skin condition

## Dealt with at least one of the following necessary actions: \*

Encouraging the client to seek medical advice

Explaining why the treatment cannot be carried out

Modification of treatment

\*However, you must prove to your assessor that you are able to deal with the other two.

## Met all of the following treatment objectives:

Relaxation

Sense of wellbeing

Uplifting

Anti-cellulite

Stimulating

## Used all of the following massage techniques:

Effleurage

Petrissage

**Tapotement** 

Vibration

Friction

## Covered all of the following treatment areas:

Face

Head

Chest and shoulders

Arms and hands

Abdomen

Back

Gluteals

Legs and feet

## Given all of the following types of advice:

Avoidance of activities which may cause contra-actions

Future treatment needs

Modifications to lifestyle patterns

Healthy eating and exercise advice

Suitable homecare products and their use

#### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing body massage treatments

Client consultation

Image courtesy of Guinot

Preparation for treatment

Anatomy and physiology

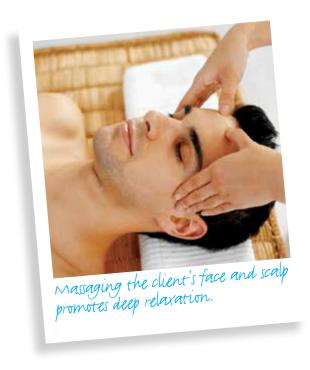

Contra-indications and contra-actions

Equipment and massage mediums

Treatment specific knowledge

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 111-117.

#### Useful words

Some terms that you will come across in this unit are explained below.

**Audio sonic** A hand-held device utilising sound waves, which penetrate the skin to a depth of 2.5 inches and which travel and vibrate along the inside of the muscle sheath.

**Effleurage** A stroking technique used to begin the massage and complete an area. This is also useful to link movements together to keep the massage flowing.

**Gyratory massager** A piece of mechanical equipment with interchangeable heads, each of which gives a different deep massage effect. It can be a free standing or hand-held appliance.

**Infra-red lamp** A lamp that uses infra-red light waves, which penetrate the skin, having a warming and relaxing effect.

Massage techniques These are specific movements applied to achieve a stimulating or relaxing effect, and include effleurage, petrissage, tapotement/percussion, vibration and friction. The speed and depth at which they are applied can alter their effect.

**Medium** A substance that allows the massage to be carried out, providing slip and glide. These may include oils, creams, emulsions, gels and powders.

**Petrissage** A movement that compresses body tissues and lifts them away from underlying structures.

**Tapotement/percussion** These movements are performed in a brisk manner to tone and stimulate the skin and muscle tissue.

**Vibrations** Trembling movements that can stimulate or relax the nerves depending on how they are applied.

# Observation sign-off sheet Unit B20 Provide body massage treatments What you must do

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will observe your performance on at least four separate occasions, on four different clients. This must include two full body massage treatments, incorporating the face. One of the full body massages must incorporate the use of mechanical massage and infra-red treatment.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

Body massage is a favourite treatment with many clients.

#### Outcome 1

## Maintain safe and effective methods of working when providing body massage treatments

- a Set up and monitor the treatment area to meet organisation procedures and manufacturers' instructions
- b Make sure that environmental conditions are suitable for the client and the treatment
- c Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- d Ensure that your nails are short, clean, well manicured and free of polish
- e Effectively disinfect your hands prior to and after treatment
- f Ensure your own posture and position minimises fatigue and risk of injury whilst working
- g Ensure all tools and **equipment** are cleaned using the correct methods
- h Position **equipment** and **massage mediums** for ease and safety of use
- i Ensure the client is in a comfortable and relaxed position suitable for the treatment
- j Maintain accepted industry hygiene and safety practices throughout the treatment
- k Adopt a positive, polite and reassuring manner towards the client throughout the treatment

- Maintain the client's modesty, privacy and comfort at all times
- m Dispose of waste materials safely and correctly

- n Ensure the treatment is cost-effective and is carried out within a commercially viable time
- o Ensure client record cards are up-to-date, accurate, complete, legible and signed by the client and practitioner
- p Leave the treatment area and equipment in a condition suitable for future treatments

To perform a great massage you need to use a variety of movements, swapping from effleurage, kneading and petrissage throughout the treatment. Sally Biles

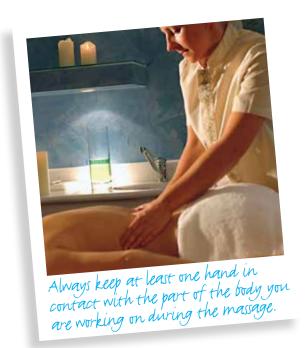

## Observation sign-off sheet Unit B20 Provide body massage treatments

What you must do (continued)

Level 3 NVQ/SVQ Beauty

#### Hints and tips

Select your massage medium carefully – it should help enhance and improve the client's skin and body condition.

#### Outcome 2

#### Consult, plan and prepare for treatments with clients

- a Use **consultation techniques** in a polite, sensitive and friendly manner to determine the client's treatment needs
- b Obtain signed, written informed consent from the client prior to carrying out the treatment
- c Ensure that informed and signed parent or guardian consent is obtained for minors prior to any massage treatment \*
- d Ensure that a parent or guardian is present throughout the massage treatment for minors under the age of 16 \*\*
- e Clearly explain to the client what the treatment entails in a way they can understand
- f Use suitable **consultation techniques** to identify your client's medical history, **physical characteristics** and lifestyle pattern
- g Ask your client appropriate questions to identify if they have any contra-indications to massage treatments
- h Accurately record your client's responses to questioning
- i Actively encourage clients to ask questions and clarify any points
- Take the **necessary action** in response to any identified contra-indications \*\*\*
- k Ensure client **advice** is given without reference to a specific medical condition and without causing undue alarm and concern

- Clearly explain and agree the projected cost, likely duration, frequency and types of treatment needed
- m Agree in writing the client's needs, expectations and treatment objectives, ensuring they are realistic and achievable
- n Ensure that the client's skin is clean and prepared to suit the type of massage to be used
- o Ensure that clothing, hair and accessories are effectively protected or removed
- p Select suitable equipment and massage mediums to meet the treatment objectives

#### Hints and tips

Make sure you know which parts of the arm and bands to use on your client.

# Observation sign-off sheet Unit B20 Provide body massage treatments What you must do (continued)

Level 3 NVQ/SVQ Beauty

#### Timing tip

The maximum commercially viable time for a back massage is 30 mins. This does not include consultation and preparation time.

#### Outcome 3

#### Perform manual massage treatments

- a Provide suitable support and cushioning to specific areas of the body during the treatment if necessary
- b Adapt your massage techniques, sequence and massage mediums to meet the client's physical characteristics and treatment area(s)
- c Effectively vary the depth, rhythm and pressure of massage movements to meet treatment objectives, treatment area(s) and client's physical characteristics and preferences
- d Ensure the application and use of **massage medium** minimises waste
- e Take appropriate and prompt remedial action if contra-actions or discomfort occur during the course of treatment
- f Allow the client sufficient post-treatment recovery time
- g Ensure the finished result is to the client's satisfaction and meets the agreed treatment objectives

#### Perform mechanical massage treatments

- a Clearly explain the sensation created by the equipment being used
- b Explain the treatment procedure to the client in a clear and simple way at each stage in the process
- c Provide suitable support and cushioning to specific areas of the body during the treatment if necessary
- d Safely use the correct treatment settings, application and applicator heads on the body throughout the treatment to meet manufacturers' instructions
- e Adjust the intensity and duration of the treatment to suit the client's physical characteristics and the treatment area(s)
- Effectively vary the sequence, depth and pressure of massage movements to meet treatment objectives and treatment area(s)
- Check the client's wellbeing throughout the mechanical massage treatment
- Take appropriate and prompt remedial action if contra-actions or discomfort occur during the course of treatment \*
- Allow the client sufficient post-treatment recovery time
- Ensure the finished result is to the client's satisfaction and meets the agreed treatment objectives

# Knowledge sign-off sheet

# Unit B20 Provide body massage treatments

## What you must know

Body massage treatments

You	u need to understand:	Evidence type
Or	ganisational and legal requirements	
1	your responsibilities under current health & safety legislation, standards and guidance eg the Health & Safety at Work Act (and any other relevant legislation)	E3
2	your responsibilities under local authority licensing regulations for yourself and your premises	E3
3	the importance of not discriminating against clients with illnesses and disabilities and why (eg Disability Discrimination Act)	E3
4	the age at which an individual is classed as a minor and how this differs nationally	E3
5	why minors should not be given treatments without informed and signed parental or guardian consent	E3
6	why it is important, when treating minors under the age of 16, to have a parent present	E3
7	the legal significance of gaining signed,informed client consent to treatment	E3
8	manufacturer's and organisational requirements for waste disposal	E3
9	the importance of the correct storage of client records in relation to the Data Protection Act	E3
10	how to complete the client records used in your organisation and the importance of, and reasons for, keeping records of treatments and gaining client signatures	E3
11	your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisation requirements	E3

Continues on next page

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a cross-unit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

# Knowledge sign-off sheet Unit B20 Provide body massage treatments

### What you must know (continued)

#### You need to understand: Evidence type 12 your responsibilities, and reasons for, keeping your E3 nails short, clean, well manicured and free of polish for massage treatments 13 the organisation's requirements for client preparation E3 14 your organisation's service times for body massage E3 treatments and the importance of completing the service in a commercially viable time 15 your organisation's and manufacturers' requirements E3 for treatment area, equipment maintenance and equipment cleaning regimes How to work safely and effectively when providing body massage treatments 16 how to set up the work area for body massage E3 treatments 17 the necessary environmental conditions for body E3 massage treatments (including lighting, heating, ventilation and general comfort) and why these are important 18 the importance and reasons for disinfecting hands E3 and how to do this effectively 19 how to position yourself and the client for body E3 massage treatments taking into account individual physical characteristics 20 what is repetitive strain injury (RSI), how it is caused E3 and how to avoid developing it when delivering massage treatments 21 the importance of adopting the correct posture E3 throughout the treatment and the impact this may

have on yourself and the outcome of the treatment

Hints and tips

Some clients may feel embarrassed if it is their first massage. Be tactful and reassuring during the consultation.

You	uneed to understand:	Evidence type
22	reasons for maintaining client modesty, privacy and comfort during the treatment	E3
23	why it is important to maintain standards of hygiene and the principles of avoiding cross-infection	E3
24	how to minimise and dispose of waste from treatments	E3
25	why it is important to check the client's wellbeing at regular intervals during mechanical massage	E3
Cli	ent consultation	
26	why it is important to encourage and allow time for clients to ask questions	E3
27	how to use effective consultation techniques when communicating with clients from different cultural and religious backgrounds, age, disabilities and gender for this treatment	E3
28	the importance of questioning clients to establish any contra-indications to head and body massage treatments	E3
29	why it is important to record client responses to questioning	E3
30	the legal significance of client questioning and recording the client's responses	E3
31	how to give effective advice and recommendations to clients	E3
32	how to visually assess the physical characteristics in the range	E3
33	how to assess posture and skeletal conditions that may be present and how to adapt and change the massage routine	E3
34	how to recognise different skin types and conditions	E3
35	the reasons why it is important to encourage clients with contra-indications to seek medical advice	E3
36	the importance of, and reasons for, not naming specific contra-indications when encouraging clients to seek medical advice	E3
37	relationship between lifestyle patterns and effectiveness of treatment	E3

Body massage treatments

#### Hints and tips

Always check for allergies before choosing your medium, in case your client is allergic to an ingredient, such as nuts.

# Knowledge sign-off sheet Unit B20 Provide body massage treatments

### What you must know (continued)

Level 3 NVQ/SVQ Beauty

#### You need to understand: Evidence type 38 the beneficial effects which can result from changes E3 to the client's lifestyle pattern (eg healthy eating and fluid intake, exercise habits, smoking habits, sleep patterns, hobbies, interests and means of relaxation) **Preparation for treatment** 39 the importance of giving clients clear instructions E3 on the removal of relevant clothing, accessories and general preparation for the treatment 40 why it is important to reassure clients during the E3 preparation process whilst also maintaining the client's modesty and privacy 41 how to select the appropriate massage medium E3 suitable for skin type and condition 42 the different types, use and benefits of pre-massage E3 heat treatments 43 how to cleanse different areas of the body in E3 preparation for treatment, eg face and feet **Anatomy and physiology** 44 the structure and function of cells and tissues E4 45 the structure and function of muscles, including **E4** the types of muscles (ie voluntary and involuntary) 46 the positions and actions of the main muscle groups E4 within the treatment areas of the body specified in the range 47 the position and function of the primary bones and E4 joints of the skeleton 48 how to recognise postural faults and conditions E4 (eg lordosis, kyphosis, scoliosis)

#### Hints and tips

Infra-red is an excellent technique for relaxing tight and aching muscles, making the treatment more effective.

Body massage treatments

# electrical ebilation

Electrical epilation is a skilled treatment for the removal of hair – permanently! This can really make a difference to the way clients see themselves. A good electrical epilation practitioner needs to be able to handle the embarrassment clients may feel, and put them at ease. In this unit you will learn how to insert a probe

painlessly into the follicle, discharging a small electrical current to destroy the hair. You'll choose the most suitable method of removal according to hair and skin type, and will learn which needles to select for best results. The technique takes time to learn, but is one of the most rewarding treatments for both the client and therapist.

# Unit B29 (City & Guilds Unit 035) Provide electrical epilation treatments Mandatory (General route)

**Electrical epilation** 

#### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing electrical epilation treatments.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

#### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

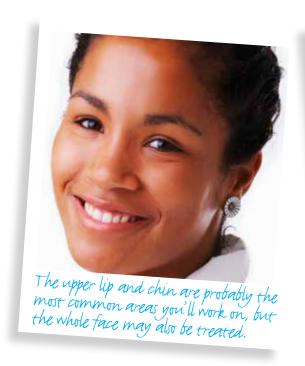

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **six** separate occasions, on at least **four** different clients. These must include **two** observations each for the **upper lip**, **chin** and **bikini line**.

## This unit has four outcomes.

Outcome 1
Maintain safe and
effective methods
of working when
providing electrical
epilation treatments

Outcome 2
Consult, plan
and prepare for
treatments
with clients

Outcome 3
Carry out electrical
epilation
Outcome 4
Provide aftercare
advice

# Unit B29 (City & Guilds Unit 035) Provide electrical epilation treatments Mandatory (General route) (continued)

Level 3 NVQ/SVQ Beauty

#### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

#### Used all of the following consultation techniques:

Questioning

Visual

Reference to client records

# Dealt with at least one of the following necessary actions \*:

Encouraging the client to seek medical advice

Explaining why the treatment cannot be carried out

Modification of treatment

\*However, you must prove to your assessor that you are able to deal with the other two.

# Covered all of the following areas to be treated:

Upper lip

Chin

Bikini line

Eyebrows

**Underarms** 

Neck

Breast

# Used all of the following types of needle:

One Piece

Two piece

Insulated

Gold

# Dealt with all of the following hair types:

Fine

Coarse

Curly

# Dealt with all of the following skin types and conditions:

Dry

Oily

Sensitive

Dehydrated

Mature

# Carried out all of the following electrical epilation treatments:

Alternating current

Blend

# Provided all of the following types of advice:

Avoidance of activities which may cause contra-actions

Future treatment needs

Home care

Dealing with regrowth between treatments

#### Hints and tips

A gold needle is the best choice for Asian or black skin types, to prevent hypopigmentation. It is also a good choice for clients with a low pain threshold or reactive skin, as less current is needed.

#### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing electrical epilation treatments

Client consultation

Anatomy and physiology

Contra-indications and contra-actions

Equipment and materials

Treatment specific knowledge

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 134–141.

#### Hints and tips

A firm three-way stretch of the skin makes insertion easier for the therapist and less painful for the client.

**Electrical epilation** 

Some terms that you will come across in this unit are explained below.

**Anaphoresis** The use of a negative galvanic current to help dilate small, tight follicles before treatment, making insertions easier.

**Blend** Galvanic direct current and high-frequency alternating current, passing down the same needle.

**Cataphoresis** A technique used after epilation to help constrict follicles, reduce redness and rebalance the acid mantle.

**Compound hair** A single follicle producing two or more hairs.

**Congenital hair growth** Normal growth, including excessive natural hairiness.

**Electrical epilation** A permanent method of hair removal, using an alternating high frequency current (referred to as diathermy) to produce heat.

**Electrolysis** A permanent method of hair removal, involving chemical destruction of the hair follicle.

**Gender disphoria** A recognised medical condition whereby people view themselves as the opposite sex. Male pattern hair growth is a distressing problem for male-to-female gender dysphoriacs.

**Hirsutism** A male hair growth pattern in women, caused by hormonal imbalance.

**Hypertrichosis** Excessive hair growth in males or females.

**Insulated needle** A needle with a coating covering the shaft, leaving only the tip exposed.

**Superfluous hair** A general term used to describe any unwanted hair.

**Systemic hair growth** Hormonal changes, either normal or abnormal, that may stimulate hair growth. Normal changes include puberty and the menopause; abnormal changes include Cushing's syndrome and polycystic ovary syndrome.

**Topical hair growth** Caused by an increase in blood supply to the area – this may result from plucking and waxing.

# Observation sign-off sheet Unit B29 Provide electrical epilation treatments

## What you must do (continued)

Outcome 1

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will make at least six observations of your work on at least six separate occasions, on at least four different clients. This must include two observations each for the upper lip, chin and bikini line.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

# It can take a while to get used to the equipment, but with practice you'll soon be producing amazing results.

# Maintain safe and effective methods of working when providing electrical epilation treatments

- a Set up and monitor the **treatment area** to meet organisation procedures and manufacturers' instructions
- b Make sure that environmental conditions are suitable for the client, the treatment and meet legal and safety requirements
- c Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- d Effectively disinfect your hands throughout the treatment as required
- e Wear the recommended personal protective equipment to avoid cross-infection and exposure to hazardous waste
- f Ensure your own posture and position minimises fatigue and risk of injury whilst working
- g Ensure all reusable tools and equipment are disinfected or sterilised using the correct methods
- h Position equipment and products for ease and safety of use
- i Ensure the client is in a comfortable and relaxed position suitable for the treatment

**Electrical epilation** 

- k Maintain the client's modesty, privacy and comfort at all times
- Check the client's wellbeing at regular intervals according to organisational policy
- m Dispose of single use items, hazardous waste and waste materials safely and correctly
- n Ensure the treatment is cost-effective and is carried out within a commercially viable time
- o Ensure client records are up-to-date, accurate, complete, legible and signed by the client and practitioner
- p Leave the treatment area and equipment in a condition suitable for future treatments

Fine, straight hairs are easily treated with high frequency, while strong, deep hairs in the same area may require treatment by blend. Janice Brown

# Observation sign-off sheet Unit B29 Provide electrical epilation treatments

## What you must do (continued)

Level 3 NVQ/SVQ Beauty

#### Outcome 2

## Consult, plan and prepare for treatments with clients

- a Use **consultation techniques** in a polite, sensitive and supportive manner to determine the client's treatment needs
- b Obtain signed, written informed consent from the client prior to carrying out the treatment
- c Ensure that informed and signed parental or guardian consent is obtained for minors prior to any **electrical epilation** treatments \*
- d Ensure that a parent or guardian is present throughout the **electrical epilation** treatment for minors \*\*
- e Clearly explain to the client what the treatment entails in a way they can understand
- f Use suitable visual aids effectively to aid client understanding
- g Use **consultation techniques** which accurately identify the client's medical history, **hair type**, causes of hair growth, **skin type and condition** and emotional state
- h Establish and record the client's past and present hair management techniques and the implication for treatments
- Ask your client appropriate questions to identify if they have any contra-indications to **electrical epilation** treatments
- j Accurately record your client's responses to questioning
- k Take the **necessary action** in response to any identified contra-indications \*\*\*
- Actively encourage the client to ask questions and clarify any points of which they are unsure
- m Encourage clients with suspected contraindications to seek medical advice without reference to specific conditions and without causing undue alarm or concern \*\*\*\*

- n Take consistent, clear high quality pre-treatment photographs of the **area(s) to be treated** with the consent of the client as and when required
- o Clearly explain the physical sensation created by the treatment
- p Correctly prepare the **area to be treated** and carry out a test patch to establish suitability for treatment
- q Ensure written aftercare procedures are given to the client following the test patch
- r Recommend alternative treatments or products which are suitable for the client if contra-indicated for **electrical epilation** treatment \*\*\*\*\*
- s Clearly explain and agree the projected cost, likely duration, frequency, types of treatment and client commitment needed
- t Clearly identify and agree in writing the area(s) to be treated, client expectations and treatment objectives, ensuring they are realistic and achievable
- Select and prepare equipment to meet legal and safety requirements and treatment objectives

What you must do (continued)

Level 3 NVQ/SVQ Beauty

66

Client pain thresholds and sensitivity vary from client to client, and appointment to appointment.

Elaine Stoddart

"

#### Outcome 3

#### **Carry out electrical epilation**

- a Leave the **area to be treated** clean, oil free and dry prior to treatment
- b Use the size and type of **needle** which is appropriate for treating the client's follicle size, **hair type** and **skin type**, and the type of **electrical epilation** treatment
- c Load and use **needles** avoiding damage and contamination throughout the treatment
- d Illuminate and magnify the **treatment area** to ensure maximum visibility during treatment
- e Stretch and manipulate the skin in a way suitable for the **area to be treated**
- f Ensure the needleholder and **needle** is used at the correct angle, direction and **needle** depth for the hair follicle and the **area to be treated**
- g Adjust the intensity and duration of current flow to ensure effective hair release to suit client tolerance, sensitivity and safety
- h Smoothly remove the hair from the treated follicle without traction

- i Work systematically to remove hair within the area(s) to be treated and the skin's tolerance
- j Discontinue treatment where contra-actions occur in accordance with manufacturers' instructions \*
- k Soothe the treated area using suitable techniques and products
- Take treatment progress photographs of the **area(s) treated** with consent of the client as and when required
- m Ensure that the finished result is to the client's satisfaction and meets the agreed treatment plan

Outcome 4

Provide aftercare advice

their individual needs

a Give **advice** and recommendations accurately and constructively

b Give your clients suitable advice specific to

Electrical epilation

Level 3 NVQ/SVQ Beauty

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a crossunit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

## Knowledge sign-off sheet Unit B29 Provide electrical epilation treatments

## What you must know

Yo	u need to understand:	Evidence type
Or	ganisational and legal requirements	
1	your responsibilities under current health & safety legislation, standards and guidance eg the Health & Safety at Work Act (and any other relevant legislation)	E3
2	your responsibilities under local authority licensing regulations for yourself and your premises	E3
3	the importance of not discriminating against clients with illnesses and disabilities and why (eg Disability Discrimination Act)	E3
4	the age at which an individual is classed as a minor and how this differs nationally	E3
5	the importance of checking current insurance guidelines for the delivery of electrical epilation treatment	E3
6	the importance of following the current guidance relating any age restrictions for electrical epilation treatments	E3
7	why minors should only be treated with informed and signed parental or guardian consent	E3
8	why it is important when treating minors to have a parent or guardian present	E3
9	the legal significance of gaining signed, informed client consent to treatment	E3
10	local authority and organisational requirements for waste disposal	E3
11	the importance of the correct storage of client records in relation to the Data Protection Act	E3
12	how to complete the client recordsused in your organisation and the importance of, and reasons for, keeping records of treatments and gaining client and practitioner signatures	E3

You need to understand:  13 your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisation requirements  14 the organisation's requirements for client preparation  15 your organisation's service times for electrical epilation treatments  16 your organisation's and manufacturers' requirements for treatment area, equipment maintenance and equipment cleaning regimes
your own personal hygiene, protection and appearance according to accepted industry and organisation requirements  14 the organisation's requirements for client preparation E3  15 your organisation's service times for electrical epilation treatments  16 your organisation's and manufacturers' requirements for treatment area, equipment maintenance and

for treatment area, equipment maintenance and
· ·
How to work safely and effectively when providing electrical epilation treatments
17 how to set up the work area for electrical epilation treatments E3
18 the necessary environmental conditions for electrical epilation treatments (including lighting, heating, ventilation and general comfort) and why these are important
19 the type of personal protective equipment that should be worn for electrical epilation treatments and why (eg powder-free, nitrile or vinyl gloves, disposable masks)
20 what is contact dermatitis and how to avoid developing it whilst carrying out electrical epilation treatments
21 what is repetitive strain injury (RSI), how it is caused and how to avoid developing it when delivering electrical epilation treatments
22 the causes and hazards of accidental exposure to clinical waste
23 the importance and reasons for disinfecting hands and how to do this effectively
24 how to position yourself and the client for electrical epilation treatments
25 reasons for maintaining client modesty, privacy and comfort during the treatment

Electrical epilation

#### Hints and tips

Remember that anaphoresis is a useful technique to carry out before epilation if the skin has small, tight follicles, as it will soften and relax them.

# Knowledge sign-off sheet Unit B29 Provide electrical epilation treatments

# What you must know (continued)

You	u need to understand:	Evidence type
26	why it is important to maintain standards of hygiene and the principles of avoiding cross-infection	E3
27	why it is important to check the client's wellbeing at regular intervals	E3
Cli	ent consultation	
28	how to use effective consultation techniques when communicating with people from different cultural and religious backgrounds, age, disabilities and gender for this treatment	E3
29	the importance of effective communication and discussion	E3
30	why it is important to encourage and allow time for clients to ask questions	E3
31	the importance of questioning clients to establish any contra-indications to electrical epilation treatments	E3
32	why it is important to record client responses to questioning	E3
33	the legal significance of client questioning and recording the client's responses	E3
34	how to give effective advice and recommendations to clients	E3
35	the importance of explaining the commitment required to maintain optimum results	E3
36	why it is advisable to take photographs of the treatment area pre and post-treatment and how they should be taken to maintain client confidentiality	E3
37	how to recognise skin types, conditions and their response to treatment	E3

Electrical epilation

You	need to understand:	Evidence type
	the importance of and how to carry out a test patch to identify allergies to needle type and products used, to establish pigmentation issues, degree of skin reaction and healing response	E3
39	why it is important to maintain client's confidentiality	E3
	the types of alternative treatments which could be recommended in the event of contra-indications to electrical epilation treatments	E3
	the importance of giving relevant and accurate information to assist the client's understanding of hair growth cycle, causes, hair management techniques and the implications of these for the treatment	E3
	the constraints surrounding electrical epilation treatments (eg cost, time, number of treatments, healing rate)	E3
	how to describe the physical sensation of the treatment and how pain threshold and sensitivity varies from differing treatment areas, treatment method, clients and appointments	E3
	how skin sensitivity is affected by other skincare treatments which may inhibit electrical epilation, ie glycolic peel, micro-dermabrasion, laser	E3
	the importance of consulting with previous record cards	E3
	the importance of giving clients written aftercare instructions immediatelyafter the test patch and reinforcing this on all subsequent visits	E3
An	atomy and physiology	
	the structure and function of the skin (ie epidermis, dermis, appendages, subcutaneous layer and nerve endings)	E4
	the skin characteristics and skin types of different ethnic client groups	E4
49	the principles of skin healing	E4
	the structure of the hair and its follicle (the pilosebaceous unit)	E4
	the growth pattern of the hair and how this influences present and future treatments	E4
52	the hair growth cycle ie anagen, catagen, telogen	E4

# Knowledge sign-off sheet Unit B29 Provide electrical epilation treatments

# What you must know (continued)

You need to understand:	Evidence type
53 the causes of hair growth ie topical, congenital, systemic	E4
54 the definition of hair growth ie superfluous, hirsutism, hypertrichosis	E4
55 the structure and function of the endocrine system	E4
56 the effects of malfunctions of the endocrine system on hair growth	E4
57 the principles of the blood and lymphatic system	E4
58 how the hormones are circulated via the blood stream	E4
Contra-indications and contra-actions	
59 the contra-indications that prevent treatment and why (eg infectious and contagious diseases, pacemakers and haemophilia)	E4
60 the conditions that require medical approval and why (eg heart problems and hair growth from moles)	E4
61 the conditions that restrict treatment and why (eg psoriasis, eczema, acne, epilepsy and diabetes)	E4
62 the potential consequences of carrying out electrical epilation on a contra-indicated client	E4
63 possible contra-actions which may occur during the treatment and how to deal with them (eg erythema, oedema, blanching, bleeding)	E4
64 the reasons why it is important to encourage clients with suspected contra-indications to seek medical advice	E3
65 the importance of, and reasons for, not naming specific contra-indications when encouraging clients to seek medical advice	E3

# 2025SM

Indian head massage has been practised for thousands of years. The treatment is carried out on the upper body, in particular on the scalp and shoulders. It is beneficial in helping to relieve stress and tension, and also helps to improve the condition of the hair and scalp. It is based on the ancient system of medicine known as Ayurveda, the aim of

which is to promote health, beauty and a long life. This unit will teach you how to plan the best treatment for the client, how to select appropriate oils, how to coordinate your breathing to the best effect and how to carry out suitable massage techniques. You will also learn about Chakras and Marma points, as well as body, mind and spiritual awareness.

#### Unit B23 (City & Guilds Unit 029) Provide Indian head massage Mandatory (Massage route)

#### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing Indian head massage treatment.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

#### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is not allowed for any performance evidence within this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least three separate occasions, on three different clients. One massage must include the use of massage oil and one massage must exclude the use of oil.

This unit has four outcomes.

Outcome 1 Maintain safe and effective methods of working when providing Indian head massage

**Outcome 2** Consult, plan and prepare for treatments with clients

Outcome 3 **Perform Indian** head massage **Outcome 4 Provide aftercare** advice

An Indian head massage is a wonderfully relaxing treatment, which helps to relieve the client's stresses and leaves them feeling great. Adele O'Keefe

# Unit B23 (City & Guilds Unit 029) Provide Indian head massage Mandatory (Massage route) (continued)

Level 3 NVQ/SVQ Beauty

#### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

#### Used all of the following consultation techniques:

Questioning

Visual

Manual

Reference to client records

# Dealt with all of the following client physical characteristics:

Posture

Muscle tone

Age

Health

Skin condition

Hair condition

Scalp condition

# Dealt with at least one of the following necessary actions \*:

Encouraging the client to seek medical advice

Explaining why the treatment cannot be carried out

Modification of treatment

\* However, you must prove to your assessor that you are able to deal with the other two.

# Met all of the following treatment objectives:

Relaxation

Sense of wellbeing

Uplifting

Improvement of hair and scalp condition

# Used all of the following massage techniques:

Effleurage

Petrissage

**Tapotement** 

Friction

Marma (pressure) points

## Covered all of the following treatment areas:

Face

Head

Chest and shoulders

Arms and hands

Back

Chakras

## Given all of the following types of advice:

Avoidance of activities which may cause contra-actions

Future treatment needs

Modifications to lifestyle patterns

Suitable homecare products and their use

66

Indian bead massage is a very powerful treatment, so become familiar with the term 'Healing Crisis' and the symptoms.

Sarah Farrell

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing Indian head massage

Client consultation

Preparation for treatment

Anatomy and physiology

Contra-indications and contra-actions

Indian head massage mediums

Treatment specific knowledge

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 158-164.

Indian head massage began in India, where the skills were passed down through each generation.

#### Hints and tips

Have fresh water nearby to offer your client, to ensure their comfort and minimise contra-actions.

#### Useful words

Some terms that you will come across in this unit are explained below.

**Alopecia** This is the term used for hair loss, whether it is a small bald patch or total hair loss over the whole body. It usually results from shock, trauma, illness or prolonged stress.

**Ayurveda** A healing system that comes from a sacred Hindu text, describing how the mind, body and spirit should be in harmony to improve the heath and wellbeing of the person.

**Chakras** Energy centres that do not have a physical form and are a way of describing energies and energy flow. They are the focal points for restoring balance to the body. There are seven major Chakras – Indian head massage refers to the three higher Chakras.

Coconut oil Derived from coconuts, this is a light moisturising oil which relieves inflammation.

**Fibromyalgia** A condition that causes musculoskeletal pain. Deep massage on the local area should be avoided.

**Hair tugging** A scalp technique where the hair is lifted and pulled at scalp level to stimulate blood flow.

Marma points Pressure points on the body that stimulate life force, similar to acupressure. During Indian head massage you may cover 37 points in the treatment area.

**Mustard oil** A popular oil in India, useful during cold spells due to the hot warming sensation it creates. It is good for tense, tight muscles and dryness of the scalp. Not for use on sensitive skin.

**Sesame oil** Popular in Ayurveda, it has a high mineral content and so is useful for nourishing the hair.

Whiplash A condition produced when the muscles, ligaments, discs or nerves in the neck region are damaged due to sudden trauma. Indian head massage can help to relieve pain and discomfort.

# Observation sign-off sheet *Unit B23 Provide Indian head massage*What you must do

Within your work, you must show your assessor that you can do the following. Your assessor will make at least three observations of your work on at least three separate occasions, on three different clients. This must include one massage with the use of massage oil and one massage that excludes the use of oil.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

#### Outcome 1

## Maintain safe and effective methods of working when providing Indian head massage

- a Set up and monitor the treatment area to meet organisation procedures and manufacturers' instructions
- b Make sure that environmental conditions are suitable for the client and the treatment
- c Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- d Ensure that your nails are short, clean, well manicured and free of polish
- e Effectively disinfect your hands prior to and after treatment
- f Ensure your own posture and position minimises fatigue and risk of injury whilst working
- g Ensure all tools and equipment are cleaned using the correct methods
- h Position equipment and massage medium for ease and safety of use
- i Ensure the client is in a comfortable and relaxed position suitable for the treatment
- j Maintain accepted industry hygiene and safety practices throughout the treatment

- k Adopt a positive, polite and reassuring manner towards the client throughout the treatment
- I Maintain the client's modesty, privacy and comfort at all times
- m Dispose of waste materials safely and correctly
- n Ensure the treatment is cost-effective and is carried out within a commercially viable time
- o Ensure client record cards are up-to-date, accurate, complete, legible and signed by the client and practitioner
- p Leave the treatment area in a condition suitable for future treatments

The ambience of a treatment room is very important in ensuring the client feels comfortable.

Anita Crosland

# Observation sign-off sheet Unit B23 Provide Indian head massage What you must do (continued)

Level 3 NVQ/SVQ Beauty

#### Hints and tips

If carrying out a seated treatment, make sure your client's legs are uncrossed and feet are placed firmly on the floor.

#### Outcome 2

#### Consult, plan and prepare for treatments with clients

- a Use **consultation techniques** in a polite, sensitive and friendly manner to determine the client's treatment needs
- b Ensure that informed and signed parent or guardian consent is obtained for minors prior to any massage treatment \*
- c Ensure that a parent or guardian is present throughout the massage treatment for minors under the age of 16 \*\*
- d Clearly explain to the client what the treatment entails in a way they can understand
- e Use suitable **consultation techniques** to identify your client's medical history, **physical characteristics** and lifestyle pattern
- f Ask your client appropriate questions to identify if they have any contra-indications to massage treatments
- g Accurately record your client's responses to questioning
- h Actively encourage clients to ask questions and clarify any points
- Take the **necessary action** in response to any identified contra-indications \*\*\*
- j Ensure client **advice** is given without reference to a specific medical condition and without causing undue alarm and concern
- k Clearly explain and agree the projected cost, likely duration and frequency treatment needed
- Agree in writing the client's needs, expectations and **treatment objectives**, ensuring they are realistic and achievable

- m Adapt client preparation procedures to suit the environment in which the massage is to be undertaken
- n Ensure that clothing, hair and accessories are effectively protected or removed
- Select suitable resources and massage medium, if required, to meet the treatment objectives

### Knowledge sign-off sheet Unit B23 Provide Indian head massage

What you must know

Level 3 NVQ/SVQ Beauty

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a crossunit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

Yo	u need to understand:	Evidence type
Or	ganisational and legal requirements	
1	your responsibilities under current health & safety legislation, standards and guidance eg the Care Standards Act, the Health & Safety at Work Act (and any other relevant legislation)	E3
2	your responsibilities under local authority licensing regulations for yourself and your premises	E3
3	the importance of not discriminating against clients with illnesses and disabilities and why (eg Disability Discrimination Act)	E3
4	the age at which an individual is classed as a minor and how this differs nationally	E3
5	why minors should not be given treatments without informed and signed parental or guardian consent	E3
6	why it is important, when treating minors under the age of 16, to have a parent present	E3
7	the legal significance of gaining signed, informed client consent to treatment	E3
8	manufacturer's and organisational requirements for waste disposal	E3
9	the importance of the correct storage of client records in relation to the Data Protection Act	E3
10	how to complete the client records used in your organisation and the importance of, and reasons for, keeping records of treatments and gaining client signatures	E3
11	your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisation requirements	E3

Indian head massage

You	u need to understand:	Evidence type
12	the organisation's requirements for client preparation	E3
13	your organisation's service times for Indian head massage and the importance of completing the service in a commercially viable time	E3
14	your organisation's requirements for treatment area maintenance	E3
	w to work safely and effectively when providing dian head massage	
15	how to set up the work area for Indian head massage	E3
16	the necessary environmental conditions for Indian head massage (including lighting, heating, ventilation and general comfort) and why these are important	E3
17	the importance and reasons for disinfecting hands and how to do this effectively	E3
18	how to position yourself and the client for Indian head massage taking into account individual physical characteristics	E3
19	what is repetitive strain injury (RSI), how it is caused and how to avoid developing it when delivering massage treatments	E3
20	the importance of adopting the correct posture throughout the treatment and the impact this may have on yourself and the outcome of the treatment	E3
21	reasons for maintaining client modesty, privacy and comfort during the treatment	E3
22	why it is important to maintain standards of hygiene and the principles of avoiding cross-infection	E3
23	how to minimise and dispose of waste from treatments	E3
Cli	ent consultation	
24	why it is important to encourage and allow time for clients to ask questions	E3
25	how to use effective consultation techniques when communicating with clients from different cultural and religious backgrounds, age, disabilities and gender for this treatment	E3

# Knowledge sign-off sheet Unit B23 Provide Indian head massage

#### What you must know (continued)

Level 3 NVQ/SVQ Beauty

## Hints and tips

A client suffering from tension headaches should be encouraged to relax their upper body muscles with specific exercises before treatment, and to continue with these at home.

You	u need to understand:	Evidence type
26	the importance of questioning clients to establish any contra-indications to Indian head massage	E3
27	why it is important to record client responses to questioning	E3
28	the legal significance of client questioning and recording the client's responses	E3
29	how to give effective advice and recommendations to clients	E3
30	how to visually assess the physical characteristics in the range	E3
31	how to assess posture and skeletal conditions that may be present and how to adapt and change the massage routine	E3
32	how to recognise different skin types and conditions	E3
33	how to recognise different scalp conditions and hair types	E3
34	the reasons why it is important to encourage clients with contra-indications to seek medical advice	E3
35	the importance of, and reasons for, not naming specific contra-indications when encouraging clients to seek medical advice	E3
36	why it is important to maintain client's modesty, privacy and comfort	E3
37	relationship between lifestyle patterns and effectiveness of treatment	E3
38	the beneficial effects which can result from changes to the client's lifestyle pattern (eg dietary and fluid intake, exercise habits, smoking habits, sleep patterns, hobbies, interests and means of relaxation)	E3

You	u need to understand:	Evidence type
Pr	eparation for treatment	
39	the importance of giving clients clear instructions on the removal of relevant clothing, accessories and general preparation for the treatment	E3
40	why it is important to reassure clients during the preparation process whilst also maintaining the client's modesty and privacy	E3
41	how to select the appropriate massage oil suitable for skin, scalp and hair type and condition	E3
42	how and when to adapt client preparation when working in different environments (eg cleansing the face, suitable positioning of the client etc)	E3
43	how to practically and mentally prepare yourself for carrying out the treatment	E3
Ar	atomy and physiology	
44	the structure and function of muscles, including the types of muscles (ie voluntary and involuntary) within the treatment areas	E4
45	the positions and actions of the main muscle groups within the treatment areas	E4
46	the position and function of the primary bones and joints of the skeletal system within the treatment areas	E4
47	how to recognise postural faults and conditions within the treatment areas (eg kyphosis, scoliosis)	E4
48	the structure, function and location of blood vessels and the principles of circulation, blood pressure and pulse within the treatment areas	E4
49	the interaction of lymph and blood within the circulatory system	E4
50	the structure and function of lymphatic system	E4
51	the position and function of the sinuses	E4
52	the basic principles of the central nervous system and autonomic system	E4
53	the basic principles of the endocrine and respiratory systems	E4

Comment	Date				

#### Unit sign-off

#### This section must be signed when the unit is complete.

We confirm that this evidence is authentic and the assessments were conducted under specified conditions and that all the performance criteria, range and essential knowledge requirements have been met for this unit.

Candidate signature	Date
Assessor signature	Date
IQA signature (if sampled)	Date
EQA signature (if sampled)	Date

Massage using pre-blended aromatherapy oils is a wonderfully relaxing treatment, which harnesses the effects of both massage and natural plant oils on the body and mind. It uses a combination of different techniques to bring about balance and harmony. In this unit you will learn the

specialised massage of the face, scalp and body. You will learn how to select an appropriate pre-blend, whether your client needs relaxing, uplifting or to achieve a sense of wellbeing. You will also learn about blends and techniques to help deal with cellulite.

# Unit B24 (City & Guilds Unit 030) Carry out massage using pre-blended aromatherapy oils Mandatory (Massage route)

#### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing massage using pre-blended aromatherapy oils.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

#### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **four** separate occasions, on **four** different clients. These must include **two** full body massage treatments that incorporate the face.

Massage using pre-blended oils

This unit has four outcomes.

Outcome 1
Maintain safe and
effective methods
of working when
carrying out
massage using
pre-blended
aromatherapy oils

Outcome 2
Consult, plan
and prepare for
treatments with
clients

Outcome 3
Massage the body
using pre-blended
aromatherapy oils
Outcome 4
Provide aftercare
advice

66

Using pre-blended oils is a good way to relax, energise or uplift the client.
Anita Crosland

# Unit B24 (City & Guilds Unit 030) Carry out massage using pre-blended aromatherapy oils Mandatory (continued)

Level 3 NVQ/SVQ Beauty

#### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

#### Used all of the following consultation techniques:

Questioning

Visual

Manual

Reference to client records

# Dealt with all of the following client physical characteristics:

Weight

Height

Posture

Muscle tone

Age

Health

Skin condition

## Dealt with at least one of the following necessary actions \*:

Encouraging the client to seek medical advice

Explaining why the treatment cannot be carried out

Modification of treatment

\* However, you must prove to your assessor that you are able to deal with the other two.

# Met all of the following treatment objectives:

Relaxation

Sense of wellbeing

Uplifting

Anti-cellulite

Stimulating

# Used all of the following massage techniques:

Effleurage

Petrissage

**Tapotement** 

Pressure point

## Covered all of the following treatment areas:

Face

Head

Chest and shoulders

Arms and hands

Abdomen

Back

Gluteals

Legs and feet

## Given all of the following types of advice:

Avoidance of activities which may cause contra-actions

Future treatment needs

Modifications to lifestyle patterns

Healthy eating and exercise advice

Suitable homecare products and their use

#### Hints and tips

During the consultation, ask about nut allergies and always check the ingredients of your pre-blend.

#### 17

#### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when carrying out massage using pre-blended aromatherapy oils

Client consultation

Preparation for treatment

Anatomy and physiology

Contra-indications and contra-actions

Pre-blended aromatherapy oils

Treatment specific knowledge

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 182–188.

#### Useful words

Some terms that you will come across in this unit are explained below.

**Erythema** Reddening of the skin due to dilation of blood capillaries on the skin's surface.

**Limbic system** The area of the brain concerned with instinct, memory and behaviour.

**Neuro-muscular** A firm form of massage used to stimulate nerves.

**Olfactory system** The system in the body that provides us with the sense of smell.

**Phototoxicity** The effect certain oils have of making the skin more sensitive in the presence of sunlight.

**Physiological effects** The effects that the oils have on the systems of the body.

**Pre-blended aromatherapy oils** Essential oils that have been pre-mixed with a vegetable oil base to achieve specific effects.

**Pressure points** Specific points on the body which, when stimulated, help to unblock energy flow.

**Psychological effects** The effects that essential oils have on the mind, memory and instincts.

**Repetitive Strain Injury (RSI)** Injury resulting from doing one type of action too much. The wrist and fingers are especially prone to RSI.

**Volatility** How quickly the essential oil evaporates.

#### Observation sign-off sheet

Unit B24 Carry out massage using pre-blended aromatherapy oils

#### What you must do

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will make at least four observations of your work on at least four separate occasions, on four different clients. These must include two full body massage treatments that incorporate the face.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

#### Outcome 1

## Maintain safe and effective methods of working when carrying out massage using pre-blended aromatherapy oils

- a Set up and monitor the treatment area to meet organisation procedures and manufacturers' instructions
- b Make sure that environmental conditions are suitable for the client and the treatment
- c Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- d Effectively disinfect your hands prior to and after treatment
- e Ensure your own posture and position minimises fatigue and risk of injury whilst working
- f Ensure all equipment is cleaned using the correct methods
- g Position equipment and pre-blended oils for ease and safety of use
- h Ensure the client is in a comfortable and relaxed position suitable for the treatment
- Maintain accepted industry hygiene and safety practices throughout the treatment

Never forget to disinfect your hands before performing a massage treatment.

- Adopt a positive, polite and reassuring manner towards the client throughout the treatment
- k Maintain the client's modesty, privacy and comfort at all times
- Dispose of waste materials safely and correctly

- m Ensure the treatment is cost-effective and is carried out within a commercially viable time
- n Ensure client record cards are up-to-date, accurate, complete, legible and signed by the client and practitioner
- o Leave the treatment area and equipment in a condition suitable for future treatments

Level 3 NVQ/SVQ Beauty

#### Hints and tips

Check your client likes the aroma of the pre-blend before commencing treatment.

treatment. This will help you to know what they want out of their massage.

#### Outcome 2

#### Consult, plan and prepare for treatments with clients

- a Use **consultation techniques** in a polite, sensitive and friendly manner to determine the client's treatment needs
- b Obtain signed, written informed consent from the client prior to carrying out the treatment
- Ensure that informed and signed parent or guardian consent is obtained for minors prior to any service \*
- d Ensure that a parent or guardian is present throughout the massage treatment for minors under the age of 16 \*\*
- e Clearly explain to the client what the treatment entails in a way they can understand
- f Use suitable **consultation techniques** to identify your client's medical history, **physical characteristics** and lifestyle pattern
- g Ask your client appropriate questions to identify if they have any contra-indications to massage treatments
- h Accurately record your client's responses to questioning
- i Encourage clients to ask questions to clarify any points
- j Effectively carry out a sensitivity test to establish response and suitability for treatment
- k Take the **necessary action** in response to any identified contra-indications \*\*\*
- I Ensure any referral is given without reference to a specific medical condition and without causing undue alarm and concern

- m Actively encourage clients to ask questions and clarify any points
- n Clearly explain and agree the projected cost, likely duration, frequency and types of treatment needed
- Agree in writing the client's needs, expectations and treatment objectives, ensuring they are realistic and achievable
- p Ensure that the client's **treatment area(s)** are clean and suitably prepared
- q Ensure that clothing, hair and accessories are effectively protected or removed
- r Select suitable pre-blended aromatherapy oils which meet the **treatment objectives** which are fit for purpose

Massage using pre-blended oils

This form can be used to record oral questioning, or for assessor/candidate comments, if required.

# Comments 1 2 3 4

Choose the pre-blend that you think best suits your client's emotional and physical needs. If you can't decide between two blends, ask your client to smell both and let them choose their favourite. Sally Biles

Knowledge sign-off sheet

Unit B24 Carry out massage using pre-blended aromatherapy oils

### What you must know

Level 3 NVQ/SVQ Beauty

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a cross-unit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

You	u need to understand:	Evidence type				
Or	ganisational and legal requirements					
1	your responsibilities under current health & safety legislation, standards and guidance eg the Care Standards Act, the Health & Safety at Work Act (and any other relevant legislation)	E3				
2	your responsibilities under local authority licensing regulations for yourself and your premises	E3				
3	the importance of not discriminating against clients with illnesses and disabilities and why (eg Disability Discrimination Act)	E3				
4	the age at which an individual is classed as a minor and how this differs nationally	E3				
5	why minors should not be given treatments without informed and signed parental or guardian consent	E3				
6	why it is important, when treating minors under the age of 16, to have a parent present	E3				
7	the legal significance of gaining signed, informed client consent to treatment	E3				
8	manufacturer's and organisational requirements for waste disposal	E3				
9	the importance of the correct storage of client records in relation to the Data Protection Act	E3				
10	how to complete the client records used in your organisation and the importance of, and reasons for, keeping records of treatments and gaining client signatures	E3				
11	your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisation requirements	E3

EQA signature (if sampled)	Date

Heated stones have been used by ancient cultures for centuries to relax and heal both physically and spiritually. This wonderful fusion of massage, heat and energy balancing involves the application of smooth, heated or cool stones to the body. The stones are arranged along the body's

energy centres, followed by massage that uses the stones as tools. This makes the massage more effective than manual treatment alone, and is also easy on the joints of the therapist's hands. A deep massage tailored to the client's needs can be achieved.

# Unit B28 (City & Guilds Unit 034) Provide stone therapy treatments Mandatory (Massage route and optional)

Stone therapy treatments

#### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing stone therapy treatments.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

#### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **four** separate occasions, on **four** different clients. These must include **two** full stone therapy treatments that incorporate the face.

This unit has four outcomes.

Outcome 1
Maintain safe and
effective methods
of working when
providing stone
therapy treatments

Outcome 2 Consult, plan and prepare for treatments with clients

Outcome 3
Perform stone
therapy treatments
Outcome 4
Provide aftercare
advice

Stone therapy is one of the most enjoyable and relaxing treatments.
The heat penetrates and relaxes muscles, allowing the therapist to carry out deep and intense massage manipulations to the area. Adele O'Keefe

# Unit B28 (City & Guilds Unit 034) Provide stone therapy treatments Mandatory (Massage route and optional) (continued)

Level 3 NVQ/SVQ Beauty

#### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

# Used all of the following types of equipment:

Professional stone heater

Stones

Accessories

Cooling systems

#### Used all of the following consultation techniques:

Questioning

Visual

Manual

Reference to client records

#### Dealt with all of the following client physical characteristics:

Weight

Height

Posture

Muscle tone

Age

Health

Skin condition

# Dealt with at least one of the following necessary actions \*:

Encouraging the client to seek medical advice

Explaining why the treatment cannot be carried out

Modification of treatment

\* However, you must prove to your assessor that you are able to deal with the other two.

# Met all of the following treatment objectives:

Relaxing

Balancing

Uplifting

Sense of wellbeing

Local decongestion

Relief from

muscular tension

# Used three of the following types of stones \*:

Basalt

Marine

Marble

Semi-precious stones

\*However, you must prove to your assessor that you are able to deal with the other one.

# Used all of the following stone therapy techniques:

Rotation of stones

Alternation of hot and cold stones

Use of hot stones only

Use of cold stones only

Combination of stone types and sizes

Temperature management

# Covered all of the following treatment areas:

Face

Head

Neck, chest and shoulders

Arms and hands

Abdomen

Back

Legs and feet

# Used all of the following treatment techniques:

Effleurage

Petrissage

Friction

Tapping

Tucking

Placement

Trigger point

# Given all of the following types of advice:

Avoidance of activities which may cause contra-actions

Future treatment needs

Modifications to lifestyle patterns

Suitable homecare products and their use

#### 400

#### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing stone therapy treatments

Client consultation

Preparation for treatment

Anatomy and physiology

Contra-indications and contra-actions

Stone therapy equipment

Treatment specific knowledge

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 207–215.

66

Warmed stones dilate the blood vessels and sedate the nervous system. Cold stones stimulate the nervous system and cause the blood vessels to contract.

Melissa Peacock

"

Stone therapy treatments

#### Useful words

Some terms that you will come across in this unit are explained below.

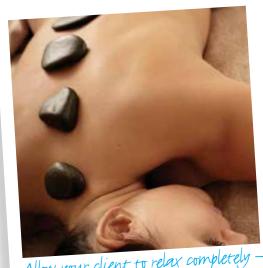

**Basalt stone** A black volcanic rock that absorbs and retains heat well. Its penetrative warmth helps to release deep muscular tension, congestion and improves the general circulation.

**Chakras** Energy centres that do not have a physical form but are a way of describing energies and energy flow. They are the focal point for restoring balance to the body.

**Lifestyle patterns** Regular habits such as smoking, alcohol intake, sleep, relaxation and exercise patterns, as well as diet and fluid intake.

**Marble** A hard, cold and smooth stone. Marble is used chilled for its cooling, decongesting and cleansing action, and because it is refreshing and invigorating for the body.

**Massage techniques** Specific movements applied to the body for a stimulating or relaxing effect. Massage techniques include effleurage, petrissage, friction, tapping, tucking, placement and trigger point. The speed and depth at which these techniques are applied can alter their effect.

Allow your client to relax completely - they deserve it!

# Observation sign-off sheet Unit B28 Provide stone therapy treatments What you must do

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will make at least four observations of your performance on at least four separate occasions, on four different clients. This must include two full body stone therapy treatments that incorporate the face.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

#### Outcome 1

# Maintain safe and effective methods of working when providing stone therapy treatments

- a Set up and monitor the **treatment area** to meet organisation procedures and manufacturers' instructions
- b Make sure that environmental conditions are suitable for the client and the treatment
- c Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- d Ensure that your nails are short, clean, well manicured and free of polish
- e Effectively disinfect your hands prior to and after treatment
- f Ensure your own posture and position minimises fatigue and risk of injury whilst working
- g Remove and handle stones in a way which avoids injury to yourself and the client
- h Ensure all tools and **equipment** are cleaned using the correct methods

Continues on next page

#### Hints and tips

The heat of the stones helps muscles relax and releases tension more quickly than in traditional massage.

- i Effectively disinfect stones after each treatment
- j Leave stones dry overnight and stored in a way which effectively energises them
- k Position **equipment** and treatment products for ease and safety of use
- Ensure the stones are heated and cooled following heater manufacturer's instructions prior to use
- m Ensure the client is in a comfortable and relaxed position suitable for the treatment
- n Use suitable materials to protect the client's skin against extremes of temperature during stone placement
- o Maintain accepted industry hygiene and safety practices throughout the treatment
- p Adopt a positive, polite and reassuring manner towards the client throughout the treatment
- q Maintain the client's modesty, privacy and comfort at all times
- r Use treatment products effectively to minimise waste
- s Dispose of waste materials safely and correctly
- t Ensure the treatment is cost-effective and is carried out within a commercially viable time
- u Ensure client record cards are up-to-date, accurate, complete, legible and signed by the client and practitioner
- v Leave the **treatment area** and **equipment** in a condition suitable for future treatments

Stone therapy treatments

#### Hints and tips

Practise cupping the stones in your hands rather than just holding them with the fingertips.

### What you must do (continued)

Level 3 NVQ/SVQ Beauty

For a successful stone therapy treatment, you must get used to massaging with stones.

#### Hints and tips

Carrying out stone therapy causes the therapist's body to heat up. Cool your hands by washing them in tepid water after treatments. Stay hydrated by drinking lots of water.

#### Outcome 2

### Consult, plan and prepare for treatments with clients

- a Use **consultation techniques** in a polite, sensitive and friendly manner to determine the client's treatment needs
- b Obtain signed, written informed consent from the client prior to carrying out the treatment
- c Ensure that informed and signed parent or guardian consent is obtained for minors prior to any stone therapy treatment \*
- d Ensure that a parent or guardian is present throughout the stone therapy treatment for minors under the age of 16 \*\*
- e Clearly explain to the client what the treatment entails in a way they can understand
- f Use suitable **consultation techniques** to identify your client's medical history, **physical characteristics** and lifestyle pattern
- g Ask your client appropriate questions to identify if they have any contra-indications to stone therapy treatments
- h Accurately record your client's responses to questioning
- Actively encourage clients to ask questions and clarify any points
- j Correctly carry out a test patch to accurately determine the client's skin response to hot and cold temperatures
- k Take the **necessary action** in response to any identified contra-indications \*\*\*
- I Ensure client advice is given without reference to a specific medical condition and without causing undue alarm and concern
- m Clearly explain and agree the projected cost, likely duration, frequency and types of treatment needed

- n Agree in writing the client's needs, expectations and **treatment objectives**, ensuring they are realistic and achievable
- o Ensure that the client's skin is clean and prepared to suit the areas to be treated
- p Ensure that clothing, hair and accessories are effectively protected or removed
- q Select **types of stone** suitable to meet the **treatment objectives**

Hot stone massage techniques are used to relax and soothe both the mind and body. Adele O'Keefe

# Observation sign-off sheet Unit B28 Provide stone therapy treatments

### What you must do (continued)

Level 3 NVQ/SVQ Beauty

Don't be afraid to use hot stones on other areas of the body, too!

#### Outcome 3

#### Perform stone therapy treatments

- a Clearly explain the sensation created by the stones
- b Explain the treatment procedure to the client in a clear and simple way at each stage in the process
- c Provide suitable support and cushioning to specific areas of the body during the treatment if necessary
- d Use suitable material to protect the client's skin against extremes of temperature during front and back placement
- e Correctly place suitable **types of stone** on the chakra points, when required, to meet the agreed **treatment objectives**
- f Correctly place suitable **types of stone** under the body, when required, ensuring client comfort
- g Ensure the skin is sufficiently lubricated to allow the smooth, continuous movement of the stones over the skin to avoid the risk of overheating
- h Effectively introduce and use **stone therapy techniques** in a way which avoids
  alarm to the client, is suitable for their **physical characteristics**, the **treatment area(s)** and **treatment objectives**
- i Adapt your treatment techniques and sequence to meet the client's physical characteristics and treatment area(s)
- j Effectively vary the depth, rhythm and pressure of **treatment techniques** to meet **treatment objectives**, **treatment area(s)** and client's **physical characteristics** and preferences
- k Check the client's wellbeing throughout the stone therapy treatment

- I Handle stones to avoid excessive noise and disturbance to the client throughout the treatment
- m Assist to reposition the client in a controlled manner to minimise disturbance of the treatment process
- n Take appropriate and prompt remedial action if contra-actions or discomfort occur during the course of treatment
- o Allow the client sufficient post-treatment recovery time
- p Ensure the finished result is to the client's satisfaction and meets the agreed treatment objectives

### Unit B28 Provide stone therapy treatments

### What you must know

Stone therapy treatments

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a cross-unit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

# Knowledge sign-off sheet Unit B28 Provide stone therapy treatments

# What you must know (continued)

Level 3 NVQ/SVQ Beauty

You need to understand:	Evidence type
12 your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisation requirements	E3
13 your responsibilities, and reasons for, keeping your nails short, clean, well manicured and free of polish for stone therapy treatments	E3
14 the organisation's requirements for client preparation	E3
15 your organisation's service times for stone therapy treatments and the importance of completing the service in a commercially viable time	E3
16 your organisation's and manufacturers' requirements for treatment area, equipment maintenance and equipment cleaning regimes	E3
How to work safely and effectively when providing stone therapy treatments	
17 how to set up the work area for stone therapy treatments	E3
18 the necessary environmental conditions for stone therapy treatments (including lighting, heating, ventilation and general comfort) and why these are important	E3
19 what is contact dermatitis and how to avoid developing it whilst carrying out stone therapy treatments	E4
20 the importance and reasons for disinfecting hands and how to do this effectively	E3
21 the importance of disinfecting stones after each treatment and how to do this effectively	E3

You	uneed to understand:	Evidence type
22	how to position yourself and the client for stone therapy treatments taking into account individual physical characteristics	E3
23	what is repetitive strain injury (RSI), how it is caused and how to avoid developing it when delivering stone therapy treatments	E4
24	the advantages to the therapist of using stone therapy as a means of avoiding RSI	E4
25	the importance of using the correct sized stones for the therapist's own hands and the client's physical characteristics	E3
26	the importance of adopting the correct posture throughout the treatment and the impact this may have on yourself and the outcome of the treatment	E3
27	reasons for maintaining client modesty, privacy and comfort during the treatment	E3
28	why it is important to maintain standards of hygiene and the principles of avoiding cross-infection	E3
29	how to minimise and dispose of waste from treatments	E3
30	why it is important to check the client's wellbeing at regular intervals during stone therapy treatments	E3
Cli	ent consultation	
31	why it is important to encourage and allow time for clients to ask questions	E3
32	how to use effective consultation techniques when communicating with clients from different cultural and religious backgrounds, age, disabilities and gender for this treatment	E3
33	the importance of questioning clients to establish any contra-indications to stone therapy treatments	E3
34	why it is important to record client responses to questioning	E3
35	the legal significance of client questioning and recording the client's responses	E3
36	how to give effective advice and recommendations to clients	E3

Stone therapy treatments

#### Hints and tips

Remember that it's not just the hot stones that can damage the skin; your client could suffer from freezer burns if the cold stones are too cold before use.

# Hasbier Philippe Phil

The fashion and photographic make-up industry is ever changing. As a make-up artist, you might work on looks for personal use, magazines, advertising campaigns or music videos. The ability to transform your client's idea into a real look is a challenging task, and preparation and research

into an idea is essential. It is a make-up artist's job to work alongside stylists, hairdressers and photographers to collectively produce an image. Your creative flair and artistic skill will grow as you work through this unit, and will enable you to create a range of beautiful images for your portfolio.

# Unit B11 (City & Guilds Unit 014) Design and create fashion and photographic make-up Mandatory (Make-up route)

### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for designing and creating fashion and photographic make-up.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **four** different occasions. In this unit the word 'client' is used to mean the person paying for the service. They may be different from the person on whom you are working.

Fashion make-up

This unit has three outcomes.

Outcome 1
Plan and design a range of make-up looks

Outcome 2
Produce a range of
make-up looks

Outcome 3
Evaluate your
results against
the design plan

objectives

66

The trick to lining eyes is making sure that you draw the line as close to the lash line as possible so that no skin shows.

Bobbi Brown

"

### Unit B11 (City & Guilds Unit 014) Design and create fashion and photographic make-up Mandatory (continued)

Level 3 NVQ/SVQ Beauty

### What you must cover

You will see key words in bold on the 'what you must do' list. For each of these, there is a range of things that you must cover. You must show that you have covered the following:

### **Produced looks for** all of the following activities:

Photographic – black and white

Photographic – colour

Fashion shows

### Created all of the following types of looks:

Period

**Fantasy** 

High fashion

Catwalk

Bridal

Commercial

### Addressed all of the following resource needs:

**Products** 

### Involved at least two of the following relevant persons \*:

Photographer

Art director

Make-up designer

Hair designer

Clients

Artistes

**Stylists** 

Nail technician

For this particular unit, knowledge evidence need not be produced for the remaining items in the range.

### Used all of the following make-up application techniques:

Precision base application

Highlighting and shading

Concealing

Blending

Stippling

Precision application of eye products

Precision application of lip products

Colour mixing

Stencilling

Body make-up

### Considered all of the following additional media:

Accessories

Clothes

Hair

Nails

you choose a colour theme, all the relevant people need to know what it is as soon as possible.

Tools and equipment

Time

People

### What you must know

You will be assessed on your knowledge of the following:

Communication

Health and safety

**Planning** 

Problem solving

Designing and developing make-up looks

**Evaluation** 

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 229-231.

Ask your photographer about how natural lighting can be used to create a particular effect.

Make-up needs to match the mood! The brief will inform the make-up artist who then designs the look.

Fashion make-up

### Useful words

Some terms that you will come across in this unit are explained below.

**Catwalk show** Usually performed on a runway, these feature models who are showcasing a designer's clothes or new collections.

**Client** The person who is commissioning the shoot. They may not always be present on the day, so you need to make sure you've designed exactly what they asked for.

Client specification or brief A description of what the client is looking for, usually in written form.

**Coloured filters** These are used to change the mood of the photograph. It is important to understand the effect that these will have on the make-up.

**Fashion stylist** The person who selects the clothing and accessories for the model. You need to work closely with them, bearing in mind the overall look.

**High fashion** Make-up that supports the impact of unique, exclusive and often trend-setting clothes, usually showcased at international fashion shows.

Photographer's assistant The person responsible for setting up, holding the reflectors, taking light readings, and looking after the camera equipment.

**Portfolio** A collection of your work that could include photographs, sketches, testimonials from satisfied clients, and any appearances of your work in magazines.

**Props** Items used as part of the shoot to add interest and support the theme.

**Show reel** A short DVD of your work to show to potential clients.

# Observation sign-off sheet Unit B11 Design and create fashion and photographic make-up

What you must do

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will observe your performance on at least four separate occasions. Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

### Outcome 1

### Plan and design a range of make-up looks

- a Agree contractual arrangements with the relevant person(s) prior to commencing your design plan
- b Clearly identify the intended **activities** for which the make-up is required
- c Use suitable sources of information to research ideas on themes for design
- d Accurately source and use suitable information to create your design
- e Create a design plan which:
  - has clearly defined objectives which meet the client's brief
  - contains mood boards suitable for the **look(s)** required
  - takes account of budgetary constraints
  - defines all **resources** required
  - states how any risks to health & safety can be reduced
  - takes account of foreseeable problems and ways of resolving them
  - takes account of lighting requirements
  - takes account of additional media
- f Agree your design plan with the relevant person(s)

### Outcome 2

### Produce a range of make-up looks

- a Prepare the work environment to meet legal, hygiene and application requirements
- b Prepare suitable equipment, materials and products for the make-up application
- c Ensure the person on whom you are working is in a position that permits access and minimises the risk of injury to both of you
- d Identify any contra-indications or restrictions to the make-up application
- Use suitable make-up application techniques for the agreed design brief
- Accurately apply false lashes to enhance the final design look, if required
- Manage resources within the limits of your own authority
- Communicate effectively with relevant person(s) throughout the make-up activities
- Adapt your agreed design plan to meet any changes to the original brief
- Ensure the use of **resources** conforms to the design plan
- Ensure the finished make-up look(s) meets the design brief

Skin camouflage is a very specialised form of make-up used to correct or conceal areas the client wishes to disguise. It uses a particular kind of make-up that is waterproof, making it longer lasting. In this unit you will learn how to correct or conceal according to your client's wishes, including covering tattoos, erythema and

hyper- and hypopigmentation, as well as how to disguise scarring. You will also learn how to advise and instruct the client on products and techniques of application for use at home. Some conditions can be very distressing to clients and so becoming skilled in this area can help you to make a real difference to their confidence.

# Unit B22 (City & Guilds Unit 028) Provide specialist skin camouflage services Mandatory (Make-up route)

### **Evidence requirements**

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for enhancing appearance using skin camouflage for providing specialist skin camouflage services.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

### What you must do

Simulation **may** be used for this unit. Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **four** occasions, involving **four** different clients, with the permission of each client.

Skin camouflage

This unit has five outcomes.

Outcome 1
Maintain safe and
effective methods
of working when
providing specialist
skin camouflage
services

Outcome 2
Consult, plan
and prepare for
specialist cosmetic
skin camouflage
Outcome 3
Carry out specialist

Carry out specialist cosmetic skin camouflage

Outcome 4
Instruct and
advise the client
on cosmetic
skin camouflage
techniques

Outcome 5
Evaluate the success
of instruction

Outcome 6
Provide aftercare
advice

CC The a

The correct application of cosmetic camouflage make-up will instill confidence in any client. Anita Crosland

# Unit B22 (City & Guilds Unit 028) Provide specialist skin camouflage services Mandatory (continued)

Level 3 NVQ/SVQ Beauty

### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

# Used three of the following camouflage products \*:

Camouflage creams
Camouflage powders
Setting products

Skin stains

Faux tan products

\* However, you must prove to your assessor that you are able to deal with the other two.

### Used all of the following application tools:

Brushes

**Fingers** 

Sponges

Velour puffs

### Used all of the following consultation methods:

Questioning

Visual

Manual

Reference to client records

### Addressed all of the following camouflage needs:

Tattoos

Atrophic scar tissue

Hypertrophic scar tissue

Keloid scar tissue

Hyper-pigmentation

Hypo-pigmentation

Erythema

Bruising

### Dealt with one of the following necessary actions \*:

Encouraging the client to seek medical advice

Explaining why the camouflage application cannot be carried out

Modification of camouflage application

\*However, you must prove to your assessor that you are able to deal with the other two.

# Carried out camouflage application on all of the following areas:

Head

Body

### Used all of the following camouflage instructional techniques:

Skills demonstration

Verbal explanation

Use of written instructions

### Provided all of the following types of aftercare advice:

Other products which can be used in conjunction with skin camouflage

Products/substances/ environments which should be avoided

Durability and removal of camouflage products

Future treatment needs

### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing skin camouflage

Client consultation, planning and preparation

Anatomy and physiology

Psychology

Contra-indications and contra-actions

Skin camouflage

Instructional skills

Aftercare advice for clients

Evaluation

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 249–255.

Don't be tempted to apply a single thick application in an attempt to conceal a problem area. A far superior result is achieved by applying two fine layers of the same camouflage product. Val Ross

Skin camouflage

### Useful words

Some terms that you will come across in this unit are explained below.

**Chloasma/melasma** A hyper-pigmentation disorder resulting in areas of increased pigmentation. Darker patches of skin compared to other areas will be visible.

**Congenital abnormality** This is a skin condition present since birth, eg port wine stains.

**Erythema** Reddening of the skin caused by the blood vessels dilating. This may be due to stimulation such as heat or massage, or may occur as an inflammatory response.

**Fluorescent light** Light that contains an excess of blue and green.

**Hyper-pigmentation** Increased melanin production resulting in darker patches of skin compared to other areas.

**Hypo-pigmentation** Absence of melanin, or reduced melanin production, resulting in paler patches of skin compared to other areas.

**Incandescent light** Light that contains an excess of reds and yellows.

**Primary colours** Every colour is made from a combination of red, yellow or blue. These three colours are known as the primary colours.

**Rosacea** Chronic inflammation of the skin producing pustules and papules but no comedones.

**Telangestacia** The technical term for thread veins, which are tiny red thread-like lines on the skin. Also known as dilated or broken capillaries.

**Vitiligo** A hypo-pigmentation disorder resulting in areas of very pale skin, with little or no pigment present.

# Observation sign-off sheet Unit B22 Provide specialist skin camouflage services

### What you must do

Level 3 NVO/SVO Reauty

Within your work, you must show your assessor that you can do the following. Your assessor will observe your performance on at least four separate occasions, involving four different clients (with the permission of each client).

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

### Outcome 1

### Maintain safe and effective methods of working when providing specialist skin camouflage services

- a Set up and monitor the treatment area to meet organisation procedures and manufacturers' instructions
- b Make sure that environmental conditions are suitable for the client and the skin camouflage
- c Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- d Effectively disinfect your hands prior to treatment
- e Ensure your own posture and position minimises fatigue and risk of injury whilst working
- f Ensure all tools are cleaned using the correct methods
- g Position skin **camouflage products** and **application tools** for ease and safety of use
- h Ensure the client is in a comfortable and relaxed position suitable for the skin camouflage application
- Maintain accepted industry hygiene and safety practices throughout the skin camouflage
- j Adopt a positive, polite and reassuring manner towards the client throughout the treatment

- Check the client's wellbeing at regular intervals according to organisational policy
- m Dispose of waste materials safely and correctly
- n Ensure the skin camouflage is cost-effective and is carried out within a commercially viable time
- o Ensure client record cards are up-to-date, accurate, complete, legible and signed by the client and practitioner
- p Leave the treatment area in a condition suitable for future treatments

Level 3 NVQ/SVQ Beauty

### Hints and tips

Remember that light may change the appearance of the colours you are using. A good therapist will take into account the setting and context in which the camouflage is to be worn.

# Agree the products you will use with your client.

### Outcome 2

### Consult, plan and prepare for specialist cosmetic skin camouflage

- a Use **consultation methods** in a polite and friendly manner to determine the client's treatment needs
- b Obtain signed, written informed consent from the client prior to carrying out the treatment/service
- c Ensure that informed and signed parent or guardian consent is obtained for minors prior to any treatment \*
- d Ensure that a parent or guardian is present throughout the treatment for minors under the age of 16 \*\*
- e Clearly explain to the client what the skin camouflage entails in a way they can understand
- f Ask your client appropriate questions to identify their skin **camouflage needs**
- g Encourage clients to ask questions to clarify any points
- h Ask your client appropriate questions to identify if they have any contra-indications to skin camouflage
- i Accurately record your client's responses to questioning

- Encourage clients with suspected contraindications to seek medical advice without reference to specific conditions and without causing undue alarm or concern \*\*\*
- k Take the **necessary action** in response to any identified contra-indication \*\*\*\*
- Clearly identify and agree the client's skin camouflage needs and the areas to be camouflaged
- m Ensure the client's expectations are realistic and achievable

Level 3 NVQ/SVQ Beauty

66

Always work in natural light when skin colour matching to achieve the best colour match. Val Ross

"

### Outcome 3

### Carry out specialist cosmetic skin camouflage

- a Ensure empathy and sensitivity to the nature of the client's condition is shown throughout
- b Apply compatible skin care products when required before the skin camouflage application
- c Use **application tools**, techniques and **camouflage products** which are best suited to the skin **camouflage needs**
- d Ensure **camouflage products** are applied in accordance with manufacturers' instructions to achieve required density, colour and effect
- e Establish an acceptable colour match with the client on the **areas to be camouflaged** to restore the skin coloration to the surrounding skin tone
- f Establish and apply an appropriate complementary colour prior to the application of the acceptable skin colour match if required
- g Apply compatible cosmetic and skin care products when required after the skin camouflage application
- h Take prompt remedial action where contra-actions occur during the course of the skin camouflage application

### Outcome 4 Instruct and advise the client on cosmetic

skin camouflage techniques

- a Discuss and recommend suitable camouflage products and application tools to meet the client's skin camouflage needs
- b Demonstrate application on the areas to be camouflaged and check the client's understanding
- c Use instructional techniques which are clear, logical and delivered at a pace suitable for the client
- d Guide the client through self application and removal of the skin **camouflage product** in a way which is suited to the client's needs and the products being used
- e Guide the client on how to select and apply compatible cosmetic and skin care products, for use under or over the client's camouflage
- f Allow the client sufficient time to practise skin camouflage techniques on themselves
- Explain the importance of adopting safe and hygienic working practices to minimise risk of cross-infection
- h Provide the client with opportunities to give feedback, ask questions and seek clarification

Image courtesy of iStockphoto.com/Lev Dolgachov

- Ensure empathy and sensitivity to the nature of the client's condition are shown throughout the instruction
- Remind the client of the need to seek medical opinion if the condition changes

### Knowledge sign-off sheet Unit B22 Provide specialist skin camouflage services

### What you must know

Yo	u need to understand:	Evidence type
Or	ganisational and legal requirements	
1	your responsibilities under relevant health & safety legislation	E3
2	why minors should not be given skin camouflage without informed and signed parental or guardian consent	E3
3	why it is important when treating minors under 16 years of age to have a parent or guardian present	E3
4	the reasons for ensuring that the request for skin camouflage from a child under the age of 16 has been instigated by them rather than their parent or guardian	E3
5	the importance of not discriminating against clients with illnesses and disabilities and why (eg Disability Discrimination Act)	E3
6	the legal significance of gaining signed, informed client consent to treatment	E3
7	your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisational requirements	E3
8	how to complete the client records and the importance and reasons for keeping records and gaining client signatures	E3
9	the importance of the correct storage of client records in relation to the Data Protection Act	E3
10	service times for completing skin camouflage and the importance of completing the application in a commercially viable time	E3
11	the pricing structures for skin camouflage	E3
12	how to avoid potential discomfort and injury to yourself and the risks of poor positioning of clients	E3

Skin camouflage

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a cross-unit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

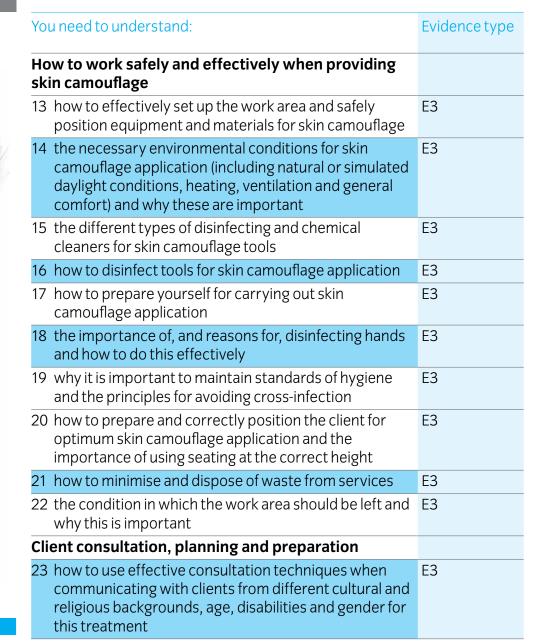

Level 3 NVO/SVO Beauty

# Knowledge sign-off sheet Unit B22 Provide specialist skin camouflage services

### What you must know (continued)

### Hints and tips

Establish what the client's expected outcomes are from the treatment and talk to them about how closely these can be met.

20	

Skin camouflage

You	u need to understand:	Evidence type
24	the importance of allowing the client to indicate the area requiring camouflage	E4
25	why it is important never to assume the area to be camouflaged	E4
26	the questioning and listening skills you need in order to find out information	E3
27	the importance of not asking intrusive questions and avoiding intrusive questioning techniques	E4
28	how to give effective advice and recommendations to clients	E3
29	how to interpret negative and positive body language	E3
30	the importance of questioning the client about known contra-indications	E3
31	the importance of gathering relevant current and ongoing medical and medication information that may affect skin camouflage application	E3
32	why it is important to encourage and allow time for clients to ask questions	E3
33	why it is important to record client responses to questions about contra-indications	E3
34	the legal significance of client questioning concerning contra-indications and the recording of client responses to questioning	E3
35	the reasons why it is important to encourage clients with contra-indications to seek medical advice	E3
36	the importance of, and reasons for, not naming specific contra-indications when referring clients to a general practitioner	E3
37	why it is important to respect the clients' modesty, privacy and sensitivities relating to their own appearance	E3
38	the importance of recognising your own limitations when dealing with clients requiring skin camouflage	E3
39	the importance of clients having realistic expectations of the camouflage results	E3

Level 3 NVQ/SVO Beauty

## Knowledge sign-off sheet Unit B22 Provide specialist skin camouflage services

# What you must know (continued)

You	u need to understand:	Evidence type
An	atomy and physiology	
40	the structure and function of the skin	E4
41	the photosensitivity of skin and how it differs in different skin groups (ie the Fitzpatrick Classification System)	E4
42	the healing and renewal process of skin and how it differs in different skin classification groups (eg Fitzpatrick scale)	E4
43	how ageing affects the skin and how its regenerative properties differ in different skin groups and lifestyle choices	E4
44	the causes and appearance of skin conditions likely to need camouflage (eg hypo-pigmentation such as vitiligo, stretch marks; hyper-pigmentation such as melasma, age spots; and erythema such as rosacea and thread veins)	E4
45	the characteristics and differences between the three types of scar tissue (atrophic; hypertrophic; keloid) and the implications of scar tissue	E4
46	the importance of recognising different skin tones (eg red or yellow undertones)	E4
Ps	ychology	
47	the psychological effects of changed image on the client	E4
48	the importance of understanding the correct psychological approach when working with people requiring camouflage	E4
49	the importance of understanding such conditions as body dysmorphia	E4
50	the importance of understanding why skin camouflage should be considered a medical, rather than make-up/cosmetic, application	E4

Skin camouflage

Yo	u need to understand:	Evidence type
Со	ntra-indications and contra-actions	
51	how to recognise those contra-indications requiring medical referral and why (eg structural changes in the area to be camouflaged, suspicious moles, infections)	E3
52	possible contra-actions which may occur during the camouflage application and how to deal with them	E3
Sk	in camouflage	
53	principles of colour theory (eg complementary colours)	E4
54	the importance of understanding when it may be necessary to apply a complementary colour prior to the skin match	E4
55	the importance of testing for a skin colour match on a small area	E4
56	the range and availability of skin camouflage products	E3
57	how to select and apply the products stated in the range to meet the needs of individual conditions	E3
58	attributes and limitations of products (eg appearance of applied products under different circumstances such as titanium dioxide and iron oxide in flash photography and on skin)	E4
59	where and how to obtain skin camouflage resources	E3
60	the importance of understanding the different properties in skin camouflage products	E3
61	the compatibility and limitation of other cosmetic and skin care products used in conjunction with skin camouflage	E3
62	the compatibility and limitation of topical and medical treatments used in conjunction with skin camouflage (eg sun screen, ointments, make-up)	E4
63	the importance of keeping own reference materials on camouflage applications and conditions	E3
Ins	structional skills	
64	how to plan skin camouflage instruction sessions (eg timing, pace, use of voice, use of graphic)	E3

People first started having eyelash extension treatments in the late 1990s, and they have become more and more popular since then.
They can be used on people (usually women) who want to make their eyelashes appear thicker and longer.
As one of the most advanced beauty treatments to date, care and attention to detail

are important in this area of beauty therapy. Attaching single eyelash extensions can be a very intricate process. During the course of this unit you will experience the activities and techniques needed in order for you to provide this treatment. Eyelash extension treatments are an excellent skill to add to your portfolio.

# Unit B15 (City & Guilds Unit 018)

## Provide single eyelash extension treatments

## **Optional**

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing single eyelash extension treatments.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

#### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence with this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least three different occasions, with each treatment including a different client. These must include a full and a partial set of single lash extensions.

This unit has five outcomes.

**Outcome 1** Maintain safe and effective methods of working when providing single eyelash extension treatments

**Outcome 2** Consult, plan and prepare for the treatment with clients

**Outcome 3** Attach single lash systems

**Outcome 4 Maintain and** remove single lash systems

**Outcome 5 Provide aftercare** advice

Single lash extensions can be a bit fiddly. To make sure they stick firmly to the natural lash apply adhesive to the base of the artificial lash extension and stroke down the natural lash before application. **Kym Menzies-Foster** 

# Unit B15 (City & Guilds Unit 018) Provide single eyelash extension treatments Optional (continued)

Level 3 NVQ/SVQ Beauty

#### What you must cover

You will see key words in bold on the 'What you must do' list. For each of these, there is a range of things that you must cover. You must show that you have:

# Used all of the following types of consultation techniques:

Questioning

Visual

Manual

Reference to client records

# Carried out at least one of the following necessary actions \*:

Encouraging the client to seek medical advice

Explaining why the treatment cannot be carried out

Modification of the treatment

\*However, you must prove to your assessor that you are able to deal with the other two.

## Considered all of the following factors:

Thickness of natural lash

Length of the natural lash

Direction of growth

Colour of the natural lash

Curvature of the natural lash

Eye shape

Previous eyelash perming

Density of eyelashes

Evident eyelash damage

Lifestyle

# Provided all of the following types of advice:

Avoidance of activities which may cause contra-actions

Longevity of single lash system treatments

Suitable homecare products and their use

Homecare maintenance routines

The importance of professional removal

#### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing single lash system treatments

Client consultation, treatment planning and preparation

Contra-indications and contra-actions

Anatomy and physiology

Equipment, materials and products

Attaching, maintaining and removing single lash systems

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 272–277.

The maximum commercially viable service time for applying a full set of single eyelash extensions is 120 mins. This does not include consultation and preparation time.

Eyelash extension treatments

#### Useful words

Some terms that you will come across in this unit are explained below.

**Air blower** A gentle puffer used to speed the drying process of the adhesive bonding agent.

**Alopecia** Hair loss that can affect adults and children of any age. The hair loss is often sudden.

**Blepharitis** Inflammation of the eyelid or eyelid rims. The eyes feel red, irritated and itchy. Dandruff-like crusts can appear on the eyelashes.

**Conjunctiva** The outermost layer of the eye and the inner surface of the eyelids.

**Conjunctivitis** An inflammation of the conjunctiva, most commonly due to an allergic reaction or an infection.

**Cornea** The clear front window of the eye that transmits and focuses light into the eye.

**Dry eye syndrome** A condition where the eyes don't produce enough tears, or they dry out too quickly.

**Glaucoma** A group of eye conditions in which the optic nerve is damaged at the point where it leaves the eye.

**Hair growth cycle** The stages of growth, transition and inactivity in the hair follicle.

**Jade stone** A cold disc which the adhesive is dispensed onto. It keeps the adhesive a constant temperature throughout the treatment.

**Meibomian gland** Specialised sebaceous glands at the rim of the eyelids. They secrete sebum to prevent evaporation of the eye's tear film, prevent tear spillage onto the cheek and make the closed lids airtight.

**Trichotillomania** A disorder or habit often triggered by stress or depression. Sufferers feel repeated urges to pull out scalp, lash, facial or brow hair, sometimes resulting in bald patches.

**'Y' Lashes** Lashes that split in two at the tapered end. This gives the effect of double the amount of lashes. They can be applied in half the normal time.

# Observation sign-off sheet Unit B15 Provide single eyelash extension treatments

## What you must do

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will observe your performance on at least three separate occasions, on at least three different clients. These must include a full and a partial set of single lash extensions.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

#### Outcome 1

# Maintain safe and effective methods of working when providing single eyelash extension treatments

- a Set up the work area to meet legal, hygiene and treatment requirements
- b Make sure that environmental conditions are suitable for the client and the treatment
- c Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- d Ensure all tools and equipments are cleaned using the correct methods
- e Effectively disinfect your hands prior to extending eyelashes
- f Maintain accepted industry hygiene and safety practices throughout the treatment
- g Position equipment and materials for ease and safety of use
- h Ensure your own posture and position minimises fatigue and the risk of injury whilst working

- i Maintain the client's modesty and privacy at all times
- j Dispose of waste materials safely and correctly
- k Ensure that the treatment is cost-effective and is carried out within a commercially viable time
- Leave the work area in a condition suitable for further treatments
- m Ensure the client's records are up-to-date, accurate, easy to read and signed by the client and practitioner

Individual permanent lash treatments are becoming incredibly popular in the salon. Having this skill will increase your client base.
Anita Crosland

# Observation sign-off sheet Unit B15 Provide single eyelash extension treatments

What you must do (continued)

Level 3 NVQ/SVQ Beauty

66

Practise using two pairs of tweezers to isolate the natural eyelash and apply the single lash extension. It can be fiddly.

Anita Crosland

"

#### Outcome 2

## Consult, plan and prepare for treatments with clients

- a Use **consultation techniques** in a polite and friendly manner to determine the client's treatment
- b Obtain signed, written informed consent from the client prior to carrying out the treatment
- c Ensure that informed and signed parental or guardian consent is obtained for minors prior to any treatment \*
- d Ensure that a parent or guardian is present throughout the treatment for minors under the age of 16 \*\*
- e Ask your client appropriate questions to identify if they have any known contra-indications to the treatment
- f Accurately record your client's responses to questioning
- g Encourage clients to ask questions to clarify any points
- h Help the client into a safe, comfortable and relaxed position for the treatment
- i Carefully examine the eye area to identify any **factors** that may affect the service
- j Correctly perform a skin sensitivity test on the client according to manufacturers' instructions and organisational requirements and record the results
- k Take the **necessary action** in response to any identified contra-indications \*\*\*
- Inform the client in a tactful way if there is an adverse reaction to the skin sensitivity test and they cannot be treated
- m Ensure client advice is given without reference to a specific medical condition and without causing undue alarm and concern

Image courtesy of Lash Perfect

- n Base your recommendations on an accurate evaluation of your client's eyelashes and the potential to achieve the required look
- Agree the treatment and realistic outcomes that are acceptable to your client and which meet their needs
- p Select and use single lash systems which are:
  - of a suitable colour
  - of a suitable curvature
  - custom blended
  - of a suitable length
  - of a suitable thickness
- q Prepare the single lash extensions to avoid wastage, tangling and to meet the manufacturer's instructions
- r Ensure your client's clothing is effectively protected and all hair away from the face prior to treatment
- s Ensure any lashes not to be treated are effectively secured and protected
- t Leave the client's eye area free of all make-up and oil prior to treatment

### What you must do (continued)

Level 3 NVQ/SVQ Beauty

Consider the whole look for the single lash extensions, including make-up and accessories.

#### Outcome 3

#### Attach single lash systems

- a Effectively isolate single lashes to meet the requirements of the system to be used
- b Place and secure the single lash systems in a way that will allow them to lie in the direction required
- c Effectively secure lash extensions into your client's lashes with an even application of adhesive
- d Leave a gap between the eyelash extension and the eyelid to meet manufacturers' instructions
- e Add and attach single lash systems in a way that takes into account the factors influencing the treatment
- f Effectively release lashes and eye pads at regular intervals throughout the treatment to avoid unwanted adhesion
- g Effectively remove any excess adhesive and debris throughout the attachment process, minimising any discomfort to the client
- h Check the comfort of your client at regular intervals throughout the treatment
- i Give suitable reassurance to the client, if necessary
- j Identify and resolve any problems occurring during the service
- k Effectively seal the eyelashes following manufacturers' instructions
- Ensure, on completion, that the single lash systems give a balanced and well proportioned finish suitable for the intended look and your client's natural eyelashes

Unit B15 Provide single eyelash
extension treatments

## What you must know

Level 3 NVQ/SVQ Beauty

You will be assessed on your knowledge and understanding of all the following points. This will be completed by your assessor through oral questions (evidence type E3) and a mandatory test (E4). These will be online tests.

The form tells you which evidence type is needed for each point.

Some areas appear in more than one unit (shaded in darker blue). These are covered in a cross-unit knowledge test. You only need to be tested on these once.

Once you have been assessed on each point, you can fill in the date and reference any written evidence that you've put in your portfolio.

You	u need to understand:	Evidence type
Or	ganisational and legal requirements	
1	your responsibilities under relevant health & safety legislation	E3
2	why minors should not be given treatments without informed and signed parental or guardian consent	E3
3	the importance of not discriminating against clients with illnesses and disabilities and why (eg Disability Discrimination Act)	E3
4	the age at which an individual is classed as a minor and how this differs nationally	E3
5	why it is important, when treating minors under 16 years of age, to have a parent or guardian present	E3
6	the legal significance of gaining signed, informed client consent to treatment	E3
7	issues surrounding the delivery of eyelash treatments to minors	E3
8	your responsibilities, and reasons for, maintaining your own personal hygiene, protection and appearance according to accepted industry and organisational requirements	E3
9	how to complete the client records used in your salon and the importance and reasons for keeping records of treatments and gaining client signatures	E3
10	the importance of the correct storage of client records in relation to the Data Protection Act	E3
11	your salon's service times for completing eyelash treatments and the importance of completing the application in a commercially viable time	E3
12	the salon pricing structures	E3

You	u need to understand:	Evidence type
13	how to avoid potential discomfort and injury to yourself and the risks of poor positioning of clients	E3
	w to work safely and effectively when providing gle lash system treatments	
14	how to set up the work area, prepare and use the equipment and materials for single lash system treatments	E3
15	methods of disinfecting and sterilising equipment	E3
16	how to maintain equipment and materials in a clean and hygienic condition	E3
17	how to prepare yourself for carrying out single lash system treatments	E3
18	the importance of, and reasons for, disinfecting hands and how to do this effectively	E3
19	the necessary environmental conditions for single lash system treatments (including lighting, heating, ventilation and general comfort) and why these are important	E3
20	the safety considerations which must be taken into account when using single lash systems (eg possible reaction to adhesives and removal solutions, alopecia, etc)	E3
21	how to check equipment used for single lash system treatments	E3
22	why it is important to maintain standards of hygiene and the principles for avoiding cross-infection	E3
23	how to effectively and safely position equipment and materials for single lash system treatments	E3
24	how to minimise and dispose of waste from treatments	E3
25	the condition in which the work area should be left and why this is important	E3
	ent consultation, treatment planning d preparation	
26	how to use effective consultation techniques when communicating with clients from different cultural and religious backgrounds, age, disabilities and gender for this treatment	E3

# Knowledge sign-off sheet Unit B15 Provide single eyelash extension treatments

## What you must know (continued)

You	u need to understand:	Evidence type
27	the questioning and listening skills you need in order to find out information	E3
28	the importance of assessing the client for any pre-treatment requirements (eg eyelash perming, eyelash tinting etc)	E3
29	how to give effective advice and recommendations to clients	E3
30	how to interpret negative and positive body language	E3
31	the importance of questioning the client about known contra-indications	E3
32	why it is important to record client responses to questions about contra-indications	E3
33	why it is important to encourage and allow time for clients to ask questions	E3
34	the legal significance of client questioning concerning contra-indications and the recording of client responses to questioning and the outcome of the skin sensitivity test	E3
35	the reasons why it is important to encourage clients with contra-indications to seek medical advice	E3
36	the importance of, and reasons for, not naming specific contra-indications when encouraging clients to seek medical advice	E3
37	the importance of, and reasons for, not naming specific contra-indications when referring clients to a general practitioner	E3
38	why it is important to maintain clients' modesty and privacy	E3

You need to understand:	Evidence type
39 how to conduct an examination of natural eyelashes and the eye area to identify factors that will affect the treatment	E3
40 how to estimate the length of time the single lash systems in the range are likely to take	E3
41 how to carry out a skin sensitivity test and why it should be conducted	E4
42 how to interpret the results of a skin sensitivity test	E4
43 how to cleanse the area to be treated	E3
Contra-indications and contra-actions	
44 those contra-indications requiring medical referral and why (eg infectious skin diseases and eye infections)	E4
45 those contra-indications which prevent treatment and why (eg conjunctivitis, chemotherapy, trichlotillomania, recent eye surgery, blepharitis, eye infections)	E4
46 those contra-indications which restrict treatment and why (eg psoriasis, styes, dry eye syndrome, glaucoma, contact lenses, thyroid disturbance)	E4
47 how to identify erythema and its causes	E4
48 the possible contra-actions resulting from single lash system treatments and how to deal with them (eg eye irritations)	E4
Anatomy and physiology	
49 the structure and cycle of hair growth	E4
50 basic structure and function of the eye	E4
51 the physical effect of the eyelash extension process on the eye (eg thickening of the cornea, overstimulation of the meibomian gland)	E4
Equipment, materials and products	
52 the types of single lash systems available and their respective advantages and disadvantages	E3
53 the principles of blending single eyelashes	E4

# B25 self tanning services

Self tanning has grown to be a very popular salon treatment, ideal for those who want year-round colour, or who wish to avoid the damaging effects of ultraviolet rays from the sun. You'll get clients who want to look great for special occasions, or need a base colour before a holiday. A product containing tanning

ingredients is applied to the skin, and left to develop into the tan. In this unit, you will learn how to prepare the body, apply the tanning product and give homecare advice, which is vital to maintain the effect the client wants. A range of methods may be used, including manual cream application or manual spray tanning.

# Unit B25 (City & Guilds Unit 031) Provide self tanning services Optional

Self tanning services

#### Evidence requirements

To achieve this unit you must practically demonstrate in your everyday work that you have met the standards for providing self tanning treatments.

The standards cover things that you must do (performance criteria), things that you must cover (range) and things that you must know.

#### What you must do

Your evidence should be collected when carrying out a real job, whether paid or voluntary, and when dealing with real clients, whether internal or external to the salon. Simulation is **not** allowed for any performance evidence within this unit.

Most evidence of your performance will be gathered from the observations made by your assessor, but you may be required to produce other evidence to support your performance if your assessor has not been present. This will involve your assessor observing your performance on at least **three** different occasions, each involving a different client. Observations must include a spray tan and a manually applied self tan.

This unit has four outcomes.

Outcome 1
Maintain safe and
effective methods
of working when
providing self
tanning treatments

Outcome 2 Consult, plan and prepare for treatments with clients

**Outcome 3** 

Apply self tan products
Outcome 4
Provide aftercare advice

66

Tell clients to adapt their make-up to their new skin tone, with a slightly darker foundation.
Lisa Fulton

"

# Unit B25 (City & Guilds Unit 031) Provide self tanning services Optional (continued)

Level 3 NVQ/SVQ Beauty

#### What you must cover

You will see key words in bold on the 'what you must do' list. For each of these, there is a range of things that you must cover. You must show that you have covered the following.

# Used all of the following types of equipment:

Spray gun

Compressor

**Buffing mitt** 

# Used at least four of the following types of product \*:

Tanning creams

Tanning gels

Spray tan liquid

Barrier cream

**Exfoliators** 

Moisturisers

\* However, you must prove to your assessor that you are able to deal with the other two.

#### Used all of the following consultation techniques:

Questioning

Visual

Reference to client records

# Dealt with at least one of the following necessary actions \*:

Encouraging the client to seek medical advice

Explaining why the service cannot be carried out

Modification of treatment

\* However, you must prove to your assessor that you are able to deal with the other two.

# Provided all of the following types of advice:

Suitable aftercare products and their use

Contra-actions that may occur post-treatment and how to deal with them

Post-treatment restrictions

Recommended further follow-on treatments

Image courtesy of iStockphoto.com/Lighthaunter

#### 202

#### What you must know

You will be assessed on your knowledge of the following:

Organisational and legal requirements

How to work safely and effectively when providing self tanning treatments

Client consultation

Contra-indications and contra-actions

Equipment and products

Tanning treatments

Aftercare advice for clients

This will be completed through written and oral questioning by your assessor, or by an online test. For details of what you must know, see pages 293–297.

66

Remember to maintain the client's modesty at all times, to reduce feelings of self-consciousness.

Anita Crosland

"

Useful words

Some terms that you will come across in this unit are explained below.

**Chloasma** A hyper-pigmentation disorder resulting in darker areas of skin, associated with pregnancy and the contraceptive pill.

**Development time** How long the product should be left on in order to produce the tan. It will vary between manufacturers, but is usually 4–6 hours.

**Dihydroxyacetone** A sugar found in self tanning products that reacts with amino acids in the skin to produce a tanned effect.

**Exfoliation** The removal of dead skin cells from the surface of the skin to leave it refined, soft and even. This is done beforehand, for best results, and afterwards, to help the tan to fade evenly.

**Guide colour** This is the shade the product looks when first applied to the skin. After development time, it's washed off, and the true colour, unique to each client, will be visible.

**Hyper-pigmentation** Increased melanin production, which causes darker patches of skin.

**Hypo-pigmentation** Reduced melanin production, which causes paler patches of skin.

**L-Tyrosine** A tan accelerator that helps with the skin's own production of melanin.

**Melanin** The dark pigment produced naturally by the skin. Melanin levels vary from client to client, so you'll come across a huge range of skin tones.

**Skin patch test** This is where a small amount of product is applied to the skin and left on for 24 hours, usually behind the ear, to ensure there will be no adverse reaction.

**Vitiligo** A hypo-pigmentation disorder resulting in areas of very pale skin, with little or no pigment present.

# Observation sign-off sheet Unit B25 Provide self tanning services

What you must do

Level 3 NVQ/SVQ Beauty

Within your work, you must show your assessor that you can do the following. Your assessor will observe your performance on at least three separate occasions each on a different client. Your assessor will want to see you provide a spray tan and a manually applied self tan.

Each time you achieve all the points listed below within a single client service, your assessor will tick the circle and enter the date.

#### Outcome 1

# Maintain safe and effective methods of working when providing self tanning treatments

- Set up the treatment and equipment area to meet organisation procedures and manufacturers' instructions
- b Wear suitable personal protective **equipment**
- c Ensure the client is provided with suitable personal protective **equipment**
- d Make sure that environmental conditions are suitable for the client and the treatment
- e Ensure your personal hygiene, protection and appearance meets accepted industry and organisational requirements
- f Effectively disinfect your hands prior to treatment
- g Ensure all tools and **equipment** are cleaned using the correct methods
- h Position **equipment** and **products** for safety and ease of use

Self tanning services

- Maintain accepted industry hygiene and safety practices throughout the treatment
- Maintain the client's modesty, privacy and comfort at all times
- k Check the client's wellbeing at regular intervals throughout the treatment
- Dispose of waste materials safely and correctly
- m Ensure the treatment is cost-effective and is carried out within a commercially viable time
- n Ensure client record cards are up-to-date, accurate, complete, legible and signed by the client and practitioner
- o Leave the treatment area and equipment clean and in a condition suitable for future treatments

66

Advise your client to exfoliate and moisturise skin for at least a week before tanning – the tan will last a lot longer. Lisa Fulton

# Observation sign-off sheet Unit B25 Provide self tanning services

What you must do (continued)

#### Hints and tips

If the tan has developed well on one area of the body, but not on others, it may be due to application technique, preparation of the area, client's homecare, or the characteristics of that area. It is important to determine the cause if the client is to be kept happy and return.

#### Outcome 2

#### Consult, plan and prepare for treatments with clients

- a Use consultation techniques in a polite and friendly manner to determine the client's treatment needs
- b Ensure that informed and signed parent or guardian consent is obtained for minors prior to any treatment \*
- c Ensure that a parent or guardian is present throughout the self tanning treatment for minors under the age of 16 \*\*
- d Clearly explain to the client what the treatment entails, its potential benefits and any restrictions to use in a way they can understand
- e Accurately carry out a skin sensitivity test to determine skin sensitivity and colour preference, when necessary
- f Ask your client appropriate questions to identify if they have any contra-indications to self tanning treatments

- g Accurately record your client's responses to questioning
- h Take the **necessary action** in response to any identified contra-indications \*\*\*
- i Recommend alternative tanning treatments which are suitable for the client's skin type and needs, when necessary
- j Clearly explain and agree the projected cost, duration and frequency of treatment needed
- k Agree in writing the client's needs, expectations and treatment outcomes, ensuring they are realistic and achievable
- I Ensure that the client's skin is clean and prepared to suit the type of **product** to be used

### Timing tip

The maximum commercially viable service time for a spray tan is 30 mins, and for a manual self tan 60 mins. This does not include consultation and preparation time.

# Outcome 3

# Apply self tan products

- a Ensure that exfoliation is carried out prior to the treatment according to manufacturer's instructions
- b Ensure that exfoliation leaves the skin smooth and free from dry, flaky skin
- c Effectively apply moisturisers and barrier creams following manufacturer's instructions to prevent over-development of tanning **products**
- d Correctly test the pressure and operation of the spray gun prior to use
- e Use **equipment** and **products** to meet client requirements and following manufacturer's instructions
- f Use spray tanning techniques in a controlled way and at a correct distance from the body to achieve the desired effect
- g Apply **products** evenly in the correct sequence to achieve the desired effect
- h Use techniques that minimise the risk of **products** being spread outside the treatment area and surrounding environment
- i Effectively correct any problems occurring during the application process
- j Ensure that the finished result is to the client's satisfaction

# DIOIL intonnations

For certain units, you will have to complete services within a 'commercially viable time'. You will find these timings within the units, but below is a complete list for your reference. The timings exclude preparation and consultation.

5	ervice Mins (maxir	num)
1	Back massage	30
2	Full body massage (excluding head and face)	60
3	Full body massage (including head and face)	75
4	Back massage using pre-blended aromatherapy oils	30
5 ar	Full body massage (excluding head and face) using pre-blended omatherapy oils	60
	Full body massage (including head and face) using pre-blended omatherapy oils	75
7	Indian head massage	45
8	Full body stone therapy treatment (including face)	75
9	Hollywood wax	60
10	) Brazilian wax	45
11	Shaping wax	45
12	? Intimate male wax	60
13	Full face straight airbrush make-up	30
14	A full set of single eyelash extensions	120
15	Full body spray tan	30
16	Full body manual self tan	60

Specialist treatments may require longer, following manufacturers' instructions.

Note: Standard service times have not been specified for the following treatments:

- Camouflage treatment
- Make-up design
- Epilation
- Body treatments
- Spa treatments
- Airbrush make-up design
- Facial electrical treatments

This is because service times will vary dramatically according to client needs, treatment requirements and service delivery.

Health and safety

# Further information on health and safety legislation (Unit G22)

# Unit overview

Fundamental to this unit is an understanding of the terms 'hazard', 'risk' and 'control'. They have been defined overleaf and it is **very important** that they are understood before undertaking G22.

The main outcomes of this unit are:

Check that health and safety instructions are followed

Make sure that risks are controlled safely and effectively

This unit is for everyone at work (whether paid, unpaid, full or part-time). The scope of the Health & Safety at Work Act 1974 covers 'all persons' whether employers, employees, self-employed, contractors, etc. Amongst other things the Act seeks to secure the health, safety and welfare of people whilst they work and protect other people against risks to health or safety arising from the activity of people at work. This unit does not require you to undertake a full risk assessment; it is about having an appreciation of significant risks in the workplace and knowing how to identify them and deal with them.

This unit covers the health and safety duties for everyone in the workplace, irrespective of their work role. It describes the competencies required to ensure that: your own actions do not create any health and safety risks you do not ignore significant risks in your workplace, and you take sensible action to put things right, including reporting situations which pose a danger to people in the workplace and seeking advice.

# Further information on health and safety legislation (continued)

The Health & Safety Executive (HSE) is the body appointed to support and enforce health and safety law. It has defined three important concepts, as follows:

**Hazard** 'a hazard is something with potential to cause harm'

**Risk** 'a risk is the likelihood of the hazard's potential being realised'

**Control** 'the means by which risks identified are eliminated or reduced to acceptable levels'

Almost anything may be a hazard, but may or may not become a risk. For example:

- 1 A trailing electric cable from a piece of equipment is a hazard. If it is trailing across a passageway there is a high risk of someone tripping over it, but if it lies along a wall out of the way, the risk is much less.
- 2 Poisonous or flammable chemicals are hazards and may present a high risk. However, if they are kept in a properly designed secure store and handled by properly trained and equipped people, the risk is much less than if they are left about for anyone to use or misuse.
- 3 A failed light bulb is a hazard. If it is just one bulb out of many in a room it presents very little risk, but if it is the only light on a stairwell, it is a very high risk. Changing the bulb may be a high risk, if it is high up, or if the power has been left on, or low risk if it is in a table lamp which has been unplugged.
- 4 A box of heavy material is a hazard. It presents a higher risk to someone who lifts it incorrectly, rather than someone who uses the correct manual handling techniques.

# Health & Safety at Work Act 1974

The Health & Safety at Work Act 1974 is the main piece of legislation under which nearly all the other regulations are made. It is for this reason that only this piece of legislation is specifically referred to in this unit.

Employers have a legal duty under this Act to ensure, so far as is reasonably practicable, the health, safety and welfare at work of the people for whom they are responsible and the people who may be affected by the work they do.

Under this Act it is also important to be aware that all people at work, not just employers, have a duty to take reasonable care to avoid harming themselves or others through the work they do.

Risks should be reduced 'so far as is reasonably practicable'. This term means the duty holder (in most instances the employer) can balance the cost against the degree of risk although obviously any Health & Safety Inspectors would expect that relevant good practice is followed.

### According to the Act:

Employers must safeguard so far as is reasonably practicable, the health, safety and welfare at work of all the people who work for them and 'other persons'. This applies in particular to the provision and maintenance of safe plant and systems of work and covers all machinery, equipment and substances used.

People at work also have a duty under the Act to take reasonable care to avoid harm to themselves or to others by their working practices and to co-operate with employers and others in meeting statutory requirements. The Act also requires employees not to interfere with or misuse anything provided to protect their health, safety or welfare in compliance with the Act.

# Other legislation

There is an array of health and safety regulations and codes of practice which affect people at work. There are regulations for those who, for example, work with electricity, or work on construction projects, as well as regulations covering noise at work, manual handling, working with VDUs, or dealing with substances hazardous to health, etc. The specific requirements for all or any of these can be obtained from HSE local offices.

As many of the regulations are only relevant to certain workplaces or working practices no specific reference has been made in the Knowledge Requirements to any of these regulations. The phrase 'your responsibilities for health and safety as required by any specific legislation covering your job role' is intended to relate to those specific pieces of legislation important to your workplace and/or working practices which you should be able to find out about.

Health and safety

# Further information on health and safety legislation (continued)

# General guidance on health and safety legislation applicable to beauty therapy

Health and safety is the responsibility of all persons at work. Employers and supervisors in particular have a greater responsibility for health and safety than, say, the trainee stylist or stylist, but all have a responsibility to work in a healthy and safe manner.

Section 7 of the Health & Safety at Work Act of 1974 states:

'It shall be the duty of every employee while at work

- a to take reasonable care for the health & safety of himself and of other persons who may be affected by his acts or omissions at work; and
- b as regard any duty or requirement imposed on the employer or any other person by or under any of the relevant statutory provisions, to co-operate with him so far as is necessary to enable that duty or requirements to be performed or complied with'

There are many individual items of health and safety legislation which apply to the working of a beauty salon. Some, like 'The Management of Health & Safety at Work Regulations 1992' (which require management to carry out a Risk Assessment of their salons, to identify hazards and to improve working conditions and practices) obviously apply mainly to your employer. Other items of legislation apply to employers and all those working within the salon.

The following are the principle items of legislation which apply to general salon operations and, therefore, to employers and employees/trainees, etc alike:

- 1 The Health & Safety at Work etc. Act 1974
  Is the great 'enabling' Act from which most of the subsequent legislation has sprung.
- 2 The Workplace (Health, Safety & Welfare) Regulations 1992 Have taken the place of most of the Office, Shops and Railway Premises Act 1963, and require all at work to help maintain a safe and healthy working environment. They apply very much to salons.
- **3 The Manual Handling Operations Regulations 1992**Places upon all at work the duty to minimise the risks from lifting and handling objects.

- 4 The Provision and Use of Work Equipment Regulations 1992 Impose upon the employee the duty to select equipment for use at work which is properly constructed, suitable for the purpose and kept in good repair. Employers must also ensure that all who use the equipment have been adequately trained. The requirement for competence to use salon tools and equipment is embodied within the beauty therapy standards.
- 5 The Personal Protective Equipment at Work Regulations 1992 Confirm the requirement for employers to provide suitable and sufficient protective clothing/equipment, and for all employees to use it when required. The use of personal protective equipment (PPE) is a requirement of the beauty therapy standards.
- 6 The Control of Substances Hazardous to Health Regulations 1992 (often referred to as COSHH) to include subsequent amendments Are particularly important as the storage, use and sale of a wide range of chemicals forms an important part of salon services, especially as such substances are applied on and sold to non-employees, ie clients.
- 7 The Electricity at Work Regulations 1989
  Under this law, your salon is required to maintain electrical equipment in a safe condition. It is your responsibility to report any faulty electrical equipment which you come across in your workplace.
- 8 Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1985 (often referred to as RIDDOR)

  Under this regulation, your salon is required to report injuries, disease and dangerous occurrences. It is your responsibility to report to the relevant person any injuries and dangerous occurrences which happen at work. Your salon may also require you to report any potentially infectious conditions of which you become aware.

9 Cosmetic Products (Safety) Regulations 1989

Beauty Suppliers Association.

This law lays down rules for recommended volumes and strengths of different hydroxide based products. The strength of a product will vary depending on whether it has been prepared for professional or non-professional general use. It is important that when using these products, you check its strength from the manufacturer's guidance notes and check current legislation. (Copies of the Regulations can be bought from Her Majesty's Stationery Office (HMSO) bookshops.) Guidance can also

be obtained from individual manufacturers and the Hairdressing and

# What do these words mean?

This section contains explanations of how commonly used words and phrases have been used in the Habia Level 3 Beauty Therapy standards.

**Aseptic** The opposite of sepsis, a situation trying to eliminate bacteria. All treatment procedures must be aseptic ie wearing PPE, hand washing, disposal of waste etc (from British Standards glossary of terms relating to Disinfectants).

Atrophic scar tissue Scar tissue that is lower than the surrounding skin, an indented scar.

Audio sonic A hand-held massage machine which produces a gentle massage action but penetrates deep into the tissues.

**Avant-garde** Images that are radical, daring and in advance of their time.

Ayurveda An ancient Indian Ayurvedic healing system which combines natural therapies and encompasses the mind, body and spirit.

**Blend** The application of direct current and high frequency to the hair follicle simultaneously.

**Blood spots** Non linear concentrations of blood present on the skin's surface.

**Cataphoresis** This is usually applied after an epilation treatment by galvanic electrolysis to soothe and reduce redness on the skin.

**Chakras** The ancient sanskrit word Chakra means 'energy wheel'. Chakras act as a link between the emotional and physical body.

**Contra-actions** Refers to negative reactions from the treatment or products, eg excessive erythema, allergic reactions.

**Contra-indications** Conditions or restrictions, which indicate a service should not be carried out.

**Dermatosis papulosa nigra** Lesions that develop through defects in the pilosebaceous follicles. They are benign, non-infectious but gradually increase in number.

**Desincrustation** A deep cleansing treatment using the effects of a galvanic current.

**Diathermy** Oscillating alternating current which destroys hair growth cells by heat.

**Disinfection** Inhibits the growth of disease causing micro-organisms (except spores) using chemical agents.

**Ectomorph** A lean and angular body shape.

**Electrolysis** Total follicle destruction using a direct current.

**Electrotherapy** The use of mechanical or electrical equipment to improve face and body condition.

**Endomorph** A round body shape.

**Epilation** Total follicle destruction.

**Erythema** Redness to the skin caused by irritation or injury to the tissue.

**Exfoliation** The removal of surface skin cells.

**Faux tan** Alternative word for fake tan.

Fibroma Benign tumour of connective tissue.

Gender dysforiac A person who believes that he/she is trapped in the wrong gender.

**Gold needle** A needle plated with gold.

**Gyratory massager** Revolving mechanical equipment used to reproduce massage movements.

Hypertrophic scar tissue Scar tissue that is higher than the surrounding skin-protruding scar.

Insulated needle A needle coated with insulating material leaving only the tip exposed.

Iontopheresis The introduction of ionised products with an electrical charge into the skin using a galvanic current to improve all skin conditions.

Keloid scar Growth of hard, raised, irregular scar tissue which spreads beyond the original injury –tending to occur more often on dark skin.

**Legislation** Laws affecting the conduct of business, treatments, the premises or working environment, people employed and systems of work.

**Lip stains** Cosmetics that will stain-dye the lips with a colour which lasts far longer than traditional lipsticks.

**Marma (pressure point)** An ancient Indian term for pressure point application.

**Mental preparation** Requires the therapist to relax and clear the mind to allow them to fully focus on the treatment.

**Mesomorph** A body shape where the shoulders are the widest point.

**Milia** These are hard white keratin trapped in a blind ended duct where there is no surface opening due to an overgrowth of epidermal skin tissue. They appear as a pearly white nodule. Commonly known as a whitehead.

**Minors** In Scotland a minor is classed under the age of 16. In England, Wales and Northern Ireland a minor is someone under the age of 18. All minors require parental consent.

**Monthly Index of Medical Specialities (MIMS)** Items that can be on NHS prescription or via Hospital Formulary.

**Needle stick injuries** Accidental self injury with a used needle.

**Objectives** Desired outcomes or results.

**One-piece needle** A needle constructed from a single piece of metal.

**Organisational requirements** Beauty therapy procedures or work rules issued by the salon management.

**Papilloma** Growth of epithelial tissue with a 'stalk' of fibrous tissue.

**Personal appearance** Hair is secured away from the face or of an appropriate length and style so as not to interfere with the treatment. Nails are clean, free of varnish and of a suitable length so as not to interfere with the treatment. The only permitted jewellery is wedding bands and small, unobtrusive earrings. Shoes should be clean, low heeled and fit securely around the foot. Uniforms should be freshly laundered.

**Pilo-sebaceous unit** Hair follicles together with the sebaceous gland which forms the pilo-sebaceous unit.

**Pre heat treatments** Heat packs, sauna, steam, infra-red, paraffin wax baths and power showers are all examples of pre heat treatments.

**Relevant person** An individual deemed responsible for supervising you during a given task or service, or the person to whom you normally report.

**Resources** The equipment, products and time required to perform a treatment.

**Sanitisation** This refers to cleansing or washing to an antiseptic level so as to inhibit bacteria.

**Skin tags** Fibrous skin condition found individually or in groups. Consisting of fibrous tissue varying in size and colour. Commonly found on neck, axilla and groin area, also known as pendunculated papilloma, fibro epithelial papilloma or polyp or raised fibroma simplex.

**Spider Neavi (Telangiectasia Angioma)**Central dilated blood vessel with smaller capillaries radiating from it, like the legs of a spider.

**Sterilisation** The total destruction of all micro-organisms.

**Tactile skin sensitivity test** The use of a soft and sharp object to test skin sensitivity.

**Telangiectasia** A permanently dilated capillary or group of capillaries visible on the skin's surface. Commonly known as thread veins.

**Test patch** Tests to determine the degree of skin reaction and sensitivity. Test patches can be used to test the degree of heat sensitivity and pain response plus skin reaction. Test patch can incorporate patch test, thermal test or tactile test.

**Thermal skin sensitivity test** The use of hot and cold to test skin sensitivity.

**Treatment plan** The stages or plan you intend to follow when carrying out a particular treatment. The basic contents of the treatment plan include: areas to be treated, type of treatment, known contra-indications, contra-actions, treatment advice, client signature, client feedback.

**Two-piece needle** A needle constructed from two separate pieces of metal crimped together.

You are now ready to embark on a career which is statistically one of the happiest.\* We wish you every success for the future.
