Appendix 1: LEARNER SKILL SCAN	17

Introduction

This document has been designed to support centres who have enrolled candidates that may have prior achievement that can be credited towards our current Electrotechnical qualifications. We have created a number of tables to support both curriculum delivery staff and exam departments when managing recognition of prior learning.

This document supplements the generic City & Guilds Recognition of Prior Learning (RPL) Policy, which can be found [here](#). If it is decided that a candidate does not demonstrate the knowledge, understanding and skills required from the RPL process, the candidate should then undertake a personalised learning programme. Following this learning, the candidate must then take the relevant assessments to achieve the qualification.

This document breaks down what prior learning can be accredited in the following qualifications;

- 5357 Level 3 Electrotechnical Qualification
- 2357 Level 3 Electrotechnical Technology.

5357

If RPL is to be used towards the 5357 qualification then centres must register candidates on 5357-93. The centre can then use Table 1 within this pack to understand what prior achievement can be mapped into this qualification.

Table 1A identifies the units that candidates are exempt from and **Table 1B** identifies what assessments are outstanding, when progressing from either the City & Guilds 2365 or 8202 qualification suites.

Table 1C identifies the units that candidates are exempt from and **Table 1D** identifies what assessments are outstanding, when progressing from the City & Guilds 2330 qualification suite.

Other awarding organisations current and equivalent qualifications are also accepted and details are given below.

To be 'valid and current' there must be a maximum of **5 years** between the date of certification from the original qualification being used for RPL and registration onto the 5357 L3 Electrotechnical qualification. Certification of qualifications older than this 5 year period are not accepted for RPL purposes as detailed in the 5357 common RPL strategy [here](#).

2357

If RPL is going to be used towards achievement of the 2357 qualification then centres should typically register candidates on 2357-91, exemptions to this are detailed within the later tables.

Centres should then use the support from **Table 2A to 2E** related to the appropriate previously achieved qualification.

- 2365
- 8202
- Legacy, CPD & Non City & Guilds Qualifications (2330, 2360, 2382, 2391 etc.)

Skills Scan

Assessors and candidates must complete a RPL Skill Scan using the template in **Appendix 1** to confirm suitability for exemption when;

- a candidate has entered either 2365 or 8202 at Level 3 without previously achieving a Level 2 qualification.
- a candidate is seeking any exemption from the 2357.
- a candidate is using prior achievement gained from another Awarding Organisation's certification.
- using historic qualifications where certification is older than 5 years (with the exemption of 5357 which **does not** recognise any prior achievement that is over 5 years old).

The purpose of the skills scan is to identify any skills gaps or gaps in currency. In each case, an assessment must be made relating to the currency of the qualifications used and the experience of the candidate relevant to the knowledge units where exemption is applied. Candidates must be able to demonstrate a sound and up to date knowledge relevant to each unit content, together with suitable CPD demonstrating currency. Any gaps in currency and knowledge identified by the assessor conducting the skill scan, must be re-assessed using the relevant assessment material.

All judgements made by an assessor must be reinforced with auditable evidence, such as copies of the candidates' certificates, which must be available for Quality Assurance at any time.

Table 1A 5357: 2365/8202 Assessment exemptions

Candidates should be registered onto 5357-93.

Completed Level 2 2365 or 8202 (or other AO equivalent with skill scan);		Completed Level 3 2365 or 8202 (or other AO equivalent with skills scan);		Completed Level 2 and 3 2365 or 8202 (or other AO equivalent with skills scan);

104 Understand Design and Installation Practices and Procedures	105 and 005 Understand how to Plan and Oversee Electrical Work Activities	105 and 005 Understand how to Plan and Oversee Electrical Work Activities
105 and 005 Understand how to Plan and Oversee Electrical Work Activities	106 Organise and Oversee the Electrical Work Environment	106 Organise and Oversee the Electrical Work Environment
106 Organise and Oversee the Electrical Work Environment	107 Understand Terminations and Connections of Conductors	108 Terminate and Connect Conductors
108 Terminate and Connect Conductors	108 Terminate and Connect Conductors	113 - Inspect, Test and Commission Electrical Systems
112 and 012 Understand Inspection, Testing and Commissioning	113 Inspect, Test and Commission Electrical Systems	115 Apply Fault Diagnosis and Rectification
113 Inspect, Test and Commission Electrical Systems	115 Apply Fault Diagnosis and Rectification	018 Understand the Requirements for Electrical Installations BS 7671: 2018
114 and 014 Understand Fault Diagnosis and Rectification	018 Understand the Requirements for Electrical Installations BS 7671: 2018	109 or 110 Apply Design and Installation Practices and Procedures/ Apply Practices and Procedures for Maintenance
115 Apply Fault Diagnosis and Rectification	109 or 110 Apply Design and Installation Practices and Procedures/ Apply Practices and Procedures for Maintenance	
018 Understand the Requirements for Electrical Installations BS 7671: 2018		
109 or 110 Apply Design and Installation Practices and Procedures/ Apply Practices and Procedures for Maintenance		

5357 & other electrotechnical qualifications

- Candidates may have particularly completed the 2357 or EAL equivalent and can map these achieved assessments into the 5357.
- The following qualifications are **NOT** accepted as RPL for the 5357:
 - 2360 Part One and Two

*Equivalent AO qualifications include:

- EAL Level 2 Diploma In Electrical Installation (600/6724/X)
- EAL Level 3 Diploma In Electrical Installation (600/9331/6)
- EAL Level 2 Intermediate Diploma in Electrical Installation 601/4561/4
- EAL Level 3 Advanced Diploma in Electrical Installation 601/4563/8
- EAL 2357

Table 2A 2357 (Installation): 2365 Assessment exemptions

Typically, candidates should be registered onto the 2357-91. If they have achieved the 2365-03 with City & Guilds they should be registered onto 2357-44.

Completed Level 2 2365 with a skill scan (or other AO equivalent* with skill scan);		Completed Level 3 2365 with a skill scan (or other AO equivalent* with skill scan);		Completed Level 2 and 3 2365 with a skill scan (or other AO equivalent* with skill scan);	
Exemption	What to claim:	Exemption	What to claim:	Exemption	What to claim:
601 and 301 Understanding Health and Safety legislation, practices and procedures (Installing and maintaining electrotechnical systems and equipment)	<ul style="list-style-type: none"> For exam 301 claim the proxy 801. For assignment 601 claim 601. 	602 and 102 Understanding environmental legislation, working practices and the principles of environmental technology systems	<ul style="list-style-type: none"> For exam 102 claim the proxy 802. Table 2B 2357: Outstanding assessments when 2365 has been achieved

A candidate who has completed Level 2 2365 (or equivalent) must complete the following outstanding assessments after exemption	A candidate who has completed Level 3 2365 and a candidate who has completed Level 2 and 3 (or equivalent) must complete the following outstanding assessments after exemption
102 and 602 Understanding environmental legislation, working practices and the principles of environmental technology systems	<p>Option 1 Performance units 311, 312, 313, 315, 316, 317, 318, 399, 350 Bridging Assignment⁺ NB: Candidates must be registered onto 2357-44.</p> <p>Or</p> <p>Option 2 Performance units 311, 312, 313, 315, 316, 317, 318, 399, 603 Understanding the practices and procedures for overseeing and organising the work environment (Electrical Installation).</p> <p>And either; 605 and 305 Understanding the practices and procedures for the preparation and installation of wiring systems and electrotechnical equipment in buildings, structures and the environment</p> <p>Or 018 and (705 or 725) Understand the Requirements of Electrical Installations BS 7671:2018</p>
603 Understanding the practices and procedures for overseeing and organising the work environment (Electrical Installation)	
604 Understanding the principles of planning and selection for the installation of electrotechnical equipment and systems in buildings, structures and the environment	
(605 and 305) or (018 and (705 or 725)) Understanding the practices and procedures for the preparation and installation of wiring systems and electrotechnical equipment in buildings, structures and the environment.	
107 and 607 Understanding principles, practices and legislation for the inspection, testing, commissioning and certification of electrotechnical systems and equipment in buildings, structures and the environment	
608 Understanding the principles, practices and legislation for diagnosing and correcting electrical faults in electrotechnical systems and equipment in buildings, structures and the environment	
609 Understanding the electrical principles associated with the design, building, installation and maintenance of electrical equipment and systems	
Performance units 311, 312, 313, 315, 316, 317, 318, 399	

+2365 to 2357 Bridging Assessment

City & Guilds have designed an assignment that is intended for candidates who have demonstrated a suitable level of understanding of electrical installation technology through successful completion of City and Guilds 2365-03 Level 3 Diploma in Electrical Installations (Buildings and Structures). Successful completion of this assignment, together with prior learning, will lead to successful completion of the 2357 Units 601 to 609 (inclusive).

Table 2C 2357 (Installation): 8202 Assessment exemptions

Candidates should be registered onto the 2357-91.

Completed Level 2 8202 with a skill scan (or other AO equivalent* with skill scan);		Completed Level 3 8202 with a skill scan (or other AO equivalent* with skill scan);		Completed Level 2 and 3 8202 with a skill scan (or other AO equivalent* with skill scan);

Table 2D 2357: Outstanding assessments when 8202 has been achieved

A candidate who has completed Level 2 8202 (or equivalent) must complete the following outstanding assessments after exemption	A candidate who has completed only a Level 3 8202 (or equivalent) must complete the following outstanding assessments after exemption	A candidate who has completed Level 2 and 3 8202 (or equivalent) must complete the following outstanding assessments after exemption
102 and 602 Understanding environmental legislation, working practices and the principles of environmental technology systems	601 and 301 Understanding Health and Safety legislation, practices and procedures (Installing and maintaining electrotechnical systems and equipment)	602 and 102 Understanding environmental legislation, working practices and the principles of environmental technology systems
603 Understanding the practices and procedures for overseeing and organising the work environment (Electrical Installation)	602 and 102 Understanding environmental legislation, working practices and the principles of environmental technology systems	All performance units 311, 312, 313, 315, 316, 317, 318, 399
604 Understanding the principles of planning and selection for the installation of electrotechnical equipment and systems in buildings, structures and the environment	606 Understanding the principles, practices and legislation for the termination and connection of conductors, cables and cords in electrical systems	
(605 and 305) or (018 and (705 or 725)) Understanding the practices and procedures for the preparation and installation of wiring systems and electrotechnical equipment in buildings, structures and the environment.	All performance units 311, 312, 313, 315, 316, 317, 318, 399	
107 and 607 Understanding principles, practices and legislation for the inspection, testing, commissioning and certification of electrotechnical systems and equipment in buildings, structures and the environment		
608 Understanding the principles, practices and legislation for diagnosing and correcting electrical faults in electrotechnical systems and equipment in buildings, structures and the environment		
609 Understanding the electrical principles associated with the design, building, installation and maintenance of electrical equipment and systems		
All performance units 311, 312, 313, 315, 316, 317, 318, 399		

Table 2E 2357 & Legacy and non City & Guilds Qualifications

For all Legacy and non-City & Guilds qualifications, centres must complete a skill scan with full auditable evidence, including justification for currency and experience which must be recorded for verification purposes. It is strongly recommended that evidence from certifying organisations or CSCS cards are used to prove currency to industry practices. Only full qualification certificates are accepted as evidence of achievement. CUCs or partial completion certificates cannot be used to exempt assessment.

Qualification achieved	
2360 Part 1/2 Theory	<p>It is likely a candidate with these certificates will have been assessed against a significant amount of the relevant level of knowledge, provided it's currently and up to date only the following assessments need to be completed in addition</p> <ul style="list-style-type: none"> • 602 and 102 Understanding environmental legislation, working practices and the principles of environmental technology systems. • 606 Understanding the principles, practices and legislation for the termination and connection of conductors, cables and cords in electrical systems. • all performance units 311, 312, 313, 315, 316, 317, 318, 399 • where no current and relevant CPD is evident specifically for units 605 and 607, all relevant assessments for these units must also be completed.
2360 Part 1/2 Theory and Practical	<p>It is likely a candidate with these certificates will have been assessed against a significant amount of the relevant level of knowledge, provided it's currently and up to date only the following assessments need to be completed in addition</p> <ul style="list-style-type: none"> • 602 and 102 Understanding environmental legislation, working practices and the principles of environmental technology systems. • all performance units 311, 312, 313, 315, 316, 317, 318, 399 • where no current and relevant CPD is evident specifically for units 605 and 607, all relevant assessments for these units must also be completed.
2330-01 Level 2 Certificate in Electrotechnical Technology - Installation (Building & Structures)	<p>Candidates must complete, as a minimum;</p> <ul style="list-style-type: none"> • all assessments associated with unit 602 • all assessments associated with unit 603 • all assessments associated with unit 607 • all assessments associated with unit 608 • all assessments associated with unit 609 • all performance units 311, 312, 313, 315, 316, 317, 318, 399
2330-07 Level 3 Certificate in Electrotechnical Technology Installation (Building and Structures)	<p>Candidates must complete, as a minimum;</p> <ul style="list-style-type: none"> • all assessments associated with 602 • Where no current and relevant CPD is evident, completion of all assessments associated with unit 605 • Where no current and relevant CPD is evident, completion of all assessments associated with unit 607 • all performance units 311, 312, 313, 315, 316, 317, 318, 399
City & Guilds 2391/2394/2395 or another AOs equivalent.	<p>These certificates can be used to exempt the assessments associated to unit 607. In this instance, centres should claim the proxy 807.</p>
City & Guilds 2382 or another AOs equivalent.	<p>When mapping into the 2357 this will only exempt the associated Wiring Regulations examination either (016 or 018). Centres must claim the proxy 816 or 818. Candidates will still need to complete the assessment 705 and 725 to meet the requirements of unit 605.</p>
.Net AM2	<p>This will exempt candidates from assessment 399.</p>

Appendix 1: LEARNER SKILL SCAN

Completed by assessor and retained for auditable records including evidence

Assessor name		Candidate name	
Centre No		Candidate No	
Previously Achieved qualification/s including awarding organisation (summary)			Qualification completion date

Learner Prior Related Experience	Learner current role/activities

1. Assessment exemption

Assessments exempt	Evidence/certification available allowing exemption - Assessor please initial

2. Assessment required

Units still required	Assessment(s) required to achieve full unit

<p>What evidence shows valid currency of previous qualifications (where historical evidence is used)</p>	
<p>Next steps (action plan) use additional sheets where required</p>
