Level 2 NVQ Diploma in Installing and Servicing Signal Reception Systems in Single Dwelling Units 600/5222/3

OVERVIEW

- What does this qualification cover?

This Framework qualification covers the practical skills and knowledge involved in installing digital aerial systems in single dwellings.

There is one pathway within the qualification, all the units within the qualification are mandatory. There is also the opportunity for learners to take two elective units, Learners may achieve a maximum of 7 credits from this group

The mandatory units are:

- Understand the procedures and practices for organising and co-ordinating the work environment: Installing Signal Reception Systems
- Apply procedures for organising and coordinating the work environment- Installing Signal reception systems
- Understand the principles, practices, procedures and legislation for installing and servicing signal reception systems
- Install and service signal reception systems
- Understand the electrical and electronic principles associated with the installation and servicing of signal reception systems
- Understanding Health and Safety legislation, practices and procedures _Installing and maintaining electrotechnical systems and equipment_
- Applying Health and Safety legislation and working practices installing and Maintaining electrotechnical Systems and Equipment
- Understanding environmental legislation, working practices and the principles of environmental technology systems
- Applying environmental legislation, working practices and the principles of environmental technology systems

Elective units

- Carry out preventative maintenance procedures on Signal Reception Systems
- Understand the principles, practices and legislation for carrying out preventative maintenance on signal reception systems

- Who could take this qualification? OR who is this qualification designed for?

This qualification is suitable for anyone from 16 years old or over to take this qualification.

This qualification is intended for those who are wishing to be employed in the digital aerial installation sector. It is designed for those learners who are just starting out as digital aerial installation engineers and who want to demonstrate their skills and abilities with an industry recognised qualification. Learners will gain the practical skills and knowledge to equip them for entry into this industry.

WHAT COULD THIS QUALIFICATION LEAD TO?

Achieving this qualification can help you progress in a number of job roles, including:

- Digital aerial system installation engineer

Will the qualification support progression to further learning, if so, what to?

The learner could progress on completion of this qualification into employment or the following qualifications:

Level 3 NVQ Diploma in Installing Electrotechnical Systems and Equipment (Buildings, Structures and the Environment) 501/2232/0

WHO SUPPORTS THIS QUALIFICATION?

This qualification is supported by the JIB (Joint Industry Board)
