

Dear BSE Centre,

Our on-line exams for 2377 (2377-101) (2377-201) will now reflect the current code of practice (Version 4). Candidates are to use version 4 for reference during examinations.

Key changes:

Unit 101 Evolve test:

- 3.1 Identify the types of electrical equipment: **microwaves no longer in the range**
- 4.4 Specify what needs to be considered when carrying out a formal visual inspection:
 - evidence of care and correct use of the equipment and connecting cable or **lead**
 - the general condition of the equipment and connecting cable or **lead** (overheating etc)
 - particular requirements of cables, **leads** and extension leads including the correct cross sectional area (CSA mm²)
- 5.4 Calculate the resistance of the flexible cable **conductors** and protective conductors
- 5.11 Define the particular checks and tests for microwave ovens: **this Assessment Criteria is now redundant**
- 5.12 Specify the requirements for testing appliance **lead** sets

Please note that for unit 2377-101, AC 5.11 has become redundant due to the 4th Edition, so in the evolve test **Outcome 5 now has 18 questions** instead of 19 **and Outcome 6 has 4 questions** instead of 3.

Unit 201 Evolve test:

- 2.1 Identify the types of electrical equipment: **microwaves** no longer in the range.

Thanks
BSE Team
