   - Unit 101 Structure of the construction industry 12
   - Unit 102 Fundamental safe working practices 18
   - Unit 103 Environmental and sustainability measures in domestic dwellings 26
   - Unit 104 Site preparation for working in the construction industry 31
   - Unit 106 Fabrication techniques for electrical installation 41
   - Unit 107 Electrical science and technology 46
Appendix 1 Relationships to other qualifications 51
Appendix 2 Sources of general information 52
This document tells you what you need to do to deliver the qualification:

<table>
<thead>
<tr>
<th>Area</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Who is the qualification for?</td>
<td>This qualification is for learners wanting to learn the basic skills and knowledge involved in electrical installation.</td>
</tr>
<tr>
<td>What does the qualification cover?</td>
<td>The qualification covers a range of basic tasks and underpinning knowledge involved in electrical installation.</td>
</tr>
<tr>
<td>What opportunities for progression are there?</td>
<td>It allows learners to progress to the following City &amp; Guilds qualification:</td>
</tr>
<tr>
<td></td>
<td>• Level 2 Diploma in Electrical Installations (Buildings and Structures) (2365-02)</td>
</tr>
<tr>
<td></td>
<td>• Level 3 NVQ Diploma in Installing Electrotechnical Systems and Equipment (Buildings, Structures and the Environment) (2357-13)</td>
</tr>
<tr>
<td></td>
<td>• Level 3 NVQ Diploma in Electrotechnical Services (Electrical Maintenance) (2357-23)</td>
</tr>
</tbody>
</table>
Structure
To achieve the Level 1 Diploma in Electrical Installation (7202-01), learners must achieve 44 credits from the mandatory units.

<table>
<thead>
<tr>

Total Qualification Time
Total Qualification Time (TQT) is the total amount of time, in hours, expected to be spent by a Learner to achieve a qualification. It includes both guided learning hours (which are listed separately) and hours spent in preparation, study and assessment.

<table>
<thead>
<tr>

2 Centre requirements

Approval

If your Centre is approved to offer
• Level 2 Diploma in Electrical Installations (Buildings and Structures) (2365-02)
• Level 3 Diploma in Electrical Installations (Buildings and Structures) (2365-03)
• Level 3 NVQ Diploma in Installing Electrotechnical Systems and Equipment (Buildings, Structures and the Environment) (2357-13)
• Level 3 NVQ Diploma in Electrotechnical Services (Electrical Maintenance) (2357-23)

you will receive automatic approval for the new Level 1 Diploma in Electrical Installations.

To offer this qualification, new centres will need to gain both centre and qualification approval. Please refer to the Centre Manual - Supporting Customer Excellence for further information.

Centre staff should familiarise themselves with the structure, content and assessment requirements of the qualification before designing a course programme.

Resource requirements

Centre staffing

Staff delivering this qualification must be able to demonstrate that they meet the following occupational expertise requirements. They should:
• be occupationally competent or technically knowledgeable in the area for which they are delivering training and/or have experience of providing training. This knowledge must be to the same level as the training being delivered
• have recent relevant experience in the specific area they will be assessing
• have credible experience of providing training.

Centre staff may undertake more than one role, eg tutor and assessor or internal quality assurer, but cannot internally verify their own assessments.
Assessors and Internal Quality Assurer
Assessor/Internal Quality Assurer TAQA qualifications are valued as qualifications for centre staff, but they are not currently a requirement for the qualification.

Continuing professional development (CPD)
Centres must support their staff to ensure that they have current knowledge of the occupational area, that delivery, mentoring, training, assessment and verification is in line with best practice, and that it takes account of any national or legislative developments.

Learner entry requirements
City & Guilds does not set entry requirements for this qualification. However, centres must ensure that learners have the potential and opportunity to gain the qualification successfully.

Age restrictions
City & Guilds cannot accept any registrations for learners under 14 as this qualification is approved for 14-16s and 16+.
3 Delivering the qualification

Initial assessment and induction
An initial assessment of each learner should be made before the start of their programme to identify:
- if the learner has any specific training needs,
- support and guidance they may need when working towards their qualification.
- any units they have already completed, or credit they have accumulated which is relevant to the qualification.
- the appropriate type and level of qualification.

We recommend that centres provide an induction programme so the learner fully understands the requirements of the qualification, their responsibilities as a learner, and the responsibilities of the centre. This information can be recorded on a learning contract.

Support materials
The following resources are available for this qualification:

<table>
<thead>
<tr>
<th>Description</th>
<th>How to access</th>
</tr>
</thead>
<tbody>
<tr>
<td>Practical Task Manual</td>
<td><a href="http://www.cityandguilds.com">www.cityandguilds.com</a></td>
</tr>
<tr>
<td>Assessor Guidance</td>
<td><a href="http://www.cityandguilds.com">www.cityandguilds.com</a></td>
</tr>
</tbody>
</table>
Candidates must successfully complete one assignment for each mandatory unit.

<table>

5 Units

Availability of units

The following units are also on The Register of Regulated Qualifications: http://register.ofqual.gov.uk/Unit

Structure of units

These units each have the following:
- City & Guilds reference number
- unit accreditation number (UAN)
- title
- level
- credit value
- guided learning hours
- unit aim
- information on assessment
- learning outcomes which are comprised of a number of assessment criteria
- notes for guidance.
## Unit 101  Structure of the construction industry

<table>
<thead>
<tr>
<th>UAN:</th>
<th>T/505/1711</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level:</td>
<td>1</td>
</tr>
<tr>
<td>Credit value:</td>

</tr>
<tr>
<td>GLH:</td>
<td>37</td>
</tr>
</tbody>
</table>

**Aim:** This unit is designed to provide learners with a broad understanding of the structure of the construction industry. They will know about different organisations, industry bodies and employment rights and responsibilities in the industry.

### Learning outcome

The learner will:

1. know the roles of the different trades in the construction industry.

### Assessment criteria

The learner can:

1.1 identify the **key trades** in the construction industry

1.2 identify the different **jobs** common to each trade

1.3 state common **hazards** associated with each trade.

### Range

**Key trades**

Electrician, plumber, carpenter, bricklayer, plasterer.

**Jobs**

**Electrician**

Lighting wiring, power supply wiring, maintenance.

**Plumber**

Hot and cold water supply, central heating, bathroom installation, sanitation and drainage.

**Carpenter**

Hanging doors, installing windows, timber roof installation.

**Bricklayer**

Brick laying, stone work, concrete block installation.
Plasterer
Plastering, dry lining.

Hazards
Electric shock, burns, cuts and abrasions, dust inhalation, working at height, lifting and carrying, solvents, vapours, asbestos, vibration, noise, extremes of temperature, slips trips and falls.

Learning outcome
The learner will:
2. know different types of organisation and job roles in the construction industry.

Assessment criteria
The learner can:
2.1 identify different types of organisation within the construction industry
2.2 identify specialist plumbing organisations
2.3 identify specialist electrical organisations
2.4 identify job roles within the construction industry.

Range
Types of organisation
Small, medium, large, specialist firms and services, sole traders, sub contractors.

Plumbing
Domestic plumber, heating engineers, industrial plumbers, drainage specialist, maintenance engineer.

Electrical
Domestic electricians, industrial commercial electricians, maintenance electricians, alarm engineer.

Roles
Architect, structural engineer, clerk of works, estimator, buyer, site manager.

Learning outcome
The learner will:
3. know the industry bodies within the plumbing and electrical industries.

Assessment criteria
The learner can:
3.1 identify the relevant industry bodies within the plumbing and electrical industries
3.2 state the key responsibilities of industry bodies
   a. Joint Industry Board (JIB)
b. Water Authority (WA)
c. Institute of Engineering Technology (IET)
d. Electrical Contractors Association (ECA)
e. Association of Plumbing and Heating Contractors (APHC)
f. Local Authority.

Range

Industry bodies
Joint Industry Board (JIB), Water Authority (WA), Institute of Engineering Technology (IET), Electrical Contractors Association (ECA), Association of Plumbing and Heating Contractors (APHC)

Responsibilities
JIB
Grades, wages, allowances, benefits, employment advice, industrial agreements.

Water Authority
Water resources and uses, quality of service, infrastructure, water supply and sanitation.

IET
International standardisation of regulations, wiring regulations.

ECA
Support services to contractors, build a sustainable industry, to enhance the profile of the industry.

APHC
Support to contractors, encourage training, knowledge and professional advice.

Local Authority
Building regulations.

Learning outcome
The learner will:
4. know basic employment rights and responsibilities in the construction industry.

Assessment criteria
The learner can:
4.1 identify the employment rights that exist within the construction industry
4.2 identify forms of discrimination
4.3 identify employment law information sources.

Range

Employment rights
Contracts, paid leave entitlement, termination of employment, minimum wage, sick pay, maternity/ paternity leave, working hours.
Discrimination
Gender, sexual orientation, age, race, disability, religion.

Information sources
Direct gov. Advisory, Conciliation and Arbitration Service (ACAS).

</table>
Candidates undertaking this unit are unlikely to have any prior experience of the Construction industry and may also have limited work experience, therefore, the delivery of this unit should be approached from a very basic level.

It is also important that there should be a focus on workplace skills in the construction industry.

Wherever possible centres should adopt a practical hands-on approach to learning and the unit could be delivered in an interactive format engaging the candidates in a full range of diverse learning opportunities.

Whilst delivering and assessing the outcomes, it should be made clear to candidates that good workplace skills are essential to the financial success of a business and that being able to demonstrate such skills are imperative to the candidate’s future employment prospects in the construction industry.
Unit 102  Fundamental safe working practices

UAN:  A/505/1712
Level:  1
Credit value:  5
GLH:  48
Aim:  This unit provides learning in the essential health and safety job knowledge required to prepare a learner to work safely in the Plumbing and Electrical installation industries. The knowledge covered relates to work carried out in a construction environment. The unit also provides learning in the practical application of a range of key health and safety requirements under simulated conditions.

Learning outcome
The learner will:
1. know health and safety legislation that applies to the plumbing and electrical installation industries.

Assessment criteria
The learner can:
1.1 state the key aims of general health and safety legislation
1.2 list the responsibilities of employers and employer representatives under health and safety legislation
1.3 list the responsibilities of employees under health and safety legislation.

Range
Aims
Health, safety and welfare of people at work, protect other people from harm.

Employers/employer representatives
Create safe working environment, provide PPE, training, safety and welfare of employees.
Employees
Take reasonable care, cooperate with employers, report hazards.
Learning outcome
The learner will:
2. know ways of controlling hazardous work areas.

Assessment criteria
The learner can:
2.1 identify common signs used in the construction industry
2.2 identify possible dangerous situations occurring during work activities
2.3 identify ways to prevent accidents occurring during work activities.

Range
Common signs
Signs, safety notices, mandatory signs, prohibition signs, hazard warning signs, information signs, hazardous substances.

Dangerous situations
Open holes and trenches, wet surfaces, trip hazards, overhead working, confined space working at height.

Ways to prevent accidents
Follow procedure, report hazards, stay alert, use correct PPE, read and follow safety signs, training, inductions.

Learning outcome
The learner will:
3. know how to recognise and respond to the dangers presented by asbestos in the workplace.

Assessment criteria
The learner can:
3.1 state the dangers to health posed by asbestos
3.2 identify situations where asbestos may be commonly found in the workplace
3.3 state what action to take if materials containing asbestos are identified in the workplace.

Range
Dangers to health
Lung cancer, asbestosis, mesothelioma, can be fatal, can take 20 years for illnesses to develop after exposure.

Situations
Insulating material within the building fabric, sheeting materials for roofs floors and walls, coating materials eg Artex, asbestos cement materials for gutters, flues, heat proofing materials, gaskets.
Action
Stop work, inform supervisor.

Learning outcome
The learner will:
4. know safe personal protection measures.

Assessment criteria
The learner can:
4.1 identify key items of Personal Protective Equipment (PPE)
4.2 state the purpose of key items of PPE.

Range
Personal Protective Equipment (PPE)
Protective clothing, high visibility wear, eye protection, gloves, safety helmet, safety footwear, hearing protection, dust mask/respirator.

Purpose
Protective clothing
Protection from oils and grease.
High visibility wear
Can be clearly seen around site.
Eye protection
Protection from dust and dirt.
Gloves
Protection from hot materials, sharp implements/tools.
Safety helmet
Protection from falling objects and bumps.
Safety footwear
Protection from dropping heavy objects, tools and nails on feet.
Hearing protection
Protection from noise.
Dust mask/respirator
Protection from inhaling dust and fumes.

Learning outcome
The learner will:
5. be able to apply manual handling techniques.

Assessment criteria
The learner can:
5.1 manually handle heavy and bulky items
   a. individually
   b. as a team
   c. using mechanical lifting equipment
5.2 state the **procedures** for manually handling heavy and bulky items.
Range

Procedures
Assessment of a safe load that a person can lift, application of safe kinetic lifting technique, use of simple mechanical lifting aids – sack trolley.

Learning outcome

The learner will:
6. know how to respond to accidents and emergencies.

Assessment criteria

The learner can:
6.1 indicate the actions that should be taken when an accident or emergency is discovered
6.2 outline the requirements for first aid in the workplace
6.3 outline the procedures for dealing with common injuries such as cuts, minor burns, objects in the eye
6.4 state the procedures for reporting an accident at work.

Range

Actions
Raise the alarm, follow concise instructions for contacting emergency services, emergency evacuation procedures.

Emergency
Gas leak, fire, collapse of buildings, electrocution.

Requirements
First aid box, first aider (appointed person).

Procedures
Cuts
Clean and protect.

Minor burns
Run under cold water.

Objects in the eye
Eywash station.

Procedures
Report to supervisor/site agent, complete details in accident book, witness statement.

Learning outcome

The learner will:
7. be able to use access equipment safely.

Assessment criteria
The learner can:
7.1 list situations where it may be necessary to work at height
7.2 identify the following types of access equipment:
   a. step ladders
   b. ladders
   c. mobile elevated work platforms
7.3 list safety checks required on the following access equipment before it is used:
   a. step ladders
   b. ladders
   c. mobile elevated work platforms
7.4 carry out safety checks and use the following access equipment:
   a. step ladders
   b. ladders.

Range
Safety checks
Step ladders
Hinges, ropes, fitted on level ground, adequate size and height, check stiles.
Ladders
Stiles, rungs, cracks, clean, safety tags.
**Mobile elevated work platforms**
Handrails, locking wheels, working platform boarded, components assembled, safety tags/permit, access steps, kick boards.

Learning outcome
The learner will:
8. know how to deal with fires in the workplace.

Assessment criteria
The learner can:
8.1 identify the elements of the fire triangle
8.2 identify different categories of fire
8.3 state how to prevent fires occurring
8.4 state the method for fighting small localised fires that can occur in the workplace.

Range
Categories
A solids, B flammable liquid, C flammable gases, D metals, E electrical apparatus.

**Prevent fires occurring**
Good housekeeping, storage of flammables, removal of waste materials.
Method
Know when to avoid tackling fires, types of extinguisher, selection of extinguisher by fire type, method of use.
Unit 103 Environmental and sustainability measures in domestic dwellings

UAN: F/505/1713
Level: 1
Credit value: 4
GLH: 33

Aim: This unit covers a range of basic measures associated with protection of the environment. It covers types of energy, use of energy sources and good working practices within the domestic environment.

Learning outcome
The learner will:
1. know the methods of conserving and reducing wastage of water and electricity within domestic dwellings.

Assessment criteria
The learner can:
1.1 state the importance of water and electricity conservation in domestic dwellings
1.2 list the methods for reducing wastage of water
1.3 list the methods for reducing wastage of electricity.

Range
Methods (AC1.2)
Flow reducing valves, spray taps, low volume wc flush, regular maintenance of terminal fittings and float valves, promoting user awareness.

Methods (AC1.3)
Energy efficient lighting, switching equipment from standby to off, energy efficient equipment, ‘A’ rated cookers/washing machines.
Learning outcome
The learner will:
2. know the applications of energy sources used in domestic dwellings.

Assessment criteria
The learner can:
2.1 outline the **types of energy** used in domestic dwellings
2.2 state the importance of reducing carbon emissions from buildings
2.3 state **methods of reducing carbon emissions** from buildings
2.4 outline the basic operating principles of **installations** using environmental sources
2.5 list key **organisations** providing advice and guidance on energy saving and conservation techniques.

Range
**Types of energy**
**High carbon**
Natural gas/LPG, fuel oils, solid fuels (coal/peat), electricity (from non-renewable sources).

**Low carbon**
Solar thermal, solid fuel (biomass), heat pumps, combined heat and power (CHP).

**Zero carbon**
Electricity-wind, electricity-tidal, hydroelectricity, solar photovoltaic.

**Methods of reducing carbon emissions**
System controls (thermostatic), improved insulation, low energy lighting, double glazing, draught proofing, A rated appliances.

**Installations**
Solar thermal, photovoltaic, biomass, heat pumps, wind turbines.

**Organisations**
Energy Saving Trust, Carbon Trust.

Learning outcome
The learner will:
3. know working practices that can conserve energy and reduce waste.

Assessment criteria
The learner can:
3.1 outline **working practices** that can be employed to conserve energy and protect the environment
3.2 state methods for reducing material wastage.
Range

Working practices
Source materials locally, reduce transportation costs, use low energy appliances where possible, use of rainwater harvesting/grey water recycling, use renewable sources.

Methods
Follow good housekeeping eg keep site tidy to reduce loss of materials and waste, measure, cut and set out pipe and cable/trunking runs accurately, reuse off cuts of pipe/cable.

Learning outcome
The learner will:
4. know how to dispose of waste and materials safely and efficiently.

Assessment criteria
The learner can:
4.1 identify how to dispose of waste materials safely
4.2 list types of metals that can be recycled
4.3 identify current regulations relating to waste disposal
4.4 identify hazardous, non-hazardous and inert waste
4.5 state the appliances that must be disposed of under the Waste Electrical and Electronic Equipment (WEEE) regulations.

Range

Disposal of waste materials
Licensed waste disposal, waste carriers licence, recycling.

Types of metals
Copper tube, brass, lead, low carbon steel, copper cable, conduit, galvanised steel trunking.

Types of waste
Hazardous
Asbestos, lead, waste electrical equipment, solvents.

Non-hazardous
Timber, paper/cardboard, water based glues/paints, scrap metal (excluding lead).

Inert
Bricks, glass, ceramics/tiles, sand and gravel.

Appliances
Motors, control equipment, lamps, printed circuit boards, drills.
Unit 104  Site preparation for working in the construction industry

UAN: J/505/1714
Level: 1
Credit value: 7
GLH: 61

Aim: This unit is designed to provide learners with a fundamental understanding of the Site preparation for new and existing dwellings. Learners will look at tools and fixings used in the installation process and understand the operational health and safety risks involved in working on new build and existing properties.

Learning outcome
The learner will:
1. know common hand tools used in site preparation.

Assessment criteria
The learner can:
1.1 identify key hand tools and their uses
1.2 identify common faults found with hand tools
1.3 state maintenance requirements for hand tools
1.4 identify appropriate safety procedures when using hand tools.

Range
Hand tools
Lump hammer, claw hammer, spirit level, tape measure, chalk line, adjustable spanner, wood chisel, steel chisel, bolster chisel, flat head screwdrivers, cross head screwdrivers, pad saw, wood saw, junior hacksaw, hacksaw.

Faults
Mushroom head, loose heads, blunt, damaged.

Maintenance requirements
Sharped points, make tools safe/remove from use, replace blades.

Safety procedures

City & Guilds Level 1 Diploma in Electrical Installation (7202-01)
Follow risk assessment, select appropriate PPE.

</tbody>
</table>
3.2 identify types of screw heads
3.3 identify types of fixings
3.4 state the reasons for using screws in different situations
3.5 describe which fixings to use on different surfaces.

Range
Drill bits
Masonry, diamond tipped core drills, hole saws, wood boring bit, steel.

Screw heads
Slotted, phillips, pozidrive, roundhead, countersunk.

Fixings (AC3.3 & 3.5)
Brass wood screws, round head screws, self tapping screws, countersunk wood screws, mirror screws, plasterboard fixings, nails, plastic wall plugs.

Reasons
Corrosive properties, cost, different applications.

Surfaces
Solid/brick wall, wood, tiles, plasterboard.

Learning outcome
The learner will:
4. know site preparation techniques for installing systems.

Assessment criteria
The learner can:
4.1 identify the purpose of information that is used for preparatory work
4.2 identify the installation process for a new build
4.3 identify the installation process when carrying out work in an existing dwelling/property
4.4 identify different flooring materials
4.5 describe processes for lifting wood flooring surfaces
4.6 identify risks faced when working in a dwelling
4.7 state regulations covering cutting holes and notching timber joists.

Range
Information
Manufacturer’s instructions, job specification, plans/drawings, work schedule.

Installation process
1st fix requirements, 2nd fix tasks.

City & Guilds Level 1 Diploma in Electrical Installation (7202-01)
Flooring materials
Wooden floor boards, chipboard, carpets, vinyl floor coverings, laminate flooring.

Lifting wood flooring
Techniques used to lift floorboard/chipboard, fitting boards down, tools used.

Risks
Drilling into existing pipes and cables, open floor, working in a loft space.

Regulations
Building regulation A, maximum depth of notch, maximum size of holes.

Learning outcome
The learner will:
5. know how to communicate effectively with customers and other trades.

Assessment criteria
The learner can:
5.1 describe how to maintain good customer relationships
5.2 describe how to maintain good working relationships with other trades.

Range
Customer relationships
Protecting customer’s property, checking for pre-installation damage, using appropriate language and behaviour, dress code, passing on information, timekeeping.

Relationships with other trades
Methods of communication, using work programmes, site meetings, resolving disputes.

Learning outcome
The learner will:
6. be able to carry out techniques in cutting, drilling and fixing.

Assessment criteria
The learner can:
6.1 operate power tools safely
6.2 mark fixings
6.3 select appropriate fixings
6.4 secure fixings to different surfaces.

Range

Unit 105  Electrical installation wiring and terminations

UAN: L/505/1715
Level: 1
Credit value: 9
GLH: 88
Aim: This unit provides learning in basic electrical tasks. The learner will have the skills and knowledge to terminate electrical wiring.

<table>
<thead>
<tr>
<th>Learning outcome</th>
</tr>
</thead>
<tbody>
<tr>
<td>The learner will:</td>
</tr>

<thead>
<tr>
<th>Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personal Protective Equipment</td>
</tr>
<tr>
<td>Hard hats, boots, overalls, goggles, gloves, ear defenders.</td>
</tr>
</tbody>
</table>
Learning outcome
The learner will:
2. be able to use tools and equipment for wiring and terminations.

Assessment criteria
The learner can:
2.1 identify tools and equipment used for wiring and terminations
2.2 state methods of maintaining tools and equipment
2.3 safely use the following tools and equipment:
   a. pliers
   b. screwdrivers (crosshead, slot head and terminal)
   c. wire stripper
   d. low resistance Ohm meter
   e. insulation resistance meter
   f. tape measure
   g. spirit level
   h. hammer
   i. electrician's knife
   j. side cutters
   k. crimping tool

Range
Tools and equipment
Pliers, screwdrivers (crosshead, slot head, terminal, torque), wire stripper, low resistance Ohm meter, Insulation resistance meter, tape measure, spirit level, hammer, side cutters, electrician’s knife, crimping tool.

Methods
Calibration, sharpening of drills and tools, oiling, cleaning.

Learning outcome
The learner will:
3. know types of electrical materials, components, fixings and termination methods.

Assessment criteria
The learner can:
3.1 identify the following materials and components:
   a. cable and flex
   b. conductor identification (sleeving)
   c. socket outlets
   d. light switch plates
   e. consumer unit
   f. main switch
   g. main earthing terminal

City & Guilds Level 1 Diploma in Electrical Installation (7202-01)
Range

Materials and components
Cable and flex
PVC/PVC/CPC (flat twin and earth), single PVC insulated cables, 2 and 3 core flexes.
Socket outlets
Single, twin, switched/unswitched, surface, flush and dry lining boxes.
Light switch plates
One-way, two-way.
Lamp holder
Bayonet, Edison screw.

Fixing methods
Clips, wood screws, roofing screws, roundhead screws, plasterboard fixings, wall plugs, wall bolts.

Termination methods
Screw terminal, soldered terminal, crimp terminal, insulation displacement terminal, push-fit terminal.

Learning outcome
The learner will:
4. be able to carry out wiring and terminations.

Assessment criteria
The learner can:
4.1 produce circuit diagrams
4.2 produce wiring diagrams
4.3 correctly install the following electrical wiring and accessories to a specification:
   a. 13 amp plug top
   b. one way lighting circuit
   c. 20A radial circuit
4.4 safely inspect and test completed wiring circuit for continuity and insulation resistance
4.5 leave work area in a safe condition after completion of work.
One way, two way lighting circuits.

**Wiring diagrams**
One way, two way lighting circuits, radial socket circuit (1363).

**Safe condition**
Area is left clean and tidy, return tools and equipment, return excess materials, dispose of any waste materials.
Unit 104  Site preparation for working in the construction industry

Supporting information

Guidance
Learning outcome 4 AC4.3
Prior to assessment centres could provide a range of training activities/practice tasks for learners which could include the following:
- induction tasks
- pendant lamp holder
- ceiling rose
- small consumer unit
- bonding.
This unit covers a broad range of basic activities designed to prepare the learner for entry into the electrical Industry with the primary emphasis on Electrical Installation. The learner will be expected to plan, prepare for and carry out hand fitting activities. They will produce a work plan containing job instructions, materials, tools, equipment and components that may be required for the activities.

### Learning outcome
The learner will:
1. be able to plan and prepare for hand fitting activities.

### Assessment criteria
The learner can:
1.1 produce a **work plan** prior to carrying out work activities  
1.2 prepare the work area to ensure that it is safe and free from hazards.

### Range
**Work plan**
Sequence of activities, health and safety requirements, materials, tools and equipment.

### Learning outcome
The learner will:
2. be able to use hand skills to manufacture and assemble components.

### Assessment criteria
The learner can:

---

City & Guilds Level 1 Diploma in Electrical Installation (7202-01)
2.1 comply with health and safety legislation, regulations and other relevant guidelines
2.2 select correct tools and equipment for the task and check that they are in a safe and useable condition
2.3 use measuring equipment during hand fitting and checking activities
2.4 mark out the components for the required operations using appropriate marking out equipment and marking out methods and techniques
2.5 use a range of fabrication techniques
2.6 cut and shape materials to the required specification, using appropriate tools and techniques
2.7 check work for accuracy and good workmanship
2.8 leave the work area in a safe and tidy condition on completion of work activities.

Range

Measuring equipment
Rules, tape measures.

Components
Metal cable tray bracket, drill gauge, cable gauge.

Marking out equipment
Scribers, punches, squares, pencils.

Fabrication techniques
Filing, sanding, sawing, drilling, threading, reaming.

Materials
Wood, plastic, steel.

Checks for accuracy
Dimensions, tolerances, ensuring ends are square.

Good workmanship
De-burring, no sharp edges, finish eg no indents, vice marks.

Safe and tidy condition
Return tools, fixings and equipment, drawings and work instructions to the designated location.

Learning outcome
The learner will:
3. be able to assemble electrical wiring support systems.

Assessment criteria
The learner can:
3.1 comply with health and safety legislation, regulations and other relevant guidelines
3.2 select the correct tools and equipment for cutting, forming and assembly operations
3.3 check tools and equipment are in a safe and useable condition
3.4 cut and form the electrical wiring support system components to the required size and shape, using appropriate tools and techniques
3.5 assemble types of electrical wiring support system components
3.6 mount and secure the electrical wiring support system components safely and correctly to meet the specification requirements
3.7 construct electrical wiring support systems according to relevant industry standards
3.8 check that completed assembly is secure and meets the required specification
3.9 leave the work area in a safe and tidy condition.

Range

Components (AC3.4 & 3.5)
Metal conduit systems, non-metallic conduit systems, metal trunking system, tray work systems, electrical accessories: straight connectors/couplings, bends/elbows (solid and inspection type), tee pieces (such as solid or inspection type), boxes, reducers, adaptors, fixings, conduit accessories.

Construct
Cutting materials to the correct lengths, removing burrs and sharp edges, producing external threads on conduit, producing bends in conduit, offsets.

Checks
Positioning, level, secure, supports used where applicable.

Safe and tidy condition
Return tools, fixings and equipment, drawings and work instructions to the designated location.

Learning outcome
The learner will:
4. know electrical wiring support systems component accessories.

Assessment criteria
The learner can:
4.1 identify types of plastic and metal conduit accessories
4.2 identify types of trunking accessories
4.3 identify types of cable tray accessories

City & Guilds Level 1 Diploma in Electrical Installation (7202-01)
4.4 Identify **specialist tools** for wiring support systems.

</tbody>
</table>
Unit 106  Fabrication techniques for electrical installation

Supporting information

Guidance
In order to carry out the activities centres are advised that they may use manufactured fittings and accessories for both tray and trunking tasks.

Learning outcome 1
The learner will need to produce a work plan listing the sequence of activities required, health & safety and tools, equipment and materials required. They will be required to carry out all necessary preparations, within the scope of their responsibility. This will include preparing the work area and ensuring that it is in a safe condition to carry out the intended activities.

Learning outcome 2
When making electrical components the learner will be expected to use appropriate tools and equipment and to check that they are in a safe and usable condition prior to use. They will mark out the material for a range of features to be produced, and then to use hand tools, portable power tools, appropriate fitting techniques to the type of material and operations being performed. These activities will include hand sawing, filing, drilling, and threading.

Learning outcome 3 and 4
The assembly activities will include the forming and assembly of metallic and/or non-metallic systems, and will cover the selection of the appropriate materials, cutting and bending/forming the appropriate pieces that make up the support system. The learner will also need to assemble the prepared pieces, using a range of connection devices, and to position, align and secure them in the correct locations, using the specified/appropriate techniques.
Unit 107  
**Electrical science and technology**

**UAN:** Y/505/1717  
**Level:** 1  
**Credit value:** 4  
**GLH:** 39  
**Aim:** The aim of this unit is to enable the candidate to understand the elementary values of electrical science. This knowledge provides the foundation for electrical studies which can be applied when calculating, constructing and testing simple electrical circuits.

Unit 107  Electrical science and technology
Supporting information

Guidance
Learning outcome 2 AC2.3
When teaching AC2.3 there are a number of other multiples and sub multiples that candidates should be introduced to.

Learning outcome 3 AC3.4
Candidates should be introduced to the key principles of electrical generation through the use of magnetism. Michael Farady's laws on electromagnetic induction.

Learning outcome 4 AC4.2
Using the symbols as illustrated in the onsite guide (BS7671).
Appendix 1  Relationships to other qualifications

Links to other qualifications

Centres are responsible for checking the different requirements of all qualifications they are delivering and ensuring that candidates meet requirements of all units/qualifications.

This qualification has connections to the:

- Level 1 Diploma in Plumbing Studies

Literacy, language, numeracy and ICT skills development

This qualification can develop skills that can be used in the following qualifications:

- Functional Skills (England) – see www.cityandguilds.com/functionalskills
- Essential Skills (Northern Ireland) – see www.cityandguilds.com/essentialskillsni
- Essential Skills Wales – see www.cityandguilds.com/esw
Appendix 2  Sources of general information

The following documents contain essential information for centres delivering City & Guilds qualifications. They should be referred to in conjunction with this handbook. To download the documents and to find other useful documents, go to the Centres and Training Providers homepage on www.cityandguilds.com.

Centre Manual - Supporting Customer Excellence contains detailed information about the processes which must be followed and requirements which must be met for a centre to achieve ‘approved centre’ status, or to offer a particular qualification, as well as updates and good practice exemplars for City & Guilds assessment and policy issues. Specifically, the document includes sections on:

- The centre and qualification approval process
- Assessment, internal quality assurance and examination roles at the centre
- Registration and certification of candidates
- Non-compliance
- Complaints and appeals
- Equal opportunities
- Data protection
- Management systems
- Maintaining records
- Assessment
- Internal quality assurance
- External quality assurance.

Our Quality Assurance Requirements encompasses all of the relevant requirements of key regulatory documents such as:

- Regulatory Arrangements for the Qualifications and Credit Framework (2008)
- SQA Awarding Body Criteria (2007)
- NVQ Code of Practice (2006)

and sets out the criteria that centres should adhere to pre and post centre and qualification approval.
Access to Assessment & Qualifications provides full details of the arrangements that may be made to facilitate access to assessments and qualifications for candidates who are eligible for adjustments in assessment.

The centre homepage section of the City & Guilds website also contains useful information on such things as:

- **Walled Garden**: how to register and certificate candidates on line
- **Events**: dates and information on the latest Centre events
- **Online assessment**: how to register for e-assessments.

About City & Guilds
As the UK’s leading vocational education organisation, City & Guilds is leading the talent revolution by inspiring people to unlock their potential and develop their skills. We offer over 500 qualifications across 28 industries through 8500 centres worldwide and award around two million certificates every year. City & Guilds is recognised and respected by employers across the world as a sign of quality and exceptional training.

City & Guilds Group
The City & Guilds Group is a leader in global skills development. Our purpose is to help people and organisations to develop their skills for personal and economic growth. Made up of City & Guilds, City & Guilds Kineo, The Oxford Group and ILM, we work with education providers, businesses and governments in over 100 countries.
