Employer-Set Project assessment

Assessment objectives

The Employer-Set Project is assessed against five assessment objectives. The assessment objectives are mapped against each task within the marking grids:

	Assessment Objective
AO1	Plan their approach to meeting the project brief
AO2	Apply core knowledge and skills as appropriate
AO2a	 core knowledge
• AO2b	o core skills
	 i) business and commercial awareness e.g. conducting a PESTLE analysis to inform a change project
	 ii) project management e.g. planning, managing and evaluating a project using appropriate tools and methodologies
	 iii) communication e.g., providing information and advice, undertaking presentations of information
	 iv) work collaboratively with other team members and stakeholders e.g., to identify solutions to problems
	 v) applying a logical approach to problem solving, using analysis of advantages and disadvantages, identifying issues and proposing solutions vi) undertaking research e.g., obtaining information/data through different forms of research, meeting requirements of a defined brief
	 vii) reflective practice e.g., reviewing performance and own behaviours, identifying ways for improvement and supporting delivery of quality outcomes
AO3	Select relevant techniques and resources to meet the brief
AO4	Use maths, English and digital skills as appropriate
AO4a	o maths
AO4b	◦ English
• AO4c	o digital
AO5	Realise a project outcome and review how well the outcome meets the brief
• AO5a	 realise a project outcome – was the right outcome achieved
• AO5b	 review how well the outcome meets the brief, how well was the brief met, the quality of the outcome in relation to the brief

Coverage of core skills

The following table indicates how the different tasks within the Employer-Set Project target each of the core skills.

Task number	Task	Core skills targeted
1.1	Investigate the project brief	i) Business context/commercial awarenessv) Applying a logical approach to problem solvingvi) Undertaking research
1.2	Project Initiation Document (PID)	ii) Project management
1.3	Project Planning	ii) Project management
1.4	Presentation	iii) Communication
2.1	Collaborative problem solving	iii) Communicationiv) Working collaboratively with othersv) Applying a logical approach to problem solving
2.2	Evaluation	vii) Reflective practice

Maths, English and digital skills

The following table outlines where maths, English and digital skills competencies have been incorporated into the assessment tasks.

Task 1.1 Investigating the	Maths skills					
brief	MC2 - Estimating, calculating and error spotting					
	MC5 - Processing data					
	MC6 - Understanding data and risk					
	MC8 - Communicating using mathematics					
	MC9 - Costing a project					
	MC10 - Optimising work processes					
Task 1.3 Project planning	Maths skills					
	MC6 - Understanding data and risk					
	MC8 - Communicating using mathematics					
	MC9 - Costing a project					
	MC10 - Optimising work process					
Task 1.4 Presentation	Digital skills					
	DC1 - Use digital technology and media effectively					
	DC2 - Design, create and edit documents and digital media					
	DC3 - Communicate and collaborate					
	English skills					
	EC1 - Convey technical information to different audiences					
	EC2 - Present information and ideas					
	EC3 - Create texts for different purposes and audiences					
	EC4 - Summarise information/ideas					
	EC5 - Synthesise information					
	EC6 - Take part in/lead discussions					

Employer-Set Project mark distribution

This table illustrates how the 100 marks for the Employer-Set Project are distributed against the tasks and mapped to each assessment objective. These have been set by subject matter experts and employers and will support the comparability between versions of the Employer-Set Project over time.

Tasks	A01	AO2a	AO2b	AO3	AO4a	AO4b	AO4c	AO5a	AO5b	Total
				Р	art 1

General marking approach

The following process details at high level the steps that will be undertaken by the external marking teams at City & Guilds following the submission of candidate's submitted evidence (including additional supporting evidence such as videos of presentations etc.).

Guidance

Markers of this assessment should note

- that candidate evidence must be marked based on what has been submitted. This
 means that if candidate evidence is not complete, marks will **only** be based on what has
 been submitted.
- any additional commentary on centre-provided forms in relation to any additional support or guidance provided to candidates as part of the assessment process. The level of support or guidance provided should be considered as a factor as part of the marking process.
- that the marking grids follow two slightly different approaches.
 - some of the task-based marking grids focus on a single targeted assessment objective. For these mark grids, the band descriptors have been written in direct response to the individual assessment objective. Markers will consider all the descriptor statements presented in each marking band, in order to determine how the candidate has evidenced demonstration of the assessment objective within the specific task.
 - some of the task-based marking grids incorporate coverage of multiple assessment objectives. This has been done where there is clear alignment between the objectives in the task and aims to support markers to bring together and assess the available evidence. For these mark grids, the assessment objectives being assessed have been incorporated into the band descriptors, so *in the same way as above*, markers should focus on how the evidence demonstrated reflects the collective descriptor statements in each band, which should be read as a whole to form an overall judgement.
- regardless of which of the above two approaches that the marking grids take, as the band descriptors incorporate the assessment objectives that each is intending to assess, markers should follow the guidance on marking without any specific need to consider the assessment objectives - i.e. considering the evidence and marks available as a whole and base their judgement on the quality of response and how it meets the overall band descriptors (see Process below).
- that if candidates make an error or display a weakness in one task that is further compounded through the inter-dependent nature of the tasks and carry through that error, the marker should penalise the candidate only once. Each task should be considered within the constraints of the marking for the task itself, focusing on the knowledge and skills to be demonstrated in that task. For example, if a candidate identifies a less than optimal solution in Task (1.1), when they get to the presentation task (1.4) where the solution is presented the marker should focus on looking at how well the candidate presents the solution they are proposing, i.e. it is the presentation and communication skills that should be the key focus of the assessment of the task, rather than further penalising the candidate for carrying forward a less than optimal technology solution from initial task (1.1). Candidates can also use evaluation within later task responses to address issues they have identified.

Process

Check the evidence

- Marker checks the marking requirements by referring to the 'Guidance for markers' section of the marking grid(s) for the task and confirming the evidence that should be used to assess that task.
- Marker scans / reads the body of candidate evidence, and carefully considers the band descriptors that reflect each mark band. The descriptors within each band have been broken down to support readability – but should be considered collectively during the marking process.

Note, the entire body of evidence for the task and how it relates to the AOs within each marking grid for the task should be considered as a 'whole' when reviewing the candidate evidence.

 Initial assessment – Marker first makes an assessment of the best fit to band taking into account the Indicative Content section which details typical evidence that may be produced for that task

Note: indicative content has been provided to help orient the marking, providing a sense of the intentions of the task evidence and expected parameters of the response. It is not exhaustive, and candidates do not need to cover all points referenced.

Confirm the band

Marker reviews the body of candidate evidence against the initial band descriptor selected in more detail to confirm if the response is securely sitting within the band, i.e. all characteristics described by the band descriptor are seen or it strongly meets the level of performance described by the descriptor holistically:

- o Marker will also check the descriptor for the level above
- If evidence clearly shows some of the characteristics of the band above, the marker will select a suitable mark at the bottom of that band
- If not showing characteristics of the higher band the marker will revert to the original band, selecting a mark at the higher end of that mark range.

If the response is not securely in the band, but *is partially* showing the characteristics of the band:

- o Marker will check the descriptor of the level below/above
- Maker will decide on a suitable mark either towards the bottom of the original band as some characteristics shown, or top of the band below if it better describes the quality of the characteristics being shown

If there is no alignment with the descriptor, the marker will reassess the starting band, and begin again.

Confirm the mark within the band

Where there are a range of marks per band, the marker will confirm a final mark based on the level of alignment with the descriptor, bearing in mind the marks available form an evenly distributed scale:

- If the quality of response fully aligns with the performance described by the descriptor the marker will assign a high mark within the band
- If the quality of the response partially aligns with the performance described by the descriptor – the marker will assign a low to medium mark within the band depending on the range of marks available
- The marker will consider the quality of a range of similar responses (e.g. annotated lead grade exemplification materials, responses reviewed during standardisation, and through experience) and choose a mark that would give an appropriate ranking amongst those responses in relation to the full range of marks available in each band.

Marking grids

Task 1.1 – Investigate the project brief

Guidance for markers

The following evidence must be used to assess performance against this task.

- Research outcomes summary table
- PESTLE & SWOT analysis
- Outline of two possible solutions
- · Cost benefit analysis with selected solution clearly identified

Note: where there is insufficient evidence to award a mark, a zero mark may be given

Indicative content

Typical evidence may include:

AO1 & AO3

Content

- Selection of techniques and resources research and application of PESTLE & application of SWOT
- Research around how organisations are structured and operate in the warehousing and distribution sector; Structure, people and management and processes and workflow used.
- Research of relevant technology used in the sector for planning resource utilisation: Supply chain management, workforce management software and solutions & potential costs associated with technology.
- Research shows a mixture of quantitative and qualitative research
- Research and potential PESTLE factors driving the need for efficiencies within it. Typical PESTLE factors are political, economic, sociocultural, technological, legal and environmental.
- Internal drivers which may impact the organisation considering strengths, weaknesses, opportunities, and threats (SWOT).
- List of sources or referenced materials.

AO2a

- Core knowledge: Business context, project and change management, Business behaviour
- Research coverage, knowledge of pestle & swot and information gathering.
- Knowledge seen across the PESTLE & SWOT in relation to the project.

AO2b & AO4

Content

- Application of research as part of core skills
- Detailed options for two solutions, potential solutions could include a combination of the following:
 - o Get in technology solution to support improved forecasting.
 - Upskilling existing staff.
 - Reducing the use of agency staff.
 - Investing in training and development to maximise staff potential / improve staff retention.
 - Increase the amount of stock they hold speaking to suppliers.
 - Introduce a specified waste area and review work processes linked to waste.
 - Rent out spare warehouse space.
- Cost benefit analysis (not expecting ROI) that consider the advantages and disadvantages of each proposed solution, consideration of impact on the organisation versus costs when considering budget in brief.
 - Cost expectations use of costings from a mix of brief and research. Costings captured for different solutions.
 - Benefits used costings to link advantages and disadvantages to support selection of one option.
- Assessment of financial viability of different options
- Comparison and analysis of the proposed options and justifications of decisions made.

Skills

- Collated information and resources from research undertaken.
- se of decision-making matrix for comparing possible options and their advantages and disadvantages.
- Undertaking a cost-benefit analysis and application to the brief.
- Use of risk analysis and application to the brief, considering risk mitigation.
- Consideration of wider options, including details of information that would be required but has not yet been possible to source.

Task 1.2 - Project Initiation Document (PID)

Guidance for markers

The following evidence must be used to assess performance against this task.

• Project initiation document

Note: where there is insufficient evidence to award a mark, a zero mark may be given

Indicative content

Typical evidence may include:

Content

- Details of projec5t management information to aid the co-ordination of resources to plan a project within time and resource constraints and to meet required compliance and governance framework for the logistics sector.
- Detail of project management phases and consideration of the co-ordination of resources to plan the project within time and resource constraints, including consideration of who to involve and when, i.e. internal key stakeholders in the organisation as well as consideration of external stakeholders such as the supply chain.
- Consideration of information to consider the scope of the project and pre-determine project aims and objectives, the intended task, or identified problems without exceeding time, cost and quality constraints.
- Identification of key project deliverables, including format and target completion date for each deliverable or project stage.
- Identifying impacts of opportunities/threats implementing the proposed solution, eg. legal, ethical in relation to the organisation, financial in relation to the details provided in the project brief.
- Consideration of risk, including details and risk mitigation evidence for each risk. Types of risk may include further loss of revenue for the organisation and its customers if orders are delayed, health and safety breaches if not complying with legislation, impact on health and wellbeing due to inadequate staffing levels.
- High level consideration of timescales in the project and how these will be met using recognised project management and/or time management tools.
- Consideration of budget outlined in the project and how this will be maintained and regularly checked.
- Consideration of how the project will be evaluated and quality managed to measure project outcomes against project objectives and aims.

Skills

- Produce a PID document.
- Evidence of planning skills in the production of the PID together with the ability to identify and deploy appropriate tools and methodologies.
- Evidence of effective information skills in the production of the PID tailored to the audience in line with the organisation need and project brief.

Note: where there is insufficient evidence to award a mark, a zero mark may be given	Band 1 descriptor		Band 2 descriptor		Band 3 descriptor		Band 4 des	criptor	AO	Total marks available

Task 1.3 – Project planning

Guidance for markers

The following evidence must be used to assess performance against this task.

- Project plan on-a-page
- Written summary statement (approximately 750 words)

Note, where guidance has been provided on an approximate word count for the written summary statement, this is for guidance to candidates only. There is not a requirement to award marks based on the word count, but instead the response should be marked based on the quality of response. **Note: where there is insufficient evidence to award a mark, a zero mark may be given**

Indicative content

Typical evidence may include:

Content

- Information to pre-determine project goals, objectives and SMART targets, the intended task, or identified solution
- Consideration of project deliverables for the proposed efficiency solution.
- Consideration of the impact of the proposed efficiency solutions in relation to the details provided in the project brief.
- Identification of a project schedule to ensure project goals and objectives are met, including specific project timelines, actions at each stage to ensure the project is kept on track, and clear awareness of risk associated with each stage.
- Consideration of budget allowances and restraint included into the project schedule to highlight key stages where the budget needs to be closely monitored and detailing an evaluation of budget after project milestones and deliverables have been achieved to check whether budget was maintained throughout.
- Consideration of stakeholder management and communication plans for internal and external key stakeholders involved in or impacted by the proposed implementation of the solution.
- Identification of a risk management plan using the identified risks and evidence of mitigations of each risk from the Project Initiation Document in Task 1.2.
- Consideration of the qualitative and quantitative indicators against which the project can be evaluated including details of this in a communication plan for the project stakeholders.
- Identification of the need for evaluation, and the evaluation stage of the project embedded into the project plan after completion of key project objectives and deliverables.
- Demonstrate awareness of organisational learning for the life of the project and beyond and detail how an evaluation method can be utilised to ensure that this key stage is completed to assist the organisation with future projects.

Skills

• Stakeholder management, communication methods and processes.

- A communication plan which summarises all project information and aims to meet the project brief and organisation need, as well as showing potential for evaluation and how these feed into future improvements.
- Use and application of maths in timing calculations/high level Gantt chart.
- Methods, tools and processes available to plan project deliverables.
- Methods used to manage the project tasks and responsibilities including timescales.
- Methods and process for identifying and allocating resources.
- Identification of and management of risks including update of communication in a written summary statement.
- Evidence of planning and managing communication skills in the production of the project-on-a-page plan together with the ability to identify and deploy appropriate tools and methodologies.

		requirements of the brief considered.	with comprehensive lines of reasoning throughout with the requirements of the brief fully and consistently considered.	
There is a brief attempt to collate information and to demonstrate project planning skills. The approach does not always follow a logical approach and may lack clarity.	There is an attempt to collate information and to demonstrate project planning skills. The approach attempts to follow a logical approach and is mostly clear.	The approach to the collation of information and project planning is clearly planned and organised. A logical approach is adopted, but with some limitations in structure.	There is clear evidence of a methodical and thorough approach to the collation of information and project planning throughout the task. A logical and well-structured approach is adopted.	
The information provided in relation to the project planning is not always clear in approach.	The information provided in relation to the project planning follows a mostly coherent approach but lacks clarity.	The information provided in relation to the project planning follows a coherent approach and shows clarity.	The information provided is comprehensive and follows a fully coherent approach, with a high degree of clarity.	

Task 1.4 – Presentation

Guidance for markers

The following evidence must be used to assess performance against this task.

- Presentation materials including presentation slides, any present notes and any handouts
- Video recording of presentation
- Observation record

Note: where there is insufficient evidence to award a mark, a zero mark may be given

Indicative content

Typical evidence may include:

Content

- Detail is provided about the chosen solution and how the solution chosen is the best outcome for the organisation. The response is based on details provided in the project brief about the organisation's core values including any applicable regulations specific to the transport and logistics sector.
- Expected impacts of the chosen solution, both short and long term.
- The ways that the solution will support the quality of communication across stakeholders, including how alignment of the solution will support improved efficiency, productivity and customer satisfaction.
- Recommendation for proposed solution and how the solution will produce efficiencies for the organisation based on its current position,
- Detail of delivery for the project plan including allocation of resources, making use of specialised planning tools and techniques for the monitoring and control of the project and clearly defining timescales of key project deliverables in order to persuade the Directors that the project will be a success.
- Expected improvement in engagement and collaboration in the supply chain including the quality of the communication for key stakeholders and why this solution will offer potential future benefits to the organisation.
- Information relating to budget restriction and limitations including applicable GDPR/legal regulations, internal policies for equality, diversity
 and inclusion, health and safety and well-being, environmental/financial/ethical impacts and how each would be a challenge to the logistics
 organisation.
- Evidence of how objectives outlined to meet the organisation's current needs and future aims have been met in the options and solutions.
- Evidence of why this proposed solution meets all the objectives and convincing the Director why it should be implemented.

Skills

• Evidence of communication and information skills in the presentation tailored to the audience in line with the organisation's need and project brief, with a credible and logical structure.

- Evidence of visual communication through the use of digital aids such as slides.
- Evidence of answering questions by relating their evidence back to what they have presented and seeking clarification from the questioner if needed.

Presentation	The presentation content is communicated to the audience with limited clarity. There is limited evidence of the use of technical language and content, with inaccuracies noted.		The presentation content is mostly communicated clearly. There is some evidence of the use of technical language and content, but it may lack relevance to the presentation.		The presentation content is communicated clearly. The use of technical language and content is accurate and mostly relevant to the presentation.		The presentation content is communicated clearly and coherently. The use of technical language is accurate and detailed and is relevant to the presentation.		The presentation content is communicated clearly and coherently through well-considered and reasoned approaches intended to engage the audience. The use of technical language is accurate and detailed and is used effectively to support judgements that enhance the presentation.		AO4c	

Limited communication skills of active listening, checking understanding of question asked and checking for sufficiency of answer provided are presented during the response to questions after the presentation. There is limited evidence of tailoring communication with the audience.	Communication skills of active listening, checking understanding of question asked and checking for sufficiency of answer provided are used with some effectiveness when responding to questions after the presentation. There is some consideration of tailoring communication with the audience.	Communication skills of active listening, checking understanding of question asked and checking for sufficiency of answer provided are used effectively when responding to questions after the presentation. Communication is attempted to be tailored to engage with the audience.	Communication skills of active listening, checking understanding of question asked and checking for sufficiency of answer provided are used effectively when responding to questions after the presentation. Communication is tailored to engage successfully with the audience.	Communication skills of active listening, checking understanding of question asked and checking for sufficiency of answer provided are used comprehensively when responding to questions after the presentation. Communication is optimally tailored to engage successfully with the audience and persuade them of their	
Limited digital technology skills are used to create and present a basic presentation. The presentation lacks coherence.	Presentation created and presented using some digital technology skills. Digital technology skills mostly support the clarity of the information presented.	Presentation created and presented with a good use of digital technology skills, with some effectiveness. Digital technology skills are used to provide clarity and coherence to the presentation, mostly effectively.	Presentation created and presented effectively with the thorough use of digital technology skills. Digital technology skills are used to effectively provide clarity and coherence to the presentation.	approach. Presentation created and presented in an optimal way using advanced digital technology skills. Digital technology skills are used to optimise the clarity and coherence of the presentation.	

Task 2.1 – Collaborative problem-solving

Guidance for markers

The following evidence must be used to assess performance against this task.

- Written discussion notes.
- Video recording of discussions.
- Observation record form
- Operations Directors email (approximately 300 words)
- Briefing note (approximately 300 words).

Note, where guidance has been provided on an approximate word count for the email and briefing note, this is for guidance to candidates only. There is not a requirement to award marks based on the word count, but instead the response should be marked based on the quality of response. **Note: where there is insufficient evidence to award a mark, a zero mark may be given**

Indicative content

Typical evidence may include:

Content

- Details about the issue the organisation is currently facing.
- Detail of expected impacts and what this means in terms of impact on productivity and meeting KPIs.
- Detail of how to mitigate the risk associated with possible action. This will include details of the optimum solution.
- Detail around the types of information that will be needed to optimise a solution.
- Recommendation for proposed solution and how this will successfully influence outcomes and solve the issue.
- Details of why the proposed solution is the most suitable and should be implemented.
- Detail around how this will be communicated effectively to all stakeholders.
- Consideration of risks or impacts of not implementing this solution.
- Consideration of responsibilities and process for the safe retention of the forklift keys and any possible consequences for future loss.

Skills

- Evidence of communication in discussion and collaborative skills used to engage.
- Evidence of problem solving and decision making.
- Evidence of using information flow to present findings coherently to an audience.

Task 2.2 – Evaluation

Guidance for markers

The following evidence must be used to assess performance against this task.

• Written summary statement (approximately 1000 words)

Note, where guidance has been provided on an approximate word count for the written summary statement, this is for guidance to candidates only. There is not a requirement to award marks based on the word count, but instead the response should be marked based on the quality of response.

Note: where there is insufficient evidence to award a mark, a zero mark may be given

Indicative content

Typical evidence may include:

Content

- Reflection on effectiveness and success of responses across project tasks.
- Considered analysis and evaluation of project outcomes and detail of whether all project outcomes were achieved.
- Evaluation of the project plan-on-a-page
- Lessons learned an evaluation of task responses indicating what was successful and the reasons why, and what different steps may be taken next time to make future projects more successful.
- Evaluation and self-reflection of own abilities to manage project objectives and outcomes, including detail of how the chosen solution meets the requirements of the organisation as detailed in the project brief.
- Evaluation of involvement in collaborative problem solving

Skills

- Evaluation of own performance and behaviours
- Ability to be able to reflect on own experience and articulate what they have learnt
