2 Centre requirements

Approval

Automatic approval is available for centres offering the Level 5 Diploma in Leadership for Health and Social Care and Children and Young People's Services - Children and Young People's Residential Management (England) 3978-51 (-91) / 4978-51 (-91).

To offer this qualification, new centres will need to gain both centre and qualification approval. Please refer to the Centre Manual - Supporting Customer Excellence for further information.

Centre staff should familiarise themselves with the structure, content and assessment requirements of the qualifications before designing a course programme.

Centre Staffing

This section outlines the approval processes for centres to offer this qualification and any resources that centres will need in place to offer the qualifications including qualification-specific requirements for centre staff.

Existing City & Guilds Centres not currently offering qualifications in this area will need to obtain qualification approval

Human resources

To meet the quality assurance criteria for these qualifications, the centre must ensure that the following internal roles are undertaken:

- Quality Assurance Coordinator
- Trainer/Tutor
- Assessor (occupationally competent and occupationally knowledgeable)
- Internal Quality Assurer

Centre staff may undertake more than one role, eg tutor and assessor or an Internal Quality Assurer, but must never internally quality assure their own assessments.

Continuing professional development

Centres are expected to support their staff in ensuring that their knowledge remains current of the occupational area and of best practice in delivery, mentoring, training, assessment and verification, and that it takes account of any national or legislative developments.

Assessor requirements

The Assessors of competence based units must:

- be occupationally competent - this means that each assessor must be able to carry out the full requirements within the competency units that they are assessing. Occupational competence means that they are also occupationally knowledgeable

- maintain their occupational competence through clearly demonstrable continuing learning and professional development
- hold D32/D33 or A1 or be working towards one of the following:
 - the A1 replacement qualifications i.e. the City & Guilds 6317 such as
 - Level 3 Award in Assessing Vocational Competence or
 - Level 3 Award in Assessing Vocationally Related Achievement or
 - Level 3 Certificate in Assessing Vocational Achievement or
 - another suitable qualification in the assessment of knowledge.
 This must be agreed in advance with the External Verifier.

Internal quality assurers

Internal quality assurance is key to ensuring that the assessment of evidence for units is of a consistent and appropriate quality. Those performing the internal quality assurance role must be occupationally knowledgeable and possess the skills necessary to make quality assurance decisions.

Although it is not a requirement to hold a qualification to quality assure this qualification, City & Guilds recommends that it is best practice to hold an internal verification qualification.

These include:

- D34 or V1
- the V1 replacements e.g. the City & Guilds 6317 such as the:
 - Level 4 Award in the Internal Quality Assurance of Assessment Processes and Practice OR
 - Level 4 Certificate in Leading the Internal Quality Assurance of Assessment Processes and Practice

If the Internal quality assurer does not hold a qualification they must be able to demonstrate evidence of working to their own organisation's QA or IV standards which clearly link to V1 or other equivalent standards for Internal Quality Assurance.

Expert witness

In line with Skills for Care and Development Assessment Principles, an expert witness must:

- have a working knowledge of the QCF units on which their expertise is based
- be occupationally competent in their area of expertise
- have EITHER any qualification in assessment of workplace performance AND/OR a professional work role which involves evaluating the every day practice of staff.

The use of an expert witness testimony should be determined and agreed by the assessor.

Assessment decisions

Assessment decisions for criteria that must be assessed in the workplace, as identified in unit assessment requirements, must be made in a real work environment by an occupationally competent assessor.

Competence based assessment must include direct observation as the main source of evidence.

Simulation may only be utilised as an assessment method for competence based assessment criteria where this is specified in the assessment requirements of the unit.

Assessment of knowledge based Learning Outcomes (eg those beginning with 'know' or 'understand') may take place in or outside of a real work environment.

See - Skills for Care and Development QCF Assessment Principles

www.skillsforcare.org.uk

Guidance for the assessment and verification for imported units

Where units have been developed by Sector Skills Councils or Standard Setting Bodies other than Skills for Care and Development any specific assessment requirements will be detailed in the unit itself.

Learner entry requirements

City & Guilds does not set entry requirements for these qualifications. However, centres must ensure that learners have the potential and opportunity to gain the qualifications successfully.

Age restrictions

The City & Guilds Level 5 Diploma in Leadership and Management for Residential Childcare is not approved for learners under 19 years of age. City & Guilds cannot accept any registrations for learners below this age group.

Other legal considerations

Learners working within care services may be legally required to undergo criminal record checks prior to taking up or continuing in employment. Centres and employers will need to liaise closely with one another to ensure that any requirements for the particular area of work are fully met. As the requirements vary between work contexts, checks should be made with the appropriate regulatory body and/or government departments if centres or employers are uncertain of these requirements. These are usually the responsibility of the employer. The appropriate service regulator identifies any 'fit person' criteria, not the Awarding Body.

Centres are advised that fit persons criteria and work function job specification limitations may impact the learner/learner's ability to generate sufficient and appropriate evidence that meets the learning outcome and assessment criteria in some of the units within this qualification. The completion of a robust initial assessment should aim to highlight any possible issues that will impact on the learner's ability to complete a full qualification.

3 Delivering the qualification

Initial assessment and induction

An initial assessment of each learner should be made before the start of their programme to identify:

- if the learner has any specific training or learning needs
- support and guidance they may need when working towards their qualification
- any units they have already completed, or credit they have accumulated which is relevant to the qualification and may be used as part of the RPL process
- the appropriate type and level of qualification.

We recommend that centres provide an induction programme so the learner fully understands the requirements of the qualification, their responsibilities as a learner, and the responsibilities of the centre. This information can be recorded on a learning contract, a personalised learning plan or a similar document.

Documents Recording

Learners and centres may decide to use paper based or electronic method of recording evidence.

City & Guilds endorses several e-portfolio systems, including our own Learning Assistant, an easy to use and secure online tool to support and evidence learners' progress towards achieving qualification. Further details are available at www.cityandguilds.com/eportfolio.

Recording forms are available on the City & Guilds website. www.cityandguilds.com

Although new centres are expected to use these forms, centres may devise or customise alternative forms, which must be approved for use by the external quality assessor/ external verifier, before they are used by learners and assessors at the centre.

Amenable (MS Word) versions of the forms are available on the City & Guilds website.

4 Assessment

Summary of assessment methods

This competence-based qualification is designed to be assessed in the learner's workplace as they undertake their normal work role. The evidence must at all times reflect the policies and procedures of the workplace as informed by current legislation, the relevant service standards and codes of practice for the sector. It is advisable that the majority of assessment for this competence-based qualification will take place in the workplace under real work conditions, using observations by a qualified assessor and/or testimony from an expert witness, work products etc. All the identified assessment criteria must be evidenced and a holistic approach to assessment is encouraged. The learner must be working with a minimum of two service users in order to complete this qualification. The qualification/units need to be assessed in line with the Skills for Care and Development QCF Assessment Principles.

Competence based units

There will be a combination of assessment methods for this qualification. Direct observation of learners' performance by a qualified occupationally competent assessor, and the assessor's judgement on testimony from an Expert Witness Testimony are the main methods of assessment and main source of evidence for this qualification.

Knowledge based units

Knowledge based units can be assessed in line with this qualification's assessment methods, e.g. centre devised/internally verified assignments, professional discussion and projects.

Range

Within the competence and knowledge-based units, keywords or phrases within the assessment criteria are highlighted in bold to reflect the range. This enables tutors/assessors to teach some or all of the areas listed in the range.

Assessment strategy

External verification

This qualification is internally assessed, internally verified and externally verified. Assessment is achieved via robust external and internal quality assurance processes, supported by City & Guilds reporting systems, which identifies areas of best practice and areas for development or risk for each centre.

Observation requirements

The prime source of evidence for competency based learning outcomes within this qualification is assessor observation. Where assessor observation would be difficult because of intrusion into areas of

privacy and/or because activities occur rarely, expert witnesses can provide testimony for the occupationally specific units.

Additional assessment method or evidence sources

In addition to observation, assessors should identify an appropriate mix of other assessment methods **below**, to ensure that all the assessment criteria are sufficiently evidenced to allow them to make the consistency of the learner’s practice for each unit

Expert witnesses	Expert witnesses may observe learner practice and provide testimony for competence based units which will have parity with assessor observation for all competence based units across the qualification. If an assessor is unable to observe their learner she/he will identify an expert witness in the workplace, who will provide testimony of the learners work based performance.
Work products	Work products can be any relevant products of learners’ own work, or to which they have made a significant contribution, which demonstrate use and application within their practice.
Professional discussion	Professional discussion should be in the form of a planned and structured review of learners’ practice, based on evidence and with outcomes captured by means of audio/visual or written records. The recorded outcomes are particularly useful as evidence that learners can evaluate their knowledge and practice across the qualification.
Learner/reflective accounts	Learner/reflective accounts describe learners’ actions in particular situations and/or reflect on the reasons for practising in the ways selected. Reflective accounts also provide evidence that learners’ can evaluate their knowledge and practice across the activities embedded in this qualification.
Questions	Questions asked by assessors and answered by learners can be used to supplement evidence generated by observations and any other evidence type used. Assessors may be able to infer some knowledge and understanding from observing learner practice. They may ask questions to confirm understanding and/or cover any outstanding areas. Questions may be asked orally or in writing but, in both cases, a record must be kept of the questions and responses.
Witness testimonies	Witness testimonies should come from people who are in a position to provide evidence of learner competence. Where testimony is sought from individuals who are service users, care should be taken to ensure the purpose of the testimony is understood and no pressure is felt to provide it and confidentiality is maintained at all times.
Projects/Assignments	Learners may have already completed a relevant project or assignment which can be mapped to the relevant standards and therefore provide evidence. Evidence can also be obtained from previous training courses and/or learning programmes which they have completed and which demonstrate their professional development may also be used (see section on Recognition of Prior Learning).

Case studies	Case studies must be based on real work practice and experiences and will need to be authenticated by an assessor if used as evidence of performance competence. Theoretical or simulated exercises would only be admissible as evidence of knowledge and understanding.
--------------	--

N.B Confidential records must not to be included in learners' portfolio but must be referred to in the assessment records.

Evidence requirements

Competence evidence requirements

The structure of this qualification makes it unlikely that any one assessor will have the necessary vocational competence to be able to assess every unit. Therefore the use of a range of occupationally competent assessors and/or 'experts' who are able to contribute to a learner's assessment, will be of considerable assistance to centres in providing learners with access to those who can testify to their competence in the workplace. It may also ensure that privacy and confidentiality are not infringed.

Evidence of learner performance will be derived from assessor observation and/or testimony from an expert witness of the learner carrying out real work activities in the workplace. Assessor observation is not required for the knowledge units although knowledge can be inferred from performance.

The unit qualified and occupationally competent assessor or the learner's overall qualification coordinating assessor will decide on the appropriateness of all evidence including expert witness testimony and on whether or not it should be included in a learners' portfolios.

Legal requirements and best practice in relation to maintaining the confidentiality and the rights to dignity and privacy of the people participating and contributing to the evidence must be upheld. This is regardless of the evidence source, assessment method and means used for recording such evidence.

Knowledge evidence requirements

If the assessor cannot positively infer the knowledge and understanding from learners' work practice they should question the learner or, if appropriate, use professional discussion to elicit the required knowledge. Assessors must retain records of questions and answers on the focus and outcomes of professional discussion. Centre-designed assignments may also be used and must comply with the City & Guilds centre assessment guidance criteria as provided (document *Assessor Guidance*, available on www.cityandguilds.com)

Professional discussion, where used, must be conducted with learners by a qualified occupationally knowledgeable assessor. Professional discussion is most appropriately used in the qualification to elicit underpinning knowledge to explain how to deal with contingencies and clarify or expand on evidence presented in portfolios. Professional discussion must be included in learners' assessment plans and thereby agreed in advance with learners. The assessor could use professional discussion to ask a set of prescribed knowledge questions if required.

Recognition of prior learning (RPL)

Recognition of Prior Learning (RPL) is a process of using an individual's previous achievements to demonstrate competence within QCF. This is not a new process but expands on previously used processes such as the Accreditation of Prior Learning (APL), the recognition of experiential learning and the validation of informal learning by incorporating all types of prior learning and training.

The regulatory arrangements for the Qualifications and Credit Framework define RPL as a method of assessment that considers whether a learner can demonstrate that they can meet the assessment requirements for a unit through knowledge, understanding or skills they already possess and do not need to develop through a course of learning. In the context of the QCF, the definition of RPL is quite specific and relates to assessment leading to the award of credit.

Assessment for RPL is conducted against the learning outcomes and assessment criteria of a unit and is subject to exactly the same quality assurance requirements as any other kind of assessment within the QCF.

The RPL process is relevant where an individual has previously learnt something but may never have received formal recognition for this learning through a qualification or other form of certification. Within the QCF an individual is able to 'claim' that he or she knows or can do something already and does not need to attend a course to learn it again. If he or she can prove this claim (through assessment of relevant evidence), then credit can be awarded for that achievement in the same way as any other credits. RPL refers to an opportunity for learners to present competence or knowledge evidence which comes from a period prior to their registration for a particular qualification. The evidence presented - e.g. certificates, witness testimonies etc. - will need to provide sufficient detail to allow the assessor to apply the RPL assessment process.

Assessment staff work through Learning Outcomes and Assessment Criteria ensuring that all are covered, using relevant methods for RPL such as: Witness Testimony, Reflective Accounts, Professional Discussion, etc.

In considering the appropriateness of any single piece of evidence the following should be considered:

- Content – the degree to which the content of any previous learning meets the requirements of the National Occupational Standards against which it is being presented as evidence.
- Comprehensiveness of Assessment – ensure that all the learning derived from the content has been assessed. If only a proportion has been assessed, then the learning for the 'non-tested' areas cannot be assumed.
- Level – the degree to which the level of learning offered and tested relates to that required by the Level 5 Diploma in Leadership and Management for Residential Childcare (England)
- Learning outcomes and Assessment criteria – the degree to which the previous learning covered both. Some learning will only have offered and tested the latter, in which case the Recognition of Prior Learning can only cover the knowledge aspect. Performance will require further assessment. Although unlikely, the reverse (performance tested but not knowledge) could be true in which case knowledge and understanding would need further assessment.

- Model of learning – difficulties can arise in mapping learning gained from non-competence based learning programmes into competence-based models.
- Relevance of Context – the degree to which the context of the learning gained and assessed relates to the current context of learners' work roles. If the context was different, assessors will need to satisfy themselves of learners' ability to transfer the learning gained into the current setting.

The City & Guilds policy on RPL can be found at: <http://www.cityandguilds.com/Provide-Training/Centre-Support/Centre-Documents-Library/Policies-and-Procedures/Quality-Assurance-Documents>.
