Qualification aim	Qualification levels and definition	Progression routes
These qualifications have been developed to provide those working in the construction industry with the knowledge required to ensure that new builds and retrofitted buildings are carried out with suitable environmentally sympathetic equipment, and offer their customers advice on energy consumption and selection of the most appropriate equipment.	These qualifications are available at Level 3 only and have been designed for those who have been working in the industry for some time.	On completion learners will gain the skills and knowledge required to progress to directly into employment, offering learners the chance to develop their skills and knowledge to a high standard recognised by the industry. Learners may also progress onto an Advanced Apprenticeship in the construction sector.

	Key features	Key benefits
Structure	Learners must complete 4 mandatory units to achieve the Certificate, and an additional 24 credits from the optional units to achieve the Diploma.	The 4 mandatory units are included in the Certificate and the Diploma which allows for easy progression from one qualification to the other. Our vast range of optional units available in the Diploma allows you to tailor content to suit learners' individual needs, whilst meeting the occupational requirements of the industry.
Assessment	Each unit has a pre-written assignment that is available in an assignment guide and can be downloaded from the website. The assignment guide is available to approved centres.	The pre-written assignment guide means that centres don't have to prepare their own assignments and the assessment approach is standardised across the country. We use subject matter experts to ensure we are testing the right skills and knowledge.
Support	Our support resources include: a free Qualification Handbook, Assignment Guide and personal support from a team of subject specific Qualification Consultants.	Personal support is available from a team of subject specific Quality Consultants, our Customer Relations Team and dedicated Business Managers.

Reasons to choose City & Guilds	
Widest range and choice of qualifications	We develop qualifications across a variety of vocational sectors that meet the needs of today's workplace, and help individuals develop their talents and abilities for future career progression.
Industry expertise	We have over 125 years experience of designing qualifications using subject matter experts to ensure they are fit for purpose.
Recognised by employers	Our qualifications are trusted and valued both by experts and employers across the construction industry.
