1. State **two** forms of foundation that can be used in the construction of low-rise domestic buildings.  
   (2 marks)

2. Explain why the following are requirements of a cold water supply entering a building.

   a) The service pipe **must** enter the building at a minimum depth of 750 mm below ground level.  
   (2 marks)

   b) The service pipe **must** enter the building through the wall but not below the foundation.  
   (2 marks)

   (2 marks)
4. Explain the physical and chemical properties of steel that make it an appropriate structural material for use in medium-rise industrial buildings. (6 marks)

5. State two items of information that should be collected during a site investigation. (2 marks)

6. State three hazards associated with deep excavations. (3 marks)

7. Failure to comply with health and safety legislation in the workplace can have corporate and human consequences.
   a) State three corporate consequences. (3 marks)
   b) State two human consequences. (2 marks)
8. Explain two techniques used to supervise and control the workforce on a construction site. (4 marks)

9. State the personal attributes and skills required of an effective site supervisor. (5 marks)
A company has purchased land upon which a large petrol station once stood. Their intention is to construct a training centre that will specialise in delivering practical construction crafts training for trades such as brick laying. The training centre does not require gas services, however will require all other building services. The workshop in the training centre, must be at least 6 m high and the structure of the building is to be steel framed.

The company also wishes to build a new home for the resident site service manager. The house is to have all normal building services provided, be single storey and be of traditional masonry construction.

a) Describe the essential documentation a site manager would use to manage and co-ordinate this construction project. (6 marks)

b) Discuss the issues concerned with site clearance, excavation, the construction of foundations and provision of building services to the two buildings. (12 marks)
