   a) Strongboy.
   b) Raking shore.
   c) Flying shore.
   d) Horizontal strut.

Response: ______________________

8 Which approved document from the building regulation would provide information of heights of chimney stacks?
   a) Part A.
   b) Part C.
   c) Part J.
   d) Part F.

Response: ______________________

9 Which component is used to reduce the fire place opening to the size of the flue?
   a) Fireback.
   b) Hearth.
   c) Throat unit.
   d) Plinth brick.

Response: ______________________

10 What is the recommended size for a throat at the entry to a flue?
   a) 75 mm.
   b) 100 mm.
   c) 125 mm.
   d) 150 mm.

Response: ______________________
Section B

11  List three criteria that would be examined by a registered building inspector when looking at a sub foundation.  

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________

12  Name three common methods used to plan construction work.  

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________

13  Identity three scales that can be used to produce construction drawings.  

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________

14  Explain the purpose of three checks that would be made by a registered building inspector when inspecting horizontal DPC.  

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________
15  a) Name one type of material that will improve the insulation of a cavity wall.  

b) When fitting cavity wall insulation, describe the importance of ensuring that the sheets are fixed in place securely and the mortar is removed.  

16  You are tendering for a small building project. Summarise the items that could be included within  
a) preliminaries  

b) PC sum (Prime cost).
17 List **four** items of equipment that could be used to provide temporary support when replacing a defective lintel.  

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

(4 marks)

18 a) Describe the probable cause of white staining on a face brick gable end.  

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

(2 marks)

b) Outline a method of removing the staining.  

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

(2 marks)

c) Recommend treatment that will prevent the stains from returning.  

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

(2 marks)

19 Name **two** components used in the construction of a fireplace opening.  

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

(2 marks)

20 Explain the purpose and position of two lead components that are used in chimney construction.  

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
