Level 2 Technical Certificate in Architectural Joinery (7906-21)

Assessment Pack
Sample Synoptic Assignment
General guidance for candidates

**General guidance**
This is a formal assessment that you will be marked and graded on. You will be marked on the quality and accuracy of your practical performance and any written work you produce. It is therefore important that you carry your work out to the highest standard you can. You should show how well you know and understand the subject and how you are able to use your knowledge and skills together to complete the tasks.

**Plagiarism**
This is an assessment of your abilities, so the work must be all your own work and carried out under the conditions stated. You will be asked to sign a declaration that you have not had any outside help with the assessment.

Your tutor is allowed to give you some help understanding the assignment instructions if necessary, but they will record any other guidance you need and this will be taken into account during marking.

Plagiarism is the failure to acknowledge sources properly and/or the submission of another person’s work as if it were your own. Plagiarism is not allowed in this assignment.

Where research is allowed, your tutor must be able to identify which work you have done yourself, and what you have found from other sources. It is therefore important to make sure you acknowledge all sources and clearly reference any information taken from them.

**Timings and planning**
Where you have to plan your time, you should take care to make sure you have divided the time available between tasks appropriately. In some assignments, there are specified timings which cannot be changed and which need to be taken into account. You should check your plan is appropriate with your tutor.

If you have a good reason for needing more time, you will need to explain the reasons to your tutor and agree a new deadline date. Changes to dates will be at the discretion of the tutor, and they may not mark work that is handed in after the agreed deadlines.

**Health and Safety**
You must always work safely, in particular while you are carrying out practical tasks.

You must always follow any relevant Health and Safety regulations and codes of practice.

If your tutor sees you working in a way that is unsafe for yourself or others, they will ask you to stop immediately, and tell you why. Your tutor will not be able to reassess you until they are sure you are ready for assessment and can work safely.

**Presentation of work**
Presentation of work must be neat and appropriate to the task.

You should make sure that each piece of evidence including any pro formas eg record/job cards are clearly labelled with your name and the assignment reference.

All electronic files must be given a clear file name that allows your tutor to identify it as your work.

Written work eg reports may be word processed but this is not a requirement.

All sketches and drawings should be neat and tidy, to scale and annotated. Calculations should be set out clearly, with all working shown, together with any assumptions made. You should use appropriate units at all times and answers must be expressed to a degree of accuracy, consistent with the requirements of the task.
Assignment Brief

Your company are manufacturing joinery products for the refurbishment of an old cottage. The owner of the house requested that the white meter box which is very prominent on the front wall be covered with a small unlocked door. Masonry has already been built to surround the box.

You have been asked to make a small door to fit into the frame which is already in place. The door must match the existing design of the nearby front door.

The front door design incorporates one central muntin and the section profile required is shown in Figure 1.

The door opening is 600 mm high x 450 mm wide. The stile and top rail sections are 57 mm x 32 mm, the muntin is 66 mm x 32 mm and the bottom rail is 95 mm x 32 mm.

You have been provided with the materials to make the door, including some 9 mm plywood for the panels. The door is to be prepared ready for clear finish.

You will have access to standard hand and power tools, workshop equipment and the following machinery:

- morticer
- bandsaw
- chop saw
- router table/spindle moulder.

Figure 1
Tasks

Task 1
1a Produce a setting out rod
1b Produce a cutting list
1c Produce a tools and equipment list

Conditions of assessment:
The setting out rod, cutting list and tools and equipment list should be produced working on your own, under supervised conditions.
You must work safely at all times. If you do not then the assessment will be stopped.

What must be presented for marking and submitted for moderation (if applicable):
- completed setting out rod
- completed cutting list
- completed tools and equipment list

Additional evidence of your performance that must be captured for marking and submitted for moderation (if applicable):
- your tutor’s notes, recorded on a Practical Observation form, of your working practice describing the quality, consistency and accuracy of the finished work
- photograph of the completed setting out rod

Task 2
2a Joint and profile the components
2b Assemble and finish the door

Conditions of assessment:
- The door must be manufactured working on your own, under supervised conditions
- You will be required to set up and operate the machinery under supervised conditions
- You must work safely at all times. If you do not then the assessment will be stopped.

What must be presented for marking and submitted for moderation (if applicable):
- completed door

Additional evidence of your performance that must be captured for marking and submitted for moderation (if applicable):
- your tutor’s notes, recorded on a Practical Observation form, of your working practice describing the quality, consistency and accuracy of the finished work
- photographs taken by your assessor of the completed door
Task instructions for centres

Resources
Candidates must have access to a suitable range of resources to carry out the tasks and to have the opportunity to choose materials demonstrating the ability to select from a range of appropriate materials.

Profiling and panel sizing is to be carried out on machinery, therefore the centre must have safe and well maintained machinery available for this purpose. Centres must prepare the PSE European redwood required. The stiles, top rail are to be supplied to the candidates PSE, and a 500 mm x 350 mm x 9 mm piece of ply for the panels.

The bandsaw, dimension saw and morticer must be set by each candidate, and only the router table/spindle moulder can be pre-set by the centre.

Candidates must be closely supervised when using machinery.

Task specific guidance

Task 1
The candidate should have the following to carry out this task:
  • pencil
  • tools and equipment
  • rod material
  • PPE as required
  • Cutting/tools and equipment lists

All work carried out should be to industry standards, in a safe manner.

Task 2
The candidate should have the following to carry out this task:
  • pencil
  • ruler
  • tools and equipment
  • PPE
  • PSE materials and manufactured board.

All work carried out should be to industry standards and in a safe manner.

A Practical Observation (PO) form must be completed and photographs must be taken in order to support assessment decisions for the candidates marked work. See details below around requirements for observations and photographs.

Guidance on photographs
It is expected that seven photographs will be submitted per candidate. These photographs should be used to support the observation recorded upon the Practical Observation Sheet.
Photographs must be of sufficient resolution to verify the quality of the completed work. Photographs must be of sufficient resolution and full frame to verify the quality of the completed work.

Task 1
One photograph of the setting out rod.

Task 2
Six photographs, one taken diagonally at the edge of each corner showing assembled joints ie fit of tenon, haunch, wedging and one of each face. One photograph should include the candidate and a sign that gives the name of the candidate and the date of the assessment so that photographs can be differentiated.

Total 9 hours.
Task 1— 3 hours (recommended)
Task 2— 6 hours (recommended)
Centre guidance

Guidance provided in this document supports the administration of this assignment. The following documents available on the City & Guilds website provide essential generic guidance for centres delivering Technical qualifications and must be referred to alongside this guidance:

- **Technical qualifications – marking**
- **Technical qualifications – moderation** (updated annually)
- **Technical qualifications – teaching, learning and assessment**

This synoptic assessment is designed to require the candidate to make use their knowledge, understanding and skills they have built up over the course of their learning to tackle problems/tasks/challenges.

This approach to assessment emphasises to candidates the importance and applicability of the full range of their learning to practice in their industry area, and supports them in learning to take responsibility for transferring their knowledge, understanding and skills to the practical situation, fostering independence, autonomy and confidence.

Candidates are provided with an assignment brief. They then have to draw on their knowledge and skills and independently select the correct processes, skills, materials, and approaches to take to provide the evidence specified by the brief.

During the learning programme, it is expected that tutors will have taken the opportunity to set shorter, formative tasks that allow candidates to be supported to independently use the learning they have so far covered, drawing this together in a similar way, so they are familiar with the format, conditions and expectations of the synoptic assessment.

Candidates should be made aware during learning what the Assessment Objectives are and how they are implemented in marking the assignment, so they will understand the level of performance that will achieve them high marks.

Candidates should not be entered for the assessment until the end of the course of learning for the qualification so they are in a position to complete the assignment successfully.

**Health and safety**

Candidates should not be entered for assessment without being clear of the importance of working safely, and practice of doing so. The tutor must immediately stop an assessment if a candidate works unsafely. At the discretion of the tutor, depending on the severity of the incident, the candidate may be given a warning. If they continue to work unsafely however, their assessment must be ended and they must retake the assessment at a later date.

**Compliance with timings**

The timings provided are estimates to support centre planning. They refer to assessment time, not any additional setting up the centre needs to carry out to create the required to ensure an appropriate assessment environment.

It is the centre’s responsibility to plan sufficient assessment sessions, under the appropriate conditions, within the assignment window, to allow candidates reasonable time to complete the assessment tasks.

Where candidates are required to plan their work they should have their plans confirmed for appropriateness in relation to the time allocated for each task.
Candidates should be allowed sufficient time to fully demonstrate the range of their skills, however this also needs to be reasonable and practicable. Candidates should be allowed to overrun their planned timings or professional service times (where they exist) in order for evidence of a range of their skills to be captured. If however, the time required exceeds reasonably set assessment periods, or the tolerance suggested for professional service times, the centre may stop the assessment and base the marking on the evidence up to that point, including the tutor’s notes of how far over time the task has taken.

**Observation evidence**

Where the tutor is required to carry out observation of performance, detailed, descriptive notes must be recorded on the practical observation (PO) form provided. The centre has the flexibility to adapt the form, to suit local requirements (eg to use tablet, hand-written formats, or to ease local administration) as long as this does not change or restrict the type of evidence collected.

The number of candidates a tutor will be able to observe at one time will vary depending on:

- the complexity of evidence collection for the task
- local conditions eg layout of the assessment environment,
- amount of additional support available (eg to capture image/video evidence), staggered starts etc,
- whether there are any peak times where there is a lot of evidence to collect that will need additional support or any that are quieter.

It is advisable to trial the planned arrangements where possible during formative assessment, reviewing the quality of evidence captured and manageability. It is expected that for straightforward observations, (and unless otherwise specified) no more than eight candidates will be observed by a single tutor at one time, and the number will usually be fewer than this maximum. The key factor to consider is the logistics of collecting sufficient evidence.

As far as possible, candidates should not be distracted, or their performance affected by the process of observation and evidence collection.

Observation notes form part of the candidate’s evidence and must describe how well the activity has been carried out, rather than stating the steps/actions the candidate has taken. The notes must be very descriptive and focus on the quality of the performance in such a way that comparisons between performances can be made. They must provide sufficient, appropriate evidence that can be used by the marker (and moderator) to mark the performance using the marking grid.

Identifying what it is about the performances that is different between candidates can clarify the qualities that are important to record. Each candidate is likely to carry out the same steps, so a checklist of this information would not help differentiate between them. However qualitative comments on how well they do it, and quantitative records of accuracy and tolerances would.

The tutor should refer to the marking grid to ensure appropriate aspects of performance are recorded. These notes will be used for marking and moderation purposes and so must be detailed, accurate and differentiating.

Tutors should ensure that any required additional supporting evidence including eg photographs or video can be easily matched to the correct candidate, are clear, well-lit and showing the areas of particular interest in sufficient detail and clarity for assessment (ie
taken at appropriate points in production, showing accuracy of measurements where appropriate).

If candidates are required to work as a team, each candidate’s contribution must be noted separately. The tutor may intervene if any individual candidate’s contribution is unclear or to ensure fair access (see below).

The Technical qualifications guides on marking and moderation are essential guidance documents and are available on the City & Guilds website. These provide further information on preparing for assessment, evidence gathering, standardisation, marking and moderation, and must be referred to when planning and carrying out assessment.

Minimum evidence requirements for marking and moderation
The sections in the assignment:
- What you must produce for marking, and
- Additional evidence of your performance that must be captured for marking
list the minimum requirements of evidence to be submitted for marking and the moderation sample.

Evidence produced during assessment above and beyond this may be submitted, as long as it provides useful information for marking and moderation and has been produced under appropriate conditions.

While technological methods which support the capturing or creating of evidence can be helpful, eg pinboard style websites for creating mood boards, the final evidence must be converted to a suitable format for marking and moderation which cannot be lost/ deleted or amended after the end of the assessment period (eg screen prints, pdf files). Considerations around tracking authenticity and potential loss of material hosted on such platforms during assessment is the centre’s responsibility.

Where candidates have carried out some work as a group, the contribution of each candidate must be clear. It is not appropriate to submit identical information for each candidate without some way for the marker and moderator to mark the candidates individually.

Note: Combining candidates’ individual pieces of evidence into single files or zip files may make evidence management during internal marking more efficient and will greatly simplify the uploading of the moderation sample.

Where the minimum requirements have not been submitted for the moderation sample by the final moderation deadline, or the quality of evidence is insufficient to make a judgement, the moderation, and therefore any subsequent adjustment, will be based on the evidence that has been submitted. Where this is insufficient to provide a mark on moderation, a mark of zero may be given.

Preparation of candidates
Candidates should be aware of which aspects of their performance (across the AOs) will give them good marks in assessment. This is best carried out through routinely pointing out good or poor performance during the learning period, and through formative assessment.

During the learning programme, direct tutor instruction in how to tackle practical tasks through modelling, support, guidance and feedback are critical. However gradual removal of this support is necessary in preparation for summative assessment. This, supported approach is not valid for summative assessment.

The purpose of summative assessment is to confirm the standard the candidate has reached as a result of participating in the learning process. Candidates should be encouraged to do
the best they can and be made aware of the difference between these summative assessments and any formative assessments they have been subject to. Candidates may not have access to the full marking grids, as these may be misinterpreted as pass, merit distinction descriptors. Refer to the Technical qualifications – teaching, learning and assessment centre guidance document, available on the City & Guilds website for further information on preparing candidates for Technical qualification assessment.

Guidance on assessment conditions
The assessment conditions that are in place for this synoptic assignment are to:

- ensure the rigour of the assessment process
- provide fairness for candidates
- give confidence in the outcome.

They can be thought of as the rules that ensure that all candidates who take an assessment are being treated fairly, equally and in a manner that ensures their result reflects their true ability.

The conditions outlined below relate to this summative synoptic assignment. These do not affect any formative assessment work that takes place, although it is advised that candidates are prepared for the conditions they will need to work under during summative assessment.

The evidence for the tasks that make up this synoptic assignment must be completed under the specified conditions. This is to ensure authenticity and prevent malpractice as well as to assess and record candidate performance for assessment in the practical tasks. Any aspect that may be undertaken in unsupervised conditions is specified. It is the centre’s responsibility to ensure that local administration and oversight gives the tutor sufficient confidence to be able to confirm the authenticity of the candidate’s work.

Security and authentication of candidate work
Candidate evidence must be kept secure to prevent unsupervised access by the candidate or others. Where evidence is produced over a number of sessions, the tutor must ensure learners and others cannot access the evidence without supervision. This might include storing written work or artefacts in locked cupboards and collecting memory sticks of evidence produced electronically at the end of each session.

Candidates are required to sign declarations of authenticity, as is the tutor. The relevant form is included in this assignment pack and must be signed after the production of all evidence.

Where the candidate or tutor is unable to, or does not confirm authenticity through signing the declaration form, the work will not be accepted at moderation and a mark of zero will be given. If any question of authenticity arises eg at moderation, the centre may be contacted for justification of authentication.

Accessibility and fairness
Where a candidate has special requirements, tutors should refer to the Access arrangements and reasonable adjustments section of the City & Guilds website.

Tutors can support access where necessary by providing clarification to any candidate on the requirements or timings of any aspect of this synoptic assignment. Tutors should not provide more guidance than the candidate needs as this may impact on the candidate’s grade, see the guidance and feedback section below.
All candidates must be provided with an environment, time frame and resources that allows them reasonable access to the full range of marks available.

Where candidates have worked in groups to complete one or more tasks for this synoptic assessment, the tutor must ensure that no candidate is disadvantaged as a result of the performance of any other team member. If a team member is distracting or preventing another team member from fully demonstrating their skills or knowledge, the tutor must intervene.

**Guidance and feedback**

To support centre file management, tutors may specify a suitable file format and referencing format for evidence (unless otherwise specified eg if file naming is an assessment point for the assignment). Guidance must only support access to the assignment and must not provide feedback for improvement. The level and frequency of clarification & guidance must be

- recorded fully on the candidate record form (CRF),
- taken into account along with the candidate’s final evidence during marking
- made available for moderation.

Tutors **must not** provide feedback on the quality of the performance or how the quality of evidence can be improved. This would be classed as malpractice.

Tutors **should** however provide general reminders to candidates throughout the assessment period to check their work thoroughly before submitting it, and to be sure that they are happy with their final evidence as it may not be worked on further after submission.

Candidates can rework any evidence that has been produced for this synoptic assignment during the time allowed. However, this must be as a result of their own review and identification of weaknesses and not as a result of tutor feedback. Once the evidence has been submitted for assessment, no further amendments to evidence can be made.

Tutors **should** check and be aware of the candidates’ plans and designs to ensure management of time and resources is appropriate, and so any allowed intervention can take place at an appropriate time.

Tutors **should** ensure that candidates’ plans for completion of the tasks distribute the time available appropriately and may guide candidates on where they should be up to at any point in a general way. Any excessive time taken for any task should be recorded and should be taken into account during marking if appropriate.

It is up to the marker to decide if the guidance the candidate has required suggests they are lacking in any AO, the severity of the issue, and how to award marks on the basis of this full range of evidence. The marker must record where and how guidance has had an impact on the marks given, so this is available should queries arise at moderation or appeal.

**What is, and is not, an appropriate level of guidance**

- A tutor **should intervene with caution** if a candidate has taken a course of action that will result in them not being able to submit the full range of evidence for assessment. However, this should **only** take place once the tutor has prompted the candidate to check that they have covered all the requirements. Where the tutor has to be explicit as to what the issue is, this is likely to demonstrate a lack of understanding on the part of the candidate rather than a simple error, and full details should be recorded on the CRF.
• The tutor should not provide guidance if the candidate is thought to be able to correct the issue without it, and a prompt would suffice. In other words, only the minimum support the candidate actually needs should be given, since the more tutor guidance provided, the less of the candidate’s own performance is being demonstrated and therefore the larger the impact on the marks awarded.

• A tutor must not provide guidance that the candidate’s work is not at the required standard or how to improve their work. In this way, candidates are given the chance to identify and correct any errors on their own, providing valid evidence of knowledge and skills that will be credited during marking.

• The tutor must not produce any templates, pro-formas, work logs etc unless instructed to in the assignment guidance. Where instructed to do so, these materials must be produced as specified and contain no additional guidance. Templates provided as part of the assignment should be used as provided, and not adapted.

**All** specific prompts and details of the nature of any further guidance must be recorded on the relevant form and reviewed during marking and moderation.

**Guidance on marking**

Please refer to the *Technical qualifications – marking, and - moderation* centre guidance documents for further information on gathering evidence suitable for marking and moderation, and on using the marking grid and forms.

The candidate record form (CRF) is used to record:

• Details of any guidance or the level of prompting the candidate has received during the assessment period

• Rough notes bringing together relevant evidence from across tasks during marking.

• Summary justifications when holistically coming to an overall judgement of the mark.

The practical observation form (PO) is used to record:

• Descriptive information and evidence of candidate performance during an observation. Although descriptions of the quality of performance should support decisions against the AOs, the notes should follow the flow of the observation, rather than attempting to assign evidence against the AOs at this point.
### Marking grid
For any category, 0 marks may be awarded where there is no evidence of achievement

<tr>
<td></td>
<td>AO1 Recall of knowledge relating to the qualification LOs</td>
<td>Poor to limited</td>
<td>Fair to good</td>
<td>Strong to excellent</td>
</tr>
<tr>
<td></td>
<td>• Does the candidate seem to have the full breadth and depth of taught knowledge across the qualification to hand?</td>
<td>(1-2 marks) Recall shows some weaknesses in breadth and/or accuracy. Hesitant, gaps, inaccuracy</td>
<td>(3-4 marks) Recall is generally accurate and shows reasonable breadth. Inaccuracy and misunderstandings are infrequent and usually minor. Sound, minimal gaps</td>
<td>(5-6 marks) Consistently strong evidence of accurate and confident recall from the breadth of knowledge. Accurate, confident, complete, fluent</td>
</tr>
<tr>
<td></td>
<td>• How accurate is their knowledge? Are there any gaps or misunderstandings evident?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• How confident and secure does their knowledge seem?</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Examples of types of knowledge expected:** how to use tools, equipment and machinery, methods of work, practical techniques, Health and Safety, legislation, risk assessment, component terminology, how to set out, mark out, produce, assemble and finish. Joinery techniques and processes, inspection and maintenance of tools, use of PPE/safety aids and work piece support, selecting ironmongery, selecting profiles, select materials.

The candidate has demonstrated recall of knowledge, but it has been limited and/or showing inaccuracies.

The candidate has demonstrated recall of knowledge, which is mostly accurate.

The candidate shows in-depth and detailed knowledge, showing a higher degree of confidence and accuracy.
| % | Assessment Objective | Band 1 descriptor  
Poor to limited | Band 2 descriptor  
Fair to good | Band 3 descriptor  
Strong to excellent |
|---|----------------------|----------------------------------|----------------------------------|----------------------------------|
| 15 | AO2 Understanding of  
concepts theories and  
processes relating to the  
LOs  
• Does the candidate make  
connections and show  
causal links and explain  
why?  
• How well theories and  
concepts are applied to  
new situations/the  
assignment?  
• How well chosen are  
exemplars – how well do  
they illustrate the  
concept? | Some evidence of being able  
to give explanations of  
concepts and theories.  
Explanations appear to be  
recalled, simplistic or  
incomplete.  
Misunderstanding, illogical  
connections, guessing, (1-3 marks) | Explanations are logical.  
Showing comprehension and  
generally free from  
misunderstanding, but may  
lack depth or connections are  
incompletely explored.  
Logical, slightly disjointed,  
plausible, (4-6 marks) | Consistently strong evidence  
of clear causal links in  
explanations generated by the  
candidate. Candidate uses  
concepts and theories  
confidently in explaining  
decisions taken and  
application to new situations.  
Logical reasoning, thoughtful  
decisions, causal links, justified (7-9 marks) |

**Examples of understanding expected:** methods of work, links between Health and Safety legislation and planning activities, correct sequence of work and machining operations, interpretation of drawings/specifications, accuracy checks

Limited range of understanding of the tasks, drawings/specification not clearly interpreted or understood.  

Good understanding shown across the tasks, drawings/specifications interpreted mostly correctly  

In-depth understanding shown across the tasks, drawings/specifications interpreted correctly

<td>-------------------------------</td>
<td>-------------------------------------</td>
</tr>
</tbody>
</table>
| 20 | AO5 Attending to detail/perfecting  
  • Does the candidate routinely check on quality, finish etc and attend to imperfections/omissions  
  • How much is accuracy a result of persistent care and attention (eg measure twice cut once)?  
  • Would you describe the candidate as a perfectionist and wholly engaged in the subject? | (1-4 marks) Easily distracted or lack of checking. Insufficiently concerned by poor result; little attempt to improve. Gives up too early; focus may be on completion rather than quality of outcome. Careless, imprecise, flawed, uncharismatic, unfocussed, unobservant, unmotivated. | (5-8 marks) Aims for satisfactory result but may not persist beyond this. Uses feedback methods but perhaps not fully or consistently. Variable/intermittent attention, reasonably conscientious, some imperfections, unremarkable. | (9-12 marks) Alert, focussed on task. Attentive and persistently pursuing excellence. Using feedback to identify problems for correction. Noticing, checking, persistent, perfecting, refining, accurate, focus on quality, precision, refinement, faultless, meticulous. |

**Examples of attending to detail:** accurate setting out, marking out, component production, assembly and finish to specification/drawing.

- There is limited attention to detail. Task shows inaccuracies. Work may be incomplete and or work produced to a poor standard.
- There is good attention to detail. Task completed are generally accurate and to an adequate standard.
- The candidate has been focused on the tasks showing extreme care and accuracy completing the task to a high standard.
Practical Observation Form (PO)

Candidate Name:
Candidate Number:
Date:

Assessment ID:
Centre Number

The evidence section in this PO form should consist of comments/notes that are used to record the qualities and details of performance to inform marking and moderation against the AOs; what is the candidate doing? How well are they performing? - Describe the evidence.

The form signposts how particular AO’s are relevant to each task. These AO’s are not a definitive list therefore if evidence for other AO’s can be captured this should be recorded accordingly.

This PO form should not be used to assign marks per task as marks need to be applied holistically for each AO across all tasks within the assignment.

Use the Candidate Record Form (CRF) to record the final overview of the quality of performance and the overall marks for each AO.

This form should, along with all other candidate evidence, should be uploaded to the Moderation Portal if requested or as part of a sample.

See the Observation section above for details around the types of comments

Tolerances for Task 2

The following tolerances should be considered when marking the candidate’s work. See the Marking Grid for details around how many marks to allocate for meeting or not meeting tolerances.

Cleaned up and assembled door ready for a clear finish:
- finished sizes correct ±1 mm
- muntin central ±1 mm
- square and out of wind ±1 mm
- joint shoulders fitted tight, no gaps exceeding 0.5 mm
- gaps around tenons and haunches not exceeding 1 mm
- internal joint faces fitted snugly
- finished thickness of the door not less than 31 mm
### Candidate Record Form (CRF)

**Candidate Name:**

**Candidate Number:**

**Assessment ID:**

**Centre Number:**

**Total Mark:**

All evidence across the assignment must be considered together when recording the mark given for each AO. Justifications for the awarded marks must be recorded below.

<table>
<thead>
<tr>
