Level 2 Technical Certificate in Architectural Joinery (7906-21)

October 2017 Version 1.0

Guide to the examination
Who is this document for?

This document has been produced for centres who offer City & Guilds Level 2 Technical Certificate in Architectural Joinery. It gives all of the essential details of the qualification’s external assessment (exam) arrangements and has been produced to support the preparation of candidates to take the exam/s.

The document comprises three sections:

1. **Details of the exam.** This section gives details of the structure, length and timing of the exam.
2. **Content assessed by the exam.** This section gives a summary of the content that will be covered in each exam and information of how marks are allocated to the content.
3. **Guidance.** This section gives guidance on the types of questions included and examples of these
4. **Further information.** This section lists other sources of information about this qualification and City & Guilds Technical Qualifications.
1. Details of the exam

External assessment
City & Guilds Technical qualifications have been developed to meet national policy changes designed to raise the rigour and robustness of vocational qualifications. These changes are being made to ensure our qualifications can meet the needs of employers and Higher Education. One of these changes is for the qualifications to have an increased emphasis on external assessment. This is why you will see an external exam in each of our Technical qualifications.

An external assessment is an assessment that is set and/or marked by the awarding organisation (i.e. externally). All City and Guilds Technical qualifications include an externally set and marked exam. This must be taken at the same time by all candidates who are registered on a particular qualification. We produce an exam timetable each year. This specifies the date and time of the exam so you can plan your delivery, revision and room bookings/PC allocation in plenty of time.

The purpose of this exam is to provide assurance that all candidates achieving the qualification have gained sufficient knowledge and understanding from their programme of study and that they can independently recall and draw their knowledge and understanding together in an integrated way. Whilst this may not be new to you, it is essential that your learners are well prepared and that they have time to revise, reflect and prepare for these exams. We have produced a Teaching, Learning, and Assessment guide that is you should refer to alongside the present document (Teaching, Learning and Assessment Guide). If a learner does not pass the exam at their first attempt, there is only one opportunity to resit the exam, so preparation is essential.

Exam requirements of this qualification
This qualification has one pathway.

- **Architectural Joinery** – Theory exam (2 hours).

The exam is graded and a candidate must achieve at least a Pass grade in order to be awarded the qualification. (In addition to the exam, a synoptic assignment must also be completed and passed. You can find full details of the synoptic assignment in the Qualification Handbook and the Synoptic Assessment Guide - please see the link to the qualification page at the end of this document).

When does the exam take place?
This qualification involves a one-year programme of study. The exam is offered on two fixed dates in March or June. The exact dates will be published at the start of the academic year in the Assessments and Exam Timetable [http://www.cityandguilds.com/delivering-our-qualifications/exams-and-admin](http://www.cityandguilds.com/delivering-our-qualifications/exams-and-admin).

In order to effectively plan teaching and exam preparation, centres should know when the exam will be taking place and allocate teaching time accordingly. Section 2 of this document gives a summary of the content that needs to be covered in order to prepare learners for the exam and full details of this are given in the Qualification Handbook.
Form of exam
The exam for this qualification can be taken either on paper or online.

Can candidates resit the exam?
Candidates may resit the exam once only. If a candidate fails the exam both on the first attempt and when resiting it, that candidate has failed the qualification and cannot achieve it in that academic year.

How the exam is structured
Each exam has a total of 60 marks available.
Each exam is made up of 60 multiple choice questions:

- Knowledge questions – 30 questions
- Understanding questions – 18 questions
- Applied knowledge questions -12 questions

The Multiple choice questions are used to confirm breadth of knowledge and understanding.

The applied knowledge multiple choice questions are designed to allow candidates to demonstrate higher level and integrated understanding through, analysis, evaluation and synthesis of the subject. When assessing higher order skills through MC we are looking for candidates to be able to formulate and make a judgement.

These questions also ensures the exam can differentiate between those learners who are ‘just able’ and those who are higher achieving.

More details about and examples of question types are given in Section 3 of this document.

Assessment Objectives
The exams are based on the following set of assessment objectives (AOs). These are designed to allow the candidate’s responses to be assessed across the following three categories of performance:

- **Recollection** of knowledge.
- **Understanding** of concepts, theories and processes.
- **Applied knowledge** of knowledge and understanding.

In full, the assessment objectives covered by the exam for this qualification are:

<table>
<thead>
<tr>
<th>Assessment objective</th>
<th>Mark allocation (approx %)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>The candidate..</strong></td>
<td></td>
</tr>
<tr>
<td><strong>AO1</strong> <a href="#">Recalls knowledge</a> from across the breadth of the qualification</td>
<td>50%</td>
</tr>
<tr>
<td><strong>AO2</strong> <a href="#">Demonstrates understanding</a> of concepts, theories and processes from a</td>
<td>30%</td>
</tr>
<tr>
<td>range of learning outcomes.</td>
<td></td>
</tr>
</tbody>
</table>
AO4 Applies knowledge, understanding and skills from across the breadth of the qualification in an integrated and holistic way to achieve specified purposes.
Booking and taking the exam
All assessments for City & Guilds Technical Exams must be booked through Walled Garden. There is a deadline for booking exams, synoptic assessments and any other centre marked assessments, please refer to the time line to check these dates.
The exam must be taken under the supervision of an invigilator who is responsible for ensuring that it is conducted under controlled conditions. Full details of the conditions under which the exam must be taken can be found in the Joint Council for Qualifications (JCQ) document, *Instructions for Conducting Examinations (ICE)*.

Special consideration
Candidates who are unable to sit the exam owing to temporary injury, illness or other indisposition at the scheduled time may qualify for special consideration. This is a post-examination adjustment that can, in certain circumstances, be made to a candidate’s final grade. The Joint Council for Qualifications’ guide to the special consideration process can be found at [www.jcq.org.uk](http://www.jcq.org.uk).
To make a request for special consideration, please contact: [policy@cityandguilds.com](mailto:policy@cityandguilds.com)

Access arrangements
Access arrangements are arrangements that allow candidates with particular requirements, disabilities or temporary illness to take assessments, where appropriate, using their normal way of working. The Joint Council for Qualifications document, *Access Arrangements and Reasonable Adjustments* gives full details and can be downloaded [here](http://www.jcq.org.uk).
For further information and to apply for access arrangements please see:
[Access arrangements - When and how applications need to be made to City & Guilds](http://www.jcq.org.uk)
[Applying for access arrangements on the Walled Garden](http://www.jcq.org.uk)
2. Content assessed by the exam

Carpentry
The exam assesses:
- Unit 201: Principles of construction
- Unit 206: Planning and preparation for architectural joinery production
- Unit 207: Use of woodworking machinery

Each exam assesses a sample of the content of these units. This means that a single exam will not cover 100% of the unit content. The full range of content will be assessed over a number of examination series. Details of the coverage of a particular exam paper will not be released in advance of the exam itself. Centres should not make assumptions about what will be assessed by a particular exam based on what has been covered on previous occasions. In order to be fully prepared for the exam, learners must be ready to answer questions on any of the content outlined below.

The table below provides an overview of how the qualification’s Learning Outcomes are covered by each exam and the number of questions available per Learning Outcome (each question is worth 1 mark). In preparing candidates for the exam, we recommend that centres take note of the number of questions allocated to Learning Outcomes and to assign teaching and preparation time accordingly.

In preparing candidates for the exam, centres should refer to the Qualification Handbook which gives full details of each Learning Outcome. The following is a summary of only that qualification content which is assessed by the exam and not a summary of the full content of the qualification.

<table>
<thead>
<tr>
<th>Unit</th>
<th>Learning outcome</th>
<th>Topics</th>
<th>Number of Marks/Questions</th>

</tbody>
</table>
* Integration across units. These questions relate to Assessment Objective 4). These questions are designed to demonstrate how well a candidate has applied their knowledge, understanding and skills from across the units that make up the qualification to meet the requirements of the exam questions. These question is also designed to differentiate between levels of performance by candidates taking the exam.
3. Guidance

Question types
The following explains, and gives examples of, types of questions used in City & Guilds Technical exams. In preparing candidates to take the exam, it is recommended that you familiarise them with the requirements of each question type so that they can be effective and make best use of the time available when sitting the exam.

- An effective candidate will gauge the type and length of each type of multiple choice question.
- Candidates should read the exam paper instruction before attempting to answer the questions and should allocate time proportionate to each type of question.

<table>
<thead>
<tr>
<th>Question type:</th>
<th>Example question:</th>
<th>Mark Scheme</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multiple Choice questions (MCQs)</td>
<td>These are objective questions with a predetermined answer. These consist of a question (or stem) and four options. The candidate should select the correct option (the key). The other 3 options (the distractors) will be plausible but incorrect in some significant respect so that the candidate is required to consider and reject these in order to identify the correct option.</td>
<td></td>
</tr>
</tbody>
</table>

These questions are split into three section

- Knowledge questions
- Understanding questions
- Applied knowledge questions
<table>
<thead>
<tr>
<th>Knowledge questions MCQs</th>
<th>What is the face of a brick called?</th>
<th>Correct answer: D</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>b. Header.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>c. Perpend.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>d. Stretcher.</td>
<td></td>

</tbody>
</table>

<table>
<thead>
<tr>
<th>Understanding questions MCQs</th>
<th>Why should a schedule be used when programming works?</th>
<th>Correct answer: C</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>a. To provide details of the costs of materials and services needed to complete works.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>b. To manage the expected and actual timescales for completion of works.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>c. To communicate the amount of significant work and materials needed to complete works.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>d. To calculate the estimated labour costs of completing the works.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Applied knowledge questions MCQs</th>
<th>You have been asked to make 3 bespoke door linings for a client who is currently having an extension built. The finished size of the material is 22 mm x 245 mm. The client wishes to use timber from a very large old oak tree that recently fell down in the garden. The tree is 700 mm in diameter, and</th>
<th>Correct answer: C</th>
</tr>
</thead>
<tbody>
<tr>
<td>The purpose of such questions is to stretch candidates who are able to and assess them on their higher order thinking skills such as analysis, evaluation and synthesis. When assessing higher order skills through MC we are looking for candidates to be able to formulate and make a judgement.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
there is access to a local sawmill to cut the trunk into the required sawn sizes. What is the best advice you could give to the client?

a. Ensure the timber is cut quarter sawn to ensure the best figure in the timber.
b. Be careful when cutting as the centre of the tree may be unusable due to rot and there may well be a lot of waste.
c. Not to use the tree as the timber will be green and unsuitable for joinery.
d. Wide timber is more likely to cup and the thickness of the lining should be increased.
Examination technique
Candidates with a good understanding of the subject being assessed can often lose marks in exams because they lack experience or confidence in exams or awareness of how to maximise the time available to get the most out of the exam. Here is some suggested guidance for areas that could be covered in advance to help learners improve exam performance.

Before the exam
Although candidates cannot pre-determine the questions they will get in the multiple choice exams, the Technical qualifications do follow a common structure and format. In advance of taking the exam, candidates should:
- be familiar with the structure of the exam (ie number and type of questions).
- be aware of the amount of time they have in total to complete the exam.
- have a plan, based on the exam start and finish time for how long to spend on each question/section of the exam.
- be aware of how many questions are available for each sections

At the start of the exam session
At the start of the exam, candidates:
- should carefully read through the instruction at the beginning of the exam paper before answering any questions.

Answering the questions
Candidates do not have to answer exam questions in any particular order. They may find it helpful to consider, for example:
- tackling first those questions which they find easiest. This should help them get into the ‘flow’ of the exam and help confidence by building up marks quickly and at the start of the exam.

Candidates should always attempt every question, even questions where they may be less confident about the answer they are selecting. Candidates should be discouraged however, from spending too long on any question they are less sure about, this could result in candidates having less time to answer questions that they are better prepared to answer.

Applied knowledge questions
The purpose of such questions is to stretch candidates who are able to and assess them on their higher order thinking skills such as analysis, evaluation and synthesis. When assessing higher order skills through MC we are looking for candidates to be able to formulate and make a judgement.

Candidates may find it helpful to read through the scenario, where applicable, and identify key information in the scenario. This will help them to analysis and evaluate the distractors to make a correct selection.

Towards the end of the exam
Candidates should always set aside time at the end of the exam to review their responses in order to make sure they are confident in their selection, i.e., their chosen answer.

Further guidance on preparing candidates to take the exam is given in the City & Guilds publication, *Technical Qualifications, Teaching, Learning and Assessment* which can be downloaded free of charge from City & Guilds website.
4. Further information
For further information to support delivery and exam preparation for this qualification, centres should see:
