General guidance for candidates

General guidance
This is a formal assessment that you will be marked and graded on. You will be marked on the quality and accuracy of your practical performance and any written work you produce. It is therefore important that you carry your work out to the highest standard you can. You should show how well you know and understand the subject and how you are able to use your knowledge and skills together to complete the tasks.

Plagiarism
This is an assessment of your abilities, so the work must be all your own work and carried out under the conditions stated. You will be asked to sign a declaration that you have not had any outside help with the assessment.

Your tutor is allowed to give you some help understanding the assignment instructions, if necessary, but they will record any other guidance you need and this will be taken into account when marking.

Plagiarism is the failure to acknowledge sources properly and/or the submission of another person’s work as if it were your own. Plagiarism is not allowed in this assignment.

Where research is allowed, your tutor must be able to identify which work you have done yourself, and what you have found from other sources. It is therefore important to make sure you acknowledge all sources and clearly reference any information taken from them.

Timings and planning
Where you have to plan your time, you should take care to make sure you have divided the time available between tasks appropriately. In some assignments, there are specified timings which cannot be changed and which need to be taken into account. You should check your plan is appropriate with your tutor.

If you have a good reason for needing more time, you will need to explain the reasons to your tutor and agree a new deadline date. Changes to dates will be at the discretion of the tutor, and they may not mark work that is handed in after the agreed deadlines.

Health and Safety
You must always work safely, in particular while you are carrying out practical tasks.

You must always follow any relevant Health and Safety regulations and codes of practice.

If your tutor sees you working in a way that is unsafe for yourself or others, they will ask you to stop immediately, and tell you why. Your tutor will not be able to reassess you until they are sure you are ready for assessment and can work safely.

Presentations of work
Presentation of work must be neat and appropriate to the task.

You should make sure that each piece of evidence including any pro formas eg record/job cards are clearly labelled with your name and the assignment reference.

All electronic files must be given a clear file name that allows your tutor to identify it as your work.

Written work eg reports may be word processed but this is not a requirement.

All sketches and drawings should be neat and tidy, to scale and annotated. Calculations should be set out clearly, with all working shown, together with any assumptions made. You should use appropriate units at all times and answers must be expressed to a degree of accuracy, consistent with the requirements of the task.
Assignment Brief

You have been asked to carry out some work for a client.

The client has problems with some external double doors providing rear access to a shop in the middle of a town. The doors have overhead door closers and are rebated together at the meeting stiles. The doors often close in the wrong order and bang loudly when closing.

An out-building to the rear of the shop is in need of a replacement roof as the wall plates and rafter feet have become rotten. The roof span is 4 m and the building is 6 m long. The roof pitch is 30°.
The client wishes to gain some headroom in the building, with an increased ceiling height of 200 mm above wall plate height. You have been asked by the client to suggest a suitable roof construction design allowing for this requirement.

You have also been asked to fit the quarter turn winder stair in Figure 1 (not fitting balustrading) which will provide access to living accommodation above the shop. The lower two winders have been sent loose for assembly on site. On delivery it was found that the middle winder was lost in transit.
You are required to make a replacement winder before fitting the stairs.

On completion of the work you are required to self-evaluate your performance to include:

- what went well
- what didn’t go so well
- what you would do differently in future
Tasks

Task 1
1a Research options and prepare a report with your recommendation for rectifying the issues with the double doors.
1b Research options and prepare a sketch of the roof design required for the outbuilding.

Conditions of assessment:
This is an open book task. All work must be completed working on your own, under supervised conditions.

What must be presented for marking and submitted for moderation:
• completed report for 1a with your recommendation for rectifying the issues with the double doors
• completed sketch of roof design

Task 2
Set out and make the replacement winder

Conditions of assessment:
All work must be completed working on your own, under supervised conditions.
You must work safely at all times. If you do not then the assessment will be stopped.

What must be presented for marking and submitted for moderation:
• Completed replacement winder

Additional evidence of your performance that must be captured for marking and submitted for moderation (if applicable):
• your tutor’s notes, recorded on a Practical Observation form, of your working practice describing the quality, consistency and accuracy of the finished work
• photographs taken by your assessor of your replacement winder

Task 3
3 Fix the staircase

Conditions of assessment:
The fitting of the winders must be completed working on your own, under supervised conditions.

You must work safely at all times. If you do not then the assessment will be stopped.

What you must produce for marking and submitted for moderation:
• completed fitted staircase
Additional evidence of your performance that must be captured for marking and submitted for moderation (if applicable):

- your tutor’s notes, recorded on a Practical Observation form, of your working practice describing the quality, consistency and accuracy of the finished work
- photographs taken by your assessor of the completed fitted staircase

Task 4
4 Complete a self-evaluation

Conditions of assessment:
The evidence for task 4 must be completed on your own, under supervised conditions.

What must be presented for marking and submitted for moderation:

- completed self-evaluation (approximately 500 words)
Task instructions for centres

Resources
Candidates must have access to a suitable range of resources to carry out the tasks. Centres should provide a ready-made (but unassembled and “flat-packed”) stair trimmer.

The stairs are to be fixed to a pre-installed trimmer against a wall. Centres may use a staircase with pre-assembled flights.

Stairs (minimum two flights, of at least 3 treads each, with minimum width 600 mm), not including top and bottom riser, winders/tapered treads and newels.

The top newel is to be marked out and notched by the candidate. This can be a replaceable piece but must be as shown in the drawing. The replaceable section of newel is to be of such thickness as to ensure the candidate will cut out the correct size piece of timber to allow notching over trimmer rather than just cut out the same piece as the candidate before.

The wall string must be marked out and cut by the candidate. The string ends can be replaceable and centres may use their discretion as to the method of changing the section of string, providing that candidates do their own marking out and cutting. Any previous work must be removed prior to the assessment and disposed of securely so that the candidate cannot use it as a template for their own work.

Tapered treads/winders supplied loose except for the one to be replaced. Winder glue blocks omitted for the purposes of this assessment, winder risers to be screwed to the back of the treads. A new set of risers should be supplied to each candidate for use with the winders.

The replacement winders is to be layout, cut to shape and profiled by each candidate, without use of a centre supplied template.

Candidates can request assistance when lifting the stairs, this person must not give guidance to the candidate.

Task specific guidance
Task 4
The candidate’s self-evaluation of performance across all task must be completed no more than one week after completion of the practical assessment. Candidates should not complete the self-evaluation on the same day as the practical assessment as this will give candidates time to reflect.

The candidate can either provide a typed or hand-written evaluation. The candidate should have access to adequate resources to complete this task. A self-evaluation pro-forma has been provided in the recording form document.

A practical Observation (PO) form must be completed and photographs must be taken in order to support assessment decisions for the candidates marked work. See details below around requirements for observations and photographs.
**Guidance on photographs**
Photographs must be of sufficient resolution and full frame to verify the quality of the completed work.

It is expected that 5 photographs will be submitted per candidate. These photographs should be used to support the observation recorded upon the Practical Observation Sheet.

**Task 2**
One photograph of the replacement winder

**Task 3**
Four photographs should be taken

- One of the notching over the trimmer
- One of the wall string to the finish floor level
- One showing the fit of the replacement winder

The final photograph of the overall fitted stairs should include the candidate and a sign that gives the name of the candidate and the date of the assessment so that photographs can be differentiated.

**Total 10 hours.**

**Task 1** – Time spent on task 1 is not included in the 10 hours

**Task 2** – 3 hour (recommended)

**Task 3** – 7 hour (recommended)

**Task 4** – 1 hour (recommended) The time taken to complete the work for task 4 is not included in the ten hours.
Centre guidance

Guidance provided in this document supports the administration of this assignment. The following documents available on the City & Guilds website provide essential generic guidance for centres delivering Technical qualifications and must be referred to alongside this guidance:

- Technical qualifications – marking
- Technical qualifications – moderation (updated annually)
- Technical qualifications – teaching, learning and assessment

This synoptic assessment is designed to require the candidate to make use of their knowledge, understanding and skills they have built up over the course of their learning to tackle problems/tasks/challenges.

This approach to assessment emphasises to candidates the importance and applicability of the full range of their learning to practice in their industry area, and support them in learning to take responsibility for transferring their knowledge, understanding and skills to the practical situation, fostering independence, autonomy and confidence.

Candidates are provided with an assignment brief. They then have to draw on their knowledge and skills and independently select the correct processes, skills, materials, and approaches to take to provide the evidence specified by the brief.

During the learning programme, it is expected that tutors will have taken the opportunity to set shorter, formative tasks that allow candidates to be supported to independently use the learning they have so far covered, drawing this together in a similar way, so they are familiar with the format, conditions and expectations of the synoptic assessment.

Candidates should be made aware during marking what the Assessment Objectives are and how they are implemented in marking the assignment, so they will understand the level of performance that will achieve them high marks.

Candidates should not be entered for the assessment until the end of the course of learning for the qualification so they are in a position to complete the assignment successfully.

Health and safety
Candidates should not be entered for assessment without being clear of the importance of working safely and practice of doing so. The tutor must immediately stop an assessment if a candidate works unsafely. At the discretion of the tutor, depending on the severity of the incident, the candidate may be given a warning. If they continue to work unsafely however, their assessment must be ended and they must retake the assessment at a later date.

Compliance with timings
The timings provided are estimates to support centre planning. They refer to assessment time, not any additional setting up the centre needs to carry out to create the required to ensure an appropriate assessment environment.

It is the centre’s responsibility to plan sufficient assessment sessions, under the appropriate conditions, within the assignment window, to allow candidates reasonable time to complete the assessment tasks.

Where candidates are required to plan their work they should have their plans confirmed for appropriateness in relation to the time allocated for each task.
Candidates should be allowed sufficient time to fully demonstrate the range of their skills, however this also needs to be reasonable and practicable. Candidates should be allowed to overrun their planned timings or professional service times (where they exist) in order for evidence of a range of their skills to be captured. If however, the time required exceeds reasonably set assessment periods, or the tolerance suggested for professional service times, the centre may stop the assessment and base the marking on the evidence up to that point, including the tutor’s notes of how far over time the task has taken.

**Observation evidence**

Where the tutor is required to carry out observation of performance, detailed, descriptive notes must be recorded on the practical observation (PO) form provided. The centre has flexibility to adapt the form, to suit local requirements (eg to use tablet, hand-written formats, or to ease local administration) as long as this does not change or restrict the type of evidence collected.

The number of candidates a tutor will be able to observe at one time will vary depending on:

- the complexity of evidence collection for the task
- local conditions eg layout of the assessment environment
- amount of additional support available (eg to capture image/video evidence), staggered starts etc,
- whether there are any peak times where there is a lot of evidence to collect that will need additional support or any that are quiet.

It is advisable to trial the planned arrangements where possible during formative assessment, reviewing the quality of evidence captured and manageability. It is expected that for straight forward observations, (and unless otherwise specified) no more than eight candidates will be observed by a single tutor at one time, and the number will usually be fewer than this maximum. The key factor to consider is the logistics of collecting sufficient evidence.

As far as possible, candidates should not be distracted, or their performance affected by the process of observation and evidence collection.

Observation notes form part of the candidate’s evidence and must describe how well the activity has been carried out, rather than stating the steps/actions the candidate has taken. The notes must be descriptive and focus on the **quality** of the performance in such a way that comparison between performances can be made. They must provide sufficient, appropriate evidence that can be used by the marker (and moderator) to mark the performance using the marking grid.

Identifying **what** it is about the performances that is different between candidates can clarify the qualities that are important to record. Each candidate is likely to carry out the same steps, so a checklist of this information would not help differentiate between them. However qualitative comments on how well they do it, and quantitative records of accuracy and tolerances would.

The tutor should refer to the marking grid to ensure appropriate aspects of performance are recorded. These notes will be used for marking and moderation purposes and so must be detailed, accurate and differentiating.

Tutors should ensure that any required additional supporting evidence including eg photographs or video can be easily matched to the correct candidate, are clear, well-lit and showing the areas of particular interest in sufficient detail and clarity for assessment (ie...
taken at appropriate points in production, showing accuracy of measurements where appropriate).

If candidates are required to work as a team, each candidate’s contribution must be noted separately. The tutor may intervene if any individual candidate’s contribution is unclear or to ensure fair access (see below).

The Technical qualifications guides on marking and moderation are essential guidance documents and are available on the City & Guilds website. These provide further information on preparing for assessment, evidence gathering, standardisation, marking and moderation, and must be referred to when planning and carrying out assessment.

Minimum evidence requirements for marking and moderation
The sections in the assignment:

- What you must produce for marking, and
- Additional evidence of your performance that must be captured in marking
list the minimum requirements of evidence to be submitted for marking in the moderation sample.

Evidence produced during assessment above and beyond this may be submitted, as long as it provides useful information for marking and moderation and has been produced under appropriate conditions.

While technological methods which support the capturing or creating of evidence can be helpful, eg pinboard style websites for creating mood boards, the final evidence must be converted to a suitable format for marking and moderation which cannot be lost/ deleted or amended after the end of the assessment period (eg screen prints, pdf files). Considerations around tracking authenticity and potential loss of material hosted on such platforms during assessment is the centre’s responsibility.

Where candidates have carried out some work as a group, the contribution of each candidate must be clear. It is not appropriate to submit identical information for each candidate without some way for the marker and moderator to mark the candidates individually.

Note: Combining candidate’s individual pieces of evidence into single files or zip files may make evidence management during internal marking more efficient and will greatly simplify the uploading of the moderation sample.

Where the minimum requirements have not been submitted for the moderation sample by the final moderation deadline, or the quality of evidence is insufficient to make a judgement, the moderation, and therefore any subsequent adjustment, will be based on the evidence that has been submitted. Where this is insufficient to provide a mark on moderation, a mark of zero may be given.

Preparation of candidates
Candidates should be aware of which aspects of their performance (across the AOs) will give them good marks in assessment. This is best carried out through routinely pointing out good or poor performance during the learning period, and through formative assessment.

During the learning programme, direct tutor instruction in how to tackle practical tasks through modelling, support, guidance and feedback are critical. However gradual removal of this support is necessary in preparation for summative assessment. This, supported approach is not valid for summative assessment.

The purpose of summative assessment is to confirm the standard the candidate has reached as a result of participating in the learning process. Candidates should be encouraged to do
the best they can and be made aware of the difference between these summative assessments and any formative assessments they have been subject to. Candidates may not have access to the full marking grids, as these may be misinterpreted as pass, merit distinction descriptors. Refer to the Technical qualifications – teaching, learning and assessment centre guidance document, available on the City & Guilds website for further information on preparing candidates for Technical qualification assessment.

**Guidance on assessment conditions**
The assessment conditions that are in place for this synoptic assignment are to:

- ensure the rigour of the assessment process
- provide fairness for candidates
- give confidence in the outcome.

They can be thought of as the rules that ensure that all candidates who take an assessment are being treated fairly, equally and in a manner that ensures their result reflects their true ability.

The conditions outlined below relate to this summative synoptic assignment. These do not affect any formative assessment work that takes place, although it is advised that candidates are prepared for the conditions they will need to work under being summative assessment.

The evidence for the tasks that make up this synoptic assignment must be completed under the specified conditions. This is to ensure authenticity and prevent malpractice as well as to assess and record candidate performance for assessment in the practical tasks. Any aspect that may be undertaken in unsupervised conditions is specified. It is the centre’s responsibility to ensure that local administration and oversight gives the tutor sufficient confidence to be able to confirm the authenticity of the candidate’s work.

**Security and authentication of candidate work**
Candidate evidence must be kept secure to prevent unsupervised access by the candidate or others. Where evidence is produced over a number of sessions, the tutor must ensure learners and others cannot access the evidence without supervision. This might include storing written work or artefacts in locked cupboards and collecting memory sticks of evidence produced electronically at the end of each session.

Candidates are required to sign declarations of authenticity, as is the tutor. The relevant form is included in this assignment pack and must be signed after the production of all evidence.

Where the candidate or tutor is unable to, or does not confirm authenticity through signing the declaration form, the work will not be accepted at moderation and a mark of zero will be given. If any question of authenticity arises eg at moderation, the centre must be contacted for justification of authentication.

**Accessibility and fairness**
Where a candidate has special requirements, tutors should refer to the Access arrangements and reasonable adjustments section of the City & Guilds website.

Tutors can support access where necessary by providing clarification to any candidate on the requirements or timings of any aspect of this synoptic assignment. Tutors should not provide more guidance than the candidate needs as this may impact on the candidate’s grade, see the guidance and feedback section below.
All candidates must be provided with an environment, time frame and resources that allows them reasonable access to the full range of marks available.

Where candidates have worked in groups to complete one or more tasks for this synoptic assessment, the tutor must ensure that no candidate is disadvantaged as a result of the performance of any other team member. If a team member is distracting or preventing another team member from fully demonstrating their skills or knowledge, the tutor must intervene.

**Guidance and feedback**

To support centre file management, tutors may specify a suitable file format and referencing format for evidence (unless otherwise specified eg if file naming is an assessment part of the assignment). Guidance must only support access to the assignment and must not provide feedback for improvement. The level and frequency of clarification & evidence must be:

- recorded fully on the candidate record form (CRF),
- taken into account along with the candidate’s final evidence during marking
- made available for moderation.

Tutors **must not** provide feedback on the quality of the performance or how the quality of evidence can be improved. This would be classed as malpractice.

Tutors **should** however provide general reminders to candidates throughout the assessment period to check their work thoroughly before submitting it, and to be sure that they are happy with their final evidence as it may not be worked on further after submission.

Candidates can rework any evidence that has been produced for this synoptic assignment during the time allowed. However, this must be as a result of their own review and identification of weaknesses and not as a result of tutor feedback. Once the evidence has been submitted for assessment, no further amendments to evidence can be made.

Tutors **should** check and be aware of the candidates’ plans and designs to ensure management of time and resources is appropriate, and so any allowed intervention can take place at an appropriate time.

Tutors **should** ensure that candidates’ plans for completion of the tasks distribute the time available appropriately and may guide candidates on where they should be up to at any point in a generated. Any excessive time taken for any task should be recorded and should be taken into account during marking if appropriate.

It is up to the marker to decide if the guidance the candidate has required suggests they are lacking in one AO, the severity of the issue, and how to award marks on the basis of this full range of evidence. The marker must record where and how guidance has had an impact on the marks given, so this is available should queries arise at moderation or appeal.

**What is, and is not, an appropriate level of guidance**

- A tutor **should intervene with caution** if a candidate has taken a course of action that will result in them not being able to submit the full range of evidence for assessment. However, this should **only** take place once the tutor has prompted the candidate to check that they have covered all the requirements. Where the tutor has to be explicit as to what the issue is, this is likely to demonstrate a lack of understanding on the part of the candidate rather than a simple error, and full details should be recorded on the CRF.
• The tutor **should not** provide guidance if the candidate is thought to be able to correct the issue without it, and a prompt would suffice. In other words, only the minimum support the candidate actually needs should be given, since the more tutor guidance provided, the less of the candidate’s own performance is being demonstrated and therefore the larger the impact on the marks awarded.

• A tutor **must not** provide guidance that the candidate’s work is not at the required standard or how to improve their work. In this way, candidates are given the chance to identify and correct any errors on their own, providing valid evidence of knowledge and skills that will be credited during marking.

• The tutor **must not** produce any templates, pro-formas, work logs etc unless instructed to in the assignment guidance. Where instructed to do so, these materials must be produced as specified and contain no additional guidance. Templates provided as part of the assignment should be used as provided, and not adapted.

All specific prompts and details of the nature of any further guidance must be recorded on the relevant form and reviewed during marking and moderation.

**Guidance on marking**

Please refer to the *Technical qualifications – marking, and moderation* centre guidance documents for further information on gathering evidence suitable for marking and moderation, and on using the marking grid and forms.

The candidate record form (CRF) is used to record:

• Details of any guidance or the level of prompting the candidate has received during the assessment period
• Rough notes bringing together relevant evidence from across tasks during marking.
• Summary justifications when historically coming to an overall judgement of the mark.

The practical observation form (POF) is used to record:

• Descriptive information and evidence of candidate performance during an observation. Although descriptions of the quality of performance should support decisions against the AOs, the notes should follow the flow of the observation, rather than attempting to assign evidence against the AOs at this point.
### Marking grid
For any category, 0 marks may be awarded where there is no evidence of achievement.
