a) staff benefits
b) welfare issues
c) safety issues
d) career opportunities.

Response: 

What type of roof is shown in Figure 2?

a) Single.
b) Couple.
c) Bowstring.
d) Couple close.

Response: 

Figure 1

Figure 2
6. What component fixed to the top edge of rafters will reduce the roof pitch at the eaves?
   a) Tilt fillet.
   b) Sprocket piece.
   c) Angle tie.
   d) Saddle board

   **Response:** ____________________________
7 a) State one Regulation that applies to safe working in the construction industry. (1 mark)

b) Identify one part of the building regulations and what it controls (2 marks)

8 Compare polyisocyanurate (PIR) with fibreglass when used for insulation purposes. (5 marks)

9 Identify three factors that cause deterioration to timber. (3 marks)

10 Explain factors that would inform the decision making process as to whether to replace or repair damaged timber components. (5 marks)

11 Name two sources of information that provides advice and guidance on safe working practices when using woodworking machinery. (2 marks)
12 Explain why training is essential prior to using woodworking machines (3 marks)

13 A client has bought an old house which has suffered from a lack of maintenance and repair. On entering the hall way there is strong damp musty odour, upon investigation it is found that, in one of the ground floor rooms, there is damage to the skirting. The skirting and adjacent floor boards display cuboidal cracking and is unstable. You have been asked to carry out remedial works. Discuss the likely causes of this decay and what actions should be taken to complete the remedial works (12 marks)
