About City & Guilds

City & Guilds is the UK's leading provider of vocational qualifications, offering over 500 awards across a wide range of industries, and progressing from entry level to the highest levels of professional achievement. With over 8500 centres in 100 countries, City & Guilds is recognised by employers worldwide for providing qualifications that offer proof of the skills they need to get the job done.

City & Guilds Group

The City & Guilds Group includes City & Guilds, ILM (the Institute of Leadership & Management) which provides management qualifications, learning materials and membership services, NPTC which offers land-based qualifications and membership services, and HAB (the Hospitality Awarding Body). City & Guilds also manages the Engineering Council Examinations on behalf of the Engineering Council.

Equal opportunities

City & Guilds fully supports the principle of equal opportunities and we are committed to satisfying this principle in all our activities and published material. A copy of our equal opportunities policy statement is available on the City & Guilds website.

Copyright

The content of this document is, unless otherwise indicated, © The City and Guilds of London Institute 2007 and may not be copied, reproduced or distributed without prior written consent.

However, approved City & Guilds centres and learners studying for City & Guilds qualifications may photocopy this document free of charge and/or include a locked PDF version of it on centre intranets on the following conditions:

- centre staff may copy the material only for the purpose of teaching learners working towards a City & Guilds qualification, or for internal administration purposes
- learners may copy the material only for their own use when working towards a City & Guilds qualification

The *Standard Copying Conditions* on the City & Guilds website also apply.

Please note: National Occupational Standards are not © The City and Guilds of London Institute. Please check the conditions upon which they may be copied with the relevant Sector Skills Council.

Publications

City & Guilds publications are available on the City & Guilds website or from our Publications Sales department at the address below or by telephoning +44 (0)20 7294 2850 or faxing +44 (0)20 7294 3387.

Every effort has been made to ensure that the information contained in this publication is true and correct at the time of going to press. However, City & Guilds' products and services are subject to continuous development and improvement and the right is reserved to change products and services from time to time. City & Guilds cannot accept liability for loss or damage arising from the use of information in this publication.

Introduction: City & Guilds Level 3 Diploma in Design and Craft

Welcome to the Design and Craft suite of qualifications.

This handbook is designed to provide you with the information you require for this course.

You will find a copy of the syllabus you are undertaking, presented as two units.

Unit 1 – Research for Design is a common unit for all qualifications at this level. It provides the means to develop an advanced visual study to inspire design work at this level.

Unit 2 – Craft is a specific craft unit for the subject you have chosen to study. The syllabus gives details of what you have to produce as evidence that you have achieved the outcomes listed.

You will explore the craft at depth, gain advanced skills in the practice of the craft and a thorough knowledge of materials, techniques and processes applicable to this level of work.

At the end of each unit, there is an assessment record sheet to be completed by your tutor/assessor, in discussion with you, as you achieve each of the outcomes.

In addition to this, your tutor/assessor will keep other records of your progress which you can see, as required.

Your tutor/assessor is the person who makes ongoing decisions about your achievement.

Each City & Guilds centre is also required to have an Internal Verifier who checks a sample of the work of each candidate to ensure that it has been correctly assessed and that records show a clear route to progression.

A City & Guilds External Verifier is allocated to your centre to monitor that all these activities are carried out in accordance with the regulations, laid down nationally, for these qualifications.

As a student of your centre and a candidate of City & Guilds, you too have responsibilities. They include regular and timely attendance, following the syllabus guidelines and presenting your work, as required, for assessment, internal and external verification.

The Design and Craft suite of qualifications is a series through which a candidate can progress as a craftsman or take the level best suited to their skills and requirements.

All skills and supporting knowledge gained, at this level, can be used in their own right or can form a foundation for the Higher Level of qualification.

Unit 1 Design for craft

Overview

Unit rationale

Note: All items presented for assessment must be original work, designed and produced by the candidate.

Aims

The aim of this unit is to produce an advanced visual design study, reference showing detailed, in-depth research and exploration into a topic for the inspiration of design work in any craft.

The unit will assess the candidate's ability to use a range of research methods to explore the topic. The candidate will use variety of materials and mediums to develop an advanced visual study using the topic as inspiration. The work will be based on highly personal approach, in order to continue and enhance the development of contextual studies within the design process.

Candidates will evaluate the completed work, processes and techniques used, to inform future work.

Outcomes

There are **six** outcomes for this unit. The candidate will be able to:

- 1 select a major theme for inspiration, and an area of focus within it, when planning the research
- 2 identify, retrieve, select and extract relevant contextual information from a variety of sources
- 3 use a range of materials, mediums and techniques to explore and produce visual ideas
- 4 produce and present the body of work in a logical, organised and appropriate form
- 5 handle materials, tools and equipment safely and effectively
- 6 appreciate the application of specific design development studies to the craft.

Connections with other qualifications

The 7923 Level 3 Diploma in Design and Craft, is designed to be a progression from the 7716 Level 1, 7716 Level 2 and 7716 Level 3 Certificates in Design and Craft qualifications.

It can also lead on to the 4440 Level 4 Higher Professional Diploma in Creative Arts.

Assessment

The six outcomes for this unit will be assessed using evidence from practical activities, which take the form of:

- practical exercise designed to assess the skills of the candidate in producing a body of detailed design development work based upon one theme
- a notebook/folder of work consisting of planning, evaluation and the underpinning knowledge to support the practical activities.

Candidates will select a theme and prepare a portfolio of design work consisting of exploratory studies and resolved ideas.

Candidates will choose an area of the main theme upon which to focus.

Throughout this work, candidates will use the design elements – colour, texture, line, shape and form and the design principles – balance, rhythm, contrast and dominance, harmony, scale and proportion.

Candidates will produce the following:

A major body of work of visual research based upon a selected theme.

The body of work will contain:

- a brief written introduction, indicating the reason for selecting the initial theme and area of focus
- a plan for the research activity, including a timescale visual records of inspirational material
- visual records of experimental ideas based upon the research
- a written bibliography and catalogue of research resources relevant to the theme
- a written evaluation of not more than 750 words, summarising the outcome of the Research for Design.

The candidate may select a theme of personal interest as this will allow for a wide exploration of sources readily available to them.

Candidate name

Assessment record year

Qualification

Qualification number

Outcome 1 Select a major theme for inspiration, and an area of focus within it, when planning the research		Evidence	Tutor/Assessor sign and date
Practical Activities	1 Review a range of themes appropriate for visual research.		
	2 Select a theme and area of focus for the research.		
	3 Plan the research activity and set a completion date.		
	4 Explore and understand the use of primary sources (direct observation of the actual objects) and secondary sources (books, photographs, websites)... for the selected theme.		
Underpinning Knowledge	1 List reasons for the selection of the theme and area of focus for the research.		
	2 List the range of primary and secondary sources of inspiration, readily available for the selected theme.		
Outcome 2 Identify, retrieve, select and extract relevant contextual information from a variety of sources		Evidence	Tutor/Assessor sign and date
Practical Activities	1 Identify sources of contextual information relevant to the selected theme – contemporary, historical and cultural.		
	2 Select, retrieve and extract materials relevant to the selected theme.		
Underpinning Knowledge	1 Compile a bibliography and catalogue of research sources relating to specific information appropriate to the theme.		

	2 Record museums, resource centres, galleries, libraries, exhibitions, electronic information systems and websites.		
	3 Record research at museums, resource centres, galleries, libraries, exhibitions, electronic information systems and websites...		
Outcome 3	Use a range of materials, mediums and techniques to explore and produce visual ideas	Evidence	Tutor/Assessor sign and date
Practical Activities	1 Use a range of materials – drawing mediums, colouring agents, collage materials, fabrics, found objects, paper, card...		
	2 Use a range of techniques – drawings, colouring studies, samples, computer generated images, collage, montage, low relief, 3D structures...		
Underpinning Knowledge	1 List Health & Safety considerations for a range materials, mediums and techniques used in design exercises.		
Outcome 4	Produce and present the body of work in a logical, organised and appropriate form	Evidence	Tutor/Assessor sign and date
Practical Activities	1 Produce exploratory design work.		
	2 Produce finished design ideas.		
	3 Use an appropriate form of presentation for the body of work.		
Underpinning Knowledge	1 list presentation forms appropriate to Research for Design for work.		
	2 State the essential features of an evaluation of Research for Design.		
	3 Evaluate the Research for Design work.		
	4 List Health & Safety factors applicable to this design work.		
Outcome 5	Handle materials, tools and equipment safely and effectively	Evidence	Tutor/Assessor sign and date
Practical Activities	1 Handle materials correctly during the process of Research and Design.		
	2 Use tools and equipment safely and effectively during the process of Research for Design.		
Underpinning Knowledge	1 List Health and Safety factors applicable to materials, tools and equipment used during the Research for Design work.		

Outcome 6 Appreciate the application of specific design development studies to the craft		Evidence	Tutor/Assessor sign and date
Practical Activities	1 Recognise and investigate the use of specific design studies by others for a variety of crafts.		
	2 Prepare evidence of specific design studies for a variety of crafts.		
Underpinning Knowledge	1 List a range of examples from cultural, social, historical, technical and contextual sources where ideas developed from the Research for Design unit and could be used in the craft.		
	2 Provide clear, concise notes of research and evaluation.		

Unit 2 Embroidery

Overview

Unit rationale

Note: All items presented for assessment must be original work, designed and produced by the candidate and involve no commercially produced pattern, template or maquette.

Aims

The aim of this unit is to provide the opportunity for candidates to become designer makers by exploring, at some depth, this specific craft in which they will use inspirational source material to design items of an advanced nature. The work will be based on a highly personal approach to innovative ideas and traditional techniques, requiring advanced practical skills in the creation of craft items.

Candidates will develop the ability to explore the craft and materials in new ways. A thorough knowledge of materials, processes and techniques will support and give an informed background to innovative practice.

Workbooks will record supporting knowledge – visual and written notes, sampled ideas and techniques where appropriate, diagrams and technical specifications on the development of design briefs, sources of inspiration, materials, processes and techniques.

Candidates will evaluate the completed work, processes and techniques used, to inform future work.

Outcomes

There are **six** outcomes for this unit. The candidate will be able to:

- 1 apply innovative and advanced design ideas to planning and making for the craft
- 2 plan, prepare and manage the making of advanced craft items to a design brief
- 3 operate specialist tools and equipment carefully, safely and effectively for advanced techniques
- 4 make advanced craft items to an exemplary standard of craftsmanship, to a design brief
- 5 appreciate the contextual influences relating to the craft at this level
- 6 use effective advanced presentation skills for display and information.

Assessment

The **six** outcomes for this unit will be assessed using evidence from practical activities, which take the form of:

- practical exercises, using a range of materials, designed to assess the skills of the candidate in making six craft items and producing a written illustrated study exploring the contextual aspects of this craft
- a workbook, that will demonstrate underpinning knowledge in support of the practical exercises, which may include samples, sketches, notes, ideas etc.

Unit 2 Embroidery

Practical exercise

Candidates will design, prepare and make the items detailed below and produce supporting notes and evidence.

These items will provide the evidence required for the six outcomes in this unit.

- **A large scale item:**-A large scale item at least 1 metre in one direction.
- **A functional 3 dimensional item:**-A functional 3 dimensional item selected from a garment, domestic item, toy or accessory.
- **A panel or hanging:**-A site specific embroidered panel or hanging. Relevant information for this 'site specific' item must be included with the supporting notes.
- **An item to incorporate the use of metallic threads:**-An item, selected by the candidate, to incorporate the use of metallic threads.
- **A collection of samples:**-A collection of eight samples related to a source, to show evidence of advanced skills in the making and use of handmade paper, silk paper, felt, bonding and constructed fabrics as backgrounds for embroidery.
- **A portfolio of techniques and embroidered samples:**-A portfolio of techniques and embroidered samples as detailed in the syllabus.
- **An illustrated study:**-An illustrated study of embroidery history and designers as detailed in the syllabus.

Items, of an advanced nature, must include a range of materials – natural, man-made and recycled fabrics, and techniques – both by hand and machine.

Candidates will provide evidence of innovative use of fabrics, materials and threads.

Items may be for religious, secular, regalia, theatrical, fashion, domestic, formal ornament or leisure purposes.

Unit 2 Embroidery

The course

During the course, you will:

- work a range of samples to interpret the design, edgings and decorative finishes and apply them correctly during the making up, as appropriate
- draft patterns, make templates and prototypes, as appropriate
- select and agree fabrics, materials, haberdashery and calculate quantities required
- show imaginative and innovative use of threads and fibres for hand and machine – natural, manmade, recycled and fabrics created by the candidate
- apply colour to fabric surfaces using a range of products
 - and processes:
 - dyeing
 - printing
 - spraying
 - foiling
 - discharging colour
 - waxing and other resist methods.
- manipulate fabrics – folding, tucking, pleating, fringing, burning, distressing and similar techniques where appropriate
- make and record a lay and cut out accurately in an appropriate order
- transfer the design to the fabric
- embroider and make up the fabric/item, using correct finishing techniques, as appropriate
- use specialist tools and equipment (eg sewing machines, heat guns, irons, pyrographs and similar)
- experiment with traditional and innovative techniques – appliqué, beading, transparent, padded and raised, pulled and drawn, metallic embroidery, constructed fabrics
- make notes on and samples of:
 - a variety of decorative techniques applicable to garments, accessories, hangings and panels, to include – beads, sequins, ribbons, rouleau loops, prairie points, fringes and tassels
 - dyeing, painting, stencilling, foiling, bleaching, stiffening, fibre etch, wax and other resists
 - bonding, fraying, burning, piercing, manipulating and making fabrics from recycled paper, silk paper and felt
 - interfacings and waddings.

Unit 2 Embroidery

Portfolio/folder

Sample portfolio/folder

The techniques and skills assessed in 7922-08 Embroidery continue to apply and should be extended and applied, as appropriate, and developed to show evidence of advanced skills both in the production of the items and for the portfolio of samples.

Samples and techniques must be worked directly from ideas produced in Research for Design, the Illustrated study or from a chosen source.

Samples will be worked in/on a wide variety of materials, to include – cotton, wool, silk, paper, leather, soluble materials, and plastic as well as felted, textured and bonded fabrics.

Candidates are required to show evidence of all the listed techniques by both hand and machine – padded and raised, transparent, pulled or drawn, appliqué, beading and other embellishments, gold and metallic threads.

Candidates will apply colour to fabric surfaces using a range of products and processes, including – dyeing, painting, spraying, foiling, image transfer, bleaching, fibre etch, waxing and other resist methods.

Manipulation of fabrics will include – finishing techniques, folding, tucking, fringing, burning, distressing and similar techniques, as appropriate.

Candidates will develop a range of samples to show the imaginative use of threads and fibres – natural, man-made, recycled and those created by the candidate.

A written, illustrated study

The written, illustrated study will provide the supporting knowledge required to demonstrate an understanding of embroidery in general and the major influence played upon it by countries of origin, religion, climate and international designers both in a historical and a current context.

The study will be in two sections.

Section 1

Embroidery in Britain from 900AD to today.

Candidates will study the factors which have influenced changes in design throughout the centuries and in this section must cover the work of three present day, nationally recognised and influential textile artists and/or designer makers in this craft.

Consideration must be given to the following factors:

- purpose or function – religious/ceremonial/domestic/secular

- fashion/style/materials/threads
- foreign influence
- design source.

Section 2

Foreign embroidery

Candidates will study 3 foreign countries with strong embroidery traditions.

Consideration must be given to the following factors:

- religious/ceremonial/domestic/secular
- fashion/style/materials/threads
- climate/geographical location
- design source.

Candidates are reminded that visual material should include selected sketches and drawings, photocopies, photographs, postcards and samples to support the written study.

The study may be used as inspiration for any of the items/artefacts made for assessment.

Candidate name _____

Assessment record year _____

Qualification _____

Qualification number _____

Outcome 1 Apply innovative and advanced design ideas to planning and making the items of the craft		Evidence	Assessor/Tutor Sign and date
Practical Activities	1 Use design ideas, as explored in Unit 1, innovatively and traditionally, with materials of an advanced nature.		
Underpinning Knowledge	1 List traditional uses of design ideas, as explored in Unit 1, to inform the application of the craft.		
Outcome 2 Plan, prepare and manage the making of advanced craft items to a design brief		Evidence	Assessor/Tutor Sign and date
Practical Activities	1 Develop a design brief and statement of intent for the production of an advanced item.		
	2 Negotiate the design brief and budget with the client or user.		
	3 Negotiate the timescale involved with the client or user.		
	4 Produce a series of design roughs to show ideas.		
	5 In negotiation with the client or user, choose the item to be made from the design roughs.		
	6 Prepare full designs and economical lays for the item to be made – sketches, diagrams, patterns, templates, marked up as appropriate.		
	7 Cost the item to be made.		
	8 Select and obtain advanced materials for the item to be made.		
	9 Prepare the materials for use.		

	10 Identify the correct method to store work in progress, carefully and safely.		
	11 Carry out a range of advanced techniques and process.		
Underpinning Knowledge	1 Identify methods of recording negotiations with the client or user.		
	2 List the characteristics of a range of advanced materials available for the item to be made.		
	3 Record the range of experiments and samples, advanced techniques and processes.		
	4 Record the management of the planning and preparation: <ul style="list-style-type: none"> • order of work • cost sheet. 		
Outcome 3	Operate specialist tools and equipment carefully, safely and effectively for advanced techniques	Evidence	Assessor/Tutor Sign and date
Practical Activities	1 Use specialist tools carefully, safely and effectively for advanced techniques.		
	2 Use specialist equipment carefully, safely and effectively for advanced techniques.		
Underpinning Knowledge	1 list a range of specialist tools used for advanced techniques and describe their use and care.		
	2 list a range of specialist equipment used for advanced techniques and describe its use and care.		
	3 record innovative uses of specialist tools and equipment for advanced techniques.		
Outcome 4	Make advanced craft items to an exemplary standard of craftsmanship, to a design brief	Evidence	Assessor/Tutor Sign and date
Practical Activities	1 Adjust and adapt craft items during the making process.		
	2 Handle advanced materials correctly during the making process.		
	3 Observe Health & Safety requirements for advanced materials, techniques and processes.		

	4	Make a range of advanced craft items, to an exemplary standard of craftsmanship, using appropriate innovative or traditional techniques.		
	5	Finish and present the advanced items correctly to meet the design brief.		
	6	Record the time taken to design and make the craft items.		
	7	Evaluate the completed items: <ul style="list-style-type: none"> • design strengths/weakness • materials used • innovative techniques discovered • problems encountered • possible solutions. 		
Underpinning Knowledge	1	Describe the reasons for adjustments and adaptations made to the items during the making process.		
	2	List the Health & Safety factors and current legislation, applicable to making of the item.		
	3	State the care/storage requirements for the items made.		
Outcome 5		Appreciate the contextual influences relating to the craft at this level	Evidence	Assessor/Tutor Sign and date
Practical Activities	1	Produce a written, illustrated study in 3 sections relating to contextual aspects of the craft- contemporary, historical and cultural.		
	2	Record specific research at museums, libraries, exhibitions and websites, related to the craft at this level.		
Underpinning Knowledge	1	List major contemporary factors relating to the craft.		
	2	List major historical factors relating to the craft – eg the work of design makers.		
	3	List major cultural factors relating to the craft – eg ethnic influences and the global market		
	4	List major museum collections, exhibitions and/or websites relating to the craft.		

Outcome 6 Use effective advanced presentation skills for display and information		Evidence	Assessor/Tutor Sign and date
Practical Activities	1 Investigate methods and information in presenting 3D work as the designer maker.		
	2 Select and use a variety of ideas to create an innovative presentation method for 3D items.		
	3 Select and use an innovative method of presenting information on the designer maker.		
Underpinning Knowledge	1 List methods of presentation applicable to items of the craft.		
	2 List relevant information to be included on individuals as designer makers.
