Assignment A

## **About City & Guilds**

City & Guilds is the UK's leading provider of vocational qualifications, offering over 500 awards across a wide range of industries, and progressing from entry level to the highest levels of professional achievement. With over 8500 centres in 100 countries, City & Guilds is recognised by employers worldwide for providing qualifications that offer proof of the skills they need to get the job done.

## **City & Guilds Group**

The City & Guilds Group includes City & Guilds, ILM (the Institute of Leadership & Management) which provides management qualifications, learning materials and membership services, NPTC which offers land-based qualifications and membership services, and HAB (the Hospitality Awarding Body). City & Guilds also manages the Engineering Council Examinations on behalf of the Engineering Council.

## **Equal opportunities**

City & Guilds fully supports the principle of equal opportunities and we are committed to satisfying this principle in all our activities and published material. A copy of our equal opportunities policy statement is available on the City & Guilds website.

# Level 2 Maintain ICT equipment and systems (7540-228)

## Assignment A

### Introduction – Information for Candidates

#### **About this document**

This assignment comprises part of the assessment for Level 2 Maintain ICT Equipment and Systems (7540-228).

---

#### **Health and safety**

You are asked to consider the importance of safe working practices at all times.

You are responsible for maintaining the safety of others as well as your own. Anyone behaving in an unsafe fashion will be stopped and a suitable warning given. You will **not** be allowed to continue with an assignment if you compromise any of the Health and Safety requirements. This may seem rather strict but, apart from the potentially unpleasant consequences, you must acquire the habits required for the workplace.

#### **Time allowance**

The recommended time allowance for this assignment is 3 hours.

# Level 2 Maintain ICT Equipment and Systems (7540-228)

## Candidate instructions

**Time allowance: 3 hours**

### Assignment set up:

This assignment is made up of three tasks

- Task A – carry out safety inspections and to check fuse values.
- Task B – carry out routine preventative maintenance to a workstation.
- Task C – carry out troubleshooting and a routine operating system maintenance procedure  
File update

### Scenario

You are required to carry out a routine preventative maintenance procedure on a workstation, consisting of a base unit, monitor, keyboard, mouse and printer, and to report and/or rectify any problems found.

Hand in your written answers on the answer sheet provided. Log sheets etc should be completed as indicated in the tasks. Screen prints should also be produced as directed by the assessor.

### Task A

- 1 Carry out a general inspection of the system installation and its immediate working area, and identify **three** items that could present a hazard if not properly managed. Enter on the System Hazards Log the
  - details of the hazards
  - risks attached to them
  - recommendations for action to reduce those risks.
- 2 Visually inspect all accessible system cables for damage and deterioration. Enter the results on the System Electrical Safety Inspection sheet.
- 3 Obtain and fit replacement cables as necessary. Record your actions on the System Electrical Safety Inspection sheet.
- 4 For **three** mains powered items in the system, calculate the value of the fuse that should be fitted to the mains plug. Enter the values on the System Electrical Safety Inspection sheet.
- 5 Gain access to **each** mains plug fuse calculated in A4 and record each rated value on the System Electrical Safety Inspection sheet.
- 6 Obtain and fit correct fuses to the mains plugs

## Task B

- 1 Visually inspect all system components externally for damage and deterioration. Using the Fault Reporting Log Sheet provided, identify any problems and propose actions to be taken.
- 2 Clean the exterior of the base unit, monitor, mouse, keyboard and printer
- 3 Remove accessible covers (excluding the monitor) and remove dust and debris from the base unit, mouse, keyboard and printer. Remove the minimum amount of printer covers to allow routine cleaning. Components other than detachable sheet feeders should not be removed. Other components must not be disturbed
- 4 Visually inspect the interior of the base unit for damage and deterioration. Identify **two** problems encountered and rectify defects. Using the Fault Reporting Log Sheet, record details of any damage or deterioration and any actions you took

## Task C

- 1 Obtain permission from the Assessor to apply power to the system.
- 2 Refit covers; reconnect the system as necessary and boot-up. Use the Fault Reporting Log Sheet to record details of any problems encountered
- 3 Carry out troubleshooting on any problems or defects encountered in (2) above. Using the Troubleshooting Record Sheet, record all details of any actions you undertook. On the answer sheet, suggest possible root causes of any problems encountered.
- 4 Carry out a data back up as directed by the assessor and take a screen print of the outcome to show that the back up completed.
- 5 Carry out a data restoration using the backup created in C4 and take a screen print of the outcome.
- 6 Carry out a routine operating system maintenance procedure as detailed by your assessor (for example a disk cleanup, de-fragmentation of disk, etc.) and take a screen print of the outcome.
- 7 Using the Preventative Maintenance Log, enter details of all actions, findings and corrective/preventative measures taken during this assignment.
- 8 Hand all paperwork and removable storage media to your Assessor. Ensure that your name is clearly identified on your work.
- 9 Sign above your name and hand all paperwork to your Assessor.
