

# Systems and Principles Unit Syllabus

## Level 3 ICT Repair centre procedures 3 7540-367

## **About City & Guilds**

City & Guilds is the UK's leading provider of vocational qualifications, offering over 500 awards across a wide range of industries, and progressing from entry level to the highest levels of professional achievement. With over 8500 centres in 100 countries, City & Guilds is recognised by employers worldwide for providing qualifications that offer proof of the skills they need to get the job done.

## **City & Guilds Group**

The City & Guilds Group includes City & Guilds, ILM (the Institute of Leadership & Management) which provides management qualifications, learning materials and membership services, NPTC which offers land-based qualifications and membership services, and HAB (the Hospitality Awarding Body). City & Guilds also manages the Engineering Council Examinations on behalf of the Engineering Council.

## **Equal opportunities**

City & Guilds fully supports the principle of equal opportunities and we are committed to satisfying this principle in all our activities and published material. A copy of our equal opportunities policy statement *Access to assessment and qualifications* is available on the City & Guilds website.

## **Copyright**

The content of this document is, unless otherwise indicated, © The City and Guilds of London Institute 2010 and may not be copied, reproduced or distributed without prior written consent.

However, approved City & Guilds centres and learners studying for City & Guilds qualifications may photocopy this document free of charge and/or include a locked PDF version of it on centre intranets on the following conditions:

- centre staff may copy the material only for the purpose of teaching learners working towards a City & Guilds qualification, or for internal administration purposes
- learners may copy the material only for their own use when working towards a City & Guilds qualification
- the *Standard Copying Conditions* on the City & Guilds website.

Please note: National Occupational Standards are not © The City and Guilds of London Institute. Please check the conditions upon which they may be copied with the relevant Sector Skills Council.

## **Publications**

City & Guilds publications are available on the City & Guilds website or from our Publications Sales department at the address below or by telephoning +44 (0)20 7294 2850 or faxing +44 (0)20 7294 3387.

Every effort has been made to ensure that the information contained in this publication is true and correct at the time of going to press. However, City & Guilds' products and services are subject to continuous development and improvement and the right is reserved to change products and services from time to time. City & Guilds cannot accept liability for loss or damage arising from the use of information in this publication.

## Unit 367 ICT Repair centre procedures 3

Syllabus Overview	2
Outcome 1 Describe legislative requirements for repair centre operations	4
Outcome 2 Detail specific technical resource requirements for repair centre operations	5
Outcome 3 Develop a specification for a repair centre	6
Outcome 4 Provide technical support to others	8
Unit record sheet	9

# Unit 367      ICT Repair centre procedures 3

## Syllabus Overview

### Rationale

This unit will enable the candidate to assess and specify technical resource requirements of a range of typical repair centres.

N.B. It is not necessary for the assessment of this unit to be undertaken in a workshop. However, the centre is advised to make available a specific location (room/building) on which the candidate can base the planning process.

### Learning outcomes

There are **four** outcomes to this unit. The candidate will be able to:

- Describe legislative requirements for repair centre operations
- Detail specific technical resource requirements for repair centre operations
- Develop a specification for a repair centre
- Provide technical support to others

### Guided learning hours

It is recommended that 30 hours should be allocated for this unit. This may be on a full time or part time basis.

### Connections with other qualifications

This unit contributes towards the knowledge and understanding required for the following qualifications:

### NVQ for IT Professionals (4324) Level 3

Outcome	Unit
2	33.2 Obtain technical resources for a repair centre
2, 3	33.3 Develop technical resources for a repair centre
4	33.4 Co-ordinate the implementation of technical resources
1	104.1 Check that health and safety procedures are followed
1, 2	104.2 Ensure that risks are controlled safely and effectively
1, 2	104.2 Assess the technical resource requirements of repair
1, 2	104.2 centre operations

## Key Skills

Application of number	N/A
Communication	3.2, 3.3
ICT	2
Working with others	N/A
Problem solving	3.1
Improving own learning	2

## Assessment and grading

Assessment will be by means of a **set assignment** covering both practical activities and underpinning knowledge.

## Unit 367

## ICT Repair centre procedures 3

### Outcome 1

Describe legislative requirements for repair centre operations

#### Practical activities

The candidate will be able to:

- 1 evaluate the current requirements of health and safety and environmental legislation as applicable to repair centre operations with regard to
  - a electrical safety
  - b COSHH
  - c bench layout and design
  - d floor coverings
  - e ventilation and fume extraction
  - f storage
  - g heating and lighting of work areas
  - h noise
  - j personal protective equipment (PPE)
  - k use of display screen equipment (DSE)
  - l waste disposal.

#### Underpinning knowledge

The candidate will be able to:

- 1 describe the regulatory requirements for data protection, confidentiality and software licensing.

## Unit 367

## ICT Repair centre procedures 3

### Outcome 2

Detail specific technical resource requirements for repair centre operations

#### Practical skills

The candidate will be able to:

- 1 locate and extract information (from eg Internet, industry codes of practice) on specific technical and safety requirements for repair centre operations, eg
  - a test equipment
  - b diagnostic software
  - c tools
  - d fire extinguishers
  - e service manuals
- 2 identify resource requirements for a repair centre, eg
  - a benches
  - b fume extraction
  - c fire protection
  - d warehousing/storage
- 3 evaluate information gained and decide on its applicability to specific repair centre operations
  - a base unit repair
  - b laptop repair
  - c printer/photocopier repair
  - d CD-ROM/DVD drive repair
  - e keyboards.

#### Underpinning knowledge

The candidate will be able to:

- 1 describe the specific technical and safety requirements for, eg
  - a antistatic protection areas
  - b soldering stations
  - c equipment testing areas
  - d equipment cleaning areas (including high voltage and laser)
  - e equipment and spares storage areas
  - f clean rooms
  - g areas for repair and test of high voltage equipment such as monitors and lasers
  - h restricted access areas
  - j electro-magnetic compatibility (EMC) testing.

**Practical activities**

The candidate will be able to:

- 1 identify issues affecting the provision of technical resources, eg
  - a cost
  - b legal requirements
  - c staff training
  - d technical specification
  - e contractual requirements
- 2 identify sources to obtain manufacturers' test and repair specifications for equipment to be repaired, eg
  - a Internet
  - b manufacturers' manuals
  - c help and information files within the system
- 3 identify sources to obtain health and safety and environmental legislation, eg
  - a Internet
  - b Health and Safety Executive (HSE)
  - c Department for Environment, Food and Rural Affairs (DEFRA)
- 4 produce a report outlining the risk factors, options to minimise them and recommendations as to the most appropriate options in a given example, eg
  - a electric shock
  - b static damage
  - c manual handling injuries
  - d fire
  - e poor lighting
  - f health damage from hazardous substances
  - g hearing damage
  - h excess heat and cold
  - j training
  - k security (data and property)
- 5 produce repair centre work instructions for using test equipment.

## Underpinning knowledge

The candidate will be able to:

- 1 describe the main steps to the development of specifications for repair centre operations
  - a define work flow processes (eg stages, equipment)
  - b decide on basic layout (including domestic/welfare arrangements)
  - c carry out a risk assessment and quantify the risks
  - d decide on optimum methods of risk minimisation
  - e modify layout and equipment lists to minimise risks
  - f define basic operating procedures
- 2 describe workflow processes typical to a repair centre eg
  - a storage
  - b spares
  - c test and verification
  - d soak testing
  - e repackaging
  - f software imaging
- 3 explain the importance of producing operating procedures for a new resource and describe methods of doing so
- 4 explain the importance of operator training in the newly introduced procedures
- 5 outline the problems that could occur when obtaining technical resources and the methods for dealing with them
  - a item out of stock
  - b expense
  - c lead time too long
  - d does not operate as advertised
- 6 outline methods for carrying out workplace risk assessments for planned new operations and recording findings
  - a be aware of hazards
  - b decide who is at risk and how
  - c evaluate hazards and establish that existing precautions are adequate
  - d review and revise the effectiveness of precautions
  - e record findings
  - f take steps to minimise risks
- 7 Explain why it is important to recover business data that has become lost or corrupted.

**Practical activities**

The candidate will be able to:

- 1 produce local repair work instructions to cover
  - a equipment/tools required
  - b health and safety considerations
  - c dismantling procedure
  - d labelling of connectors
  - e removal of unserviceable items
  - f unpacking, handling and visual checking of replacement items
  - g pre-installation, configuration of replacement items
  - h installation of replacement items
  - j reassembly of major units
- 2 produce local work instructions for post repair testing to cover
  - a connection of equipment
  - b software requirements
  - c configuration of equipment under test
  - d test(s) to be carried out, (functional, diagnostic, stress)
  - e expected results and tolerances
  - f test report format.

# Unit record sheet

Use this form to track your progress through this unit.

Tick the boxes when you have covered each outcome. When they are all ticked, you are ready to be assessed.
