

9628-08 Level 3 Award in Cloud Services (for the Level 3 Infrastructure Technician Apprenticeship)

9628-308 Cloud Services and Disaster Recovery

Sample question paper answer sheet

Pass mark: 28/40 (70%)

Question	Answer Key	Test specification reference
1	A	1.1 Describe the characteristics of Cloud technology
2	A	1.1 Describe the characteristics of Cloud technology
3	B	1.1 Describe the characteristics of multi-tenancy and resource pooling in Cloud technology
4	A	1.1 Describe the characteristics of Cloud technology
5	B	1.1 Describe the characteristics of Cloud models
6	D	1.1 Describe the characteristics of Cloud services
7	D	1.1 Describe the importance of relevant legislation and consequences of a breach in respect to Cloud services
8	C	1.1 Describe the importance of relevant legislation and consequences of a breach in respect to Cloud services
9	C	1.2 Describe considerations specific to the use of hardware for delivering Cloud services
10	B	1.2 Describe considerations specific to the use of hardware for delivering Cloud services
11	A	1.2 Describe considerations specific to the use of hardware for delivering Cloud services
12	A	1.2 Describe considerations specific to the use of hardware for delivering Cloud services
13	C	1.2 Describe considerations specific to the use of hardware for delivering Cloud services
14	B	1.2 Describe considerations specific to the use of networking for delivering Cloud services
15	A	1.2 Describe considerations specific to the use of networking for delivering Cloud services
16	B	1.2 Describe considerations specific to the use of networking for delivering Cloud services
17	D	1.2 Describe considerations specific to the use of software for delivering Cloud services
18	B	1.2 Describe considerations specific to the use of hosted applications for delivering Cloud services

19	C	1.2 Describe considerations specific to Virtual machine configuration for delivering Cloud services
20	D	1.3 Describe the use and importance of SLAs for provisioning tenants
21	B	1.3 Describe the use and importance of service provisioning
22	B	1.3 Describe the use and importance of service provisioning
23	A	1.3 Describe the use and importance of multiple tenants
24	B	1.4 Describe the configuration of secure access to Cloud services
25	C	1.4 Describe the configuration of user identity to Cloud services
26	D	2.1 Describe organisational considerations for producing a disaster recovery plan
27	C	2.1 Describe organisational considerations for producing a disaster recovery plan
28	D	2.1 Describe organisational considerations for producing a disaster recovery plan
29	A	2.1 Describe organisational considerations for producing a disaster recovery plan
30	A	2.1 Describe organisational considerations for producing a disaster recovery plan
31	B	2.1 Describe organisational considerations for producing a disaster recovery plan
32	A	2.1 Describe roles and responsibilities for producing a disaster recovery plan
33	C	2.2 Describe the 'prevent' step of a disaster recovery plan
34	C	2.2 Describe the 'detect' step of a disaster recovery plan
35	B	2.2 Describe the 'respond' step of a disaster recovery plan
36	C	2.2 Describe the 'respond' step of a disaster recovery plan
37	C	2.2 Describe the 'recovery' step of a disaster recovery plan
38	A	2.2 Describe the 'recovery' step of a disaster recovery plan
39	C	2.2 Describe the 'restore' step of a disaster recovery plan
40	C	2.2 Describe the 'restore' step of a disaster recovery plan
