Assignment C

About City & Guilds
City & Guilds is the UK's leading provider of vocational qualifications, offering over 500 awards across a wide range of industries, and progressing from entry level to the highest levels of professional achievement. With over 8500 centres in 100 countries, City & Guilds is recognised by employers worldwide for providing qualifications that offer proof of the skills they need to get the job done.

City & Guilds Group
The City & Guilds Group includes City & Guilds, ILM (the Institute of Leadership & Management) which provides management qualifications, learning materials and membership services, NPTC which offers land-based qualifications and membership services, and HAB (the Hospitality Awarding Body). City & Guilds also manages the Engineering Council Examinations on behalf of the Engineering Council.

Equal opportunities
City & Guilds fully supports the principle of equal opportunities and we are committed to satisfying this principle in all our activities and published material. A copy of our equal opportunities policy statement is available on the City & Guilds website.

Copyright
The content of this document is, unless otherwise indicated, © City & Guilds Limited and may not be copied, reproduced or distributed without prior written consent.

However, approved City & Guilds centres and learners studying for City & Guilds qualifications may photocopy this document free of charge and/or include a locked PDF version of it on centre intranets on the following conditions:

- centre staff may copy the material only for the purpose of teaching learners working towards a City & Guilds qualification, or for internal administration purposes
- learners may copy the material only for their own use when working towards a City & Guilds qualification

The *Standard Copying Conditions* on the City & Guilds website also apply.

Please note: National Occupational Standards are not © City & Guilds Limited. Please check the conditions upon which they may be copied with the relevant Sector Skills Council.

Publications
City & Guilds publications are available on the City & Guilds website or from our Publications Sales department at the address below or by telephoning +44 (0)20 7294 2850 or faxing +44 (0)20 7294 3387.

Level 2 Create software components using COBOL (7266/7267-203) Assignment C

Introduction – Information for Candidates

About this document

This assignment comprises part of the assessment for Level 2 Create software components using COBOL (7266/7267-203).

Health and safety

You are asked to consider the importance of safe working practices at all times.

You are responsible for maintaining the safety of others as well as your own. Anyone behaving in an unsafe fashion will be stopped and a suitable warning given. You will **not** be allowed to continue with an assignment if you compromise any of the Health and Safety requirements. This may seem rather strict but, apart from the potentially unpleasant consequences, you must acquire the habits required for the workplace.

Time allowance

The recommended time allowance for this assignment is **4 hours**.

Level 2 Create software components using COBOL (7266/7267-203)

Candidate instructions

Time allowance: 4 hours

Assignment set up:

This assignment is made up of **two** tasks

- Task A - Create software to validate input, produce a report and an output file
- Task B - Check presentation criteria

Scenario

You work as a software developer for Delta Systems who develop software for clients. You have been asked to create software for a company that provides a yearly service for alarm systems. The software is to validate data that is entered via the keyboard, save the valid data into a file and print an error report for invalid data.

Task A

In this task you will validate the customer records which are entered via the keyboard, produce an error report and create a sequential file of valid records.

The table below shows the fields in the customer records and the validation required.

Name	Type	Length	Validation
Customer Number	Numeric except that last digit may be an X	6	Modulus 11 check digit Use 999999 to terminate the program
First Name	Alphanumeric	20	Not spaces
Last Name	Alphanumeric	20	Not spaces
Start Date	Alphanumeric	10 (DD/MM/YYYY)	Days and month should be fully checked
System	Alphabetic	1	"P" or "F"
Service Month	Numeric	2	Month in format MM
Contract Type	Alphabetic	1	"P" or "C"

1 Create the DISPLAY screen to allow input of the customer records. Use REDEFINES to create the ACCEPT screen.

2 Write the code to validate the input data as shown in the table above.
The modulus 11 check digit for the customer number must be checked by evaluating the following formula:
((A*6) + (B*5) + (C*4) + (D*3) + (E*2) + (F*1)) / 11
Where A is the highest order digit, B the next and so on. The customer number is valid if the division by 11 gives no remainder. Note that an X in the rightmost position is counted as 10.

3 Write the code to output valid records to a sequential file in the same format as shown in the table above except that the Start Date should be output as numeric in the format ddmmyyyy.

4 Design a layout for a validation report and then write the code to produce the report. The report is to show any input records which contain errors. The report must contain the following:
- a heading at the top of each page which includes a page number
- all the fields with an indication for any field which contains an error
- 13 customer records per page.

5 At the end of the validation report the following totals are to be provided
- total number of records in error
- total number of valid records
- total number of input records.

6 Provide evidence that the program complies with the specification by producing validation reports and file prints.

7 Print a listing of the code.

Task B

In this task you should follow the criteria below when producing your work.

1 The program conforms to the design specification.

2 The program uses the most appropriate data type(s).

3 Meaningful names are used when declaring variables.

4 The program syntax is consistently indented to aid readability.

5 The program is commented.

Notes

- Candidates should produce the following for their assessor:
    - printed program listing
    - validation report layout
    - evidence that the program works correctly.
- At the conclusion of this assignment, hand all paperwork and removable storage media to the test supervisor.
- Ensure that your name is on the removable storage media and all documentation.
- If the assignment is taken over more than one period, all removable storage media and paperwork must be returned to the test supervisor at the end of each sitting.
