About City & Guilds
City & Guilds is the UK’s leading provider of vocational qualifications, offering over 500 awards across a wide range of industries, and progressing from entry level to the highest levels of professional achievement. With over 8500 centres in 100 countries, City & Guilds is recognised by employers worldwide for providing qualifications that offer proof of the skills they need to get the job done.

City & Guilds Group
The City & Guilds Group includes City & Guilds, ILM (the Institute of Leadership & Management) which provides management qualifications, learning materials and membership services, NPTC which offers land-based qualifications and membership services, and HAB (the Hospitality Awarding Body). City & Guilds also manages the Engineering Council Examinations on behalf of the Engineering Council.

Equal opportunities
City & Guilds fully supports the principle of equal opportunities and we are committed to satisfying this principle in all our activities and published material. A copy of our equal opportunities policy statement Access to assessment and qualifications is available on the City & Guilds website.

Copyright
The content of this document is, unless otherwise indicated, © The City and Guilds of London Institute 2007 and may not be copied, reproduced or distributed without prior written consent.

However, approved City & Guilds centres and learners studying for City & Guilds qualifications may photocopy this document free of charge and/or include a locked PDF version of it on centre intranets on the following conditions:

• centre staff may copy the material only for the purpose of teaching learners working towards a City & Guilds qualification, or for internal administration purposes
• learners may copy the material only for their own use when working towards a City & Guilds qualification
• the Standard Copying Conditions on the City & Guilds website.

Please note: National Occupational Standards are not © The City and Guilds of London Institute. Please check the conditions upon which they may be copied with the relevant Sector Skills Council.

Publications
City & Guilds publications are available on the City & Guilds website or from our Publications Sales department at the address below or by telephoning +44 (0)20 7294 2850 or faxing +44 (0)20 7294 3387.

Every effort has been made to ensure that the information contained in this publication is true and correct at the time of going to press. However, City & Guilds’ products and services are subject to continuous development and improvement and the right is reserved to change products and services from time to time. City & Guilds cannot accept liability for loss or damage arising from the use of information in this publication.

Unit 034  Creating combined presentation design using ICT

Syllabus Overview

Rationale
The aim of this unit is to provide candidates with an intermediate level of skills and knowledge to competently prepare for, and perform a variety of paper and web based design related tasks using Information and Communication Technologies (ICT). Candidates will develop a more demanding understanding of design and web site applications and the operating system in everyday usage and the ability to work in a generally unsupervised role solving issues competently without direction.

Learning outcomes
There are five outcomes to this unit. The candidate will be able to:

- Acquire digital still images from different sources
- Produce digital artwork and drawings using a desk top publishing (DTP) application
- Produce designs for publications
- Prepare publications using a DTP application
- Prepare publications using a web publishing application

Guided learning hours
It is recommended that 60 hours should be allocated for this unit. This may be on a full time or part time basis.

Connections with other qualifications
This unit contributes towards the knowledge and understanding required for the following qualifications:

**IT User NVQ (ITQ) Level 2**

Assessment and grading
Assessment will be by means of a **set assignment** covering both practical activities and underpinning knowledge.
Unit 034  
Creating combined presentation design using ICT

Outcome 1  
Acquire digital still images from different sources

Practical activities
The candidate will be able to:

1  use a simple digital camera to produce digital images of a range of subjects with a range of light levels (eg sun, cloud, indoor, flash etc)
   a  portrait
   b  group
   c  landscape (including panoramic views using multiple adjacent images)
   d  street scene
2  download digital photographs from a camera storage medium to a pc
3  use a flatbed scanner and software
   a  to acquire digital images of
      i  monochrome photographs/graphics
      ii monochrome documents using optical character recognition (OCR)
      iii grey scale photograph/graphics
      iv  colour photographs/graphics
      v  colour documents
   b  using basic software settings eg
      i  image type
      ii destination
      iii resolution
      iv  scale
4  acquire digital images in various file formats from Internet or other network sources
5  organise and re-name digital image files in themed groups.

Underpinning knowledge
The candidate will be able to:

1  list the features of common digital imaging systems eg
   a  multiple file types
   b  file compression
   c  image acquisition from different sources
   d  peripherals  eg printers, scanners etc.
   e  image enhancement and manipulation
   f  can produce hard copy in a variety of formats
   g  facilitates sharing of images between applications and locations
Underpinning knowledge continued

2 identify sources of digital images eg
   a digital camera
   b scanner

3 describe the limitations of digital imaging when using:
   a digital camera
   b scanner
   c existing images from outside sources

4 explain the terms:
   a compression
   b capture
   c post-processing
   d resolution
   e ‘lossy’ format

5 describe scanning modes:
   a line
   b tone
   c rgb
   d cmyk
   e greyscale

6 Outline the technical dangers of acquiring images from un-proved sources eg
   a embedded viruses
   b spyware/adware

7 Outline the legal implications of downloading images from the Internet and other public access sources including:
   a copyright issues
   b data protection
   c criminal offences (obscenity etc.)
   d workplace restrictions.
Unit 034  
Creating combined presentation design using ICT

Outcome 2  Produce digital artwork and drawings using a desktop publishing (DTP) application

Practical activities
The candidate will be able to:

1. produce outline designs for artwork that includes:
   a. line drawing, using auto and freehand shapes
   b. colour painting and imported images

2. select and open a DTP application that includes suitable drawing facilities to produce digital versions of artwork designs

3. produce digital artwork based on outline designs, using single and multiple images, and including appropriate text, and using tools such as:
   a. group/ungroup
   b. grid
   c. snap to grid
   d. size
   e. crop
   f. rotate/flip

4. save digital artwork using suitable file formats and convenient file sizes to the specified local or remote location.

Underpinning knowledge
The candidate will be able to:

1. identify the common functions and tools in software with drawing facilities eg
   a. auto shapes
   b. freehand drawing
   c. line types and thicknesses
   d. airbrush
   e. paintbrush
   f. eraser
   g. colour selection (standard and custom)
   h. sizing
   i. crop
   j. aspect ratio lock
   k. zoom
   l. layout grid
   m. snap
Underpinning knowledge continued

2 identify suitable
   a file types for their artwork in websites eg
      i Bitmap .bmp
      ii .gif
      ii .jpg

   b file types suitable for print publishing that are application specific and more common
      i .psd
      ii .pdf
      iii .eps
      iv .rtf
      v .html

3 outline the advantages and disadvantages of using a graphic tablet to input data

4 outline the advantages and disadvantages of methods of digital image storage eg
   a optical media
   b hard drive
   c removable/portable media

5 define the term ‘image manipulation’
   a Outline the basic features and tools found in image enhancing software eg
   b sizing eg image and canvas
   c rotate/ flip
   d adjust eg brightness, contrast, auto, sharpen
   e layer
   f crop/trim
   g zoom
   h filter

6 identify the commonly used colour modes eg
   a greyscale
   b rgb
   c cmyk
   d Duotone
   e halftone
   f monotone
   g sepia

7 describe some of the basic problems associated with image editing eg
   a enlarging low-definition images
   b wide angle distortion
   c image not straight eg tilted horizon etc.
   d over-use of sharpen tool
   e auto-correct not giving desired effect
   f cropping can destroy image composition.
Unit 034 Creating combined presentation design using ICT

Outcome 3 Produce designs for publications

Practical activities
The candidate will be able to:
1  produce a brief publication specification detailing:
   a  textual content
   b  graphical content
   c  order of presentation
2  produce layouts for a hard copy publication to be produced using DTP including specifications for graphics files to be used
3  produce layouts for a publication to be published as a series of web pages, including specifications for graphics files to be used.

Underpinning knowledge
The candidate will be able to:
1  describe different file formats for text or graphics and text:
   a  .rtf
   b  text files .txt
   c  word processor files
   d  .pdf
   e  DTP formats
2  Identify the differences in requirements for hard copy and web-based publications and resolve issues surrounding them.
Unit 034 Creating combined presentation design using ICT

Outcome 4 Prepare publications using a DTP application

**Practical activities**
The candidate will be able to:

1. select and open a suitable DTP application with sufficient features to produce a publication containing text and graphics
2. input text and graphics according to specific layouts and designs
3. use guides or page layout grids to position and align text
4. use different text layouts eg
   a. line and character spacing
   b. bullet and numbered lists
   c. indents eg first line, hanging, whole paragraph
   d. side headings
   e. rotated/skewed text
   f. banner headlines
   g. callout boxes
   h. justification eg left, right, centre, full
5. use different text enhancements and formats eg
   a. font
   b. font size
   c. bold, italics, roman
   d. dropped and raised capitals
   e. reverse text
   f. tinted backgrounds
   g. leading
   h. kerning
   i. hyphenation
   j. underline
   k. strikethrough
   l. subscript, superscript
6. use interline and character spacing, eg leading, pair, kerning and hyphenation to fit copy to a given space
7. create and use different text styles
8. use guides or page layout grids to position and align graphic elements on pages containing text
9. anchor a graphic image to a specified position
Practical activities continued

10 change the attributes/properties of a graphic eg
   a object
   b size
   c position
   d shape
   e border
   f background

11 add a frame to a graphic image

12 add a caption to a graphic image

13 wrap text around a graphic image

14 combine text and a graphic image to produce text over the image

15 edit a graphic image to modify the colour, fill colour and style

16 save the publication to a specified location

17 print the publication on specified paper in a specified format.

Underpinning knowledge

The candidate will be able to:

1 identify basic principles and means of ensuring effective communication using printed images:
   a typefaces and typesetting
   b type: layout, structure, emphasis
   c illustration
   d page layout grids
   e guides

3 describe the purposes of using different text layout designs when creating a publication:
   a text density
   b white space
   c special text effects
   d wrap
   e rotated and skewed text

4 describe the purposes of selecting different typographical designs when creating a publication:
   a serif
   b sans serif
   c roman
   d italic
   e upper case, lower case
   f tinted backgrounds
   g dropped and raised capitals
   h describe the reasons for creating text styles

5 distinguish between fonts eg printer, screen, bitmap and scaleable.
Unit 034 Creating combined presentation design using ICT

Outcome 5 Prepare publications using a web publishing application

Practical activities
The candidate will be able to:

1. select and open suitable a web publishing application
2. produce web versions of text and graphics publications
3. embed images within web pages
   a. set suitable alignment attributes
   b. use the alt tag to provide the user with alternative meaningful information
4. use tables to enhance the layout of
   a. text and graphics
   b. tabular information
5. use anchors to establish hyperlinks within a single web page
6. use hyperlinks to link to:
   a. pages within the same web site
   b. other sites on the world wide web
7. create image maps and hotspots to link to:
   a. pages within the same web site
   b. other sites on the world wide web
8. use meta tags to add keyword information to pages to aid search engines
9. resize images within web sites:
   a. as primary images
   b. for use as background images on pages
   c. for use as a icons or thumbnails
   d. to specific dimensions
10. apply transparency to images
11. apply ‘web safe’ palettes of colours to images
12. use file compression to achieve optimal quality of images within constraints eg file size, download times
13. test web pages to ensure:
   a. hyperlinks work correctly
   b. navigation between pages is easy
   c. pages can be viewed on a variety of browsers
   d. text and images can be viewed easily.
Underpinning knowledge

The candidate will be able to:

1. explain the factors that affect the file size of an image:
   a. number of colours
   b. file compression
   c. physical pixel dimensions
   d. file type

2. describe the advantage of ‘transparency’ when applied to an image

3. explain the purpose of using a ‘web safe’ palette of colours

4. Identify ways in which the look and function of web pages might be improved eg
   a. reduce the size of image files to give quicker loading
   b. alter background and font colours to improve contrast
   c. introduce additional hyperlinks to aid navigation
   d. alter layout to reduce clutter.
Unit record sheet

Use this form to track your progress through this unit.

Tick the boxes when you have covered each outcome. When they are all ticked, you are ready to be assessed.
