e-Quals Unit Syllabus

Level 3 Designing and producing spreadsheets to analyse information

7266 - 043
About City & Guilds
City & Guilds is the UK’s leading provider of vocational qualifications, offering over 500 awards across a wide range of industries, and progressing from entry level to the highest levels of professional achievement. With over 8500 centres in 100 countries, City & Guilds is recognised by employers worldwide for providing qualifications that offer proof of the skills they need to get the job done.

City & Guilds Group
The City & Guilds Group includes City & Guilds, ILM (the Institute of Leadership & Management) which provides management qualifications, learning materials and membership services, NPTC which offers land-based qualifications and membership services, and HAB (the Hospitality Awarding Body). City & Guilds also manages the Engineering Council Examinations on behalf of the Engineering Council.

Equal opportunities
City & Guilds fully supports the principle of equal opportunities and we are committed to satisfying this principle in all our activities and published material. A copy of our equal opportunities policy statement Access to assessment and qualifications is available on the City & Guilds website.

Copyright
The content of this document is, unless otherwise indicated, © The City and Guilds of London Institute 2007 and may not be copied, reproduced or distributed without prior written consent.

However, approved City & Guilds centres and learners studying for City & Guilds qualifications may photocopy this document free of charge and/or include a locked PDF version of it on centre intranets on the following conditions:

• centre staff may copy the material only for the purpose of teaching learners working towards a City & Guilds qualification, or for internal administration purposes
• learners may copy the material only for their own use when working towards a City & Guilds qualification
• the Standard Copying Conditions on the City & Guilds website.

Please note: National Occupational Standards are not © The City and Guilds of London Institute. Please check the conditions upon which they may be copied with the relevant Sector Skills Council.

Publications
City & Guilds publications are available on the City & Guilds website or from our Publications Sales department at the address below or by telephoning +44 (0)20 7294 2850 or faxing +44 (0)20 7294 3387.

Every effort has been made to ensure that the information contained in this publication is true and correct at the time of going to press. However, City & Guilds’ products and services are subject to continuous development and improvement and the right is reserved to change products and services from time to time. City & Guilds cannot accept liability for loss or damage arising from the use of information in this publication.

Unit 043  Designing and producing spreadsheets to analyse information

Syllabus Overview

Rationale
The aim of this unit is to provide candidates with an advanced level of skills and knowledge to competently prepare for; perform or supervise the performance of others in a variety of spreadsheet related tasks using Information and Communication Technologies (ICT). Candidates will develop a more in depth understanding of the spreadsheet application and the operating system in everyday usage and the ability to work in a supervisory role performing advanced tasks with a high degree of competence, using ‘problem solving’ skills and giving direction to others.

Learning outcomes
There are six outcomes to this unit. The candidate will be able to:

- Analyse user requirements and design multi-page spreadsheets to meet them
- Input, test and document spreadsheets
- Use standard tools in problem solving
- Import, parse and process data supplied in text files
- Use the range of functions provided in spreadsheets
- Embed macros in spreadsheets

Guided learning hours
It is recommended that 90 hours should be allocated for this unit. This may be on a full time or part time basis.

Connections with other qualifications
This unit contributes towards the knowledge and understanding required for the following qualifications:

**IT Users N/SVQ (iTQ) Level 3**

</tbody>
</table>

Assessment and grading
Assessment will be by means of a set assignment covering both practical activities and underpinning knowledge.
Unit 043  Designing and producing spreadsheets to analyse information

Outcome 1  Analyse user requirements and design multi-page spreadsheets to meet them

Practical activities
The candidate will be able to:

1  Produce specifications for a multi-page spreadsheets from user descriptions by:
   a  analysing data for input into a spreadsheet
      i  input, process and output
      ii  types, formats and accuracy
   b  identifying extra information/labelling required
      i  labels on screen to aid data input
      ii  labels on printouts to clarify data output
   c  planning a spreadsheet structure to meet the specification
      i  data input areas, with validation
      ii  data output area layout
      iii  hidden and/or protected cells
      iv  functions and formulas
      v  graphical charts/graphs, positioning and sizes
   d  choosing suitable presentation for data
   e  constructing suitable formulas for calculated cells
   f  defining the printout required for a given application

2  create test data to include representative, marginal, rogue and extreme values

3  calculate expected values from test data.

Underpinning knowledge
The candidate will be able to:

1  explain the purpose of validation for input data

2  explain the causes of calculation error in a spreadsheet.
Unit 043 Designing and producing spreadsheets to analyse information

Outcome 2 Input, test and document spreadsheets

Practical activities
The candidate will be able to:

1. input multi-page spreadsheets according to a given design and linking across/between various sheets
2. improve and adjust designs to facilitate data input and output
3. manipulate worksheets to improve ease of use eg rename, move, copy, delete
4. test spreadsheets and correct designs or implementation errors
5. create data entry forms to facilitate data input
6. annotate copies of spreadsheets with comments, explanatory graphics & text
7. set and print spreadsheets to show formulas
8. produce user documentation for spreadsheets explaining the spreadsheet’s purpose, how it is to be used, and the action to be taken on errors.

Underpinning knowledge
The candidate will be able to:

1. Use open, close, save, save as, print preview and print functions
2. Identify and manage directory/folders locally and remotely
3. Identify how to combine information including hyperlinks, object linking, embedding
Unit 043  Designing and producing spreadsheets to analyse information
Outcome 3  Use standard tools in problem solving

Practical activities
The candidate will be able to:

1. solve problems with implicit variables eg breakeven points, maxima and minima using available tools (goal-seeker, what IF, solver)
2. use sort facilities to reorder data
3. use grouping facilities to focus on summarising formulas.
Unit 043  Designing and producing spreadsheets to analyse information
Outcome 4 import, parse and process data supplied in text files

Practical activities
The candidate will be able to:
1 import delimited text data into spreadsheets
2 parse delimited text data into columns of numbers and labels
3 parse structured text data into columns of numbers and labels
4 export data in different text formats.

Underpinning knowledge
The candidate will be able to:
1 identify the format of data supplied from other users as text (structured, separated values, separator/delimiter).
Unit 043  Designing and producing spreadsheets to analyse information

Outcome 5  Use the range of functions provided in spreadsheets

Practical activities
The candidate will be able to:
1. use named cells and ranges in functions
2. use mathematical functions, eg PI(), RAND, INT, ROUND, SUM
3. use statistical functions, eg COUNT, AVERAGE, STDEV, VARIANCE, MEDIAN, MODE, PERCENTILE,
4. use financial functions, eg FV, PV, IRR, INTRATE
5. use date and time functions, eg NOW, TODAY, DAY, MONTH, YEAR
6. use look-up functions, eg LOOKUP, VLOOKUP, HLOOKUP, INDEX
7. use logical functions, eg AND, OR, NOT, IF and compounded IF eg IF(AND), IF(OR)
8. use text functions, eg CONCATENATE, LEN, MID, LEFT, RIGHT, TRIM
9. use error functions.

Underpinning knowledge
The candidate will be able to:
1. identify the spreadsheet function most suited to a requirement
2. identify the nature of arguments used in functions.
Unit 043 Designing and producing spreadsheets to analyse information
Outcome 6 Embed macros in spreadsheets

Practical activities
The candidate will be able to:
1. record macros eg select print areas and then print them
2. assign macro's to a keystroke combinations
3. assign macro's to a labelled button or other automating item on a sheet
4. run macros eg to produce hardcopy
5. print macros
6. describe macro usage in user documentation.

Underpinning knowledge
The candidate will be able to:
1. identify legitimate key combinations to activate macros
2. describe the potential danger of a macro virus.
**Unit record sheet**

Use this form to track your progress through this unit.

Tick the boxes when you have covered each outcome. When they are all ticked, you are ready to be assessed.
