Candidate instructions

Time allowance: One and half hours

Assignment set up:

This assignment is made up of **four** tasks

- Task A - Using Formulas
- Task B - Inserting new information into a spreadsheet
- Task C - Sorting a spreadsheet
- Task D - Amending a spreadsheet

Scenario

You work for a small business that sells second-hand records. Your manager has requested that you keep an up to date account of the stock, which arrives on a regular basis. The data is used by both sales staff and the manager. The company policy is to reduce the price of old stock items and also offer a discount off the normal selling price for items over a certain value.

Read all of the instructions carefully and complete the tasks in the order given.

Task A - Using Formulas

- 1 Copy the **album** spreadsheet, provided, into your work area and open it.
- 2 Format columns **F:J** as currency (using local symbol) to 2 decimal places.
- 3 Centre align column **E** (ensure that the column maintains this alignment throughout).
- 4 Format the column titles to bold.
- 5 Replace the hyphen in **J1**, **Sale-Price** to show as an underscore.
- 6 **Mark_Up** is 50% of value in column **F2**, **Cost_Price**. Enter a formula in **G2** which calculates the **Mark_Up**.
- 7 **Base_Price** is **Cost_Price** plus the **Mark_Up**. Enter a formula in **H2** which calculates the **Base_Price**.
- 8 **VAT** is charged at **17.5%** of the **Base_Price**. Enter a formula in **I2** which calculates the **VAT**.
- 9 **Sale_Price** is the **Base_Price** plus the **VAT**. Enter a formula in **J2** which calculates the **Sale_Price**.

10 Replicate your formulas for the rest of the items.

11 Save your spreadsheet as **album1**.
