Centre assessed Marks for Moderation (CMM)

In negotiation with the centre contact, the Moderator will specify the units which will be required for moderation. As far as possible, these units must cover all of the different types of work required by the specification and a wide range of content and skills.

The sample of candidates from each unit specified for moderation will be determined by the Moderator. The sample will consist of the completed work of at least 10 candidates from each of these units (or all candidates, if 10 or fewer).

Centres must submit their centre assessed unit marks to the Moderator prior to moderation, for candidates/units where work is completed, marked and internally standardised. Once the marks have been submitted to the moderator, the candidates must *not* carry out further work in the unit(s).

One form should be submitted by the centre for each unit being moderated in this series

The marks must be listed in rank order, from highest to lowest.
