Dear Andrew

The Engineering Council is the UK regulatory body for the engineering profession, holding the Register of 235,000 professional engineers and technicians.

In addition, the Engineering Council sets and maintains the internationally recognised standards of professional competence and ethics that govern the award and retention of these titles, the UK Standard for Professional Engineering Competence (UK-SPEC).

Licences are granted by the Engineering Council to professional engineering institutions (PEIs), allowing them to assess candidates for inclusion on its Register of professional engineers and technicians, and to approve programmes that contribute to the requirements for registration.

The following qualification is listed on the Engineering Council's public database for technician related qualifications as having been approved by the Institution of Mechanical Engineers who is licensed to do so by the Engineering Council and to our standards.

Qualification Accreditation Number (QAN)	Qualification Title	Approved by (PEI)
600/0882/9	City & Guilds Level 3 Diploma in Engineering (QCF)	IMechE

The qualification is approved as contributing to the requirements for professional registration as an Engineering Technician (EngTech). Holding an approved qualification alone does not guarantee the award of the professional title EngTech. All potential registrants must undergo a Professional Review by their chosen PEI, where their competence and commitment is assessed.

Approved status is for a specific period to a maximum of five years, and is specified for each entry on the database, and re-approval must be sought. Any changes to the qualification by the awarding organisation must be notified to the approving PEI.

For further details about the approved status, please refer to the database:

<http://www.engc.org.uk/education--skills/technicians/database-of-technician-qualifications>

Yours sincerely

recognising professional excellence

About us

The Engineering Council was incorporated by Royal Charter in 1981 and is the UK regulatory body for the engineering profession, holding the Register of 235,000 professional engineers and technicians.

In addition, the Engineering Council sets and maintains the internationally recognised standards of professional competence and ethics that govern the award and retention of these titles, the UK Standard for Professional Engineering Competence (UK-SPEC). Licences are granted by the Engineering Council to professional engineering institutions (PEIs), allowing them to assess candidates for inclusion on its Register of professional engineers and technicians, and to approve programmes that contribute to the requirements for registration.

The Engineering Council's mission is to maintain internationally recognised standards of competence and commitment for the engineering profession, and to license competent institutions to champion the standards. Our vision is that society continues to have confidence and trust in the engineering profession.

The Engineering Council is governed by a 22 member Board of Trustees, who are appointed in accordance with our Bye-Laws. 15 are appointed to represent the professional engineering institutions, and 7 are appointed by the EngineeringUK to represent industry.
