## Contents

1. **Introduction**  
   - Structure  
   
2. **Centre requirements**  
   - Approval  
   - Resource requirements  
   - Candidate entry requirements  

3. **Delivering the qualification**  
   - Initial assessment and induction  
   - Recording documents  

4. **Assessment**  
   - Assessment of the qualification  
   - Time constraints  
   - Opportunities to repeat tasks within an assignment  
   - Grading and marking  

5. **Units**  
   - Unit 201 Manual Metal Arc (MMA) welding  
   - Unit 202 Oxy-acetylene welding  
   - Unit 203 Tungsten Inert Gas (TIG) welding - aluminium  
   - Unit 204 Tungsten Inert Gas (TIG) welding  
   - Unit 205 Metal Inert Gas (MIG) welding  
   - Unit 206 Metal fabrication  
   - Unit 207 Thermal cutting techniques  
   - Unit 208 Flux cored arc welding  

Appendix 1 Relationships to other qualifications  
Appendix 2 Sources of general information
1 Introduction

This document tells you what you need to do to deliver these qualifications:

<table>
<thead>
<tr>
<th>Area</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Who is the qualification for?</td>
<td>The qualifications at Level 2 are designed for those wishing to build on introductory skills acquired at Level 1.</td>
</tr>
<tr>
<td>What does the qualification cover?</td>
<td>They allow candidates to learn, develop and practise the skills required for employment and/or career progression in the engineering sector.</td>
</tr>
</tbody>
</table>
| What opportunities for progression are there? | The qualifications provide knowledge and/or practical skills related to Engineering NVQs at Level 2.  
On completion of these qualifications candidates may progress into employment or to the following City & Guilds qualifications:  
• Level 3 Diploma in Engineering (2850)  
• Level 3 Awards in Advanced Welding Skills (3268-03). |
## Structure

### Awards

To achieve the **Level 2 Award in Manual Metal Arc (MMA) Welding (3268-02)** learners must achieve 7 credits from Unit 201.

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>
<tr>
<td>R/501/9428</td>
<td>201</td>
<td>Manual Metal Arc welding</td>
<td>7</td>
</tr>
</tbody>
</table>

To achieve the **Level 2 Award in Oxy-Acetylene Welding (3268-02)**, learners must achieve 7 credits from Unit 202.

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y/501/9429</td>
<td>202</td>
<td>Oxy-acetylene welding</td>
<td>7</td>
</tr>
</tbody>
</table>

To achieve the **Level 2 Award in Tungsten Inert Gas (TIG) Welding - Aluminium (3268-02)**, learners must achieve 7 credits from Unit 203.

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>
<tr>
<td>L/501/9430</td>
<td>203</td>
<td>Tungsten Inert Gas (TIG) welding - Aluminium</td>
<td>7</td>
</tr>
</tbody>
</table>

To achieve the **Level 2 Award in Tungsten Inert Gas (TIG) Welding (3268-02)** learners must achieve 7 credits from Unit 204.

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>
<tr>
<td>R/501/9431</td>
<td>204</td>
<td>Tungsten Inert Gas welding</td>
<td>7</td>
</tr>
</tbody>
</table>

To achieve the **Level 2 Award in Metal Inert Gas (MIG) Welding (3268-02)**, learners must achieve 7 credits from Unit 205.

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>
<tr>
<td>T/501/9423</td>
<td>205</td>
<td>Metal Inert Gas welding</td>
<td>7</td>
</tr>
</tbody>
</table>
To achieve the **Level 2 Award in Thermal Cutting Techniques (3268-22)**, learners must achieve 7 credits from Unit 207.

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>
<tr>
<td>K/506/6254</td>
<td>207</td>
<td>Thermal cutting techniques</td>
<td>7</td>
</tr>
</tbody>
</table>

To achieve the **Level 2 Award in Metal Fabrication (3268-23)**, learners must achieve 7 credits from Unit 206.

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>
<tr>
<td>D/506/6252</td>
<td>206</td>
<td>Metal fabrication</td>
<td>7</td>
</tr>
</tbody>
</table>

To achieve the **Level 2 Award in Flux-Cored Arc Welding (3268-24)**, learners must achieve 7 credits from Unit 208.

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>
<tr>
<td>M/506/6255</td>
<td>208</td>
<td>Flux cored arc welding</td>
<td>7</td>
</tr>
</tbody>
</table>

**Certificates**

To achieve the **Level 2 Certificate in Welding Skills (3268-20)**, learners must achieve a minimum of 14 credits from Units 201-205.

Please note that learners taking Unit 204 can only claim once (either in low carbon steel or austenitic stainless steel).

<table>
<thead>
<tr>
<th>Unit accreditation number</th>
<th>City &amp; Guilds unit number</th>
<th>Unit title</th>
<th>Credit value</th>
</tr>
</thead>
<tbody>

<td>Metal Inert Gas welding</td>
<td>7</td>
</tr>
</tbody>
</table>
To achieve the **Level 2 Certificate in Welding, Fabrication and Cutting Skills (3268-25)**, learners must achieve 21 credits. 14 credits must come from Units 206 and 207, plus a minimum of 7 credits from 201-205, 208.

Please note that learners taking unit 204 can only claim once (either in low carbon steel or austenitic stainless steel).

### Total Qualification Time

Total Qualification Time (TQT) is the total amount of time, in hours, expected to be spent by a Learner to achieve a qualification. It includes both guided learning hours (which are listed separately) and hours spent in preparation, study and assessment.

<table>
<thead>
<tr>
<th>Title and level</th>

2 Centre requirements

Approval

To offer any of these qualifications new centres will need to gain both centre and qualification approval. Please refer to the Centre guide and Providing City & Guilds Qualifications for further information.

Existing centres already offering 3268-(02 and 20) will be given automatic approval for 3268-24. They will still need to gain qualification approval for 3268-22, 23 and 25.

Centre staff should familiarise themselves with the structure, content and assessment requirements of the qualification before designing a course programme.

Resource requirements

Physical resources
Centres must provide access to sufficient equipment in the centre or workplace to ensure candidates have the opportunity to cover all of the practical activities.

Centre staffing
Centre staff must satisfy the requirements for occupational expertise for this qualification.

These requirements are as follows:

Staff should be technically competent in the areas for which they are delivering training and/or should also have experience of providing training.

Staff delivering these qualifications must be able to demonstrate that they meet the following occupational expertise requirements. They should:

- be occupationally competent or technically knowledgeable in the areas for which they are delivering training and/or have experience of providing training. This knowledge must be to the same level as the training being delivered
- have recent relevant experience in the specific area they will be assessing
- have credible experience of providing training.

Centre staff may undertake more than one role, eg tutor and assessor or internal verifier, but cannot internally verify their own assessments.
Assessors and internal verifiers
While the Assessor/Verifier (A/V) units are valued as qualifications for centre staff, they are not currently a requirement for these qualifications.

Continuing professional development (CPD)
Centres must support their staff to ensure that they have current knowledge of the occupational area, that delivery, mentoring, training, assessment and verification is in line with best practice, and that it takes account of any national or legislative developments.

Candidate entry requirements
Candidates should not be entered for a qualification of the same type, content and level as that of a qualification they already hold.

There are no formal entry requirements for candidates undertaking these qualifications. However, centres must ensure that candidates have the potential and opportunity to successfully gain the qualification.

Age restrictions
These qualifications are not approved for use by candidates under the age of 14, and City & Guilds cannot accept any registrations for candidates in this age group.
3 Delivering the qualification

Initial assessment and induction
An initial assessment of each candidate should be made before the start of their programme to identify:

- if the candidate has any specific training needs
- support and guidance they may need when working towards their qualification
- any units they have already completed, or credit they have accumulated which is relevant to the qualification
- the appropriate type and level of qualification.

We recommend that centres provide an induction programme so the candidate fully understands the requirements of the qualification, their responsibilities as a candidate, and the responsibilities of the centre. This information can be recorded on a learning contract.

Recording documents
Candidates and centres may decide to use a paper-based or electronic method of recording evidence.

City & Guilds endorses several ePortfolio systems, including our own, Learning Assistant, an easy-to-use and secure online tool to support and evidence learners’ progress towards achieving qualifications. Further details are available at: www.cityandguilds.com/eportfolios.

City & Guilds has developed a set of Recording forms including examples of completed forms, for new and existing centres to use as appropriate. Recording forms are available on the City & Guilds website.

Although new centres are expected to use these forms, centres may devise or customise alternative forms, which must be approved for use by the External Verifier, before they are used by candidates and assessors at the centre. Amendable (MS Word) versions of the forms are available on the City & Guilds website.
4 Assessment

Assessment of the qualification
For each qualification candidates will be required to complete the following assessments:

- **Five practical** assignments and one oral knowledge test for each welding unit.
- **Three practical** assignments and one oral knowledge test for the **metal fabrication** unit.
- **Three practical** assignments and one oral knowledge test for the **thermal cutting** unit.

Full assignment details can be found in the Practical Assessment Handbooks which are available on the City & Guilds website.

Time constraints
Recommended time allowances have been allocated for each assessment however, this does not form part of the marking criteria and is for guidance purposes only.

Should Assessors find that the recommended time for an assignment is considerably at a variance with the time taken by candidates, they should contact their External Verifier in the first instance, who will advise accordingly and feed this information back to City & Guilds where appropriate.

Opportunities to repeat tasks within an assignment
If a candidate fails a task, they may repeat it. Assessors, however, should allow **seven** days before a candidate repeats a task.

If the failed task is built upon the results of a previous task, this may also need to be repeated.

Grading and marking
Grading of assignments for these qualifications is pass or fail.

Grading is based on essential and desirable criteria for each task. Each marking criterion should be marked with a ‘P’ to indicate achievement and a cross ‘X’ if it has not been achieved. In the event that a marking criterion is not applicable, it should be crossed through and marked ‘not appropriate’ and a note made of the reason(s) why. Candidates must achieve all essential and a prescribed number of desirable criteria for the award of a Pass.

Detailed marking and grading criteria are provided in the Practical Assessment Handbooks.

Assignments are internally marked and graded Pass/Fail.
Simulation is not permitted for the assessment of these qualifications.

The Practical Assessment Handbooks for these qualifications contain an ‘Evidence Recording Sheet’.

City & Guilds has developed a set of Recording forms including examples of completed forms, for new and existing centres to use as appropriate. **Recording forms** are available on the City & Guilds website.

Although it is expected that new centres will use these forms, centres may devise or customise alternative forms, which must be approved for use by the External Verifier, before they are used by candidates and assessors at the centre.

Amendable (MS Word) versions of the forms are available on the City & Guilds website.

Individual Practical Assessment Handbooks have been produced for each unit available at Level 2. These can be found on the City & Guilds website.
5 Units

Structure of units
These units each have the following:
- City & Guilds reference number
- unit accreditation number (UAN)
- title
- level
- credit value
- guided learning hours
- unit aim
- relationship to NOS, other qualifications and frameworks
- information on assessment
- learning outcomes which are comprised of a number of assessment criteria
- notes for guidance.
### Unit 201 Manual Metal Arc welding

<table>
<thead>
<tr>

<td>60</td>
</tr>
<tr>
<td>Relationship to NOS:</td>
<td>This unit is linked to the NVQ Level 2 in Fabrication and welding engineering—joining materials by the manual metal arc welding process.</td>
</tr>
</tbody>
</table>

**Aim:** The unit is designed to enable candidates to demonstrate welding skills typically found in industry and associated underpinning knowledge to a level that will enable them to complete welded joints in standard welding positions and prepare them for undertaking qualifications at NVQ level 2 and at level 3.

### Learning outcome

The learner will:

1. produce a butt weld in the PA flat position

### Assessment criteria

The learner can:

1.1 use manual metal arc welding techniques safely to produce a butt weld in standard positions

1.2 check joints are aligned and welds are sound and of uniform appearance

1.3 identify defects in the weld using visual checks and destructive testing method

### Learning outcome

The learner will:

2. produce a multiple-run tee fillet in the PB horizontal/vertical position

### Assessment criteria

The learner can:

2.1 add some criteria to this list

2.2 demonstrate personal responsibility, with some sub-text

2.3 identify defects in the weld using visual checks and destructive testing method

| The learner will:                                                               | The learner can:                                                                                                                                                                                                     |
| 5. produce a brazed corner joint in the PA flat position                         | 5.1 use Oxy Acetylene welding techniques safely to produce a brazed corner joint in standard welding positions  
5.2 check joints are aligned and welds are sound and of uniform appearance  
5.3 identify defects in the weld using visual checks and destructive testing methods |
|                                                                                |                                                                                                                                                                                                                  |
Learning outcome

The learner will:

6. know the Process and Health & Safety requirements for Oxy-acetylene welding

Assessment criteria

The learner can:

6.1 explain the health and safety risks associated with oxy-acetylene welding
   - precautions

6.2 explain methods of managing welding fume hazards
   - types
   - effects
   - precautions

6.3 explain the personal protective equipment (PPE) and clothing and respiratory protective equipment (RPE) requirements for oxy-acetylene welding

6.4 explain the types of fire extinguisher for use with electric arc welding
   - colour
   - type
   - applications

6.5 explain the storing handling and safe use of compressed gas cylinders

6.6 explain the safe use and assembly of oxy-acetylene welding gas hoses and connections

6.7 define the welding specific requirements for oxy-acetylene welding

6.8 describe the correct procedure for oxy-acetylene torch ignition and extinguishing

6.9 describe the slope and tilt angles for the torch and filler rod when using the leftward welding technique

6.10 describe pre welding/brazing activities
   - cleaning

6.11 describe post welding/brazing activities
   - cleaning
   - visual inspection

6.12 define the factors that influence weld quality

6.13 define workshop-based destructive tests
   - bend (root face or side – accept any one bend test answer)
   - nick-break (fracture)
   - macro-examination cupping test
Unit 203  Tungsten Inert Gas (TIG) welding - Aluminium

Relationship to NOS: This unit is linked to the NVQ Level 2 in Fabrication and welding engineering – joining materials by the manual TIG and plasma arc welding process.

Aim: The unit is designed to enable candidates to demonstrate welding skills typically found in industry and associated underpinning knowledge to a level that will enable them to complete welded joints in standard welding positions and prepare them for undertaking qualifications at NVQ level 2 and at level 3.

Learning outcome

The learner will:
1. produce a butt weld in the PA flat position

Assessment criteria

The learner can:
1.1 use tungsten inert gas welding techniques safely to produce a butt weld in standard positions
1.2 check joints are aligned and welds are sound and of uniform appearance
1.3 identify defects in the weld using visual checks and destructive testing method

Learning outcome

The learner will:
2. produce a lap fillet weld in PB horizontal/vertical position

Assessment criteria

The learner can:
2.1 use tungsten inert gas welding techniques safely to produce a lap fillet weld in standard positions
2.2 check joints are aligned and welds are sound and of uniform appearance
2.3 identify defects in the weld using visual checks and destructive testing method

### Learning outcome

The learner will:

6. know the Process and Health & Safety requirements for Tungsten Inert Gas (aluminium) welding

### Assessment criteria

The learner can:

6.1 define the health and safety risks associated with TIG welding
   - precautions
   - high frequency spark
   - using etching solutions

6.2 define hazards associated with arc radiation
   - types
   - effects
   - precautions

6.3 define the storing handling and safe use of compressed inert gas cylinders

6.4 define the welding specific requirements for TIG welding

6.5 define the types of power source used for TIG welding
   - transformer/rectifier
   - generator
   - inverter

6.6 define the types of current for the process
   - applications for d.c.
   - applications for a.c.
   - applications for electrodes

6.7 define methods of arc ignition
   - touch or scratch
   - high frequency or HF
   - lift

6.8 define the function of slope in/out controls

6.9 define the construction of a TIG welding torch
   - body/handle
   - head
   - connections
   - contactor/switch
   - back cap
   - nozzle
   - collet
   - collet holder
   - electrode
   - gas lens

6.10 define types of shielding gas / gas mixtures used for TIG welding
   - argon
   - helium
   - argon/hydrogen (H2) for austenitic stainless steels
   - argon/helium
   - helium/argon
• oxygen-free nitrogen for copper
• argon/nitrogen for copper

6.11 define gas output control
• pressure regulation
• flow rate

6.12 select methods of distortion control
• welding in sequence
• tacking
• pre-setting/cambering/bending
• restraint
• pre-heating
• joint design

6.13 define maintenance requirements
• electrode

6.14 select types of welded joint
• lap
• butt
• tee
• corner

6.15 select types of weld

6.16 select welding positions in accordance with EN ISO 6947 and ASME IX

Unit 205  Metal Inert Gas welding

UAN: T/501/9423
Level: 2
Credit value: 7
GLH: 60
Relationship to NOS: This unit is linked to the NVQ Level 2 in Fabrication and welding engineering—joining materials by the manual MIG/MAG and other continuous wire welding processes.

Aim: The unit is designed to enable candidates to demonstrate welding skills typically found in industry and associated underpinning knowledge to a level that will enable them to complete welded joints in standard welding positions and prepare them for undertaking qualifications at NVQ level 2 and at level 3.

Learning outcome
The learner will:
1. produce a butt weld in the PA flat position

Assessment criteria
The learner can:
1.1 use metal inert gas welding techniques safely to produce a butt weld in standard positions
1.2 check joints are aligned and welds are sound and of uniform appearance
1.3 identify defects in the weld using visual checks and destructive testing method

Learning outcome
The learner will:
2. produce a lap fillet weld in the vertical position

Assessment criteria
The learner can:
2.1 use metal inert gas welding techniques safely to produce a lap fillet weld in standard positions
2.2 check joints are aligned and welds are sound and of uniform appearance
2.3 identify defects in the weld using visual checks and destructive testing method

### Learning outcome
The learner will:

6. know the Process and Health & Safety requirements for Metal Inert Gas (MIG) welding

### Assessment criteria
The learner can:

6.1 define the health and safety risks associated with MIG welding
   - precautions

6.2 define the types of fire extinguisher for use with electric arc welding
   - colour
   - type
   - applications

6.3 define methods of managing welding fume hazards
   - types
   - effects
   - precautions

6.4 define hazards associated with arc radiation
   - types
   - effects
   - precautions

6.5 define the welding specific requirements for MIG welding

6.6 define the types of power source used for TIG welding
   - transformer/rectifier
   - generator
   - inverter

6.7 define types of induction control used in MIG welding systems
   - fixed
   - stepped
   - variable

6.8 define the construction of a MIG welding gun/torch
   - body/handle
   - neck
   - connections
   - contactor/switch
   - nozzle
   - gas diffuser/ports
   - electrode wire
   - contact tip/tube

6.9 define types of shielding gas mixtures used commonly for MIG welding steels
   - argon/carbon dioxide (CO2)
   - carbon dioxide (CO2)
   - argon/oxygen (O2)/carbon dioxide (CO2)
   - argon/oxygen (O2)
   - argon/helium/oxygen (O2)/carbon dioxide (CO2)
6.10 define gas output control
   - pressure regulation
   - flow rate

6.11 distinguish between modes of metal transfer
   - dip/short-circuiting
   - globular
   - spray
   - pulse

6.12 define workshop-based destructive tests
   - bend (root face or side – accept any one bend test answer)
   - nick-break (fracture)
   - macro-examination
   - cupping test

6.13 select types of welded joint
   - lap
   - butt
   - tee
   - corner

6.14 select types of weld
   - welding symbols

6.15 select welding positions accordance with EN ISO 6947 and ASME IX

</tbody>
</table>

Learning outcome
The learner will:
1. be able to measure and mark out in preparation for metal fabrication

Assessment criteria
The learner can:
1.1 select and use measuring and marking out equipment
1.2 mark out a range of profiles within tolerance

Range
Equipment: dividers, square, scriber, protractor, straight edge, tape measure, rule, centre punch, dot punch, marking medium, Vernier callipers, use of templates
Profiles: circular, rectangular, radial, irregular, triangular
Tolerance: +/- 2 mm

Learning outcome
The learner will:
2. be able to set up, prepare and shut down equipment for metal cutting, forming and joining

Assessment criteria
The learner can:
2.1 select and set up metal fabrication equipment and tools
2.2 check metal fabrication equipment and tools are safe for use
2.3 safely shut down selected equipment and safely store away tools
**Range**

**Equipment:**
Cutting: guillotine (treadle or powered), bench guillotine, pedestal drill
Forming: folders, bending rolls, fly press
Joining: spot welder, TIG welder, MIG welder

**Tools:** hand drills, hammers, mallets, stakes, tin snips, electric nibblers, electric shears, riveters, de-burring, files, sanders, hand punches

**Safe for use:** electrical checks, visual equipment checks

---

**Learning outcome**

The learner will:
3. be able to produce a selection of fabricated components

**Assessment criteria**

The learner can:
3.1 produce fabricated **components** with various **features**
3.2 check completed work meets the required standard and is within **tolerance**

---

**Range**

**Components:** boxes, trays, cylinders, cones

**Features:** holes, bends, flanges, radii, cut outs, riveted, spot welded, mechanical fasteners, welded joints

**Tolerance:** +/- 2 mm

---

**Learning outcome**

The learner will:
4. be able to join metal using a range of techniques

**Assessment criteria**

The learner can:
4.1 produce metal fabrications using **mechanical jointing**
4.2 produce metal fabrications with **fusion welded joints**
4.3 produce metal fabrications using **adhesive joints**

---

**Range**

**Mechanical jointing:** riveting (hollow and solid), screws,

**Fusion welding:** spot welds, TIG welding, MIG welding

**Adhesive joints:** two-part epoxy
### Learning outcome

The learner will:

5. know the process requirement for metal fabrication

### Assessment criteria

The learner can:

5.1 identify the health and safety hazards associated with metal fabrication
5.2 identify the main health and safety requirements for fabrication
5.3 identify powered fabricating equipment and tools
5.4 outline the basic principles of metal cutting
5.5 outline the basic principles of metal forming
5.6 outline the basic principles of mechanical joining
5.7 outline the basic principles of fusion welding
5.8 outline the basic principles of adhesive joining
5.9 state the cause of metal fabrication defects
5.10 describe the safe shut down of the selected equipment
5.11 describe the procedures for ensuring tools are safely stored away

### Range

**Hazards:** burns, fire, trips and falls, sharp edges, manual handling, electrical, fumes, welding radiation

**Health and safety requirements:** eye protection, personal protective equipment, electrical safety, equipment safety, fire extinguishers, safety signs

**Equipment:**

Cutting: guillotine (treadle or powered), bench guillotine, pedestal drill
Forming: folders, bending rolls, fly press
Joining: spot welder, TIG welder, MIG welder

**Tools:** hand drills, hammers, mallets, stakes, tin snips, electric nibblers, electric shears, riveters, de-burring, files, sanders, hand punches, marking out tools

**Cutting principles:** cutting by shear, chip forming, thermal (plasma)

**Forming principles:** bend allowances, rolling allowances, pre-setting, springback

**Mechanical and adhesive joining principles:** riveting allowances, resistance welding, TIG welding, MIG welding, shielding gases, adhesives

**Mechanical joining:** riveting (hollow and solid), screws

**Fusion welding:** spot welds, TIG welding, MIG welding

**Adhesive:** two-part epoxy

**Defects:** surface tooling marks, burrs, lack of fusion, misshaped holes
Unit 206  Metal fabrication

Evidence requirements
Please refer to the Practical Assessment Handbook for full details of evidence requirements for this unit.

Unit Range:
Profiles are identified within the range and are assessed by tasks in the Practical Assessment Handbook.

Guidance:
1. Material types to be limited to low carbon steel including galvanised sheet
2. The three practical assessments are to be carried out on 0.8 to 3 mm thick materials
3. Acceptance to be assessed by visual inspection and measurement of the completed component
4. Knowledge questions consist of 20 set oral questions for each qualification based on qualification handbook knowledge requirements:
   • Eight metal fabrication generic health and safety questions (pass mark = 8/8)
   • Twelve metal fabrication process specific questions (pass mark = 8/12)
5. Pattern development is not a requirement of this unit. Templates, where appropriate, can be supplied
6. Demonstrate safe working practices whilst performing activities.
Unit 207  Thermal cutting techniques

UAN: K/506/6254
Level: 2
Credit value: 7
GLH: 41
Relationship to NOS: This unit is linked to the NVQ Level 2 in Fabrication and welding engineering.

Aim: The unit is designed to enable candidates to demonstrate thermal cutting skills typically found in industry and associated underpinning knowledge to a level that will enable them to complete welded joints in standard welding positions and prepare them for undertaking qualifications at NVQ level 2 and at level 3.

Learning outcome
The learner will:
1. be able to measure and mark out in preparation for thermal cutting

Assessment criteria
The learner can:
1.1 select and use equipment for measuring and marking out
1.2 mark out a range of profiles within tolerance

Range
Equipment: rules, squares, dividers, protractors, centre punch, dot punch, scribers, chalk
Profiles: rectangular, circular, holes, bevels, radius (internal and external), irregular profiles
Tolerance: +/- 2 mm
Learning outcome
The learner will:
2. be able to set up, prepare and shut down equipment for thermal cutting

Assessment criteria
The learner can:
2.1 select and set up the appropriate thermal cutting equipment
2.2 check the equipment selected is safe to use
2.3 safely shut down the selected equipment

Range
Thermal cutting equipment:
Oxy-fuel gas cutting: equipment assembly, safe storage of cylinders, types of gasses, cylinders types and identification, flashback arrestors, hose types and identification, connector types and identification, hose check valves, cutting torches, torch cutting guides, nozzles, portable track cutting machines
Plasma cutting: equipment, compressed gas supply, types of gasses, hazards from hot metal/sparks, cutting guides, nozzles
Safe to use: electrical connections, earthing, gas leaks, safe storage

Learning outcome
The learner will:
3. be able to make a selection of cuts using thermal cutting techniques

Assessment criteria
The learner can:
3.1 produce cuts in different positions and profiles
3.2 produce cuts in a range of material forms
3.3 check completed work meets the required standard and is within tolerance

Range
Positions: flat (down-hand)
Profiles: rectangular, circular, holes, bevels, radius (internal and external), irregular profiles, straight lines using track cutting machines
Material forms: plate, rolled sections, pipes
Tolerance: +/- 2 mm

Unit 207  Thermal cutting techniques

Evidence requirements
Please refer to the Practical Assessment Handbook for full details of evidence requirements for this unit.

Unit Range:
Profiles are identified within the range and are assessed by tasks in the Practical Assessment Handbook.

Guidance:
1. Material limited to a thickness range of 1.6 – 12 mm
2. Low carbon steel is the recommended material for this unit, but the use of other materials or a mix of materials is acceptable
3. Material forms identified within the Practical Assessment Handbook
4. Acceptance to be assessed by visual inspection and measurement of the completed component
5. Knowledge questions consist of 20 set oral questions for each qualification based on qualification handbook knowledge requirements:
   - Eight thermal cutting generic health and safety questions (pass mark = 8/8)
   - Twelve thermal cutting process specific questions (pass mark = 8/12)
6. Demonstrate safe working practices at all times whilst performing activities.

**Relationship to NOS:** This unit is linked to the NVQ Level 2 in Fabrication and welding engineering.

**Aim:** The unit is designed to enable candidates to demonstrate welding skills typically found in industry and associated underpinning knowledge to a level that will enable them to complete welded joints in standard welding positions and prepare them for undertaking qualifications at NVQ level 2 and at level 3.

### Learning outcome

The learner will:

1. be able to prepare joints for flux cored arc welding

### Assessment criteria

The learner can:

1.1 prepare plate edges for flux cored arc welding using **hand tools** and **ancillary equipment**

1.2 set up and tack **joints** for flux cored arc welding

### Range

**Hand tools:** files, grinders, wire brushes

**Ancillary equipment:** edge preparation equipment, jigs, magnets

**Joints:** tee, lap, corner, butt
### Learning outcome
The learner will:

2. be able to set up, prepare and shut down equipment used for flux cored arc welding

### Assessment criteria
The learner can:

2.1 **check equipment** is safe to use  
2.2 **set up** flux cored arc welding equipment for safe use  
2.3 **shut down** flux cored arc welding equipment after use

### Range
- **Check equipment**: electrical checks, risk assessments, gas leaks, good housekeeping  
- **Set up**: polarity, voltages, wire feed speed, gas flow rates

### Learning outcome
The learner will:

3. be able to produce flux cored arc welded joints to the required standard

### Assessment criteria
The learner can:

3.1 **produce flux cored arc welded joints** in standard **positions**  
3.2 **inspect** flux cored arc welded joints to ensure required standard has been attained

### Range
- **Joints**: tee, lap, corner, butt  
- **Positions**: PA (flat), PB (horizontal/vertical), PF (vertical up)  
- **Inspection**:
  - Non-destructive: visual  
  - Destructive: bend, nick break, macro-etch, cupping test
Learning outcome
The learner will:
4. know the process requirements for flux cored arc welding

Assessment criteria
The learner can:
4.1 identify health and safety hazards associated with flux cored arc welding
4.2 identify the main health and safety requirements for flux cored arc welding
4.3 describe the basic principles of flux cored arc welding
4.4 identify main equipment for flux cored arc welding
4.5 describe the process variables and consumables for flux cored arc welding
4.6 identify welding positions as defined in the relative standards
4.7 describe workshop inspection methods
4.8 state the cause of and prevention of flux cored arc welded joint defects
4.9 describe the shutting down procedure for flux cored arc welding equipment

Range
Hazards: radiation, heat, fumes, electricity, slips, trips and falls
Health & safety requirements: eye protection, personal protective equipment, fire extinguishers, safety signs, extraction and ventilation, electrical protection
Principles: metal transfer, electrical polarity, shielding gas control
Equipment: power sources, torches, wire feeders, gas regulators, gas flow meters
Process variables: voltage, wire feed, gas flow, induction
Consumables: shielding gases, electrode wire
Positions: PA (flat), PB (horizontal/vertical), PF (vertical up)
Inspection methods:
Non-destructive: visual
Destructive: bend, nick break, macro-etch, cupping test
Defects: distortion, cracks, porosity, undercut, lack of fusion, lack of penetration, slag inclusions, spatter
Unit 208  Flux cored arc welding

Evidence requirements
Please refer to the Practical Assessment Handbook for full details of evidence requirements for this unit.

Unit Range:
Materials and joint types are identified within the range and are assessed by tasks in the Practical Assessment Handbook.

Guidance:
1. All plate/sheet sizes to be 200 mm long minimum by nominally 50 mm wide
2. The five practical assessments are to be carried out on 0.8 to 3 mm thick or 5 to 10 mm thick materials
3. Acceptance to be assessed by inspection methods identified within the Practical Assessment Handbook
4. Knowledge questions consist of 20 set oral questions for each qualification based on qualification handbook knowledge requirements:
   - Eight Flux Cored Arc Welding generic health and safety questions (pass mark = 8/8)
   - Twelve Flux Cored Arc Welding specific questions (pass mark = 8/12)
5. Demonstrate safe working practices whilst performing activities.
Appendix 1  Relationships to other qualifications

Literacy, language, numeracy and ICT skills development
These qualifications can develop skills that can be used in the following qualifications:

- Functional Skills (England) – see www.cityandguilds.com/functionalskills
- Essential Skills (Northern Ireland) – see www.cityandguilds.com/essentialskillsni
- Essential Skills Wales – see www.cityandguilds.com/esw
Appendix 2  Sources of general information

The following documents contain essential information for centres delivering City & Guilds qualifications. They should be referred to in conjunction with this handbook. To download the documents and to find other useful documents, go to the Centres and Training Providers homepage on www.cityandguilds.com.

Centre Manual - Supporting Customer Excellence contains detailed information about the processes which must be followed and requirements which must be met for a centre to achieve ‘approved centre’ status, or to offer a particular qualification, as well as updates and good practice exemplars for City & Guilds assessment and policy issues. Specifically, the document includes sections on:

- The centre and qualification approval process
- Assessment, internal quality assurance and examination roles at the centre
- Registration and certification of candidates
- Non-compliance
- Complaints and appeals
- Equal opportunities
- Data protection
- Management systems
- Maintaining records
- Assessment
- Internal quality assurance
- External quality assurance.

Our Quality Assurance Requirements encompasses all of the relevant requirements of key regulatory documents such as:

- SQA Awarding Body Criteria
- NVQ Code of Practice

and sets out the criteria that centres should adhere to pre and post centre and qualification approval.
Access to Assessment & Qualifications provides full details of the arrangements that may be made to facilitate access to assessments and qualifications for candidates who are eligible for adjustments in assessment.

The centre homepage section of the City & Guilds website also contains useful information on such things as:

- **Walled Garden**: how to register and certificate candidates online
- **Events**: dates and information on the latest Centre events
- **Online assessment**: how to register for e-assessments.

Centre Guide – Delivering International Qualifications contains detailed information about the processes which must be followed and requirements which must be met for a centre to achieve ‘approved centre’ status, or to offer a particular qualification. Specifically, the document includes sections on:

- The centre and qualification approval process and forms
- Assessment, verification and examination roles at the centre
- Registration and certification of candidates
- Non-compliance
- Complaints and appeals
- Equal opportunities
- Data protection
- Frequently asked questions.

About City & Guilds
As the UK’s leading vocational education organisation, City & Guilds is leading the talent revolution by inspiring people to unlock their potential and develop their skills. We offer over 500 qualifications across 28 industries through 8500 centres worldwide and award around two million certificates every year. City & Guilds is recognised and respected by employers across the world as a sign of quality and exceptional training.

City & Guilds Group
The City & Guilds Group operates from three major hubs: London (servicing Europe, the Caribbean and Americas), Johannesburg (servicing Africa), and Singapore (servicing Asia, Australia and New Zealand). The Group also includes the Institute of Leadership & Management (management and leadership qualifications), City & Guilds Licence to Practice (land-based qualifications), the Centre for Skills Development (CSD works to improve the policy and practice of vocational education and training worldwide) and Learning Assistant (an online e-portfolio).
