14 Angela is 28 years old. She has had several low-paid unskilled jobs since leaving school. She now has a sedentary job as a machinist in a clothing factory and works long hours.

She drinks several cups of coffee during her working day and likes to buy a takeaway meal on the way home because she is too tired to cook. Angela has been experiencing abdominal pain and bloating over the last few weeks and has been diagnosed with a digestive disorder.

Discuss the considerations healthcare professionals would need to take into account to help improve Angela's health and wellbeing. (12 marks)
