13	Describe how statistical information on adolescent health and wellbeing can be used by service providers to improve outcomes in adulthood.	(4 marks)
14	Describe what is meant by the term 'value consensus'.	(3 marks)

3625-534

15	Explain the impact of two health and social care issues that are prevalent in
	the 21st Century.

(4 marks)

16	Robert is 68 years old and has been diagnosed with a progressive degenerative disease of the nervous system, which affects his mobility and has diminished his sense of smell and taste. His partner Carol provides care support to him for daily living tasks. Carol and Robert attend health care appointments where the progression of the disease is monitored. At the last appointment Robert explained that he was feeling depressed and isolated. Carol also stated that she is finding it difficult to cope with the situation.	
	Discuss the psychological and sociological theories and approaches staff should consider when caring for and supporting Robert and Carol.	(12 marks)
