

Level 3 Advanced Technical Stranded Diplomation
Agriculture (720) (Farm mechanisation) (0171 007) mechanisation (0171007) Synoptic Assignment – 2019 – v1.1

PAST ASSIGNMENT

General guidance for candidates

General guidance

This is a formal assessment that you will be marked and graded on. You will be marked on the auality and accuracy of your practical performance and any written work you produce. It is therefore important that you carry your work out to the SMEN highest standard you can. You should show how well you know and understand the subject and how you are able to use your knowledge and skills together to complete the tasks.

Plagiarism

This is an assessment of your abilities, so the work must be all your own war carried out under the conditions stated. You will be asked to sign a ded you have not had any outside help with the assessment.

Your tutor is allowed to give you some help understanding the as instructions if necessary, but they will record any other guidance will be taken into account during marking.

Plagiarism is the failure to acknowledge sources proper A/or the submission of another person's work as if it were your own. Plagiarism is not allowed in this assignment.

Where research is allowed, your tutor must be able to identify which work you have done yourself, and what you have found from other sources. It is therefore important to make sure you acknowledge all sources and clearly reference any information taken from them.

Timings and planning

Where you have to plan your time, you should take care to make sure you have divided the time available between tasks appropriately. In some assignments, there are specified timings which cannot be changed and which need to be taken into account. You should the k your plan is appropriate with your tutor.

If you have a good reason for needing more time, you will need to explain the reasons to your the and agree a new deadline date. Changes to dates will be at the discretion the tutor, and they may not mark work that is handed in after the aareed de

Safety

ust always work safely, in particular while you are carrying out practical tasks.

You must always follow any relevant Health and Safety regulations and codes of oractice.

If your tutor sees you working in a way that is unsafe for yourself or others, they will ask you to stop immediately, and tell you why. Your tutor will not be able to reassess you until they are sure you are ready for assessment and can work safely.

Presentation of work

Presentation of work must be neat and appropriate to the task.

You should make sure that each piece of evidence including any proformas eg record/job cards are clearly labelled with your name and the assignment reference.

All electronic files must be given a clear file name that allows your tutor to identify it as your work. Written work eg reports may be word processed but this is not a

PAST ASSIGNMENT 2019). DO NOTUSE FOR LIVE ASSESSMENT

Assignment Brief

You have recently gained employment as a Machinery Operative on an arable farm. The farmer is very passionate about safe, efficient and accurate work. You will be the main tractor driver and also be responsible for the routine maintenance of tractors and machines.

calibration and accurate operation of a tractor and fertiliser spreader. The farmer has instructed that you carry out a risk assessment.

efficiency and accuracy of fertiliser placement, you will submit a report.

A Rough Terrain Telescopic Fork Lift Truck will be used to load the fertilise You will need to carry out pre-start and routine maintenance che operate the machine.

You will also be required to demonstrate the safe calibration a hydraulic boom sprayer and discuss how developments in application to Hology have impacted on operator safety and environmental protection.

The farm has a contracting business which spreads muck and slurry for local farmers.

In advance of the assessment you may research recent developments in pesticide application technology. This should be have sed into your tutor prior to the assessment along with any images you have selected. Your tutor will provide you with your notes and images at the of the assessment. PAST ASSIGNMENT (2019)

Tasks

Task 1a

Set up a fertiliser spreader in the field and spread artificial fertiliser accurately on a piece of land to include at least four turns.

Conditions of assessment:

When operating machinery, if you are working in a way that risks the safety yourself or others, you will be stopped. If your tutor decides that it is unsafe continue working, you will be asked to leave the assessment area.

You must carry out the task on your own, under supervised condition

Additional evidence of your performance that must be captured for marking:

Your tutor's observation notes relating to your machine set up and operation of a fertiliser spreader

Task 1b

Produce a written report, discussing the variables that could have affected the accuracy of your fertiliser placement, st best practice in **each** case.

Conditions of assessment:

You must produce the report on yo own, under supervised conditions.

What you must produce form

ASTASSIGNMENT A written repor

Task 2

Undertake pre-start and routine maintenance checks on a Rough Terrain Telescopic Forklift truck (RTFL). Record your findings in a checklist.

Complete a written risk assessment for the operation of the forklift.

SESSNEN Use a Rough Terrain Telescopic Forklift truck (RTFL) to safely lift and manoeuvre two different items.

What you must produce for assessment

Your completed checklist and risk assessment.

Conditions of assessment:

When operating machinery, if you are working in a way that risks the yourself or others, you will be stopped. If your tutor decides that it is unsafe for you to continue working, you will be asked to leave the assessmer

You must carry out the task on your own, under supervise

Additional evidence of your performance that mutto captured for marking:

Your tutor's observation notes relating to our preparation and operation of the Rough Terrain Telescopic Forklift Irro

Task 3

Calibrate a hydraulic boom spraye selecting the correct sized nozzles, pressure settings and spray quality. You must wear appropriate Personal Protective Equipment (PPE).

Your tutor will provide:

- Forward speed
- A pesticide (

- afetv data sheet

Condition of assessment:

Wperoperating machinery, if you are working in a way that risks the safety of elf or others, you will be stopped. If your tutor decides that it is unsafe for you to ontinue working, you will be asked to leave the assessment area.

You must carry out the task on your own, under supervised conditions.

Additional evidence of your performance that must be captured for marking:

Your tutor's observation notes relating to your safe calibration of a hydraulic boom sprayer, correct sized nozzles, pressure settings, spray quality and PPE.

Task 4

Using your research notes, produce a written report discussing how recent developments in pesticide application technology have impacted the agricultural

Conditions of assessment:

You must produce the report on your own, under supervised conditions. You can refer to the notes and images you handed into your tutor.

What you must produce for marking:

A written report
Your research notes and images

Task 5

Spread farm yard manuse (EVAL)

Spread farm yard manure (FYM) or slurry accurately on a Your tutor will provide you with the application rate

Conditions of access least two turns.

When operating machinery, if you are working in a way that risks the safety of yourself or others, you will be stopped. If your tutor decides that it is unsafe for you to continue working, you will be asked to leave the assessment area.

You must carry out the task on your own, under supervised conditions.

Additional evidence of your performance that must be captured for marking:

Your tutor's observation notes relating to your machine set up and operation kspreader.

Task instructions for centres

Resources

Learners must have access to a suitable range of resources to carry out the tasks and to have the opportunity to choose materials demonstrating the ability to select ESSIME from a range of appropriate materials. Learners must have access to the manufacturer's handbook.

Task specific guidance

This guidance should not be shared with learners.

Learners should be given the assignment brief only, one week before to planned assessments. It is recommended that where possible all tag assignment are completed within 4 teaching weeks of the learn brief.

Each task should be given to the learner at the start of the advance. The tasks do not need to be completed on the same day, nor do they need to be completed in order. It is best practice cave no more than two days between linked tasks (1a, 1b).

Task 1a

arner to set the height of the machine An opportunity should be created for eq in the field.

The use of alternative materials for ration of the fertiliser spreader may be used. This can be carried out on any type of surface.

Task 1b

The report should be d in one sitting. Learners are allowed to bring their notes into the asses

Task 2

e required to use the Rough Terrain Telescopic Fork Lift Truck for and must only demonstrate the correct and safe operation of the

naintenance must include checking the function of the safety overload and tyre pressures.

eration of the RTFL should include at least 1 right angle turn whilst reversing. Suitable attachments from which 2 could be used would be bale spike, pallet fork, muck fork, bucket.

Tutors should provide a risk assessment template and a maintenance checklist for learners to complete. These can be centre devised or industry standard.

Task 3

A suitable pesticide label should be provided to the learners to allow them to choose the correct spray nozzle, spray quality, water application rate/ha. The material data safety sheet must be provided to allow the learner to select the correct PPE to be worn.

Task 4

Learners should be given the assignment brief in advance to enable research to take place. There is no specific limit on the amount of notes learners can produce for the assessment but centres should be reminded evidence may need to be uploaded for moderation and a common sense approach should be adopted These notes may be typed or handwritten. There is no word count for the report learners should ensure they demonstrate all their knowledge and understar the allotted time for the task. Learners may use images in electronic or paper They must hand these in to the tutor prior to the supervised session who sould review the notes for authenticity and to ensure it is not a direct cop textbook or the learner's entire course folder.

Task 5

To enable accurate spreading, learners will need to be ded with an application rate, and the required information to calculate the forward speed to deliver this application rate.

Time

The following timings are provided to support entre planning. They are for guidance only and centres may use disciplion.

Total - 10 to 12 hours.

Task 1a - 1 hour (recomme

Task 1b - 2 hours (recor

Task 2 -3 hours (red nended)

Task 3 ommended)

Task 4 -

Task 5 (recommended)

Centre guidance

Guidance provided in this document supports the administration of this assignment. The following documents available on the City & Guilds website provide essential generic guidance for centres delivering Technical qualifications and must be referred to alongside this guidance:

rechnical qualifications – teaching, learning and assessment

This synoptic assessment is designed to require the candidate to make use the knowledge, understanding and skills they have built up over the course of learning to tackle problems/tasks/challenges.

This approach to assessment empt applicability of the course of

applicability of the full range of their learning to practice in their inclusiry area, and supports them in learning to take responsibility for transferring their knowledge, understanding and skills to the practical situation, fostering in period ence, autonomy and confidence.

Candidates are provided with an assignment brief. They hen have to draw on their knowledge and skills and independently select the carrect processes, skills, materials, and approaches to take to provide the ordence specified by the brief.

During the learning programme, it is expected that tutors will have taken the opportunity to set shorter, formative tasks traillow candidates to be supported to independently use the learning they have far covered, drawing this together in a similar way, so they are familiar with the format, conditions and expectations of the synoptic assessment.

Candidates should be made aware during learning what the Assessment Objectives are and how they are implemented in marking the assignment, so they will understand the level of performance that will achieve them high marks.

Candidates should not be entered for the assessment until the end of the course of learning for the qualification so they are in a position to complete the assignment successfully.

Candidates should not be entered for assessment without being clear of the imperation of working safely, and practice of doing so. The tutor must immediately on assessment if a candidate works unsafely. At the discretion of the tutor, depending on the severity of the incident, the candidate may be given a warning. If they continue to work unsafely however, their assessment must be ended and they must retake the assessment at a later date.

Compliance with timings

The timings provided are estimates to support centre planning. They refer to assessment time, not any additional setting up needed to create an appropriate assessment environment.

It is the centre's responsibility to plan sufficient assessment sessions, under the appropriate conditions, within the assignment window, to allow candidates reasonable time to complete the assessment tasks.

Where candidates are required to plan their work they should have their plans confirmed for appropriateness in relation to the time allocated for each task.

Candidates should be allowed sufficient time to fully demonstrate the range of their skills, however this also needs to be reasonable and practicable. Candidates should be allowed to overrun their planned timings or professional service times (where they exist) in order for evidence of a range of their skills to be captured. If however, the time required exceeds reasonably set assessment periods, or the tolerance suggested for professional service times, the centre may stop the assessment base the marking on the evidence up to that point, including the tutor's potential box for over time the task has taken.

Observation evidence

Where the tutor is required to carry out observation of performance detailed, descriptive notes must be recorded on the practical observation (PO) form provided. The centre has the flexibility to adapt the form, to suit local requirements (eg to use tablet, hand-written formats, or to ease local administration) as long as this does not change or restrict the type of evidence called.

The number of candidates a tutor will be able to observe at one time will vary depending on:

- the complexity of evidence collection for the task
- local conditions eg layout of the assessment environment,
- amount of additional support available (eg to capture image/ video evidence), staggered starts
- whether there are any peak times where there is a lot of evidence to collect that will need additional support or any that are quieter.

It is advisable to trial the planned arrangements where possible during formative assessment, reviewing the quality of evidence captured and manageability. It is expected that for straight forward observations, (and unless otherwise specified) no more than eight candidates will be observed by a single tutor at one time, and the number will usually be fewer than this maximum. The key factor to consider is the logistics of collecting sufficient evidence.

As far as possible, candidates should not be distracted, or their performance affected by the process of observation and evidence collection.

Observation notes form part of the candidate's evidence and must describe **how**The activity has been carried out, rather than stating the steps/ actions the
candidate has taken. The notes must be very descriptive and focus on the **quality** of
the performance in such a way that comparisons between performances can be
made. They must provide sufficient, appropriate evidence that can be used by the
marker (and moderator) to mark the performance using the marking grid.

Identifying **what it is** about the performances that is **different** between candidates can clarify the qualities that are important to record. Each candidate is likely to carry out the same steps, so a checklist of this information would not help differentiate between them. However qualitative comments on **how well** they do it, and quantitative records of accuracy and tolerances would.

The tutor should refer to the marking grid to ensure appropriate aspects of performance are recorded. These notes will be used for marking and moderation purposes and so must be **detailed**, **accurate** and **differentiating**.

Tutors should ensure that any required additional supporting evidence including eg photographs or video can be easily matched to the correct candidate, are clear, well-lit and showing the areas of particular interest in sufficient detail and clarity for assessment (ie taken at appropriate points in production, showing accuracy of

If candidates are required to work as a team, each candidate's contribution must be noted separately. The tutor may intervene if any individual candidate's contribution is unclear or to constitution.

The Technical qualifications guides on marking and moderation are esse guidance documents and are available on the City & Guilds website. further information on preparing for assessment, evidence gathering en planning standardisation, marking and moderation, and must be referred. and carrying out assessment.

Minimum evidence requirements for marking and moder (tid

The sections in the assignment:

- What you must produce for marking, and
 - Additional evidence of your performance that must be captured for marking

list the minimum requirements of evidence to be submitted for marking and the moderation sample.

Evidence produced during assessment we and beyond this may be submitted, as long as it provides useful information for marking and moderation and has been produced under appropriate condition

While technological methods which support the capturing or creating of evidence can be helpful, eg pinboardet de websites for creating mood boards, the final evidence must be converted to a suitable format for marking and moderation which cannot be lost/ dee ed or amended after the end of the assessment period (eg screen prints, pdf Ney). Considerations around tracking authenticity and potential loss of material hosted on such platforms during assessment is the centre's responsibility.

Where candidates have carried out some work as a group, the contribution of each candidate wist be clear. It is not appropriate to submit identical information for each carry date without some way for the marker and moderator to mark the ates individually. canaic

© Combining candidates' individual pieces of evidence into single files or zip fles may make evidence management during internal marking more efficient and will greatly simplify the uploading of the moderation sample.

Where the minimum requirements have not been submitted for the moderation sample by the final moderation deadline, or the quality of evidence is insufficient to make a judgement, the moderation, and therefore any subsequent adjustment, will be based on the evidence that has been submitted. Where this is insufficient to provide a mark on moderation, a mark of zero may be given.

Preparation of candidates

Candidates should be aware of which aspects of their performance (across the AOs) will give them good marks in assessment. This is best carried out through routinely pointing out good or poor performance during the learning period, and through formative assessment.

During the learning programme, direct tutor instruction in how to tackle practical tasks through modelling, support, guidance and feedback are critical. However gradual removal of this support is necessary in preparation for summative

The purpose of summative assessment is to confirm the standard the candidate here reached as a result of participating in the learning process. Candidates should be encouraged to do the back of the standard to do the encouraged to do the best they can and be made aware of the difference between these summative assessments and any formative assessments the been subject to. Candidates may not have access to the full marking grid may be misinterpreted as pass, merit distinction descriptors. Refer to the **Vechnical** qualifications – teaching, learning and assessment centre quidance available on the City & Guilds website for further information of candidates for Technical qualification assessment.

Guidance on assessment conditions

The assessment conditions that are in place for this

- ensure the rigour of the assessment proce
- provide fairness for candidates
- give confidence in the outcome.

They can be thought of as the rules that ensure that all candidates who take an assessment are being treated fairly, equally and in a manner that ensures their result reflects their true ability.

The conditions outlined belowed at to this summative synoptic assignment. These do not affect any formative assessment work that takes place, although it is advised that candidates are prepared for the conditions they will need to work under during summative assessment

The evidence for the tasks that make up this synoptic assignment must be completed under the specified conditions. This is to ensure authenticity and prevent malpractices well as to assess and record candidate performance for assessment in the processed tasks. Any aspect that may be undertaken in unsupervised conditions is specified. It is the centre's responsibility to ensure that local administration and oversight gives the tutor sufficient confidence to be able to im the authenticity of the candidate's work.

Security and authentication of candidate work

Candidate evidence must be kept secure to prevent unsupervised access by the candidate or others. Where evidence is produced over a number of sessions, the tutor must ensure learners and others cannot access the evidence without supervision. This might include storing written work or artefacts in locked cupboards and collecting memory sticks of evidence produced electronically at the end of each session.

Candidates are required to sign declarations of authenticity, as is the tutor. The relevant form is included in this assignment pack and must be signed after the production of all evidence.

Where the candidate or tutor is unable to, or does not confirm authenticity through signing the declaration form, the work will not be accepted at moderation and a mark of zero will be given. If any question of authenticity arises eg at moderation,

Where a candidate has special requirements, tutors should refer to the Access arrangements and reasonable adjustments section of the City & Guilds webs candidate on the requirements. Tutors should **not** provide more guidance than the candidate need as this may impact on the candidate's grade, see the guidance and feedback section below.

All candidates must be provided with an environment, time frame and resources that allows them reasonable access to the full range of many svailable.

Where candidates have worked in groups to complete or more tasks for this synoptic assessment, the tutor must ensure that no candidate is disadvantaged as a result of the performance of any other team member is distracting or preventing another team member from fully demonstrating their skills or knowledge, the tutor must intervene.

Guidance and feedback

To support centre file management, utors may specify a suitable file format and referencing format for evidence (uNess otherwise specified eg if file naming is an assessment point for the assignment). Guidance must only support access to the assignment and must not prove feedback for improvement. The level and frequency of clarification & guidance must be

- recorded fully on the candidate record form (CRF),
- sount along with the candidate's final evidence during marking
- able for moderation.

Tutors must brovide feedback on the quality of the performance or how the quality of widence can be improved. This would be classed as malpractice.

buld however provide general reminders to candidates throughout the assessment period to check their work thoroughly before submitting it, and to be that they are happy with their final evidence as it may not be worked on further after submission.

Candidates can rework any evidence that has been produced for this synoptic assignment during the time allowed. However, this must be as a result of their own review and identification of weaknesses and not as a result of tutor feedback. Once the evidence has been submitted for assessment, no further amendments to evidence can be made.

Tutors **should** check and be aware of the candidates' plans and designs to ensure management of time and resources is appropriate, and so any allowed intervention can take place at an appropriate time.

Tutors **should** ensure that candidates' plans for completion of the tasks distribute the time available appropriately and may guide candidates on where they should be up to at any point in a general way. Any excessive time taken for any task should be recorded and should be taken into account during marking if appropriate.

It is up to the marker to decide if the guidance the candidate has required suggests. they are lacking in any AO, the severity of the issue, and how to award marks on basis of this full range of evidence. The marker must record where and how guidance has had an impact on the marks given, so this is available should arise at moderation or appeal.

What is, and is not, an appropriate level of guidance

- A tutor should intervene with caution if a candidate has taken action that will result in them not being able to submit the full range of evidence for assessment. However, this should **only** the place once the tutor has prompted the candidate to check that they have covered all the requirements. Where the tutor has to be explicit wato what the issue is, this is likely to demonstrate a lack of understanding on the part of the candidate rather than a simple error, and full details should be recorded on the CRF.
- The tutor **should not** provide guidance if the candidate is thought to be able to correct the issue without it, and a prompt would suffice. In other words, only the minimum support the canada te actually needs should be given, since the more tutor guidance provided, the less of the candidate's own performance is being demonstrated and therefore the larger the impact on the marks awarded.
- A tutor **must not** provide guidance that the candidate's work is not at the required standard or to improve their work. In this way, candidates are given the chance to identify and correct any errors on their own, providing valid evidence who wledge and skills that will be credited during marking.
- The tutor **mud not** produce any templates, proformas, work logs etc unless instructed to in the assignment guidance. Where instructed to do so, these materials must be produced as specified and contain no additional Templates provided as part of the assignment should be used as d, and not adapted.

prompts and details of the nature of any further guidance must be led on the relevant form and reviewed during marking and moderation.

Suidance on markina

Please refer to the **Technical qualifications – marking**, and **- moderation** centre guidance documents for further information on gathering evidence suitable for marking and moderation, and on using the marking grid and forms.

The candidate record form (CRF) is used to record:

- Rough notes bringing together relevant evidence from across tasks during
- Summary justifications when holistically coming to an overall judgement of

all of prompting the coperiod ar relevant evidence from active and evidence from active and the property of the profession of the quality of performance of an although descriptions of the quality of performance shadesions against the AOs, the notes should follow the flow of alion, rather than attempting to assign evidence against the point. Descriptive information and evidence of candidate performance during a observation. Although descriptions of the quality of performance should support decisions against the AOs, the notes should follow:

observation, rather than att

	produced pieces of work (writing, drawings, posters etc) structured, laid out, presented, communicated?	Written work has no structure.	Work is fairly structured. Explanations lack clarity.	Work is well structured. Explanations are clear and show depth and breadth of discussion topics.
		Top of band: The candidate has shown limited evidence of using their knowledge, understanding and practical skills to make straightforward links between topics.	Top of band: The candidate brings together their knowledge, understanding and practical skills to make good links between topics and justify decisions, choices and actions.	Top of band: The candidate utilises a wide range of knowledge from across the qualification to justify and problem solve creatively and holistically. Integration of knowledge, understanding and skills which informs a full understanding of the wider context of agriculture.
		Work is poorly structured.	Work is well structured. Explanations generally clear and address discussion topics.	Work is excellent in structure and presentation. Explanation are clear and cohesive and show depth and breadth of discussion topics.
