

General guidance for candidates

General guidance

This is a formal assessment that you will be marked and graded on. You will be marked on the quality and accuracy of your practical performance and any written work you produce. It is therefore important that you carry your work out to the highest standard you can. You should show how well you know and understand the subject and how you are able to use your knowledge and skills together to complete the tasks.

Plagiarism

This is an assessment of your abilities, so the work must be all your own work and carried out under the conditions stated. You will be asked to sign a sociaration that you have not had any outside help with the assessment.

Your tutor is allowed to give you some help understanding the assignment instructions if necessary, but they will record any other guidence you need and this will be taken into account during marking.

Plagiarism is the failure to acknowledge sources properly and/or the submission of another person's work as if it were your own. Plagicity vis not allowed in this assignment.

Where research is allowed, your tutor must be able to identify which work you have done yourself, and what you have found trans other sources. It is therefore important to make sure you acknowledge all sources and clearly reference any information taken from them.

Timings and planning

Where you have to plan your time, you should take care to make sure you have divided the time available between tasks appropriately. In some assignments, there are specified timings which cannot be changed and which need to be taken into account. You should check your plan is appropriate with your tutor.

If you have a good reason for needing more time, you will need to explain the reasons to you mor and agree a new deadline date. Changes to dates will be at the discretion of the tutor, and they may not mark work that is handed in after the agreed datalines.

Health and Safety

You must always work safely, in particular while you are carrying out practical tasks.

You must always follow any relevant Health and Safety regulations and codes of practice.

If your tutor sees you working in a way that is unsafe for yourself or others, they will ask you to stop immediately, and tell you why. Your tutor will not be able to reassess you until they are sure you are ready for assessment and can work safely.

Presentation of work

Presentation of work must be neat and appropriate to the task.

You should make sure that each piece of evidence including any proformas eg record/job cards are clearly labelled with your name and the assignment reference.

All electronic files must be given a clear file name that allows your tutor to identify it as your work. Written work eg reports may be word processed but this is not a SESSMENT requirement.

Assignment Brief

You are a farm mechanic working with a large contracting business. As part of your role, you will be required to maintain machinery on land-based power units, carry out welding tasks and undertake workshop safety reviews.

In advance of the assessment you may research welding techniques and the use of different materials to improve strength and durability. You may make notes to take PASTASSIGNMENT 2019 into this assessment. You may select images and these nest be handed in to the Χ,

Tasks

Task 1a

Prepare equipment to carry out a metal arc or a metal inert gas weld on:

- a butt joint in 5mm mild steel (min 100mm long)
- a fillet joint in 5mm mild steel (min 100mm long).

Conditions of assessment:

When operating machinery, if you are working in a way that risks the safe of yourself or others, you will be stopped. If your tutor decides that it is unsafe for you to continue working, you will be asked to leave the assessment area.

You must carry out the task on your own, under supervised conditions.

What you must produce for marking:

- The completed butt weld in 5mm mild steel
- The completed fillet weld in 5mm mild steel

Additional evidence of your performance that must be captured for marking:

 Photographs of the completed work and your tutor's notes relating to the setting up and using of the welding aquipment.

Task 2

A cultivator frame has been added and the weld has cracked.

Write a report recommending possible changes to the repair, to improve its durability and strength.

Conditions of assessment:

You must write the report on your own, under supervised conditions.

You may use the research notes produced in advance of this task but you may not use any additional notes whilst completing the task. You must produce the report in your own words; direct copy of your notes is **not** acceptable.

Mat you must produce for marking:

• A written report

15SMEN

Task 3a

Conditions of assessment: You must complete the inspection on your own, under supervised conditions. What you must produce for marking: Your completed written notes. Additional evidence of your performance the inspection Undertake a workshop safety inspection, identifying possible health and safety, and

Task 3b

Write a report, describing any control measures al eady in place and make recommendations to improve the safety of the workshop. Diagrams, plans and photos you took may be included.

44

Conditions of assessment:

, under supervised conditions. You may refer You must write the report on your ow to your inspection notes.

What you must produce narkina:

• A written report

ASTASIGNME

Task 4

Carry out routine maintenance on a land-based power unit. You must complete all appropriate records and produce a written report of the reasons for undertaking the maintenance tasks you have carried out.

Conditions of assessment:

, or yourself or others, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you to continue working, you will be consistent it is unsafe for you rown, under supervised conditions, for marking.
Must complete the assessment on your own, under supervised conditions, for marking.
Must complete for marking.
Must complete for marking.
Must complete to be added a set of your performance that must complete for marking.
Must complete the added a set of your performance that must complete for marking.
Must complete the added a set of your performance that must complete for marking.
Must complete the added a set of your performance that must complete for marking.

PASTASSIGNMENT 20191-DONO

Task instructions for centres

Resources

Candidates must have access to a suitable range of resources to carry out the tasks and to have the opportunity to choose materials demonstrating the ability to select SESMEN from a range of appropriate materials. Candidates must have access to the manufacturer's handbook.

Task specific guidance This guidance should not be shared with learners.

Candidates should be given the assignment brief only, one week before for planned assessments. It is recommended that where possible all tasks w assignment are completed within 4 teaching weeks of the candida being given the brief.

All tasks should be released on the days of the assessment. tasks do not need to be completed on the same day, nor do they need to be completed in order. It is best practice to leave no more than two days between wheed tasks.

Task 1

Candidates can practice on **one** piece of metal only before commencing their test weld. Candidates only get two pieces of metal for each weld. If they make a mistake they can grind the weld off and start again, but this must be taken in to account when marking. Candidates will be expected to choose the correct welding materials and set the welder to the properties settings.

Task 2

Learners should be given the signment brief in advance to enable research to take place. There is no specific limit on the amount of notes learners can produce for the assessment but cantres should be reminded evidence may need to be uploaded for moderation and a common sense approach should be adopted. These notes may be typed or handwritten. There is no word count for the report but learners should ensure they demonstrate all their knowledge and understanding in the allotted tige for the task. Learners may use images in electronic or paper format. nd these in to the tutor prior to the supervised session who should They must review, the notes for authenticity and to ensure it is not a direct copy from a textbook or the candidate's entire course folder.

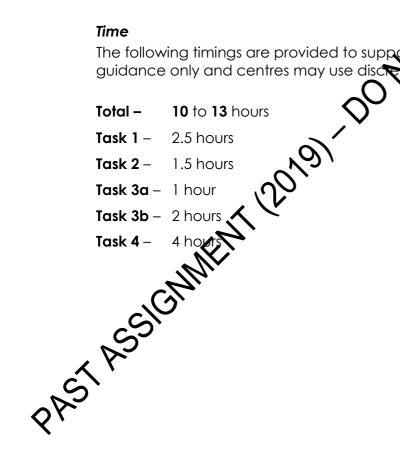

D for will need to provide details of the crack, ensuring not all candidates are assessing the same type of crack.

Task 4

Contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of and filter and complete at least five contribution of the engine of the engine

guidance only and centres may use discretion.

Centre guidance

Guidance provided in this document supports the administration of this assignment. The following documents available on the City & Guilds website provide essential generic guidance for centres delivering Technical gualifications and **must** be referred to alongside this guidance:

Incoderation (updated annually) Inconnical qualifications – teaching, learning and assessment This synoptic assessment is designed to require the candidate to make use there is the knowledge, understanding and skills they have built up over the course of the term of term of the term of term of

supports them in learning to take responsibility for transferring their knowledge, understanding and skills to the practical situation, fostering independence, autonomy and confidence.

Candidates are provided with an assignment brief. They men have to draw on their knowledge and skills and independently select the correct processes, skills, materials, and approaches to take to provide the correct processes by the brief.

During the learning programme, it is expected that tutors will have taken the opportunity to set shorter, formative tasks than allow candidates to be supported to independently use the learning they have a far covered, drawing this together in a similar way, so they are familiar with the format, conditions and expectations of the synoptic assessment.

Candidates should be made aware during learning what the Assessment Objectives are and how they are implemented in marking the assignment, so they will understand the level of performance that will achieve them high marks.

Candidates should not **Open**tered for the assessment until the end of the course of learning for the qualification so they are in a position to complete the assignment successfully.

Health and

Candidates should not be entered for assessment without being clear of the importance of working safely, and practice of doing so. The tutor must immediately station assessment if a candidate works unsafely. At the discretion of the tutor, constant on the severity of the incident, the candidate may be given a warning. If they continue to work unsafely however, their assessment must be ended and they must retake the assessment at a later date.

Compliance with timings

The timings provided are estimates to support centre planning. They refer to assessment time, not any additional setting up needed to create an appropriate assessment environment.

It is the centre's responsibility to plan sufficient assessment sessions, under the appropriate conditions, within the assignment window, to allow candidates reasonable time to complete the assessment tasks.

Where candidates are required to plan their work they should have their plans confirmed for appropriateness in relation to the time allocated for each task.

Candidates should be allowed sufficient time to fully demonstrate the range of their skills, however this also needs to be reasonable and practicable. Candidates should be allowed to overrun their planned timings or professional service times (where they exist) in order for evidence of a range of their skills to be captured. If however, the time required exceeds reasonably set assessment periods, or the tolerance suggested for professional service times, the centre may stop the assessment professional service times has the marking on the evidence up to that point, including the tutor's not professional service times the task has taken.

Observation evidence

Where the tutor is required to carry out observation of performance detailed, descriptive notes must be recorded on the practical observation (NO) form provided. The centre has the flexibility to adapt the form, to soit local requirements (eg to use tablet, hand-written formats, or to ease local administration) as long as this does not change or restrict the type of evidence categored.

The number of candidates a tutor will be able to observe at one time will vary depending on:

- the complexity of evidence collection for the task
- local conditions eg layout of the assessment environment,
- amount of additional support available (eg to capture image/ video evidence), staggered starts et O
- whether there are any peak times where there is a lot of evidence to collect that will need additional support or any that are quieter.

It is advisable to trial the planned arrangements where possible during formative assessment, reviewing the quality of evidence captured and manageability. It is expected that for straightforward observations, (and unless otherwise specified) no more than eight condidates will be observed by a single tutor at one time, and the number will usually be fewer than this maximum. The key factor to consider is the logistics of collecting sufficient evidence.

As far as people, candidates should not be distracted, or their performance affected by the process of observation and evidence collection.

Observation notes form part of the candidate's evidence and must describe **how** were the activity has been carried out, rather than stating the steps/ actions the condidate has taken. The notes must be very descriptive and focus on the **quality** of the performance in such a way that comparisons between performances can be made. They must provide sufficient, appropriate evidence that can be used by the marker (and moderator) to mark the performance using the marking grid.

Identifying **what it is** about the performances that is **different** between candidates can clarify the qualities that are important to record. Each candidate is likely to carry out the same steps, so a checklist of this information would not help differentiate between them. However qualitative comments on **how well** they do it, and quantitative records of accuracy and tolerances would.

The tutor should refer to the marking grid to ensure appropriate aspects of performance are recorded. These notes will be used for marking and moderation purposes and so must be **detailed**, **accurate** and **differentiating**.

Tutors should ensure that any required additional supporting evidence including eg photographs or video can be easily matched to the correct candidate, are clear, well-lit and showing the **areas of particular interest** in **sufficient detail** and **clarity** for assessment (ie taken at appropriate points in production, showing accuracy of measurements where appropriate).

If candidates are required to work as a team, each candidate's contribution must be noted separately. The tutor may intervene if any individual candidate's contribution is unclear or to ensure fair access (see below).

The **Technical qualifications guides on marking and moderation** are essential guidance documents and are available on the City & Guilds website. These provide further information on preparing for assessment, evidence gathering standardisation, marking and moderation, and must be referred to the planning and carrying out assessment.

Minimum evidence requirements for marking and moderatio

The sections in the assignment:

- What you must produce for marking, and
- Additional evidence of your performance the must be captured for marking

list the minimum requirements of evidence to be submitted for marking and the moderation sample.

Evidence produced during assessment above and beyond this may be submitted, as long as it provides useful information formarking and moderation and has been produced under appropriate conditions.

While technological methods which support the capturing or creating of evidence can be helpful, eg pinboard style websites for creating mood boards, the final evidence must be converted to a suitable format for marking and moderation which cannot be lost/ dected or amended after the end of the assessment period (eg screen prints, pdf flet). Considerations around tracking authenticity and potential loss of moterial hosted on such platforms during assessment is the centre's responsibility.

Where candidates have carried out some work as a group, the contribution of each candidate must be clear. It is not appropriate to submit identical information for each candidate without some way for the marker and moderator to mark the candidates individually.

Notes Combining candidates' individual pieces of evidence into single files or zip files may make evidence management during internal marking more efficient and will greatly simplify the uploading of the moderation sample.

Where the minimum requirements have **not been submitted** for the moderation sample by the final moderation deadline, or the **quality of evidence is insufficient** to make a judgement, the moderation, and therefore any subsequent adjustment, will be based on the evidence that *has* been submitted. Where this is insufficient to provide a mark on moderation, a mark of zero may be given.

Preparation of candidates

Candidates should be aware of which aspects of their performance (across the AOs) will give them good marks in assessment. This is best carried out through routinely pointing out good or poor performance during the learning period, and through formative assessment.

During the learning programme, direct tutor instruction in how to tackle practical tasks through modelling, support, guidance and feedback are critical. However gradual removal of this support is necessary in preparation for summative assessment. This, supported approach is **not** valid for summative assessment.

The purpose of summative assessment is to confirm the standard the candidate has reached as a result of participating in the learning process. Candidates should be encouraged to do the best they can and be made aware of the difference between these summative assessments and any formative assessments the the been subject to. Candidates may not have access to the full marking gride as these may be misinterpreted as pass, merit distinction descriptors. Refer to the **technical qualifications – teaching, learning and assessment** centre guidance document, available on the City & Guilds website for further information on prevaring candidates for Technical qualification assessment.

Guidance on assessment conditions

The assessment conditions that are in place for this sycoptic assignment are to:

- ensure the rigour of the assessment process
- provide fairness for candidates
- give confidence in the outcome.

They can be thought of as the rules there is use that all candidates who take an assessment are being treated fairly equally and in a manner that ensures their result reflects their true ability.

The conditions outlined below relate to this summative synoptic assignment. These do not affect any formative assessment work that takes place, although it is advised that candidates are presented for the conditions they will need to work under during summative assessment

The evidence for the tasks that make up this synoptic assignment must be completed under the specified conditions. This is to ensure authenticity and prevent malpractice of well as to assess and record candidate performance for assessment in the practice it tasks. Any aspect that may be undertaken in unsupervised conditioners specified. It is the centre's responsibility to ensure that local administration and oversight gives the tutor sufficient confidence to be able to codian the authenticity of the candidate's work.

Security and authentication of candidate work

Candidate evidence must be kept secure to prevent unsupervised access by the candidate or others. Where evidence is produced over a number of sessions, the tutor must ensure learners and others cannot access the evidence without supervision. This might include storing written work or artefacts in locked cupboards and collecting memory sticks of evidence produced electronically at the end of each session.

Candidates are required to sign declarations of authenticity, as is the tutor. The relevant form is included in this assignment pack and must be signed after the production of all evidence.

Where the candidate or tutor is unable to, or does not confirm authenticity through signing the declaration form, the work will not be accepted at moderation and a mark of zero will be given. If any question of authenticity arises eg at moderation, the centre may be contacted for justification of authentication.

Where a candidate has special requirements, tutors should refer to the Access Galily arrangements and reasonable adjustments section of the City & Guilds website Galily tutors can support access where necessary by provide the City and the requirement. candidate on the requirements or timings of any aspect of this synoptic assignm Tutors should **not** provide more guidance than the candidate needs as this may impact on the candidate's grade, see the guidance and feedback ection below.

All candidates must be provided with an environment, time frame, and resources that allows them reasonable access to the full range of marks available.

Where candidates have worked in groups to complete grear more tasks for this synoptic assessment, the tutor must ensure that no candidate is disadvantaged as a result of the performance of any other team memberis distracting or preventing another team member, for fully demonstrating their skills or knowledge, the tutor must intervene.

Guidance and feedback

To support centre file management, to simal specify a suitable file format and referencing format for evidence (unless otherwise specified eg if file naming is an assessment point for the assignment). Guidance must only support access to the assignment and must not provide feedback for improvement. The level and frequency of clarification & guidance must be

- candidate record form (CRF), recorded fully ar
- ount along with the candidate's final evidence during marking taken into ac
- made avo able for moderation.

Tutors must make rovide feedback on the quality of the performance or how the sence can be improved. This would be classed as malpractice. quality of

Tutors sh d however provide general reminders to candidates throughout the asses pent period to check their work thoroughly before submitting it, and to be that they are happy with their final evidence as it may not be worked on further after submission.

andidates can rework any evidence that has been produced for this synoptic assignment during the time allowed. However, this must be as a result of their own review and identification of weaknesses and not as a result of tutor feedback. Once the evidence has been submitted for assessment, no further amendments to evidence can be made.

Tutors should check and be aware of the candidates' plans and designs to ensure management of time and resources is appropriate, and so any allowed intervention can take place at an appropriate time.

Tutors **should** ensure that candidates' plans for completion of the tasks distribute the time available appropriately and may guide candidates on where they should be up to at any point in a general way. Any excessive time taken for any task should be recorded and should be taken into account during marking if appropriate.

It is up to the marker to decide if the guidance the candidate has required suggests they are lacking in any AO, the severity of the issue, and how to award marks on the FSSMEN basis of this full range of evidence. The marker must record where and how guidance has had an impact on the marks given, so this is available should gueries arise at moderation or appeal.

What is, and is not, an appropriate level of guidance

- A tutor should intervene with caution if a candidate has taken a coule action that will result in them not being able to submit the full range evidence for assessment. However, this should only take place once the tutor has prompted the candidate to check that they have covered all the requirements. Where the tutor has to be explicit as to what the issue is, this is likely to demonstrate a lack of understanding on the part of the candidate rather than a simple error, and full details should be recorded on the CRF.
- The tutor should not provide guidance if the canate is thought to be able • to correct the issue without it, and a prompt would suffice. In other words, only the minimum support the candidate actually needs should be given, since the more tutor guidance provided, the less of the candidate's own performance is being demonstrated and therefore the larger the impact on the marks awarded.
- A tutor **must not** provide guidance that the candidate's work is not at the required standard or how to improve their work. In this way, candidates are given the chance to identify and correct any errors on their own, providing valid evidence of knowledge and skills that will be credited during marking.
- The tutor **must not** produce any templates, pro-formas, work logs etc unless instructed to in the assignment guidance. Where instructed to do so, these materials must be produced as specified and contain no additional guidance. Templates provided as part of the assignment should be used as provided, and not adapted.

and details of the nature of any further guidance must be All specific proc recorded e relevant form and reviewed during marking and moderation.

e on marking Guidar

se refer to the Technical qualifications – marking, and - moderation centre guidance documents for further information on gathering evidence suitable for marking and moderation, and on using the marking grid and forms.

The candidate record form (CRF) is used to record:

- Details of any guidance or the level of prompting the candidate has received during the assessment period
- Rough notes bringing together relevant evidence from across tasks during marking.

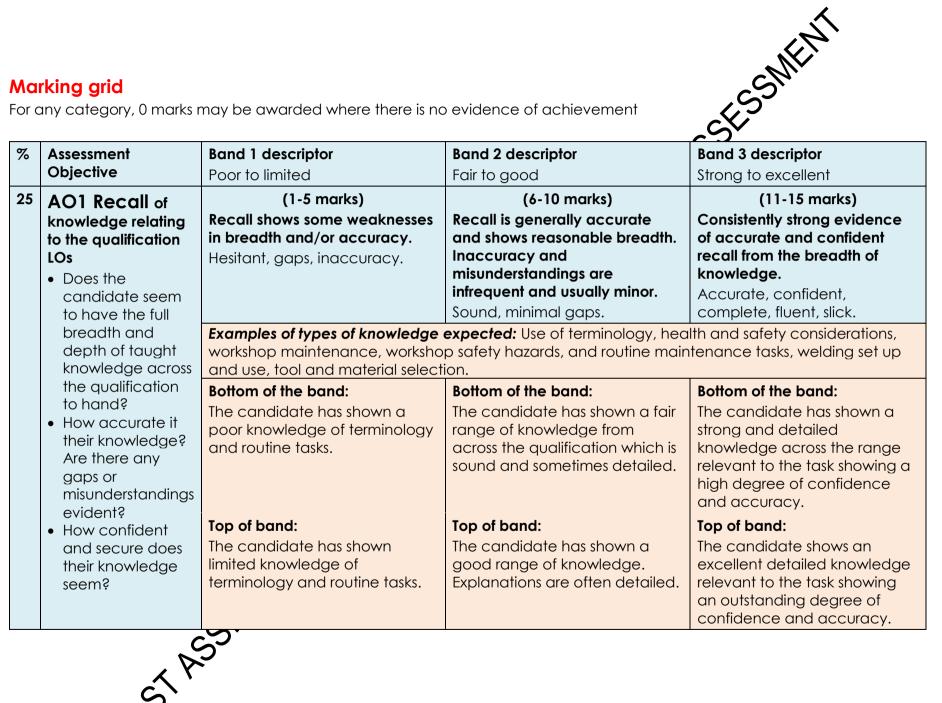

• Summary justifications when holistically coming to an overall judgement of the mark.

The practical observation form (PO) is used to record:
