

# General guidance for candidates

### General guidance

This is a formal assessment that you will be marked and graded on. You will be marked on the quality and accuracy of your practical performance and any written work you produce. It is therefore important that you carry your work out to the highest standard you can. You SSMEN should show how well you know and understand the subject and how you are able to use your knowledge and skills together to complete the tasks.

### Plagiarism

This is an assessment of your abilities, so the work must be all your own work and carried under the conditions stated. You will be asked to sign a declaration that you have any outside help with the assessment.

Your tutor is allowed to give you some help understanding the assignment ins uctions if necessary, but they will record any other guidance you need and this will aken into account during marking.

Plagiarism is the failure to acknowledge sources properly and/or me submission of another person's work as if it were your own. Plagiarism is not allowed in is assignment.

Where research is allowed, your tutor must be able to identit which work you have done yourself, and what you have found from other sources. It is therefore important to make sure you acknowledge all sources and clearly reference any information taken from them.

# Timings and planning

Where you have to plan your time, you shows ake care to make sure you have divided the time available between tasks appropriately. In some assignments, there are specified timings which cannot be changed and ien need to be taken into account. You should check your plan is appropriate with your tutor.

If you have a good reason for negoing more time, you will need to explain the reasons to your tutor and agree a new deadine date. Changes to dates will be at the discretion of the tutor, and they may not make work that is handed in after the agreed deadlines.

# Health and Safet

You must alwa k safely, in particular while you are carrying out practical tasks.

follow any relevant Health and Safety regulations and codes of practice. You must alv

If your tuto ees you working in a way that is unsafe for yourself or others, they will ask you to stor mediately, and tell you why. Your tutor will not be able to reassess you until they you are ready for assessment and can work safely.

### Presentation of work

Presentation of work must be neat and appropriate to the task. You should make sure that PASTASSIGNMENT (2019)-DONOTUSEFORTUFASSISSIMENT each piece of evidence including any proformas eg record/job cards are clearly labelled with your name and the assignment reference. All electronic files must be given a clear file name

# Assignment Brief

You are working for a veterinary services clinic, as a laboratory technician and you are responsible for conducting common procedures and laboratory practices. Your role involves

# Task instructions for centres

### Resources

Candidates must have access to a suitable range of resources to carry out the tasks and to have the opportunity to choose materials demonstrating the ability to select from a range of RUNEASSESSMENT appropriate materials.

### Time

The following timings are provided to support centre planning. Total – twelve to sixteen hours

Task 1	2 - 3 hours
Task 2	3 - 4 hours
Task 3	4 - 5 hours
Task 4	3 - 4 hours

# **Tutor** guidance

This guidance should not be shared with candidates.

Candidates should be given the assignment brief only, one week before the first planned assessments. It is recommended that where possible all tasks within this assignment are completed within 4 weeks of the candidate being given the brief. These do not have to be consecutive weeks if a term break falls in between

Tasks 1, 2 and 3 can be given to candidates a be start of the supervised session for Task 1. Task 4 should only be given to candidates at the start of the supervised session for that task and not in advance. Tasks 1, 2 and 3 need to be completed in order. Task 4 can be completed at any point of the assessment window.

The tasks do not need to be completed on the same day. It is best practice to leave no more than two days between linker tasks (1a, 1b).

# Task 1:

given the assignment brief in advance to enable research of a method Candidates should be for investigating for temperature affects the rate of reaction in enzymes. These notes may be typed or the written and should not be more than **two** sides of A4 paper. Candidates notes in to the tutor prior to the supervised session, who should review the must hand notes for a direct copy from a textbook or the candidate's entir Course folder. The candidate's notes should be handed back to them at the start of the pervised session for the task.

access.

andidates are **not** permitted any additional notes whilst completing this task. This includes classroom notes, printed resources and text books. They are also not permitted internet

Tutors must provide a resource list with details of the fixed parameters for practical work. The resource list must not include temperatures.

All plans should be submitted to tutors for them to assess the feasibility based on centre resources and student safety. Following this, candidates can update the temperatures in their plan, but both the original and amended plan must be submitted.

Tutors must provide the risk assessment template provided in appendix 1 to complete task. 1b.

Candidates should be given access to their plan and risk assessment from Task 1. Candidates are **not** permitted any additional notes whilst completing this task. This in the classroom notes, printed resources and text books. They are also not permitted intermediates access.

Candidates can conduct the work in small groups, however each candidate must have the opportunity to conduct one repetition of the practical. Where candidates work in small groups, tutors must ensure that each candidate is given an equal opportunity to meet the requirements of the task and that this arrangement allows the tutors Make a correct professional judgment of the candidates' performance.

An opportunity should be provided for each candidate to provide verbal commentary on their work practice, but this must be done individually for from other candidates. Tutors should not prompt this commentary with leading qu

### Task 3:

Candidates should be given access to their the from Task 1 and their results from Task 2. Candidates are **not** permitted any additional notes whilst completing this task. This includes classroom notes, printed resources and text books. They are also not permitted internet access.

Candidate should have acc esources to complete graphs for statistical analysis, ie suitable software or gra

### Task 4:

ermitted any notes whilst completing this task. This includes classroom Candidates are urces and text books. They are also not permitted internet access. notes, print ASTASSIC

# **Centre guidance**

Guidance provided in this document supports the administration of this assignment. The following documents available on the City & Guilds website provide essential generic guidance for centres delivering Technical gualifications and **must** be referred to alongside this guidance:

*incaeration* (updated annually) *i echnical qualifications – teaching, learning and assessment* This synoptic assessment is designed to require the candidate to make use of their knowledge, understanding and skills that they have built up over the course of the to tackle problems/tasks/challenges.

learning to take responsibility for transferring their knowledge, understanding and skills to the practical situation, fostering independence, autonomy and confidence.

Candidates are provided with an assignment brief. They then have to draw on their knowledge and skills and independently select the correct processes, skills, materials, and approaches to take to provide the evidence specified by the brief.

During the learning programme, it is expected that tutors will have taken the opportunity to set shorter, formative tasks that allow candidates to be supported to independently use the learning they have so far covered, drawing this together in a similar way, so they are familiar with the format, conditions and expectations of the synoptic assessment.

Candidates should be made aware during learning what the Assessment Objectives are and how they are implemented in marking assignment, so they will understand the level of performance that will achieve them high marks.

Candidates should not be entered for the assessment until the end of the course of learning for the qualification so they are in a position to complete the assignment successfully.

# Health and safety

Candidates should be entered for assessment without being clear of the importance of working safely, and practice of doing so. The tutor must immediately stop an assessment candidate work unsafely. At the discretion of the tutor, depending on the severity of the d practice of doing so. The tutor must immediately stop an assessment if a incident, condidate may be given a warning. If they continue to work unsafely however, soment must be ended and they must retake the assessment at a later date.

# ance with timings

The timings provided are estimates to support centre planning. They refer to assessment ime, not any additional setting up needed to create an appropriate assessment environment.

It is the centre's responsibility to plan sufficient assessment sessions, under the appropriate conditions, within the assignment window, to allow candidates reasonable time to complete the assessment tasks.

Where candidates are required to plan their work they should have their plans confirmed for appropriateness in relation to the time allocated for each task.

Candidates should be allowed sufficient time to fully demonstrate the range of their skills, however this also needs to be reasonable and practicable. Candidates should be allowed to overrun their planned timings or professional service times (where they exist) in order for evidence of a range of their skills to be captured. If however, the time required exceeds reasonably set assessment periods, or the tolerance suggested for professional service times, the centre may stop the assessment and base the marking on the evidence up to that point, including the tutor's notes of how far over time the task has taken.

Where the tutor is required to carry out observation of performance, detailed, descriptive notes must be recorded on the practical observation (PO) form provided. The control has a flexibility to adapt the form to avit has a set the form. flexibility to adapt the form, to suit local requirements (eq to use tablet, hand-written,  ${f C}$ formats, or to ease local administration) as long as this does not change or restrict the of evidence collected.

The number of candidates a tutor will be able to observe at one time will vary Sendina on:

- the complexity of evidence collection for the task
- local conditions eq layout of the assessment environment •
- amount of additional support available (eq to capture in ape/ video evidence), • staggered starts etc,
- whether there are any peak times where there in the of evidence to collect that will need additional support or any that are quieter

It is advisable to trial the planned arrangements where possible during formative assessment, reviewing the quality of evidence captured and manageability. It is expected that for straight forward observations, (and these otherwise specified) no more than eight candidates will be observed by a single (utyr at one time, and the number will usually be fewer than this maximum. The key factor to consider is the logistics of collecting sufficient evidence.

As far as possible, candidates sound not be distracted, or their performance affected by the process of observation and evidence collection.

Observation notes form part of the candidate's evidence and must describe how well the activity has been carried out, rather than stating the steps/ actions the candidate has taken. The notes must be very descriptive and focus on the quality of the performance in such a way that comparisons between performances can be made. They must provide sufficient, appropriate evidence that can be used by the marker (and moderator) to mark the wing the marking grid. performan

Identify what it is about the performances that is different between candidates can clarify the qualities that are important to record. Each candidate is likely to carry out the same teps, so a checklist of this information would be the true to the Steps, so a checklist of this information would not help differentiate between them. However qualitative comments on how well they do it, and quantitative records of accuracy and tolerances would.

The tutor should refer to the marking grid to ensure appropriate aspects of performance are recorded. These notes will be used for marking and moderation purposes and so must be detailed, accurate and differentiating.

Tutors should ensure that any required additional supporting evidence including eq photographs or video can be easily matched to the correct candidate, are clear, well-lit and showing the areas of particular interest in sufficient detail and clarity for assessment (ie

taken at appropriate points in production, showing accuracy of measurements where appropriate).

If candidates are required to work as a team, each candidate's contribution must be noted separately. The tutor may intervene if any individual candidate's contribution is unclear or to ensure fair access (see below).

The Technical qualifications quides on marking and moderation are essential quidance - SSMEN documents and are available on the City & Guilds website. These provide further information on preparing for assessment, evidence gathering, standardisation, marking and moderation, and must be referred to when planning and carrying out assessment.

# Minimum evidence requirements for marking and moderation

The sections in the assignment:

- What you must produce for marking, and
- Additional evidence of your performance that must be captured •

list the minimum requirements of evidence to be submitted for marking an the moderation sample.

Evidence produced during assessment above and beyond this more submitted, as long as it provides useful information for marking and moderation and Sbeen produced under appropriate conditions.

While technological methods which support the capturing or creating of evidence can be helpful, eg pinboard style websites for creating mood sourds, the final evidence must be converted to a suitable format for marking and moderation which cannot be lost/ deleted or amended after the end of the assessment period leg screen prints, pdf files). Considerations around tracking authenticity and potential loss of material hosted on such platforms during assessment is the centre's responsibility.

Where candidates have carried out some work as a group, the contribution of each candidate must be clear. It is not appropriate to submit identical information for each candidate without some way for the marker and moderator to mark the candidates individually. Q

Note: Combining candidates individual pieces of evidence into single files or zip files may make evidence management during internal marking more efficient and will greatly simplify the uploading of the moderation sample.

Where the minimum equirements have **not been submitted** for the moderation sample by the final moderation deadline, or the **quality of evidence is insufficient** to make a judgement, the moderation, and therefore any subsequent adjustment, will be based on the evidence that has been submitted. Where this is insufficient to provide a mark on 🐼 a mark of zero may be given. moder

# Preparation of candidates

Candidates should be aware of which aspects of their performance (across the AOs) will give them good marks in assessment. This is best carried out through routinely pointing out good or poor performance during the learning period, and through formative assessment.

During the learning programme, direct tutor instruction in how to tackle practical tasks through modelling, support, guidance and feedback are critical. However gradual removal of this support is necessary in preparation for summative assessment. This, supported approach is **not** valid for summative assessment.

The purpose of summative assessment is to confirm the standard the candidate has reached as a result of participating in the learning process. Candidates should be encouraged to do the best they can and be made aware of the difference between these summative assessments and any formative assessments they have been subject to. Candidates hav not have access to the full marking grids, as these may be misinterpreted as pass, nori distinction descriptors. Refer to the *Technical qualifications – teaching, leaking and assessment* centre guidance document, available on the City & Guilds whosite for further information on preparing candidates for Technical qualification assessment.

### Guidance on assessment conditions

The assessment conditions that are in place for this synoptic assignment are to:

- ensure the rigour of the assessment process
- provide fairness for candidates
- give confidence in the outcome.

They can be thought of as the rules that ensure that all candidates who take an assessment are being treated fairly, equally and in a manner that ensures their result reflects their true ability.

The conditions outlined below relate to this summative synoptic assignment. These do not affect any formative assessment work that takes place, although it is advised that candidates are prepared for the conditions they will need to work under during summative assessment.

The evidence for the taske has make up this synoptic assignment must be completed under the specified conditions. This is to ensure authenticity and prevent malpractice as well as to assess and record candidate performance for assessment in the practical tasks. Any aspect that may be undertaken in unsupervised conditions is specified. It is the centre's responsibility to ensure that local administration and oversight gives the tutor sufficient confidence to a able to confirm the authenticity of the candidate's work.

# Security authentication of candidate work

Careforate evidence must be kept secure to prevent unsupervised access by the candidate or there. Where evidence is produced over a number of sessions, the tutor must ensure learners and others cannot access the evidence without supervision. This might include storing written work or artefacts in locked cupboards and collecting memory sticks of evidence produced electronically at the end of each session.

Candidates are required to sign declarations of authenticity, as is the tutor. The relevant form is included in this assignment pack and must be signed after the production of all evidence.

Where the candidate or tutor is unable to, or does not confirm authenticity through signing the declaration form, the work will not be accepted at moderation and a mark

of zero will be given. If any question of authenticity arises eg at moderation, the centre may be contacted for justification of authentication.

### Accessibility and fairness

Where a candidate has special requirements, tutors should refer to the *Access arrangements and reasonable adjustments* section of the City & Guilds website.

Tutors can support access where necessary by providing clarification to **any** candidate on the requirements or timings of any aspect of this synoptic assignment. Tutors should **not** provide more guidance than the candidate needs as this may impact on the candidate's grade, see the guidance and feedback section below.

All candidates must be provided with an environment, time frame and resources that them reasonable access to the full range of marks available.

Where candidates have worked in groups to complete one or more tasks for this synoptic assessment, the tutor must ensure that no candidate is disadvantaged as a result of the performance of any other team member. If a team member is distracting on preventing another team member from fully demonstrating their skills or knowledge, the tutor must intervene.

# Guidance and feedback

To support centre file management, tutors may specify a suitable file format and referencing format for evidence (unless otherwise specified eg if file maning is an assessment point for the assignment). Guidance must only support access to the assignment and must not provide feedback for improvement. The level and requency of clarification & guidance must be

- recorded fully on the candidate record form (CRF),
- taken into account along with the candidate's final evidence during marking
- made available for moderation

Tutors **must not** provide feed and on the quality of the performance or how the quality of evidence can be improved this would be classed as malpractice.

Tutors **should** however provide general reminders to candidates throughout the assessment period to check their work thoroughly before submitting it, and to be sure that they are happy with their final evidence as it may not be worked on further after submission.

Candidates conversely any evidence that has been produced for this synoptic assignment during the time allowed. However, this must be as a result of their own review and identification of weaknesses and not as a result of tutor feedback. Once the evidence has been submitted for assessment, no further amendments to evidence can be made.

Tutor should check and be aware of the candidates' plans and designs to ensure management of time and resources is appropriate, and so any allowed intervention can take place at an appropriate time.

Tutors **should** ensure that candidates' plans for completion of the tasks distribute the time available appropriately and may guide candidates on where they should be up to at any point in a general way. Any excessive time taken for any task should be recorded and should be taken into account during marking if appropriate.

It is up to the marker to decide if the guidance the candidate has required suggests they are lacking in any AO, the severity of the issue, and how to award marks on the basis of this full

range of evidence. The marker must record where and how guidance has had an impact on the marks given, so this is available should gueries arise at moderation or appeal.

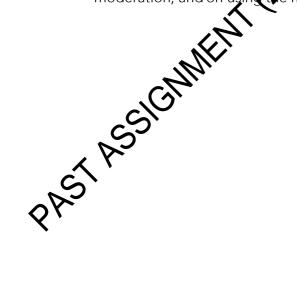

# What is, and is not, an appropriate level of guidance

- A tutor should intervene with caution if a candidate has taken a course of action that will result in them not being able to submit the full range of evidence for assessment. However, this should only take place once the tutor has prompted the candidate to check that they have covered all the requirements. Where the tutor has to be explicit as to what the issue is, this is likely to demonstrate a lack of understanding on the part of the candidate rather than a simple error, and full g should be recorded on the CRF.
- The tutor **should not** provide guidance if the candidate is thought to be a correct the issue without it, and a prompt would suffice. In other words, minimum support the candidate actually needs should be given, since the more tutor auidance provided, the less of the candidate's own performance is being demonstrated and therefore the larger the impact on the marks and Med.
- A tutor must not provide guidance that the candidate's work is so at the required standard or how to improve their work. In this way, candidaes are given the chance to identify and correct any errors on their own, providing vidence of knowledge and skills that will be credited during making
- The tutor **must not** produce any templates, protomas, work logs etc unless instructed to in the assignment guidance. Where Distructed to do so, these materials must be produced as specified and contain no additional guidance. Templates provided as part of the assignment should be used as provided, and not adapted.

All specific prompts and details of the nature of any further guidance must be recorded on the relevant form and reviewed during arking and moderation.

### Guidance on marking

Please refer to the Technical qualifications – marking, and - moderation centre guidance documents for further information on gathering evidence suitable for marking and moderation, and on using the marking grid and forms.

		Bottom of band	Bottom of band	Bottom of band
		There is some evidence of the candidate using their knowledge, understanding and skills to make straightforward links between limited topics across the qualification. Little evidence of them using their knowledge and understanding to inform practical activities. <b>Top of band:</b> The candidate shows evidence of using their knowledge, understanding and skills to make key links between limited topics. Limited evidence of them using their knowledge and understanding to inform practical activities.	The candidate consistently brings together their knowledge, understanding and skills with basic analysis, problem solving, and reflection on animal management. Candidate makes key links between a range of topics across the qualification and uses these links to inform practical activities. <b>Top of band:</b> The candidate consistently brings together their knowledge, understanding and skills with sound analysis, problem solving and clear reflection on animal management. Candidate makes key links between a wide range of topics across the qualification and uses these links to inform practical activities.	The candidate coherently brings together knowledge, understanding and skills to solve problems across the qualification, including good reflection and evaluation on animal management. Candidate uses theory and skills effectively to achieve tasks and understands the context in which the tasks are undertaken. Candidates can solve problems independently. <b>Top of band:</b> The candidate demonstrates a holistic understanding across tasks. Uses a wide range of sources and shows in-depth knowledge, understanding and skills to propose industry appropriate solutions to problems faced. Candidate reflects and evaluates on both animal management and own practice to identify areas for improvement.

%	Assessment Objective	Band 1 descriptor	Band 2 descriptor	Band 3 descriptor			
		Poor to limited	Fair to good	Strong to excellent			
10	<ul> <li>AO5 Attending to detail/ perfecting</li> <li>Does the candidate routinely check on quality, finish etc and attend to imperfections/ omissions?</li> <li>How much is accuracy a result of persistent care and attention (eg measure twice cut once)?</li> <li>Would you describe the candidate as a perfectionist and wholly engaged in the subject?</li> </ul>	(1-2 marks) Easily distracted or lack of checking. Insufficiently concerned by poor result; little attempt to improve. Gives up too early; focus may be on completion rather than quality of outcome. Careless, imprecise, flawed, uncaring, unfocussed, unobservant, unmotivated.	(3-4 marks) Aims for satisfactory result but may not persist beyond this. Uses feedback methods but perhaps not fully or consistently. Variable/intermittent attention, reasonably conscientious, some imperfections, unremarkable.	(5-6 marks) Alert, focussed on task. Attentive and persistently pursuing excellence. Using feedback to identify problem for correction. Noticing, checking, persistent, perfecting, refining, accurate, focus on quality, precision, refinement, faultless, meticulous.			
		improvements, contingencies cor	<i>Examples of attending to detail:</i> Thorough planning, justification and suggestions of areas for improvements, contingencies considered and implemented, links between husbandry, animal welfare needs and behaviour, equipment checks and safe storage.				
		There is limited attention to detail. Evidence provided shows inaccuracies or gaps in assessment tasks. Quality of work mostly meets industry standards.	There is consistent attention to detail across all tasks. Evidence provided is accurate and related to specific tasks. Quality of work meets industry standards.	The candidate is highly focused on all tasks, showing great care and attention to detail. Candidate utilises feedback to improve own performance and to achieve excellence. Tasks ar always completed to a high level industry standard and timescales.
