Dear Susie

City & Guilds Level 3 Advanced Technical Extended Diploma in Animal Management (Applied Science) (1080)

Seaham Vets is a small animal veterinary practice which employs 9 staff. We are predominantly a first opinion practice covering all aspects of veterinary care and welfare. Our practice offers clients a wide range of services including surgery, radiography, laboratory and specialist services including orthopaedics and acupuncture.

We feel that this qualification is suitable for young people aged between 16 and 19 and could give them an advantage when applying for a job. The qualification contains a good mix of animal care and husbandry skills, plus some science-based units that would enable a young person to progress into employment in job roles such as a Lab technician, Animal husbandry technician or Veterinary practice lab assistant.

The skills and knowledge in the qualification that we would be looking for include:

Animal handling and restraint skills  
Routine care skills – preparing, maintaining and cleaning animal accommodation, feeding and watering, health care, welfare requirements  
Knowledge of animal behaviour  
Animal breeds and breeding  
Undertaking a range of lab techniques  
Ability to record information and data

We confirm that we consent to our name and logo to be publicly available on the City & Guilds website.

Yours sincerely

Natalie Land  
Director
