Level 2 Diploma in process technology (600/0820/9)

OVERVIEW

What does this qualification cover?

This qualification covers the basic knowledge required to work in chemical/metal/oil technician roles within chemical/metal/oil processing. There are separate pathways covering oil production, metal production and chemical production processes and there is a variety of units covering the basic principles involved producing materials for these industries. Basic mathematical and laboratory techniques are also covered within this qualification.

All learners will take a mixture of mandatory and optional units depending on their technician role within the above industries.

This is a Framework qualification.

Who could take this qualification?

This qualification is suitable for if you wish to pursue a career in technician roles within the chemical/metal/oil industries.

This qualification is if you are aged 16 years old or over. You do not need any previous qualifications to take this qualification, however an aptitude for maths and science/chemistry would be desirable.

WHAT COULD THIS QUALIFICATION LEAD TO?

This qualification could lead to jobs such as:

- Process operator
- Chemical Engineering Technician
- Chemical Plant Process Worker
- Engineering Maintenance Technician
- Oil and Gas Industry Technician

- Polymer Technician
- Pharmaceutical Technician

You could progress onto the 'Process Manufacturing' apprenticeships or the following qualifications:

- Level 3 Diploma in process technology (600/1066/6)

WHO SUPPORTS THIS QUALIFICATION?

This qualification is supported by:

Gen 2
Trafford College
Wirral Metropolitan College
